**Descriptors—**\*Administrative Policy, \*Comparative Analysis, Conference Reports, Decision Making, Educational Objectives, Educational Research, \*Higher Education, \*Management Systems, \*Pilot Projects, Questionnaires, Systems Approach

**Identifiers—**\*Sussex University

Initial objectives of this pilot study were to: define the effectiveness and structure of administration in institutions of higher education; explore and identify measures of administrative effectiveness and structure; test the practicability of such definitions and measures against on-going processes at Sussex University; direct, coordinate, and analyze the results of small comparative studies at various European institutions for higher education. Comparisons are made between the systems approach and the behavioral approach. The systems approach is concluded to offer a practicable and profitable methodology that can realize all of the project objectives. Proposals for future research are offered, utilizing a research team with administrative experience and a set of participating institutions, which would determine the comparative effectiveness of alternative administrative structures. The full-scale continuance of the pilot project is advocated. The package for such an application would contain sets of departmental, administrative, and student questionnaires, an information sheet, and a new set of contingency studies. It is concluded that the behavioral approach needs further work for effective application. (LBH)

**Design of the Preclass Instructional Package for Higher Education.**

Central Michigan Univ., Mount Pleasant. Inst. for Personal and Career Development.

Pub Date Aug 75

Note—20p.

Available from—The Institute for Personal and Career Development, Central Michigan University, Mt. Pleasant, Michigan

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Adult Students, Continuing Education Centers, Degree Requirements, \*Flexible Schedules, Graduate Students, \*Graduate Study, \*Higher Education, Instructional Innovation, \*Instructional Technology, Part Time Students, \*Performance Based Education, Performance Factors, Scheduling

The Institute for Personal and Career Development (IPCD) provides graduate level instruction in a number of disciplines to groups of individuals who might otherwise not be able to obtain a graduate education. IPCD attempts to provide an alternate program that meets the needs of these individuals by emphasizing controls which would promote more efficient instruction and learning. These include such controls as (1) the compressed schedule; (2) a mastery of prerequisites; (3) course content; (4) instructional strategies; and (5) evaluation. This document highlights the importance of and methods of achieving the mastery of prerequisites through a specially designed preclass instructional package based on the competency-based model of instruction. The package includes an introduction to the course, instructions to the student, a list of course prerequisites stated as performance objectives, performance objectives for the first unit, a study directory, exercises and problems for the unit, self-assessment test, subsequent units, and a list of classroom ac-

tivities stated as performance objectives. This package is intended to ensure the instructional effectiveness of the classroom sessions and the post class activities. (JMF)

**Results of the 1974 NACUBO Comparative Performance Study and Investment Questionnaire.** National Association of Coll. and Univ. Business Officers, Washington, D.C.

Pub Date [75]

Note—72p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**\*Comparative Analysis, \*Educational Economics, \*Educational Finance, \*Financial Support, \*Higher Education, Investment, Performance, Questionnaires, Trusts (Financial)

**Identifiers—**\*Endowment Funds

The 1974 Comparative Performance Study includes 150 endowment pools representing 136 institutions. The market value of the pools which provided information as of June 30, 1974, was 6.9 billion dollars. The study identifies endowment pools by code and indicates each pool's investment objective, approximate market value, the percentage in cash and short-term investments as of June 30, 1973, and June 30, 1974, the percentage in equities as of June 30, 1973, and June 30, 1974, fund characteristic and fund composition, and percentage in senior securities and miscellaneous assets as of June 30, 1973, and June 30, 1974. The investment objective coding used is (1) total return, (2) balanced, and (3) income oriented. (Author/JMF)

**Descriptors—**Budgets, Comparative Analysis, Educational Finance, \*Educational Quality, Enrollment Trends, Expenditures, Financial Policy, Financial Problems, Financial Support, \*Higher Education, Land Grant Universities, School Surveys, \*State Aid, State Universities

Whether or not there will be enough funds available to meet required expenditures has become an annual dilemma for most colleges and universities in recent years. This publication, based on a survey conducted among the 130 member institutions of the National Association of State Universities and Land-Grant Colleges (NASULGC), is an attempt to show the dimensions of the financial crisis besetting large public universities. The colleges and universities represented in this report together enrolled slightly more than 30 percent, or 3.1 million, of the 10.2 million students attending all higher education institutions in Fall, 1974. The questionnaire attempted to identify possible trouble areas. Analysis of the data is designed to show the effects of inflation and of continued enrollment increases on the financial resources of these universities. Special attention has been devoted to the growing problem of inadequate state appropriations. Economy measures being taken to help combat rising costs and other efforts to cope with crisis situations are emphasized. Implicit in every aspect of the financial crisis is the question of quality. This is evidenced by the major unmet needs as analyzed by the universities themselves. (Author/JMF)

**"Opening Up" Faculty Evaluation. Who Evaluates, How and Why.**

Southern Regional Education Board, Atlanta, Ga. Pub Date Sep 75

Note—8p.

Journal Cit—Regional Spotlight. News of Higher Education in the South; v10 n1 Sep 1975

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Advisory Committees, Alumni, \*College Faculty, Educational Administration, Educational Diagnosis, Effective Teaching, Evaluation, \*Faculty Evaluation, Faculty

Promotion, \*Higher Education, Questionnaires, \*Student Participation, Tenure

Because of the growing emphasis on tenure and faculty evaluation the Southern Regional Education Board conducted a survey of faculty evaluation procedures. Questionnaires received from 536 private and public institutions in a 14-state region illustrate the picture of who evaluates, how, and why. The survey showed that the department chairperson and the chief academic officer are those persons primarily responsible for evaluation. Others involved in the process at various institutions included high administrative officers, faculty committees, and students. Alumni, joint student faculty committees, or peers from other institutions are used very little in the evaluation process. The primary reason given for faculty evaluation was faculty development and improvement. Other reasons listed were to provide diagnostic information on teaching behavior and effectiveness, and to provide data on which to make decisions regarding reappointment, promotion and tenure. Evaluation is generally based on instruction, advising, administrative activities (e.g., serving on decision and policy-making committees), personal attributes, research, publications, activity in professional societies, public service, and civic activities. Should Higher Education Have a Role in Higher Education Policy?

Pub Date 6 Nov 75

Note—13p.; Paper presented at the Annual Meeting of the North Carolina Association of Colleges and Universities (Boone, North Carolina, November 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—College Role, Consultants, \*Cooperative Planning, \*Educational Legislation, \*Federal Legislation, Government Role, \*Higher Education, \*Policy Formation

Federal legislation and court decisions over the past two decades have exerted a pervasive influence on the whole fabric of higher education in America. Increasing restrictions have been placed on the qualities of freedom and diversity, which this nation has historically valued in its institutions of higher education. But there is also a heightened awareness of the enormous powers the people have entrusted to their government, and the potential and actual dangers of abuse of these powers. The persistent failure by the executive branch to consult the education community on matters which affect it, particularly in the development of regulations implementing Federal programs, is a cause of these problems and a reason for demanding broader participation in the decision making process. With such consultation, the college community would obtain a helpful understanding of the problems the regulations are intended to address and program officials would obtain an early warning of possible difficulties that might arise in administering the regulations. Profiles of Hofstra Prospective Applicants at Various Points in the Admissions Process. Report No. 112.

Hofstra Univ., Hempstead, N.Y. Center for the Study of Higher Education.

Report No—R-112

Pub Date Oct 75

Note—30p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
Descriptors—\*Admission (School), \*Enrollment Influences, \*Higher Education, Recruitment, Statistics, \*Student Application, \*Student Characteristics, Student Placement

Identifiers—\*Hofstra University, Student Descriptive Questionnaire

For the past two years Hofstra has participated in the College Entrance Examination Board's (CEEB) Admissions Testing Programs (ATP). Through this program, Hofstra has received summary statistics on the students who have requested that their SAT scores be sent to Hofstra, those who apply, and enrolled students. Normative data are also included for prospective applicants to all colleges and to other four-year private colleges to provide a perspective for determining unique characteristics of Hofstra prospective applicants. The profiles are based on responses to the Student Descriptive Questionnaire (SDQ), which provides information concerning student interests, backgrounds, activities, and educational plans. The main questions asked in this document have to do with the characteristics of: prospective applicants as compared to those of other four-year colleges and to other colleges in general; the accepted applications as compared to the enrolled; the enrolled as compared to the no-shows; and Hofstra applicants who requested financial aid as compared to the total group. In addition, each subgroup's profile can be compared with each other and all groups can be compared over time. These data provide much information that can be used for admissions criteria, financial aid policies, plans for academic programs, and particularly for recruitment purposes. (Author/KE)

Descriptors—\*College Freshmen, Comparative Analysis, \*Demography, \*Higher Education, National Norms, Questionnaires, Sex Differences, \*Student Attitudes, \*Student Characteristics, Tables (Data)

Identifiers—\*University of South Carolina

During the 1974 fall orientation, a questionnaire was administered to approximately 65 percent of the entering freshmen class at the University of South Carolina (USC). A total of 364 other institutions of higher education, including 44 universities, also participated in this continuing national study of higher education. This document presents a comparative analysis of various demographic data, opinions, and projections of the entering freshmen at USC. USC entering freshmen were compared as a whole to the national norms; they were also compared by the colleges in which they were enrolled. Sex differences were reported where they appeared to be important. Eleven areas of interest were selected for this analysis from the original 52 areas contained in the questionnaire. The eleven areas selected to provide a composite profile of the entering freshmen were: (1) age; (2) racial background; (3) average grade in high school; (4) highest degree planned anywhere; (5) reasons noted as important for selecting the college; (6) estimated parental income; (7) probable major field of study; (8) current religious preference; (9) political orientation; (10) "students estimate chances are very good that they will"; (11) residence planning during fall term. Results showed that the U.S.C. entering freshmen as compared with others, generally achieved lower in high school; academic reputation of U.S.C. was of less importance in selecting school; were more likely to be Black less confident academically; more likely to be Protestant; and more likely to live at home than in a college dormitory. Document Not Available from EDRS

Descriptors—\*Financial Support, \*Higher Education, \*Human Services, \*Negro Colleges, Questionnaires, \*Research and Development Centers, Research Projects, Statewide Planning, Tables (Data)

This fact finding project (1971-72) accumulated information upon which Social and Rehabilitation Service (SRS) could begin reversing its tendency to fund white rather than black institutions of higher learning as training and research centers. The purpose was to suggest where and how, among black institutions, future funds might best be allocated. This was to be a feasibility study; it would recommend mechanisms of action but not choose locations or membership for particular centers. Data were collected by mail questionnaires sent to administrators and faculty of black colleges and universities, by interviews conducted in 54 schools and from institutional publications. It was concluded that establishment of research and learning centers in black schools is feasible and that, in general, implementation should be through statewide clusters of schools. (Author)

This document, part of a five-volume set, summarizes the major results of a survey of FY 1973 Department of Health, Education, and Welfare obligations to institutions of higher education and other nonprofit organizations. The companion volumes contain data in tabular form covering Department support to: (1) institutions of higher education; (2) health professional schools, (3) nonprofit hospitals, and (4) other nonprofit organizations such as research institutes, operating foundations, and R & D centers. This summary volume highlights Department support in terms of specific types of science activities, fields of science, geographic and institution distribution of funds, and source of funds by constituent agency. Scientific Research, Surveys, Tables (Data), \*Universities

This document on Department of Health, Education, and Welfare obligations to institutions of higher education provides a detailed report on funds obligated during Fiscal Year 1973 to institutions of higher education by constituent agencies of the DHEW. The tables present data three ways for each DHEW agency: (1) alphabetically by census region, state, and institution; (2) by descending order of rank according to the amount obligated to each institution; and (3) type of obligation. Guidelines were developed to provide a meaningful perspective of DHEW support for a wide range of activities related to science, health and education performed in institutions of higher education. Pub Date Sep 75

Note—6p.  
EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Collective Bargaining, Colleges, \*Conflict Resolution, \*Decision Making, \*Grievance Procedures, \*Higher Education

This document summarizes some of the major findings and basic conclusions of a study conducted during the 1973-75 period, the goal of which was to assess the impact of collective bargaining on conflict resolution practices in higher education. The population of institutions operating under collectively negotiated contracts with faculty in September 1973 was matched with a corresponding sample of colleges (for size, level of degree offering, type of control and region of the country) not then operating under negotiated contracts. Both groups were subsequently surveyed to establish: (1) the nature of formal mechanisms used for resolving faculty conflict; and (2) the extent to which these procedures had been used. The most general conclusion reached is that more universalistic and secular principles of conflict resolution are replacing the older more informal norms based on the traditions and values of a shared concept of academic life. Greater and greater emphasis on procedural protection appears in general to be supplanting the mechanisms on consensus, trust, and shared authority as the accepted mode of dispute resolution. On January 25, 1973 the Board of Trustees and the Faculty Federation of Southeastern Massachusetts University ratified what each party considered to be a unique and broadly optimistic collective bargaining agreement. The agreement was germinated as the progeny of two strongly shared beliefs: (1) in the need to create a system for the development of a participatory democracy within the academic processes of the University; and (2) that the academic processes of the University could be structured through collective bargaining to most effectively achieve such a system. In attempting to structure the university's decision-making processes, responsibility and authority have been given credence through accountability. This is in keeping with all good administrative practices and applicable to all forms of institutions and offices. However, it has not always been rigorously applied within the academy. Southeastern Massachusetts University has learned through experience that a well conceived and well structured collective bargaining agreement is not a panacea for curing the ills of colleges and universities, but it has also learned that such an agreement can go a long way toward making them healthy, functional, and effective. Attitudes concerning faculty unionization have an impact on its rejection or acceptance and its subsequent implementation. This study was conducted to determine the level of agreement among faculty, student services staff, and students

before major collective bargaining activities, such as a run-off election, take place. Assessed are attitudes held by faculty, students who are active and assumedly concerned with the welfare and the dynamics of the University, and staff members under the Office of Student Services toward aspects of collective bargaining at the Ohio State University, Columbia campus. Findings point out a variety of areas, such as fringe benefits, working conditions, and student participation that have the potential to become areas of conflict. In the event of collective bargaining at Ohio State, the question whether decisions will be made in the distributive model as a result of power, coercion, and formalization, or in the integrative model as a result of trust, reason, and shared goals will be partly dependent upon a change in the attitudes of the parties involved. Those parties must understand that they are not simply interest groups but that they constitute the University and share a variety of common goals and interests. (Author/KE)

College and university faculties and students often dislike being reminded that the organization of which they are a part is an economic enterprise. Yet, each individual college and university is an economic entity, substantially concerned with obtaining and utilizing economic resources. In the process of getting and spending, colleges and universities have a choice: to behave as an economic endeavor producing and selling services or to behave as a body politic obtaining resources from taxation and philanthropy and distributing these resources as some particular power structure may determine. Related issues are: (1) allocation mechanisms in the economy; (2) allocation in higher education; (3) sharing authority for resource allocation; (4) program planning and budgeting; (5) the university and the marketing-price mechanism; (6) the college and the marketing-price mechanism; (7) expenditure-income analysis and decision making; (8) criticisms of the market-price mechanism; and (9) the challenge of allocation decisions. Descriptors—Clinical Experience, Educational Objectives, \*Federal Programs, Graduate Study, \*Higher Education, \*Medical Education, \*Medical Schools, Models, Statistical Analysis, Teacher Attitudes, \*Teacher Participation

This document attempts to quantify the objectives of various Federal programs of support to medical schools and to examine the extent to which these objectives have been met. It utilizes a multivariate regression model to investigate variations among the characteristics of 50 medical schools in 1972 associated with high and low faculty participation in federal programs. It presents four factors as possible participation rates in National Institutes of Health (NIH) training grants and in other federal programs: (1) propensity of the medical school to produce graduates later employed in academic medicine; (2) experience of the faculty with respect to previous participation in federal programs; (3) emphasis on graduate training in the basic sciences; and (4) clinical orientation of the medical school. Utilizing nine variables to describe the four pre-

dictors, a model was devised that predicts faculty participation rates in the NIH training grant programs among the medical schools. Using the same variables, a similar model was developed to predict participation in other federal programs, primarily NIH research programs. (Author/KE)

Descriptors—Delivery Systems, Educational Objectives, \*External Degree Programs, Faculty, \*Guides, \*Higher Education, \*Instructional Innovation, \*Program Development, Program Evaluation, Program Planning, Student Needs, Student Personnel Services

A framework is needed to follow in implementing external degree programs. External degree programs meet the needs of individuals who cannot meet the time and space commitments of regular on-campus college classes. They differ from correspondence courses in the delivery system, student support services, and credibility of the learning experience. But in order to reach the needs of the diverse population, innovative methods of higher educational instruction and assessment need to be developed. Interested individuals need to seek the assistance of programs that have been in existence. In this way, new programs will be able to apply the experiences of other programs to their surroundings. The result will be more widespread initial support, and an emphasis on effective planning, and deemphasis on problem solving. (Author/KE)

The thesis of this document is that arbitrary social rules must be eliminated. Chapters cover: (1) what it is like to be a student whose personal activities are controlled; (2) the necessity of environmental freedom as a prerequisite to successful educational reform; (3) the question of environmental control; (4) the legal history of environmental control, and a presentation of the current status of the courts with regard to student freedom; (5) the tactics a student might employ in eliminating a certain social rule; (6) ways to make the college environment into a place where interpersonal contact is open and rewarding; (7) articles, statements, and case studies dealing with

women's hours, intersession, and dress regulations. (Author/KE)

One of the youngest of the professions belonging to higher education is institutional research. But younger still has been the incursion of institutional research onto the campuses of predominantly black institutions. This group of papers attempts to lend a truer perspective to the burgeoning institutional research function at predominantly black institutions. The papers cover: (1) a poll conducted among institutional researchers at predominantly black colleges and universities; (2) the origin of institutional research in North Carolina at public-supported institutions, the sameness which marks the institutional research function at both black and white campuses, the necessity to relate research at black institutions to black students; (3) the need for a total information gathering and reporting system, the role an office of institutional research should play as a part of the total information and reporting system, institutional benefits as whole or partial derivatives of an office of institutional research; (4) assessment of student attitudes as measured by College Student Questionnaires data; and (5) an analysis of the sex, socioeconomic status, educational background, and concern for grades of North Carolina Central University students, and pairs these findings with the liberality of their political views. The Education Amendments Act of 1972 authorizes the Secretary of Health, Education, and Welfare to improve postsecondary education opportunities by providing assistance to educational institutions and agencies for a broad range of reforms and innovations. The Fund for the Improvement of Postsecondary Education was established for this purpose. It is a governmental grant-making organization. Its two general goals are diversity and cost-effectiveness, which will be achieved primarily through the encouragement of structural, learner-centered improvements throughout postsecondary education. To achieve these purposes, the fund administers several distinctive program competitions. Applicants are invited to submit proposals under the comprehensive program competition, the special-focus program, and the national projects competition. The National Project of Teaching strengthens and encourages individuals and institutions that have demonstrated a commitment to raising the importance of teaching within postsecondary education. Special guidelines and procedures have been established for applicants to the national projects with reference to the general criteria of significance, feasibility, extent of institutional commitment, and appropriateness to the fund. Descriptors—Field Interviews, \*Higher Education, \*Nonprofessional Personnel, \*Post Secondary Education, Process Education, Role Playing, \*Social Workers, \*Training Techniques

Identifiers—\*Kentucky

This document evaluates six three-week inservice training sessions provided for Kentucky public assistance workers. The training was conducted with 15 trainees participating in each session. Trainees were state employees who were employed to determine eligibility for food stamps, medical assistance, SSA unemployment insurance, etc. Their formal education was generally less than 2 years of college. The instructional objectives were to develop interviewing and counseling skills, understanding of human behavior, and appreciation of values held by different groups. Enrollees were first trained in discriminating among different qualities of responses that workers might make to clients' statements. They then practiced responding, first in writing and then orally, to client statements. A pre- and posttraining assessment of enrollees' communication skills was made by administering paper-and-pencil tests and by analyzing the content of role-playing interviews. The data suggested that the interviewing skills of the participants were considerably better at the end of training, but short-term training is not adequate to produce the level of interviewing skills possessed by effective counselors or therapists. Pre- and posttraining measures of the participants' values were also obtained. The data indicated that by the end of training the trainees were more accepting of the values desirable for professional social workers. Tables and appendixes of paper-and-pencil tests are included. **Developing and Evaluating a Training Manual for Social Work Field Instructors Using Elements of the Behavioristic System of Learning.**

Pub Date 1 Apr 75

Note—67p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Curriculum Development, Curriculum Guides, Field Experience Programs, \*Field Instruction, \*Higher Education, Learning Theories, \*Manuals, Performance Based Education, Program Evaluation, \*Social Work, \*Teaching Guides, Teaching Methods, Training Techniques

A major problem in social work field institution is that there is very little organized structure or order to field teaching. This document discusses the creation and evaluation of a training manual in performance-oriented field instruction that can be used as a tool for clinical faculty to develop an orderly and systematic progression of teaching. In developing the training manual, the behavioristic psychology of learning was utilized as a basis for developing a systems approach in which field instruction is conceptualized as a course for which content can be selected, behavioral objectives defined, learning activities planned, and student learning assessed. It was designed as a self-instructional guide for field teachers to use in operationalizing a systematic method of preparing instructional units for students and developing curriculum for field work. The first draft of the training guide was utilized and critiqued by three experts in methods of field teaching, then revised according to their recommendations. The revised guide was then evaluated and field tested by agency instructors. Participants' evaluations were extremely favorable. (Author/KE)

At a time when planning becomes more and more essential for American colleges and universities, precise and accurate information about them becomes critical. This document reports on some sophisticated statistical measurements of certain aspects of the supply and demand for students, places for them to attend college, and faculty members to teach them. Models are constructed to demonstrate the application of their procedures to the econometric analysis of: (1) the demand for freshman places by potential students as a function of costs of attendance, student family income, student academic ability, and other traits; (2) the relationship between student-faculty ratios and institutional characteristics; and (3) the stocks of educated persons, by age, sex, highest degree, and field of specialization. Presented to illustrate the use of qualitative models for policy making are: (1) alternative forecasts of the demand for new Ph.D.'s on college faculties; (2) estimates of human financial resources requirements of alternative programs to provide two years of college for everyone; and (3) estimates of the impact on higher education of significant compensatory education programs in primary and secondary schools. This analysis demonstrates not only that rather widely differing results can be obtained, but also that a number of different assumptions are quite plausible in attacking problems of estimating future developments in higher education. This document studies the changes in the total number of holders of bachelor's and more advanced degrees from 1930 to 1971 and provides detailed annual estimates of degree holders in 44 fields. Considered are four possible models that might explain the steady growth in the number of degrees awarded and the changes that occurred in their distribution by level and by field. Of these, the two most important and distinctive are the "technogenic" model, which interprets the aspiration for degrees as a response to the growth of the economy and its changing demands for various types of highly educated manpower, and the "sociogenic" model, which sees little relationship between changes in the labor market and aspirations for degrees either by level or by field, but rather tends to regard the steady increase in the demand for higher education as a manifestation of constantly increasing desires for upward social mobility. The "sociogenic" model also views the tendency of employers to upgrade their educational requirements, and the upward trend in the proportion of young people aspiring to higher degrees, as twin forces contributing to the phenomenon of "credentialism." Although no

decisive conclusion is arrived at, data does not seem to support the technogenic model. (Author/KE)

Identifiers—\*HR 3471

Congressman O'Hara, as chairman of the Subcommittee on Postsecondary Education, has presented a bill for student financial aid for higher education (H.R. 3471). The first question is how well do the provisions of the bill serve broader societal goals? After summarizing the bill and examining provisions and implications of the bill that affect the furtherance of equal access and a viable postsecondary educational system, the bill was found to do little in the way of furthering these goals and, in fact, it neutralizes some of the progress made by the Educational Amendments of 1972. H.R. 3471 offers nothing to encourage greater institutional diversity and in some instances it is positively harmful, discriminating against high-tuition schools and schools that price at cost. While it does include provision for protecting the student as consumer, this amounts to little more than recognition of the issue. Insofar as the bill enables more people to obtain some kind of postsecondary education, it promotes greater access; however, by using "the leverage of Federal student aid in such a way to encourage the creation and utilization of low-cost educational opportunities," the bill, in design and implementation, leads toward a kind of access that is neither equitable nor efficient. Descriptors—Colleges, Comparative Analysis, Costs, Data Analysis, \*Educational Economics, \*Higher Education, \*Liberal Arts, \*Private

Colleges, Residential Colleges, \*Student Personnel Services

Smaller residential colleges provide the highest degree of support, i.e., board, room, close student-faculty relationships, large financial aid, extensive cultural programs in music, drama, and athletics for student participation, and those other prerequisites that make the whole life at the small residential college a learning experience. Using data provided by the institutions and additional material obtained from numerous campus visits, this study identifies the support functions and their costs that fit into student, academic, and institutional support classification at five first-rate, independent liberal arts colleges. It provides a synoptical view of the academic year 1973-74. It is basically a fiscal analysis of costs of support operations. Detailed comparative analyses of this information provide the basis for the conclusions and suggestions for possible improvements in economy of operation. Suggestions are a reduction of cost in the following categories: academic administration and personnel development; financial aid for operating funds; physical plant; and community relations. Other possible methods are: a reduction of faculty; an increase in enrollment; and an increase in student financial aid from government sources. (Author/KE)

Identifiers—\*Air Force Reserve Officer Training Corps

This document describes (1) the development of effectiveness criteria for Air Force Reserve Officer Training Corps (AFROTC), and (2) relationships between the criteria and various environmental and program characteristics. Normative data are presented for selected criteria (enrollment, production, and unit costs) for each school year between 1966 and 1974. Multiple regression techniques were used to determine the extent to which criterion performance was attributable to characteristics of the host college and characteristics of the program. Predictive stability was examined across both institutions and time. Implications of the findings for evaluation of both current detachments and potential host sites are also discussed. (Author/KE)

Descriptors—\*Change Agents, Church Role, Curriculum Development, \*Faculty, \*Higher Education, Professional Education, \*Socialization, Student Teacher Relationship, Teacher Attitudes, Teacher Background, Teacher Influence, \*Theological Education

Why do people, who have charge of socialization processes, arrange them the way they do? This contrasts with the question typically asked: "What does the person being socialized have to do to succeed?" It shifts the focus of attention from children or students to parents or faculty. In this research the focus is on theological faculty. The sample consists of 269 faculty teaching at 15 theological schools. Fifteen of 33 schools were chosen and stratified by university affiliation and denomination. There were 389 full-time faculty at the rank of assistant professor or above who were the universe sampled. A representative sample of 269 (69 percent) were chosen as respondents. Research consisted of visiting each school for a week, interviewing faculty, talking informally with students, and researching the history of the

school in the library. Interviews focused on and covered these areas: personal background, major curricula shifts since 1960, students, faculty colleagues, career development, intellectual context, and future of the church. Findings and conclusions are: (1) the schools are more alike than different; (2) since there is no vision of theological education that commands widespread respect and authority, changes occurring in format, teaching technique, and student freedom are based on a system of trial and error; (3) schools are less than 3 percent female or black; and (4) theological language, in its traditional sense, is used very little. **Identifiers**—\*California, California State University System, University of California

Access to college for ethnic minorities and the poor remains very limited. Four times as many high school graduates from high-income families enter the University of California than do graduates of low-income families. The entrance rate to the State University and Colleges for high-income graduates is twice the rate for low-income graduates. An examination of the educational and work choices of 1,600 random graduates of 20 Los Angeles high schools revealed that only 4 percent and 9 percent of all black graduates enter UC and CSUC, respectively. The inequality of college opportunities largely results from the disproportionate numbers of low income graduates who are ineligible to enter the University of California or the State University and Colleges. Findings also indicate that UC entrance requirements that focus on high school performance in math and science courses discriminate against women graduates. Los Angeles high schools are greatly segregated, and entrance rates to private colleges and community colleges are surprisingly equal. Several steps to overcome inequities are: (1) expansion of student financial aid programs to further alleviate financial barriers to college; (2) expansion and improvement of outreach programs; and (3) greater flexibility in UC and CSUC admission requirements. **Descriptors**—\*Academic Records, Credentials, \*Higher Education, Information Dissemination, \*Information Services, Job Application, \*Special Services, Student Application, \*Student Records

**Identifiers**—\*Educational Passport

The Educational Passport is a service that is being developed at the Educational Testing Service for students or other individuals in order to facilitate their entry to school or college or employment. The Passport is an accumulative record that the individual prepares and owns and uses. At the Educational Testing Service, photographed documents supplied by the individual, and by institutions at the individual's request, and a wallet-sized piece of microfiche containing all the documents is produced. The individual receives his records along with the Passport, and ETS forwards copies of the Passport to institutions the individual designates. Once a passport has been prepared, the individual does not need to gather all his records together each time he wishes to present his credentials. Consequently, much work is eliminated for all concerned. Passports can be brought up to date easily whenever the individual so requests. (Author/KE)

The National Endowment for the Humanities is an independent federal agency whose principal function is to encourage the understanding and use of the humanities to national concerns. It serves its various constituencies by supporting the work of individual humanists and of nonprofit institutions and organizations engaged in projects involving the humanities. Unlike some federal agencies, the National Endowment for the Humanities does not provide funds of a "formula" or "program" nature to sustain ongoing institutional or individual activities. Its grants are awarded competitively and on individual merit following a careful review process. Four major divisions administer most of its programs: (1) Public Programs Division, (2) Division of Education Programs, (3) Fellowship Division, and (4) Research Grants Division. There is also a Youthgrants in the Humanities program. Applicants should submit a proposal to appropriate division. (Author/KE)

**Descriptors**—Academic Standards, Accreditation (Institutions), Certification, \*Evaluation Criteria, Evaluation Methods, Federal Aid, Federal Legislation, \*Federal Programs, \*Higher Education, \*Institutions, Organizations (Groups), \*Program Descriptions

The Office of Education's system for determining institutional eligibility for access to Federal funds derives from a series of 13 specific statutory mandates. It uses HEGIS (Higher Education General Information Survey form #2300-1), that provides basic institutional characteristics information, which together with catalogs and other materials, provide information to help make initial eligibility decisions. Educational institutions may establish eligibility to apply for participation in the Federal financial aid programs by meeting the pertinent statutory requirements. Institutional eligibility is subject to termination whenever an institution is found not to be in compliance with one of the eligibility elements. Twenty-nine different agencies and audiences are known to utilize eligibility determinations and assessments made by the Office of Education. Although the Office of Education stresses that institutional eligibility for Federal funding does not insure quality education, the consumer and the taxpayer appear to assume that the institutions which the Government has deemed eligible for Federal assistance have been appropriately evaluated and meet at least minimum levels of operational performance and quality. **Identifiers**—\*Nursing Training Act 1975

The Nursing training Act of 1975 revises and extends the nursing training authorities provided under Title VIII of the Public Health Service Act for a three-year period, thus providing aid to nursing training through September 30, 1978. It provides two new, separate authorities for the support of Advanced Nursing Training and

Nursing Practitioner programs. Institutional aid is continued through Construction Assistance, Capitation Grants, and Financial Distress authorities. Start-Up Grants for nursing training programs and grants and contracts for Full Utilization of Educational Talent for Nursing are repealed. Support for the latter purpose is continued, but it is now consolidated with the other purposes under Special Project Assistance. Continuation of student support is again authorized through the Nursing Student Loan and Scholarship programs and the Professional Nursing Traineeship program. Programs under this legislation are administered by the Division of Nursing, except for the Student Loans and Scholarships which are administered by the Office of Student Assistance, Bureau of Health Manpower. This document reviews the highlights of these new and amended provisions. (Author/KE)

Financial aid is available to help students meet postsecondary education costs. It comes in a variety of forms. It may take the form of a grant, a loan, or a job. Colleges very commonly employ a combination of these forms, called "packages," tailored to fit each student's resources and requirements. This booklet can help you learn whether you are eligible for financial aid. You will find out how to estimate education expenses and how to figure the amount you and your parents might be expected to contribute toward these costs and how much you will require from other sources. Sections cover: (1) making a student budget; (2) estimating what parents may be asked to pay; (3) Will you need financial aid?; (4) Where does aid come from?; and (5) applying for aid. Tables provide hypothetical examples. (Author/KE)

Using the expertise of faculty members of various departments, the University of Texas at Austin has initiated a four-year, two million dol-

lar project, called C-BE, to examine the capacity of computer-assisted instruction (CIA) to improve teaching in the sciences and in engineering. The computer can assist the instructor by doing grading, bookkeeping, experiment monitoring, basic instruction, simulations, and data processing. When the instructor supplies a list of behavioral objectives, achievement measurement standards, and technical limitations, the systems analyst can then design the computer materials necessary to meet the instructor's requirements. The goals of Project C-BE are to quantitatively demonstrate the effect of CAI on the effectiveness of college teaching and to examine the relative costs. The computerized courses that are being designed could potentially be shared with other institutions. (EMH)

**Identifiers**—Computer Based Quizzing System, Proctorial System of Instruction, Project C BE University of Texas Austin

The proctorial system of instruction requires the administration of frequent quizzes that measure the student's readiness to proceed to the next unit of instruction. With the support of Project C-BE, a computer program was written which permits students to take quizzes using on-line conversational commands, or to answer the questions at another location and return to the computer terminal at a later time. The system allows the proctor to accommodate twice as many quiz takers, and it provides him with more release time for tutoring students. Students have been receptive to the use of the system. This document details the features of the system, describes the computer files and it provides sample routines used by the quiz takers. (EMH)

tional Programs, \*Instructional Design, \*Instructional Systems, Models, Program Evaluation, Systems Analysis, \*Systems Approach, Systems Concepts, Systems Development

**Identifiers**—\*Project C BE, SCRAPE

Using effectiveness, efficiency, self-sustenance, and communicability as criteria, a conceptual model, called SCRAPE, was developed at the University of Texas to systematically describe educational behaviors. The key elements of the system are: (1) diagnosis and prescription, (2) instructional events, (3) achievement evaluation, and (4) consequent activities. Within each of these elements, behaviors can be classified as either input processing, recording, monitoring, or output. Having outlined a course in this fashion, an instructor could then use the assistance of an instructional engineer to determine which teaching processes should be human and which should substitute technology; the engineer could then take the responsibility to design the nonhuman elements of the educational system. This report offers a paradigm for developing educational systems, and it includes detailed examples of the variables that could effect each element of the system. (EMH)

**Identifiers**—Project C BE

An experimental course in introductory organic chemistry at the University of Texas at Austin made use of the computer for drill and routine instruction. Lecturing time was reduced, and computer lessons were made part of the required coursework. This experimental situation was planned on the basis of results from previous experiments using computer-assisted instruction (CAI) in chemistry courses. Evaluation of student performance showed equivalence or improvement using the experimental approach compared to the traditional course. Student attitude surveys revealed support for the individual, self-paced, tutorial approach. Perceived disadvantages included time needed to complete computer-based lessons and difficulties with the computer system hardware. (CH)

**Identifiers**—\*OMNITAB, Project C BE  
 OMNITAB is an interpretive computing system that enables the nonprogrammer to use a computer to perform calculations and manipulations on tabulated data without prior knowledge of computers and computer languages. Because OMNITAB is widely available, and can be used to perform a variety of operations, instructors selected it for use in a statistics laboratory. Psychology students enrolled in a statistics course used the computer laboratory section to perform computational exercises. The objectives of this laboratory program were to overcome the typical student's fear or dislike of handling numbers, to avoid the boredom associated with mechanical operations in statistics, to motivate the student, and to introduce the student to the computation center. Developed by the National Bureau of Standards, OMNITAB is a simplified computer language designed to permit the novice user to solve basic statistical functions after less than an hour of instruction. It was hoped that by providing students in introductory statistics courses with an easily understood computer language, fears of number operations would be allayed, and excitement and interest would be generated. OMNITAB can arrange data and do calculations using only a simple list of English language commands and the subsequent numbers. The program provides for immediate corrections of errant commands, and it performs such operations as matrices, linear models, regression, and analysis of variance. Students at the University of Texas easily mastered these basic operations. (EMH)

Realizing that each student has his own optimal learning environment and that the computer is a valuable tool in individualizing instruction, instructors at the University of Texas at Austin designed a chemistry course using the latest computer technology to assist the instructor and to maximize student achievement. The course consisted of lectures, textbook activities, and exams; for those students that showed weaknesses on the exams, remedial computer modules were available. The course was offered twice and results showed a positive effect on both student achievement and student attitudes. A list of computer modules, sample student-computer interactions, grade distribution data, and cost information are included. (EMH)

Engineering design is a complex cognitive skill differing from possession of knowledge in tactical use of knowledge to achieve goals under constraints. An operational definition of a design must satisfy a set of constraints and objectives. Several published theories about the design process in terms of the criteria developed leads to the elaboration of hypothetical model of design behavior. The assumed model of design behavior

predicts that the design behavior can be determined by measuring the information interchange between the designer and his environment. The use of real-time interactive graphic methods is an educational environment and is discussed in terms of the expected advantages and disadvantages of the approach. (Author)

As computer technology becomes more sophisticated and as its application as an instructional tool increases, there is an increasing need to establish a central reservoir of computer resources and to organize a formal exchange procedure for computer hardware and software. Through Project C-BE at the University of Texas at Austin, a bilingual workshop was organized to test the concept of transferability of university-level, computer-based undergraduate teaching packages. Three days were spent in discussions of computer-assisted instruction, computer hardware, the design of instructional packages, and various programming languages. On line demonstrations were used to illustrate the concepts and topics discussed. The appendixes show information about conference attendance, equipment used, technical problems, and participant evaluations. (EMH)

**Identifiers**—\*Project C BE

Attempting to define the optimal use of educational resources for large numbers of students, a research group at the University of Texas at Austin has adopted a system approach to curriculum development consisting of the following components: content, teacher, student, machine, and media. The first procedural step in the system is to define the objectives and tasks of the course in terms of related sets of behavioral objectives. Then, using information about teaching style, learning style, and available resources, a complete multimedia course can be designed that is tailored to the individual needs of the student. In one chemistry course, the technique was used to generate remedial modules to assist the student having difficulties with exam questions. Results indicate that computer based techniques relieve the burden on the instructor, and they have a positive effect on student achievement and attitudes. The appendixes include the flow diagram for the system design, a list of the tutorial modules used in the chemistry course, and cost data. (EMH)

The author has developed a model for transferring and implementing educational innovations from one institution to another. The model consists of an organized set of variables whose precedence relationships were determined by statistical analysis of collected data. A questionnaire was sent to a sample of prospective consumers of educational technology. Using their responses to the questionnaire, several forms of multivariate statistical analysis were used to determine which factors were important to consumers. These factors were then used for the design of a data collection form for innovation developers, and the foundation for the design of a data management system. (Author/CH)

**Identifiers**—Rocky Mountain Region, \*Satellite Technology Demonstration

The Satellite Technology Demonstration (STD) represented a cooperative and complex effort involving federal, regional, state and local interests and demonstrated the feasibility of media distribution by communication satellite of social services for rural audiences. As part of a comprehensive evaluation plan, the summative data base was augmented with subjective interpretive information derived from three case studies. The case studies conducted as part of the STD data collection activities were expected to produce four major benefits: (1) insights which would help in refining and modifying the data for summative purposes; (2) insights into the sequences of events and motivations occurring at sites; (3) information to amplify and clarify the interpretation of other statistical data received from all sites; and (4) validation of statistical information derived from site visitation serving as a data check for the large quantities of information collected from STD sites. The data collected from the case studies were largely subjective and response to various treatments at the sites varied at both extremes, depending on the methods used and the influence of the local staff. It was concluded that extensive data collection efforts were endured and supported probably because the STD was perceived as having an experimental base. Recommendations for future research was included. (Author/HB)

## Identifiers—Mohican Youth Camp, Ohio

A librarian's view of the Mohican Youth Camp (MYC) and the Ohio penal system for youthful offenders provides information about these institutions and their library services. The report first describes existing treatment and institutions and gives the author's opinions as to how to make constructive changes in both public attitudes and the system, of which he is highly critical. The counter-productiveness of the mass conformity imposed on the boys in the camp is emphasized. There follows a discussion of libraries in such institutions, the narrow, protected places they often are and the open, idea-producing places they ought to be. The author describes his attempts to give the library a real, rather than institutional, atmosphere and to engage the boys' enthusiasm by making them participants in the library with projects that ranged from cleaning windows to selecting books and music criticism. He concludes, however, that since the library is part of a controlling institution, it cannot perform its major function—teaching the boys to take control of their lives. (LS)

Construction and remodeling of libraries should insure that the resulting building be functionally efficient and that it provide an attractive environment for the library user. Providing a list of objectives, space estimations, schematic use diagrams, and a description of the desired atmosphere can assist the architect in designing a building that pleases the library staff as well as the community of library users. This document is a collection of brief essays that address the issue of library design. (EMH)

Identifiers—Minicomputers

With the stated purpose of describing and appraising information science developments and trends during the past year, the 1975 Annual Review provides articles in the areas of planning, techniques and tools, and applications. National planning is reviewed for selected countries, and planning, development, and testing of new information systems are discussed in relation to appraisal of existing systems and components. Bibliographic standards, minicomputer use in libraries, and developments in communications technology are the techniques and tools discussed in this issue. The applications covered include: (1) international activities in library automation, especially Universal Bibliographic Control; (2) generation and use of machine-readable data bases; (3) computer technology in the publishing industry; and (4) the role of international organizations in cooperative information processing and transfer. Two special topics are treated in the final chapters: judicial and legislative developments in the copyright area and the use of technology in the communication process. (LS)

Identifiers—Japan, \*US Japan Science Film Exchange Project

One hundred and eighty Japanese 16mm motion pictures, 8mm cartridges, and video tapes produced and judged appropriate for a variety of audience levels are listed in alphabetical order by title with descriptive and evaluative information. A subject heading list and a subject index to the film titles are included, as well as a sample of the evaluation form used, a list of the evaluation specialists, and a list of the evaluation sites. Among the 19 subject areas listed are: archeology, microbiology, oceanography, astronomy, and ornithology. Evaluation was based on content, audience suitability, structure, picture, sound, and photo technique. The film were identified as part of the U.S.-Japan Science Film Exchange Project. (Author/DS)

Descriptors—Aptitude Tests, \*Bibliographies, Computer Assisted Instruction, \*Educational Research, Educational Technology, Experimental Psychology, Individual Differences, \*Instructional Design, Instructional Technology, \*Learning Theories, Psychological Studies, Psychology

Identifiers—\*Aptitude Treatment Interaction, Communications Research

Fifty-eight books, monographs, and dissertations and 116 articles and papers published between 1953 and 1975 are listed in this bibliography of information about aptitude-treatment interactions (ATI). The emphasis is on research and development of theoretical models, but many sources deal with application of ATI theory to actual teaching and learning situations. Materials are categorized by type of publication and then subdivided by content areas: methodology, application of the ATI approach, ATI research reports, reviews of ATI research studies, and critiques of the ATI approach. This bibliography is intended to be most useful to the educational

researcher and educational psychologist. It should also be helpful to the communications researcher, the learning theorist, the instructional designer, and the classroom teacher. (CH)

Identifiers—\*California, California Library Authority for Systems Services, CLASS

In June 1975, 100 participants spent a week considering the future of California's libraries. Library trustees, Friends, concerned citizens, and librarians from all types of libraries heard talks by state and local government officials, social planners, and eminent librarians. Topics discussed included library planning, librarianship in general, new technology, libraries and local government, library program funding, interlibrary loans and cooperative programs, urban and rural libraries, library systems, library legislation, and the California Library Authority for Systems and Services (CLASS). Several presentations were also made concerning the Peat, Marwick, Mitchell and Company (PMM) report "California Public Library Systems: A Comprehensive Review with Guidelines for the Next Decade." A midweek opinion poll showed support for the PMM report in the areas of transaction-based interlibrary loan funding formulas, funding the program, and equal access to libraries, but the participants preferred resource sharing based on existing library structures and a statewide on-line union catalog rather than the structure suggested by PMM. Small study groups considered the report and other aspects of California's library future and produced programs for structuring and funding interlibrary activities. Recommendations were then developed for a new legislative program. (LS)

Descriptors—Behavior Change, \*Change Agents, \*Change Strategies, \*Communication (Thought Transfer), Communication Skills, \*Information Needs, Institutes (Training Programs), Librarians, Library Education, Library Planning, Program Evaluation, \*Public Libraries, Role Playing

An institute designed to prepare 25 public librarians (from Alaska, Idaho, Montana, Oregon, and Washington) for roles as change agents was held in the state of Washington in February 1975. The institute was organized around experiential exercises designed to teach librarians to observe and diagnose communication situations and to use various communications tactics. Participants also learned about communication and change processes from the behavioral sciences, and were exposed to the general topics of perception, language, meaning, development of understanding, conflict resolution, consensus achievement, communications relationships, implementing change, and planning for change in public libraries. Finally, the participants were given tools for

teaching what they had learned when they returned to their communities. Outside evaluators prepared two narrative evaluations of the institute, and quantitative evaluations were made at the midpoint and end of the institute by administering questionnaires to participants. All were generally favorable. Appendixes contain institute documents, letters, and brochures, as well as a biographic information about the participants. (LS)

**Identifiers—**Library Services and Construction Act, Multitype Library Cooperation, \*South Carolina

Goals and objectives for library services, 1975-1980, are presented by the South Carolina Advisory Council on Libraries as a supplement to the original South Carolina State Program for Library Development, 1972-1977. Goals for the state library are in the areas of financial support, reference and interlibrary loan service, centralized programs, consultant services, services to state government, library planning, and current national and state concerns. For public library service, goals are described for personnel standards, administration, and training; extension services to those in rural areas, and to the disadvantaged, and aged and homebound, and those of limited English-speaking ability; county services; metropolitan library services; and facilities. Standards, institutional support, consultant service, personnel, materials, service to professional staff, and special programs are discussed in relation to institutional library goals. Service to the blind and physically handicapped, interlibrary cooperation, area reference resource centers, public relations, a microfilm catalog shelflist, federal documents depository, ERIC, the interlibrary loan code, and intertype library cooperation are also covered. A final chapter contains an assessment of need for and feasibility of library service for those with limited English speaking ability. (LS)

**Descriptors—**Academic Freedom, \*Academic Rank (Professional), \*College Libraries, Contracts, Faculty Evaluation, Grievance Procedures, \*Librarians, Library Administration, Library Research, \*Professional Recognition, Standards, Status, Tenure, \*University Libraries

The basic documents on faculty status for librarians in colleges and universities are compiled. The first chapter contains a history and overview of university librarians' status and discussions of such topics as professionalism, the librarian's role, tenure, academic freedom, evaluation, titles and ranks, professional growth, research, and administration. Subsequent chapters contain the Association of College and Research Libraries' (ACRL) 1971 "Standards for Faculty Status;" the 1972 "Joint Statement on Faculty Status" by ACRL, the American Association of University Professors, and the Association of American Colleges; and the ACRL's 1974 "Model Statement of Criteria and Procedures for Appointment, Promotion, and Tenure for College and University Librarians." The "Model Statement" contains a description of a model contract,

procedures for termination and dismissal, and model academic library grievance procedures. (LS)

**An Examination of the Literature on Criterion-Referenced and Computer-Assisted Testing.**

Pub Date Nov 75

Note—45p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**Computer Programs, \*Criterion Referenced Tests, Educational Testing, Information Processing, Instrumentation, Item Banks, Literature Reviews, Measurement Techniques, Norm Referenced Tests, State of the Art Reviews, Test Construction, \*Testing, Testing Programs

**Identifiers—**Automatic Examination Generator, Classroom Teacher Support System, \*Computer Assisted Testing, Domain Referenced Testing, Educational Testing Service, Mentrex Enterprises

Criterion-referenced testing (CRT) is defined as a method of ascertaining an individual's status with respect to some performance standard. Computer-assisted testing (CAT) is a method of constructing tests using a variety of computer techniques such as a single test computer printouts, stored item banks, teacher specified criteria, machine readable answer sheets, etc. After an examination of the literature on both subjects, the conclusion reached is that CRT and CAT may help each other in the following ways: (1) item generation techniques may be refined to allow more comprehensive evaluation of domains by making more items available; (2) item sampling algorithms may be used to achieve more representative tests from existing domains; (3) branching tests may be utilized to arrive at the most cost-effective method for evaluating performance; (4) test models may be simulated to ascertain their feasibility; (5) mathematical models may be developed to help define and standardize the criteria by which performance is judged; and (6) CRT can be used more widely as a valid theory to aid the design of CAT systems. There is a 16 page annotated bibliography divided into two separate subject divisions. (Author/NR)

**Identifiers—**Appalachia, \*Appalachian Educational Satellite Program

The Appalachian Education Satellite Project (AESP) was created to demonstrate the feasibility of conducting graduate level courses for teachers in isolated regions using communication satellites. One of the AESP's four projects was an eight session career education series for 234 elementary school teachers given at 15 sites throughout the Appalachian region. The conclusions reached were: (1) teachers demonstrated a significant gain in the cognitive area; (2) teachers indicated a significant change in attitude toward career education; (3) teachers felt the course provided them with more useful information than a campus education course; and (4) teachers are continuing to use the career education techniques they learned in their own classrooms. The appendixes cover course outline, lab materials, and various questionnaires used in the formative evaluation process. (NR)

**Identifiers—**Appalachia, \*Appalachian Educational Satellite Program, Computer Based Resource Units, AIM ARM

A communication satellite was utilized as part of a 16 session career education course for secondary school teachers given at 15 sites throughout the Appalachian region. The conclusions reached were: (1) teachers preferred the sessions which presented examples of career education and were "how to do it" in format; (2) teachers preferred lab activities in which student interaction predominated; (3) teachers would use the CBRU (Computer Based Resource Units) and AIM/ARM (Abstracts of Instructional Media and Research Materials in Vocational Education) information systems if they were installed in their school systems but wanted more clarification of their usage; (4) teachers demonstrated significant gains in the cognitive area; (5) teachers indicated significant change in attitude towards career education; and (6) teachers indicated they are using more career education activities in their own classrooms. The appendixes include the names of the 35 participants, the lab activities, and various questionnaires used during the formative evaluation process. (NR)

**Identifiers—**\*Global Communication, International Surveys

This reference book contains updated material on four principal media (press, radio, television, and film) for 200 countries, supplying with

statistical support, information on the general structure, facilities, output, distribution, and coverage of each in its individual, local, and national context. Entries for news agencies, space communications, and professional training are given when relevant. Data cited is valid for 1971-72; population figures apply to mid-1972. The material is divided into eight sections. Section 1 contains four chapters presenting comprehensive summaries on the global status of the press, news agencies, broadcasting, and film. The remaining sections cover Africa, North America, South America, Asia, Europe, Oceania, and the USSR. Nations are listed alphabetically under each section. Two appendixes contain an alphabetical listing of news agencies and a bibliography of source material. (NR)

**Quality Assurance of Media Devices and Courseware.**

Air Force Human Resources Lab., Lowry AFB, Colo. Technical Training Div.  
Report No.—AFHRL-TR-75-37  
Pub Date Oct 75  
Note—30p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Audiovisual Aids, \*Films, Government Publications, Instructional Films, Performance Specifications, \*Quality Control, \*Slides, \*Tape Recordings, Visual Aids

A quality assurance program is outlined that could be employed during the development of prearranged sound/slide instructional packages. The characteristics described were selected to be both: (1) important to instruction and (2) capable of being measured objectively. These criteria were selected in order to develop a program that would be suitable for incorporation into contracts where a training program would be developed by a commercial agency and delivered to a United States Air Force training base. It is recommended that the procedures also be incorporated into programs in which the instructional material is being developed in-house. Particular attention is paid to the essentiality of being able to update and revise the training programs. (Author/EMH)

**Descriptors—**\*Broadcast Industry, \*Educational Background, Higher Education, Interviews, \*Job Skills, Job Training, Radio, \*Surveys, Telecommunication, Television  
**Identifiers—**Kent State University

A survey was undertaken to determine the opinion of local broadcasters on the effectiveness of broadcast education to prepare students for jobs in the industry. Based on 55 questionnaires and 21 interviews of station directors and managers, it was determined that the industry preferred college educated employees whose education emphasized public speaking, journalism, advertising, and communications science. The broadcasters specifically recommended the acquisition of knowledge in sales and programing, and the skills of production, copywriting, continuity, and editing. Employers also look for experience, appearance, and personality. (EMH)

**An Aid to Independent Study through Automatic Question Generation (AUTOQUEST).**

Navy Personnel Research and Development Center, San Diego, Calif.

Report No.—NPRDC-TR-76-18

Pub Date Oct 75

Note—40p.; Technical Report for the period 1 July 73-30 June 75

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Autoinstructional Programs, \*Computational Linguistics, \*Computer Assisted Instruction, Independent Study, Program Descriptions, Program Evaluation, Test Construction

**Identifiers—**\*AUTOQUEST, Natural Language Processing, Question Generation

AUTOQUEST is a computer aid to independent study. It presents ordinary text to a student at a computer terminal, a paragraph at a time. Using a pattern-matching approach, the system generates a question based on one of the sentences of the text and grades the student's answer. If the student's answer does not match the words of the text, the paragraph is displayed again. Results showed that about 68 percent of the generated questions were satisfactory and that the errors were largely syntactic, indicating the need for a structural parser to preprocess the sentences. The economic feasibility of AUTOQUEST is discussed and judged to be good within 5 years. (Author)

Because the volume of information circulating in our society has proliferated since World War II and become increasingly subject to processing by electronic hardware, the public has a vital interest in knowing how information performs, how its flow is controlled, and on what terms it is made available to the public. Since all information systems are concerned with one or more of the following basic functions: creating information, storing information, processing information, distributing information, and/or using information, there has been much duplication and interchangeability of information technology. The Program on Information Technologies and Public Policy aims to develop an understanding of these merging technologies and to use that understanding to illuminate public discussions of information policies. The research group at Harvard University frames issues and hypotheses prepares background documents, and analyzes data that are subjected to review and criticism and then released to a wide public audience. This first volume of a two volume annual report concentrates on the program scope and aims, and it includes graphs and tabular data showing the growth and organization of the information industry. Today's students, with their exposure to a great variety of media, tend to prefer a learning experience characterized by: (1) considerable variety in learning methods; (2) a choice among alternatives as well as some feedback; and (3) quick-moving, active involvement that requires only a short span of concentration. A library science course in principles of materials selection was designed to fulfill these three learning requirements. The method used was an adaptation of the American Society for Information Science 1975 poster sessions; it consisted of a number of simultaneous informal student presentations using graphs, diagrams, data, pictures, and a small amount of text. The class was divided into

teams that took turns making presentations and being active participants. In informal evaluations the participants indicated that there was more active learning taking place in this interactive, informal atmosphere than in traditional lecture textbook courses. An additional advantage was seen in the students' opportunity to use and improve communication skills they would need when working in libraries. (LS)

**Descriptors**—Higher Education, Interinstitutional Cooperation, Internship Programs, \*Librarians, \*Library Cooperation, Library Education, Library Research, \*Library Schools, Personnel Needs, Professional Continuing Education, Speeches

There are a number of ways library educators and librarians cooperate. Some libraries participate in library schools' internship and fieldwork programs, while others allow their organizations to be used as laboratories for special projects, to the benefit of both parties. Library school faculty members are available to nearby libraries as resource people and, in return, invite area librarians to serve as advisors or guest speakers. Cooperation is also possible in making the curriculum of the school relevant to the personnel needs of the locality, as well as in preparing students for the job market and matching student strengths to specific job requirements. Finally, librarians and the library school may cooperate in developing continuing education activities based on the needs of the local librarians. (LS)

**Descriptors**—Academic Rank (Professional), Affirmative Action, \*Ethnic Distribution, Faculty, Females, \*Librarians, \*Library Education, Library Schools, \*Library Technicians, \*Minority Groups, Racial Composition, Sex Discrimination, Surveys

In order to provide information for affirmative action programs, data were collected about the ethnic and sexual composition of the 1973-74 graduates and faculty of U.S. library education programs. A tabulation of returns showed that graduates of all degree and certificate programs (graduate, undergraduate, and library technical assistant) were predominantly white, as were faculty members. Blacks and Asian Americans were being recruited into the library profession in numbers comparable to their representation in the pool of college graduates, but the Spanish-surnamed and American Indians were not. While three quarters of all master's degrees and 6th year certificates were earned by women, the women earned only one third of the doctoral degrees. White men outnumbered white women on library education program faculties, and more men than women held positions at the higher levels. Among minorities on faculties, blacks predominated with other ethnic groups appearing in very small numbers. Data tables are attached. (Author/LS)

The State Library of Florida sponsored a conference in 1974 to provide an interchange of ideas between public libraries and specialists in adult basic education (ABE). Nine papers were given covering existing ABE programs, the role of libraries in ABE, how to find and evaluate materials, and methods of interagency cooperation. Nine appendixes include a bibliography of bibliographies, a 72-item bibliography of books from the State Library of Florida concerned with adult education and literacy, a listing of over 200 ABE materials, information from the Appalachian Adult Education Center, and a list of library programs in ABE. **Descriptors**—Bibliographies, Books, Building Design, \*Fire Protection, \*Libraries, Library Materials, Manuals, Preservation, Prevention, Safety Equipment, Vandalism

**Identifiers**—Arson, Charles Klein Law Library, Sprinkler Systems, Temple University

A discussion of fire risks, causes, prevention, and salvage in libraries is presented in text and photographs. A description of some historic library fires demonstrates the value of adequate protection and preparedness programs to minimize loss and damage. The need for fire retardant construction and protection from vandalism and arson are discussed, followed by a history and analysis of the fire which destroyed the law library at Temple University in Philadelphia. Alternatives for reducing fire risk are suggested, such as renovation, reconstruction, warning devices, and fire extinguishing systems, with emphasis on automatic sprinkler systems using water or chemicals such as Halon 1301. Guidelines for disaster preparedness are provided, including those for water emergencies and fire prevention. Procedures and sources of information for salvaging wet books are outlined. Finally, there is a review of automatic fire protection systems: where to find technical information, lists of types of systems, and manufacturers promotional materials illustrating samples of various types of systems. Appendixes contain three reprints which describe fire protection at the National Archives, a book salvage operation, and the Military Personnel Records Center fire. A bibliography is included. (LS)

**Descriptors**—Academic Rank (Professional), Administrative Policy, Budgets, \*Higher Education, Librarians, \*Library Instruction, Speeches, \*Undergraduate Study, University Administration, \*University Libraries

**Identifiers**—CLA 75, \*University of California

The problems involved in establishing a formal library instruction program for undergraduates on the University of California's nine campuses are discussed. The following changes are suggested: (1) The library should be recognized as an academic department in its own right, responsible for initiating and conducting courses taught by librarians using their own academic titles, and subject to normal academic review, (2) the library

budget should be examined and revised to identify and provide for such courses. There is a brief description of the kinds of library instruction available at present on each campus. (NR)

This individualized learning manual deals with the mechanics of information retrieval of the ERIC files, using the RIC program of North Dakota. The material covered includes formulating a basic search strategy, identifying major concepts, the mechanics of computer searching, and the unique properties of the ERIC system. Each discussion contains illustrations and examples as well as a summary of important points. The appendix includes 19 worksheets, 15 answer sheets, a listing of the national dissemination coordinators, a listing of the 16 ERIC Clearinghouses, a glossary, and 1 page bibliography. The manual is designed to be used in conjunction with the media kit, "ERIC: What It Is, How To Use It," and the pamphlet, "What Is the Question? A Guide for Search Negotiation." (NR)

**Management/Technical Interaction in Integrated Information System Development.**

Pub Date 4 Dec 75  
Note—25p.; Paper presented at the College and University Systems Exchange National Conference (Denver, Colorado, December 3-5, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Budgets, Coordination, \*Data Bases, \*Information Systems, \*Management Information Systems, Universities, \*University Administration

Identifiers—Arizona State University  
The integrated information system element of the management information system concept has practical applications for management in the areas of both information analysis and decision-model building. Four basic options for achieving integration in operational data systems are: a default option, the coordinated file option, the distributed processing option, and the data base option. Arizona State University (ASU) has chosen a data base management system (DBMS) to coordinate disparate existing systems and eliminate extensive manual integration of data from the various systems. However, raising a budget for the project is not a simple matter. Difficulties also arise in convincing the diverse elements of a university's bureaucratic hierarchy to cooperate on a DBMS. At ASU, a Data Base Review Committee, representing major administrative areas, has been set up to encourage effective management/technical interaction and interdepartmental cooperation in data base development. Identifiers—FCC, Federal Communications Commission, McLuhan (Marshall), NAEB 75, Public Broadcasting Service

The Public Broadcasting Service (PBS) programming is often criticized by standards or criteria that are out of date and misrepresented in terms of the audience response. There is a need for the development and application of critical standards that recognize and utilize the unique characteristics identified by Marshall McLuhan. Television audience response is often judged by a simple head count which is an archaic method of determining listeners. Public television programming needs to encourage audience participation with programs whose content has been thoroughly researched; but instead of researching why one program succeeds while another fails, PBS is satisfied to borrow from the British Broadcasting Company. One alternative would be to use the programs rejected by commercial networks, but which are acceptable to the PBS audience. The second alternative would call for PBS to take a more aggressive and systematic research approach to determine its audience and its preferences. (Author/DS)

**The Uses of Media Theory in a Broadcast Curriculum.**

Pub Date 18 Nov 75

Note—10p.; Paper presented at the Annual Meeting of the National Association of Educational Broadcasters (Washington, D.C., November 18, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Broadcast Industry, Broadcast Television, \*Futures (of Society), Mass Media, Media Technology, \*Programming (Broadcast), Public Television, \*Social Responsibility, Television

Identifiers—FCC, Federal Communications Commission, NAEB 75

There has been an increasing emphasis on the social responsibility of media within the past 25 years. Social responsibility began with the Fairness Doctrine, the Equal Time Rule, and other Federal Communications Commission (FCC) regulations, but was expanded further when cigarette commercials were banned in 1971. Freedom of speech in programming must be retained and the truth encouraged in advertising. Legal challenges involving the social responsibility of television stations are centered around three main issues: (1) station awareness of the needs and interests of the local community, (2) station discrimination in employment, and (3) the need for more programming of a particular type. These issues will be an important point for media students to study in the future, and a strong background in media theory will be needed to cope with these problems. Social responsibility can either initiate an era of examination and development for the good of society or it can clog the courts with petty complaints. (Author/DS)

An algorithm is defined here as an unambiguous procedure which will always produce the correct result when applied to any problem of a given class of problems. This paper gives an extended discussion of the definition of an algorithm. It also explores in detail the elements of an algorithm, the representation of algorithms in standard prose, flow charts, coded graphs, linear representation, list form and decision table form. It develops a taxonomy of algorithms and discusses at length the uses of algorithms in instruction and in research and development problems. (JY)

## Identifiers—Computer Use

This booklet was written to answer some basic questions about the use of the computer in education. A number of ways in which computers are used in the learning process are listed, followed by the rationale for using computers in education. Benefits of using computers to improve instruction, to provide learner control, and to develop a computer-literate society are discussed along with the potential the computer provides for cost saving in alternative learning environments. Several approaches to the development of instructional material are suggested, followed by approaches which might be used to facilitate acceptance of computers. Key personnel roles in the use of the computer in education are outlined. A list of important considerations in the acquisition process for a computer are given, and the booklet concludes with a comment on the prospects for international cooperation in computer-based education systems. Can a Computer Utilization Survey Course be Justified in a Curriculum for Public School Teachers?

Pub Date 75

Note—13p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Computers, \*Computer Science Education, Curriculum Development, Educational Innovation, Educational Needs, \*Educational Technology, Elementary School Teachers, Higher Education, \*Teacher Education Curriculum

**Identifiers**—University of Georgia College of Education

The feasibility of computer applications in teacher education programs and growing importance to educational professionals of knowledge of computers provide a framework which justifies the need for a computer utilization survey course in the teacher education curriculum. Instructional management systems to keep records and to monitor student progress are increasing, and the use of computers in the classroom is just beginning to develop. Teachers need to understand and to be able to use computer resources which are available to them. One study in higher education revealed that computer applications have made little progress in the humanities. A computer assisted instruction course on statistics and test construction was favorably evaluated by most of the teacher education students enrolled. A concise, nontechnical introduction to the use of computers in education is a viable alternative to the direct acquisition of computer skills. (CH)

Transition to Information Systems at a Liberal Arts College.

College of William and Mary, Williamsburg, Va. School of Education.

Pub Date Dec 75

Note—17p.; Paper presented at the College and University Systems Exchange Conference (Denver, Colorado, December 3-5, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*College Administration, Computer Oriented Programs, \*Facility Case Studies, Higher Education, \*Information Needs, Information Services, \*Information Systems, Institutional Research, Management

**Identifiers**—International Business Machines Corporation, Virginia, \*William and Mary College

That William and Mary is a small, traditional, liberal arts college does not exempt it from the need for interdepartmental coordination, efficient allocation of resources, and accountability. In conjunction with the International Business Machines Corporation (IBM), the college undertook an extensive probe into information networks to see if the institution's demands for information, data processing, and planning could be supplied by an IBM system. A six-man team of college staff and IBM personnel conducted interviews and collected data attempting to spell out the administrative processes and information flow required to supply leadership with more perfect information. It was found that the information flow was poor, restricted by departmental provincialism. The development of an institution-wide, computer-based system was recommended. (EMH)

The Humanities and Professional Training in Broadcast Education.

Pub Date 17 Nov 75

Note—9p.; Paper presented at the Annual Meeting of the National Association of Educational Broadcasters (Washington, D.C., November 17, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Broadcast Industry, Communication (Thought Transfer), \*General Education, \*Higher Education, Liberal Arts, \*Professional Training, \*Relevance (Education), Training Objectives

**Identifiers**—Broadcast Education

The question of the proper mix of liberal arts courses and professional broadcast training courses in higher education is often debated. Many feel that broadcast education in higher education should return to a greater study of humanistic, liberal arts courses with a de-emphasis on the vocational aspects of the curricula. Vocational training is defined as teaching "how to," but not "what" or "why." Conversely, liberal arts education teaches the power of understanding and judgment. Expanded perception and extension of the ability to think logically and thoroughly about any subject, to learn the difference between dogma and reality, to note discrepancies and to acquire the habit of precise and accurate communication—in short, the development of critical thought, which may not be relevant to getting the first job but may be relevant to the survival of our civilization—should be the aim of broadcast education. Report of the LRL Survey Committee; For the Legislative Reference Librarians Section, National Conference of State Legislatures. ECS Report No. 79.

Education Commission of the States, Denver, Colo. Dept. of Research and Information Services.; National Conference of State Legislatures, Washington, D.C.

Report No.—ECS-R-79

Pub Date Dec 75

Note—82p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Information Retrieval, \*Legislative Reference Libraries, Library Automation, Library Cooperation, \*Library Services, \*Library Surveys, Questionnaires, State Libraries

A questionnaire was sent to all librarians on the Council of State Governments' state legislative reference librarians list and the directors of state library agencies in an effort to provide a data base for future studies and the development of standards in specific areas of legislative reference operations. Replies were received from 48 states. Variation was found in all aspects of legislative reference services—especially in staffing, funding, and scope of services offered. The automation capabilities in the states differed but were being utilized more and more for information purposes. Greater interstate cooperation was needed in the exchange of information and publications. The survey findings are shown in great detail along with the questionnaire, a sample response from one state, a directory of officials or agencies responsible for state documents, and a list of respondents. **Chinese Library Services to a Predominantly Chinese-Speaking Community.**

Pub Date 4 Dec 75

Note—5p.; Paper presented at the California Library Association Annual Conference (San Francisco, California, December 4, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Branch Libraries, \*Chinese, \*Chinese Americans, Library Collections, Library Programs, \*Library Services, Phonograph Records, \*Public Libraries, Speeches

**Identifiers**—California (San Francisco), CLA 75

The San Francisco Public Library has developed some special services for Chinese-speaking patrons. A collection of Chinese materials at the Chinatown branch now contains 9,000 fiction and non-fiction books, 9 newspapers, 19 periodicals, and over 300 phonograph records. Bilingual citizenship books are provided, as are reference books on China and the Chinese in English. Members of the Chinese-speaking community helped select books at first, and librarians now order books from Hong Kong and Taiwan as well as from local sources. Since most books are cataloged at the branch, a simplified system was developed to speed the process. Branch librarians are bilingual, providing three Chinese languages, and publicity announcements and flyers are in both English and Chinese. Many special services are given: class visits, tours, library participation in local events, bilingual programs, and music programs. Chinese residents of all ages and interests can enjoy fiction, philosophy, history, classical Chinese music, or the latest Hong Kong record hits at the Chinatown branch. (LS)

**Identifiers**—Computer Terminals

A recent needs study determined that most of the terminal requirements for military computer assisted instruction (CAI) applications can be satisfied with mainstream commercial terminals. Additional development, however, is likely to be required to satisfy two of the capabilities (limited graphics and prerecorded visuals). The expected architecture of commercial terminals will make it easy to modify and customize them to meet all the identified CAI needs. The military community is also expected to use computer networks to satisfy an appreciable portion of its requirements.

Commercial terminals and available computer networks provide the basis for an effective and economical user interface to military CAI systems. (Author/EMH)

**Identifiers**—Computer Terminals

A policy study was conducted in four rounds to assess the anticipated payoff of investment by the Advanced Research Projects Office in the development of a new family of terminals for use by the military in computer-assisted instruction. Members of the panel of experts proposed features, rated them, and reacted to the resulting ratings. Of the 24 features, those rated as most needed were seen by these experts as likely to be in commercial production five to ten years from now in a form usable by the military. Experts generally agreed that investments in innovative pedagogical software and in innovative course writing are likely to have greater payoff than an investment in terminal development. Of 14 software features, those rated as most needed were ones for particularizing instruction online to the course-related needs of individual students. The report is a thorough description of the conduct of the study. (EMH)

**Identifiers**—Milgram (Stanley), Shotland (R Lance)

An evaluation was made of the methodology and findings presented in "Television and Antisocial Behavior. Field Experiments," by Stanley Milgram and R. Lance Shotland (New York: Academic Press, 1973). In the book, seven experiments were reported, all concerned with antisocial behavior toward a medical charity. Three episodes of Medical Story were prepared. In two, antisocial endings were presented; in a third, a prosocial ending was presented. An entirely different episode created a fourth (control) condition for the three experimental variations: (1) antisocial behavior with punishment, (2) antisocial behavior without punishment, and (3) prosocial behavior. In several experiments, various versions were shown to audiences, and subjects were tested later by their reactions to an experimental situation. Milgram and Shotland concluded that television's influence on antisocial behavior was "not proven." A careful examination of these experiments shows them to be flawed and poorly conceived, largely irrelevant to prior research, and a minor contribution to the large body of scientific evidence relevant to the topic. **Descriptors**—Annotated Bibliographies, \*Behavioral Science Research, Behavior Patterns, Human Development, \*Literature Reviews, Media Research, \*Research Methodology, Research Problems, State of the Art Reviews, Surveys, \*Television Research, Television Viewing, \*Trend Analysis

Some 450 studies and other items judged to be of key importance to research on television and human behavior are summarized. For empirical research, each summary presents: (1) principal findings; (2) design and methodology; (3) theory and discussion. For theory, review and nonempirical works, each summary presents: principal conclusions and theory and discussion. The summaries are described as critical annotations because they represent a judgment about the data or, in the case of nonempirical work, about the major thrust, and not a reiteration of stated conclusions. The summaries were rated by a jury of social scientists on the basis of "interest at this time," and their opinions are noted by a system of asterisks. In addition, the summaries are preceded by an analysis of methodological issues and trends within each of the substantive areas covered by the eleven specialized bibliographies. It concluded that many of the apparent disputes about the substantive scientific findings instead represent differences in the way various evaluators collate and analyze evidence, and that debate should be focused on the validity and implications of alternative means of evaluation, instead of on the "rightness" or "wrongness" of the findings. **Descriptors**—\*Behavioral Science Research, Behavior Patterns, Futures (of Society), Human Development, Literature Reviews, Media Research, \*Policy Formation, \*Research Needs, \*Research Problems, State of the Art Reviews, Surveys, \*Television Research, Television Viewing

Current activity in the area of television research was reviewed, with an emphasis on some of the factors which will influence future research. An analysis was made of: (1) the priorities held by the scientific community in regard to research on television and human behavior, (2) the perspectives within the community that are likely to influence such research, and (3) some of the implications of the desire on the part of many social scientists to make such research more relevant to television policy decision-making. The analysis was based on in-depth interviews with selected social scientists, information collected in other ways from the scientific community, and reactions to preliminary analyses of a panel of highly informed social scientists. About 50 "in progress" research projects were uncovered. A description of these projects and an annotated bibliography of current publications are appended. (Author/HB)

**Teacher Self-Assessment via Videotaped Minilessons in the Marin County Regional Occupational Program.**

Pub Date Oct 75

Note—162p.; Ed.D. Dissertation, Nova University, San Francisco Cluster, Group II

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

**Descriptors**—Individual Development, Microteaching, \*Occupational Guidance, Occupational Information, \*Self Evaluation, Teacher Education, Teacher Improvement, Teaching Methods, Training Techniques, \*Videotape Recordings, \*Vocational Education, \*Vocational Education Teachers

**Identifiers**—California, \*Marin County Regional Occupational Program

The Marin County (California) Regional Occupational Program (Marin ROP) was charged with increasing the vocational education opportunities for youth and adults so that they may acquire occupational skills. While the Marin ROP was jointly sponsored by three secondary school districts and a two-campus community college, the ROP was administered by the Marin County Superintendent of Schools. As a component of the Marin ROP, a practicum was designed to teach eighteen vocational teachers how to use video equipment in order to: (1) increase the diversity of teaching styles, (2) sharpen self-assessment skills, and (3) use the equipment as a teaching tool. Sixteen teachers produced videotaped lessons and fifteen teachers chose to incorporate the videotaped lessons in their annual teaching

evaluations. The author concluded that while videotaped lessons are a valid tool for increasing teachers' self-assessment awareness and capabilities, self-assessment as a stated objective for producing videotaped lessons created high degrees of teacher apprehension. Therefore, it was speculated that if teachers simply learned how to operate the equipment as a teaching tool and produced lessons for classroom use, self-assessment would automatically occur because teachers would see themselves teaching and begin to change. (Author/HB)

Since the complete understanding of an institution is impossible, an administrator must base his decisions on models of institutional structure. State and federal trends towards accountability and detailed cost accounting restrict the administrator's ability to cope with the problems of the institution. Similarly efforts to make each com-

ponent of the institution operate on a profit basis provide incentive, but they limit flexibility. If the economic flow of the institution is charted in detail, it can serve as a model used to identify the institution's weakest elements, but it should be remembered that encouraging departmental self-sufficiency can lead to fragmentation and internal dissonance. Identifiers—Central Mass Library Admin Simulation Project, CLASP, Higher Education Act Title IIB, Planning Programming Budgeting System, PPBS

Central Massachusetts Library Administration Simulation Project (CLASP) was a research project funded under Title II-B to develop and test a simulation model that would enable public library personnel to learn and practice skills of negotiation, decision making, budgeting, and program planning. A simulation model was developed and tested in a four-day workshop series in which 21 participants learned skills of program planning and budgeting. Suggestions were made that the model should encourage the participants to develop performance measures for self-evaluation of their programs; and greater emphasis should be placed on the relationship between community development and formulation of library goals and objectives. A schematic map of the six-town region and a photograph of the game board is included. A list of project participants, members of the advisory committee, a description of the play of the simulation game, a description of the alternative programs, and previous budget data sheets are appended. **Document Not Available from EDRS**

Descriptors—\*Evaluation Methods, \*Librarians, \*Library Administration, Library Reference Services, Library Services, Library Surveys, Manuals, Statistical Data, Tables (Data)

Identifiers—Work Sampling

Work sampling is an effective device for testing efficiency in the use of library materials and personnel. An administrator can determine whether circulation or reference librarians are effectively using their time and whether the work flow should be reorganized. Key operations of a sampling should include definition of a problem, identification of the pertinent categories, determination of appropriate observation times, mathematical processing of the data, and finally the interpretation. Statistical tables illustrate calculations of the study, and the figures illustrate tally forms. The appendixes contain additional mathematical refinements and a review of library literature on work sampling; and a 22-item bibliography includes books and articles on sampling. (Author/DS)

Identifiers—Multimedia Rehabilitation Resources Project, \*National Rehabilitation Information Center, Rehabilitation Services Administration

In order to supplement an earlier investigation, "Feasibility Study for a National Rehabilitation Information Center," a study was conducted to assess the current state of rehabilitation training materials in terms of their production, dissemination, and use. Based on interviews of a cross section of rehabilitation training professionals, the study identified three major needs: (1) providing a single comprehensive list of training materials; (2) providing access to the materials; and (3) demonstrating new materials to potential users. The study attempted to define the universe of training materials by classifying them according to format, subject, funding source, intended audience, and intended use. A selective list of sources and catalogs is provided in the appendix. (EMH)

Identifiers—Multimedia Rehabilitation Resources Project, \*National Rehabilitation Information Center

Access to information about rehabilitation has traditionally been limited by the undefined scope of the field and by the lack of a central clearinghouse for rehabilitation information. A study was conducted to examine the feasibility of establishing a national rehabilitation resource center to improve the delivery of information. The study attempted to identify: (1) potential users; (2) the type of information materials that were needed; (3) the best storage and retrieval system; (4) the best location; (5) costs; and (6) methods to increase the effectiveness of existing materials. Employing a literature search, interviews, and think tank techniques, researchers first surveyed the state of existing rehabilitation information and then delineated what informational needs were unmet. The study recommended the formalizing of a rehabilitation information network with a national center to serve as a catalyst and coordinator. The appendixes contain bibliographic references and details concerning the interviews and workshops that were held. (EMH)

**Quest Into Matter. Final Report.**

Ontario Educational Communications Authority, Toronto. Research and Planning Branch.

Pub Date Dec 75

Note—25p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Audiovisual Instruction, \*Chemistry Instruction, \*College Freshmen, \*Educational Television, Evaluation, Higher Education, Instructional Media, Media Research, Science Courses, Student Attitudes, \*Summative Evaluation, Teacher Attitudes, \*Telecourses

Identifiers—Canada, \*Ontario Educational Communications Authority, Quest Into Matter

"Quest into Matter," produced by Ontario (Canada) Instructional Television, aimed to investigate the "heart of matter" at the college freshman level of chemistry. Specifically, its purpose was to demonstrate the relevance of "shape" in relation to the properties of matter from the molecular level to the galactic. Some 180 students enrolled in a first year chemistry course, and 17 freshman chemistry teachers took part in the evaluation of the program which involved responding to a set of questions after viewing the program. The students found the programs stimulating, informative, and neither boring or confusing. Most found the analogies in the program very or somewhat helpful in understanding the various properties of matter and very or somewhat relevant to their chemistry course. Teachers responded even more favorably than students. Over 90 percent found the program somewhat to very stimulating and neither boring nor confusing. Most teachers also found it very informative. Like the students, the teachers found the analogies very or somewhat helpful in understanding the various properties of matter and very or somewhat relevant to a first year chemistry course. They also preferred a combination of both the method used in the program and a conventional lecture-type method and stated they would like to see more programs of this type used in their classes. The findings suggest that programs like "Quest into Matter" would be readily welcomed as supplementary material to textbook information. (Author/HB)

**Selection of Instructional Materials; A Model Policy and Rules.**

Iowa State Dept. of Public Instruction, Des Moines.

Pub Date Oct 75

Note—19p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Audiovisual Aids, Censorship, Instructional Materials, Instructional Media, \*Media Selection, \*Models, Policy, \*Policy Formation, Reading Material Selection, \*School Policy, Textbook Selection

Identifiers—Iowa

The Iowa State Department of Public Instruction has developed an instructional materials selection policy and procedures to help achieve appropriate assignment of selection responsibility and quality selection while guarding against unwarranted censorship of materials. The model emphasized the ongoing nature of media selection, involving assignment of responsibility of selection and continued evaluation by school staff members. Intended to provide assistance to schools in developing their own selection policies and procedures, the model delineates: (1) responsibility of selection of materials; (2) criteria for selection of materials; (3) procedures for selection of media and text materials; (4) procedures for objections by the community; and (5) a sample form for reevaluation of printed or audiovisual material. Sources of publications and associations concerned with intellectual freedom are appended. (HB)

Identifiers—Library Services Construction Act Title I, \*Michigan (Macomb County), Public Information Centers

A public information center was established in an area covering 16 libraries in Detroit, Michigan. Funded by a Title I grant, the center sought to increase the effectiveness of information flow to residents and to compile a community resources directory. Several types of literature

were reviewed and information was gathered from the Detroit Public Library information and referral service. A file system was established, subject headings chosen, and a questionnaire was sent out to find the type of information that was needed. A brochure about employment resources was designed and published. Seven appendixes include: a map of Macomb County; the project grant application; census and planning commission data; 49 information sources on community resources; the project questionnaire; and the employment brochure. **Progress and Pedagogy: The Teachers Dilemma in a Technological Revolution.**

Pub Date 19 Nov 75

Note—12p.; Paper presented at the National Association of Educational Broadcasters Annual Meeting (Washington, D.C., November 19, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Audio Equipment, \*Educational Equipment, \*Educational Innovation, \*Educational Technology, Electronic Equipment, Instructional Media, Speeches, \*State of the Art Reviews, Technological Advancement, \*Video Equipment

**Identifiers**—NAEB 75

Though most technological advances are triggered by the initiative of the military and business sectors, if educators can overcome their aversion to technology, some recent technological developments can easily be adapted for use in the educational sector. For example, an experimental color television camera developed recently is no larger than a 35mm camera; resolution in video equipment has been vastly improved and changed to a digital mode which can be used to generate extremely realistic computer animation; advances in fiber optics and lasers may lead to the development of high-density audiovisual recorders with no moving parts; and reduction of electrical components to the molecular size also provides some interesting possibilities for the near future. It remains to be seen if man's imagination and sensitivity will insure that these technologies are used in beneficial ways. (EMH)

**Schools Inquiring About Seven-Day School Rerecording of Public and Instructional Television Programs.**

Public Broadcasting Service, Washington, D.C.

Pub Date 16 Dec 75

Note—4p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Audiovisual Centers, Copyrights, \*Educational Television, Instructional Media, \*Policy, \*Public Television, \*Video Tape Recordings

**Identifiers**—Agency for Instructional Television, Great Plains National Instructional Library, Public Broadcasting Service, Public Television Library

A statement of policy outlines the method to be used by all schools, colleges, and universities that desire to take advantage of a seven-day rerecording privilege to record televised material transmitted by public television stations. The policy has been jointly agreed upon by the Public Broadcasting Service, the Great Plains National Instructional Television Library, the Agency for Instructional Television, and the Public Television Library. The policy statement sets forth rules about who may record, what may be recorded, for what purpose, and under what conditions the recordings may be transmitted. (JY)

Note—48p.; Presented at the Federal Communications Commission Regional Meeting (San Francisco, California, November 20, 1975)

Available from—Committee on Children's Television, Inc., 1511 Masonic Avenue, San Francisco, California 94117

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—Broadcast Industry, \*Broadcast Television, \*Children, Commercial Television, Evaluation, Mass Media, \*Programming (Broadcast), Statistical Data, Television, Television Commercials, \*Television Research, Television Viewing

**Identifiers**—FCC, Federal Communications Commission

Over a two month period, the Committee on Children's Television evaluated the response of commercial broadcasters to the Federal Communications Commission guidelines that were established in 1974. Volunteers in 12 cities monitored children's programs on network affiliated and independent television stations. Managers of local television stations were also interviewed. The survey revealed that: (1) few stations were making any real effort to present informative and educational material in exciting and imaginative ways, (2) age-specific programming was virtually nonexistent; (3) weekday programming for children was totally inadequate; (4) the number of product ads were excessive; (5) very little money was invested in children's programming; and (6) hosts of children's television shows were selling products. The appendixes contain a summary of the 32 network programs most consistently aired; the community profiles which summarize the evaluation of locally produced programs, syndicated programs, and alternative network programming; the children's television program profile form used; and the questionnaire sent to the station managers. **The Effect of Feedback on Group Cohesiveness.**

Pub Date 76

Note—20p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Behavioral Science Research, College Students, \*Communication (Thought Transfer), Experiments, \*Feedback, \*Group Behavior, Group Dynamics, Organizational Communication, Reinforcement, \*Task Performance

The effect of feedback on group cohesiveness (measured in terms of group and task attractiveness) for a person who is performing a simple, highly repetitive task was studied. One hundred business administration students, randomly assigned to five member groups, completed a series of trials having the goal of determining the number commonly held by the other members of their group as quickly as possible. In each group communication was restricted to written messages and partitions restricted the flow of messages among members according to a predetermined wheel or circle communication network. Half the groups participated in feedback at the end of each trial, the other half did not. All subjects were measured for their feeling of group and task attractiveness at the beginning, middle and end of the experiment. Based on a nested hierarchical design, feedback was found to positively affect a member's opinion of his group, but neither the opportunity for feedback, the network nor the individual's position within the network had a significant influence on the member's attractiveness to the task (findings are significant at the .005 level). The findings suggested group attractiveness was facilitated through formalized feedback mechanisms. However, feedback does not change an individual's opinion of the job performed. Similarly, programs designed to furnish feedback to workers performing menial tasks may not enhance the workers attractiveness to the job. (HB)

**Identifiers**—Baraboo Campus, Learning Resource Centers, \*University of Wisconsin

The Learning Resource Center (LRC) at the Baraboo campus of the University of Wisconsin was designed to be an integral part of the teaching program, and to embody the multimedia approach to individual self-paced learning by using the most appropriate medium or combination of media for a given instructional situation. The collection includes books, periodicals, microfilm, records, audio-tapes, (reel and cassette), sculpture, films (cartridge, reel, super 8 and 16mm), slides, filmstrips, teaching machine programs, videotapes and cassettes, and all the necessary supporting play back and production equipment. The automated circulation procedures include a Standard Register Source Record Punch model which reads badges coded for students, faculty or special users. The LRC is used as a testing center for both the self-paced and traditional courses, thus freeing instructors' time enabling them to have extra class sessions and discussions. Various innovative testing formats on teaching machines are also used. In addition, the production facilities for audiovisual materials are available to instructors. (HB)

**Descriptors**—Audiovisual Instruction, \*Content Analysis, Course Content, \*Educational Television, \*Elementary Education, Females, Instructional Media, Sex Discrimination, Sex Role, \*Sex Stereotypes, Telecourses, Womens Studies, Working Women

**Identifiers**—Agency for Instructional Television, \*Bread and Butterflies

A 15 program instructional television series on career awareness, "Bread and Butterflies" was produced by the Agency for Instructional Television in 1974-75. Designed to be an affective stimulus in the classroom, the series was analyzed to document how women were portrayed and the extent to which stereotyping occurred in the work roles shown. Five categories of common sex roles were established: (1) female job ghetto; (2) male career domain; (3) woman in a man's job; (4) man in a woman's job; and (5) nonsexist career presentation (a job or career in which the skill required is the main criteria for doing it). The characters were analyzed both in terms of the jobs they were shown doing and the context in which they were shown. In terms of the amount of time each category was shown, over one-third of the characters portrayed in nonsexist roles were from one program, and only one program focuses on a character who was portrayed in a nonsexist way. It was found that no woman was portrayed as competently and confidently doing her job in a leadership position. Also, while many nonsexist role models were briefly portrayed in the series, in terms of the context in which women are shown, little was done to break down commonly held stereotypes of women and men in the work world. Identifiers—NAEB 75

Although educational technology in health care institutions has developed considerably, there is still a lack of communication between the technologists and those who are directly involved in the learning process. Educators often view educational technology as a threat and the learners view it as an inconvenience. When new methods are used, they are often used improperly, without searching for adequate methods in which media can conform to the present teaching techniques to enhance learning. Communication must be improved between technologists and the users, and this involves an understanding of the educational tradition and the designing of systems that will fit existing teaching methods. Descriptors—African American Studies, American Indians, Annotated Bibliographies, Asian Americans, Black Community, Directories, \*Ethnic Studies, \*Films, \*Filmstrips, Instructional Films, Mexican Americans, Negroes, \*Resource Guides, Spanish Americans, Spanish Speaking

The selected resources annotated in this bibliography concentrate on educational films and filmstrips for teaching about four ethnic American minorities—Afro-American, Native American Indian, Oriental American, and Spanish-Speaking American. Selections were made on the basis of authenticity, suitability for children and youth, and relevance in today's world. Only a few entries predate 1965. No materials were included which were considered condensing or degrading to any ethnic group. Citations are arranged alphabetically by title under each of the four ethnic minority headings. Films are listed first, followed by filmstrips. Title, producer and/or distributor, release date, grade level, and some media characteristics

are listed with each annotation. Grade level and producer/distributor are given in code form. A directory of producer/distributors and a list of 16 Educational Resources Information Center (ERIC) documents dealing with ethnic minorities and the media are included. (Author/PF)

Identifiers—Library Services and Construction Act, LSCA, Ohio, \*Project Outreach

The goals of Project Outreach were: to place library materials in agencies throughout the county; to offer film programs, filmstrip presentations, and talks; to continue cooperative ventures in the use of braille and talking books; to continue to utilize tape cassettes; to provide materials to handicapped persons; to make available large print materials; to continue a public relations program; and to establish a local oral history archive through a collection of tape interviews. In order to evaluate the program, questionnaires were sent to: (1) administrators of agencies that had participated in the project; (2) those who had not participated; (3) the staff of the public library of Youngstown and Mahoning County, Ohio; and (4) the staff of Project Outreach. It was concluded that Project Outreach represented a creative response to an urgent community need and should be continued. The four questionnaires and the statistical data used to tabulate the response are included. Supplementary data cover the oral history project and a timescale of local historical events from 1890 to 1945. A log of the hours spent in data gathering and evaluation is appended. (Author/DS)

Pub Date 75

Note—23p.; Paper presented at Paley Library as part of a continuing education Program (Temple University's Academic Assembly of Librarians, Philadelphia)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Cataloging, \*Computers, Indexing, Information Retrieval, \*Library Automation, \*Library Technical Processes, Library Technicians, \*Technological Advancement

In times when the total volume of information is proliferating and information users are demanding greater access and faster response, the librarian is likely to turn to the computer for assistance. Modern computers can provide fast, accurate operations with an enormous capacity for bibliographic data, and they can be accessed through on-line, time-sharing terminals. Using binary logic to code bibliographic data, new computer languages can facilitate swift manipulation of data and rapid retrieval. Cataloging and indexing can also be automated. In the future computers will be able to provide continuous monitoring of all bibliographic data provided that library technicians and library users can be kept informed of the continuing advances in technology. Identifiers—EXPER SIM, Guided Study, \*IMPACT, Student to Student Counseling, TIPS

Using four IMPACT innovations as examples (EXPER SIM, Guided Design, TIPS, and Student-to-Student Counseling), this study attempts to define the nature of technological and social changes in university teaching. Data were gathered in three phases: (1) a questionnaire was mailed to individuals who requested information; (2) the adopters of innovations were interviewed; and (3) individuals who received second-hand information were interviewed. The results of the survey focused on the primary and secondary dispersion of information, the decision making mechanism used to determine when an innovation should be adopted, the extent of adoption, and the barriers to adoption. The text of the report describes in detail the research methodology and conclusions, and the appendixes provide definitions of concepts, informational brochures about the four innovations, sample questionnaires, and coding sheets for the interviews. **Identifiers**—\*Canada (Ontario), Ontario Educational Communications Authority

A probability sample survey of 1,541 residents of Ontario, Canada investigated: (1) the scope of involvement of adults in deliberate part-time learning activities, and (2) the possible role that educational communications media could play in extending educational opportunities to adults. Involvement in education varied according to age, educational attainment, income, occupation, place of residence, and native language, but overall results showed that 30 percent of adults were engaged in deliberate educational activities, and an additional 18 percent were interested in learning activities but were not presently involved. Obstacles that presented participation in education were investigated with the hope that in the future educational media could increase access. The report briefly discussed the institutions, subject areas, methods, and motivations that are employed in adult education. (EMH)

**Identifiers**—Project ACCESS Videotape

The ACCESS video tape series was designed as continuing education for librarians working in public libraries in rural areas of the Rocky Mountain and Plains states. Twelve documentary style and four panel shows were produced. A study guide supplemented the video material and included program outlines and further discussion suggestions. All tapes were produced on quadruplex masters of commercial broadcast quality. For field testing and evaluation purposes, 3/4" color cassettes were used. Conclusions were: (1) there is a definite need for library continuing educational materials; (2) a production-oriented staff member should be involved in proposal development to determine costs, equipment needs, and staffing patterns; (3) high start-up costs can be overcome by cooperative production of groups of programs; and (4) production of future packages should be centered in locations which possess experienced personnel and production capabilities. Survey of the Use of Slide/Tape Presentations for Orientation and Instruction Purposes in Academic Libraries.

Pub Date Jan 76

Note—183p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

**Descriptors**—\*Audiovisual Aids, \*Audiovisual Instruction, Behavioral Objectives, \*Bibliographies, \*Library Instruction, Library Surveys, Phonotape Recordings, Slides, State of the Art Reviews, \*University Libraries

Eighty-eight academic libraries were surveyed to determine what kinds of slide/tape library instruction materials are available for purchase or loan. The conclusions reached were: (1) there are less than a dozen libraries that have produced presentations of sufficient quality and adaptability to be widely used; and (2) the slide/tape format demands time, expertise, and resources that are often underestimated. For each responding library a summary of the purpose, course use, subject, producer, financing, and evaluation of the slide/tape presentations is included. Four tables and the appendixes contain the survey questionnaire and the prices of Kodak slide Projectors and 3M Wollensak tape recorders as of December 1975. Also included is a reprint of a 17 page bibliography on audio-visual techniques and library instruction compiled by the University Library, The University of Michigan. (NR)

This is the first statewide study of the development of education beyond the high school within the State University and Community College System of Tennessee, established in July 1972. It reflects the operation of the System from 1972-1975 and projections for a 5-year period through 1980. The materials used to develop this report were drawn from separate self-studies furnished for this purpose by the six universities and 10 community colleges of the System. The study addresses the current state of affairs in both the traditional and nontraditional collegiate forms of higher education and offers guidelines for revising and strengthening higher education in the System. Information considered includes the following:

enrollment trends, student characteristics (age, full-time or part-time status), faculty resources, faculty characteristics (rank, training, tenure), faculty responsibilities, educational opportunities provided by the System, current research activities, public service and continuing education programs, physical facilities, and financial needs assessed according to three variables—number of students, an inflation factor, and program development. **Identifiers**—New York (New York City), New York City Community College

Despite the constraints of budget and space, the Division of Continuing Education (DCE) of New York City Community College in 1973-74 enrolled a total of 8,358 students in 276 courses. Comparison of this report with two previous reports evidences continued growth in diversity and number of programs. Apparent, too, is the evolution of many significant programs from relatively small beginnings. In general, DCE offerings are of two types: those developed for particular groups through grants and contracts, and those offered to the public on a tuition basis. Through collaborative efforts with other community institutions, DCE identifies educational needs, selects courses, recruits students, and evaluates outcomes. Although DCE offers only non-credit courses and programs, it can stimulate the development of credit and degree programs. In the past two years, DCE has attempted to involve the departments of the College in early stages of curriculum planning. This has created the opportunity for departmental faculty to make larger contributions to program design. DCE has also strengthened its relationship with students, involving them not only in the evaluation of teaching and course content, but in planning for new programs. Specific programs and community service projects are described, and statistical data are appended. (Author/NHM)

**Identifiers**—\*Florida

Florida statutes provide that the community colleges shall serve the post-high school educational needs of local communities by providing education in three major areas: (1) adult continuing education, including community services; (2) occupational education; and (3) general and academic education parallel to that of first and second years of the State University System. This report is intended to provide information with which to answer those questions most frequently asked by members of the legislature, state agencies, external agencies, citizens, administrators, faculty members, and students. Introductory materials describe the history, goals and philosophy, and organization of the Florida public community college system. In addition, material on financial support, articulation, and legislative regulations on the establishment of occupational, vocational, and general adult education programs is presented. The latter half of this report is comprised of 16 tables of data on enrollment, personnel, academic programs, physical facilities, and finances. Because of its unusual balance of local

control with state coordination and support, the Florida community college master plan has been a national model for long-range planning and the orderly development of a statewide system of community colleges. (Author/NHM)

In an effort to improve the quality of trustee selection and participation in the public community colleges of Florida, a "Special Ethics Committee" was established to develop performance guidelines for trustees. This pamphlet is comprised of four documents. The "Code of Ethics" and "Expectations of an Effective Trustee" are to be given to each potential trustee prior to his acceptance. The "Trustee Performance Standards" and "Trustee Self-Evaluation Form" are to be provided after the individual accepts his appointment. Appended information includes: (1) descriptions of the responsibilities of community college trustees and presidents as defined by the State Board of Education regulations; (2) descriptions of the responsibilities of community college trustees as defined by the Florida statutes; and (3) an index to the State Board of Education regulations and Florida statutes pertinent to trustee functions. All four documents, and the appended information, are intended as useful tools to trustees as they carry out their responsibilities. This material is also recommended for use in trustee in-service training. (Author/DC)

This catalog was developed as a means of communicating innovative and imaginative programs and practices among the 28 community colleges in the state of Florida. Each institution submitted information on programs and practices which they have successfully used and which they feel might serve as a pattern for other institutions. Types of innovative programs and practices were broken down according to five categories: instruction, public service, academic support, student support, and institutional support. Each entry consists of a title, a brief description, and a contact person, college and phone number. Well over 200 entries are included in the catalog. Detailed information on an entry may be obtained from the contact person for that entry. Institutional addresses are appended. (Author/NHM)

This report provides information on the academic progress of the 26,742 students who transferred from a Florida community college and were enrolled in one of the universities of the Florida State University System during fall 1973. It follows a similar study of community college transfers in fall 1971. Data presented are pertinent to three general areas: (1) transfer student characteristics (sex, race, age, year of university entrance, number of quarter hours transferred, present class status, county of residence, community college attended, and university attended); (2) academic performance of community college transfer students (university grade point averages, comparisons of grade point averages attained in universities by students transferring prior to or after earning 90 quarter hours or more in the community college, and grade point averages of transfer students by major and university); (3) relationship between Florida Twelfth Grade Test scores and university grade point averages of transfer students. Appended is a brief report on the academic success of students of community college origin in post-baccalaureate studies. (DC)

**Identifiers**—Franklin College, \*Switzerland  
Franklin College and Institute for European Studies is a small two-year liberal arts college in Switzerland dedicated to "the education of a new kind of international citizen for the last quarter of the 20th century." Accordingly, it is designed to spark interest in and concern for the contemporary scene in Europe so that American college age

students, living and working with an international faculty, can make personal judgments on the political, social, economic, and cultural issues which affect them. Leading towards an Associate in Arts degree, courses are designed to meet transfer and admission requirements of U.S. colleges and universities. This self-evaluation report proposes to present an accurate account of the college, its philosophy, educational programs, and aspirations for the future. It provides descriptions of the academic program (curriculum, curriculum development, academic travel program, and co-curricular activities), students and student life (admissions, counseling, services, athletics and extra-curricular activities, and the student association), faculty and teaching, physical plant and facilities, college organization and administration, finances, and the continuing system of college and program evaluation. **Feasibility Study for the Establishment of a Dental Auxiliary Education Program.**

Luzerne County Community Coll., Nanticoke, Pa. Spons Agency—Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C.

Pub Date Sep 74

Note—97p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Advisory Committees, Budgets, Course Descriptions, Curriculum Design, \*Dental Assistants, \*Dental Hygienists, Educational Objectives, \*Feasibility Studies, \*Health Occupations Education, \*Junior Colleges, Manpower Needs, Occupational Surveys, Program Administration, Program Costs, Program Planning

This report provides background information needed for a determination of the feasibility of establishing a program to train dental hygienists and dental assistants at Luzerne County Community College, and presents data needed to design such a program in a comprehensive community college. Information presented describes: the constituency and functions of a dental auxiliary advisory committee, program objectives and characteristics, curriculum content and course descriptions, personnel and budget requirements, program administration needs, facility needs, and accreditation and licensing requirements. In addition, findings of a labor market survey of all Luzerne County dentists are presented. Respondents reported the number of dental auxiliaries currently employed, their immediate needs for additional dental auxiliaries, and their anticipated needs over the next three years. Seventy-seven percent of the respondents indicated that they would prefer to employ a college trained assistant to training one themselves. An analysis of an existing dental auxiliary education program at another Pennsylvania community college is included, and the survey instrument is appended. (Author/DC)

**The Analysis of a Core Course for Community College Nursing Students.**

Pub Date 75

Note—88p.; Ed.D. Dissertation, Nova University

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Academic Achievement, Academic Standards, Articulation (Program), \*Associate Degrees, \*Core Courses, Course Content, Curriculum Development, Health Occupations Education, \*Junior Colleges, \*Nurses, \*Practical Nurses, Textbook Selection

Identifiers—Illinois

An extensive review of the literature and a survey of nursing faculties revealed the incompleteness and obsolescence of current texts to meet the needs of the Associate Degree Nursing (ADN) course in current trends. It became evident while researching course content materials for the current trends course that the personal and vocational relationships course required of Licensed Practical Nursing (LPN) students was very similar. Because of this similarity, a core nursing course was proposed which would be equally applicable to ADN or LPN programs. The core course was centered around a common textbook entitled "Historical Perspectives and Current Trends in Nursing," and was offered to students in 12 ADN and 12 LPN programs in public community colleges in Illinois. In order to

test the hypothesis that the two levels of community college nursing students would each achieve a satisfactory level of attainment in the core course, 12 unit review tests consisting of 12 items each were administered to 505 ADN students and 469 LPN students. Performance was evaluated through testing for content validity and correlating scores of ADN and LPN students. Mean test scores proved to be essentially equal, verifying the applicability of the course to either program. Data are tabulated and a bibliography is appended. (Author/NHM)

**Employer Perceptions of Important Skills, Knowledge and Attitudes for Commercial Artists, Metropolitan Kansas City.**

Johnson County Community Coll., Overland Park, Kans.

Pub Date Dec 75

Note—38p.; Pages 23 through 26 of the original document are copyrighted and therefore not available; they are not included in the pagination

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Commercial Art, \*Employer Attitudes, Employment Qualifications, Job Analysis, \*Job Skills, \*Junior Colleges, \*Manpower Needs, \*Occupational Surveys, Program Planning, Visual Arts, Vocational Education

Identifiers—Johnson County Community College, Kansas (Kansas City)

A commercial art program at Johnson County Community College (JCCC) was authorized to begin August 1975. In order to obtain information concerning needed skills and training, and future manpower needs for commercial artists, a questionnaire was designed and mailed to 936 possible employers of commercial artists in the Kansas City area. Although only 124 usable responses were received, the data were expected to be helpful in developing a program culminating in the successful employment of all program graduates. Respondents were asked to rank over 40 basic skills and personal characteristics on a five-point scale ranging from "essential" to "not applicable." Five characteristics were rated "essential" by more than 50 percent of the respondents: (1) meeting high quality standards of neatness and accuracy; (2) meeting deadlines consistently; (3) using the tools, materials, and processes relating to graphic reproduction and the preparation of camera-ready art; (4) team work; (5) doing paste-ups and mechanicals. It was also determined that a successful job applicant must have the following: a quality portfolio, experience, a variety of skills, ability to adapt to new situations, and practicality. Recommendations for student selection and program development are made on the basis of the findings. (NHM)

**Nursing and Dental Hygiene Selection Procedures.**

Part I: The Structured Interview as a Tool for Selecting Students into an Associate of Arts Degree Program.

Johnson County Community Coll., Overland Park, Kans.

Pub Date 75

Note—75p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Admission Criteria, \*College Admission, \*Competitive Selection, Dental Hygienists, Individual Characteristics, \*Interviews, Junior Colleges, Nurses, Rating Scales, \*Student Characteristics

Identifiers—Structured Interviews

A structured interview procedure was used during the spring of 1975 as a tool in selecting nursing and dental hygiene students at Johnson County Community College. Potential students had two 20-minute interviews: one by a staff member of the program to which application was made, and one by another staff member. Interviewers rated the applicants on several personal characteristics including: perception of nursing, stamina, personal integrity and maturity, self insight and self concept, interpersonal competency, problem solving skills, social conscience and empathy, ethics, communication skills, ability to work with hands, and personal appearance. Interviewers also gave each applicant a percentile rating and an acceptability rating. Final selection was made by ranking applicants according to a

total summed score obtained by adding the rating scores of the two interviewers. A bonus of 10 points was given to all Johnson County residents. An evaluation of the results revealed that nursing staff and non-nursing staff tended to give comparable ratings to the same applicant. A survey of the 34 interviewers showed a favorable overall reaction to the structured interview instrument and related procedures. Data are tabulated, previous selection methods are summarized, and the interview instrument is appended. (NHM)

**Declining Enrollment: Why? What Are the Trends and Implications?; and Enrollment Forecasting Techniques.**

Johnson County Community Coll., Overland Park, Kans.

Pub Date 24 Sep 75

Note—39p.; Paper presented at the Meeting on Coping with Declining Enrollments (Hyannis, Massachusetts, September 24, 1975). Appendix A (sample printouts) may reproduce poorly

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Birth Rate, Community Zoning, Computer Programs, Death, \*Demography, \*Educational Planning, \*Enrollment Projections, \*Mathematical Models, Migration Patterns, Multiple Regression Analysis, Research Methodology, Residential Patterns

Identifiers—Cohort Survival

This document presents a modified cohort survival model which can be of use in making enrollment projections. The model begins by analytically profiling an area's residents. Each person's demographic characteristics—sex, age, place of residence—are recorded in the computer memory. Four major input variables are then incorporated into the model: (1) death rate—deaths are projected for males and females as a function of the number of people for each age; (2) birth rate—three equations are offered, with the most popular projecting the number of births by using the fertility rates of women by age; (3) net migration—total subarea net migration (the number of people moving in minus the number of people moving out of a given area) is assigned by age and sex; (4) land use—designations are based on zoning. Categories employed in this model are: special, agricultural, industrial, commercial, residential (low, medium, and high density), and unzoned. Zoning is specified for the beginning year, and the user has the option of incorporating anticipated zoning changes into the model. Mathematical and computer procedures used in this model include regression analysis and the two-point logistic curve. A hypothetical application of the model is presented, and practice problems are proposed. Sample printouts are appended. (NHM)

Descriptors—\*College Faculty, Females, General Education, \*Instructional Staff, \*Junior Colleges, Leave of Absence, Males, Part Time Teachers, \*Professional Personnel, State Surveys, \*Teacher Characteristics, Teacher Salaries, Tenure, Vocational Education, Vocational Education Teachers

Identifiers—\*Hawaii, Lecturers

This report provides data on the faculty and staff of the Hawaii community college system as of fall 1975. It focuses on full-time appointees, but also provides information on lecturers, part-time appointees, and professional staff on leave. Data are summarized by five program categories: instructional support, academic support, student services, instruction, and public service; the instruction category is further divided into the areas of general education and vocational education. The bulk of the report consists of eight tables: (1) headcount for all professional staff, by full-time and part-time status; (2) sex, highest degree earned, and mean age of full-time professional staff, by program category; (3) average salary, salary range, tenure status, age, highest

degree earned, and instructional area for full-time instructors, by sex; (4) sex, program category, highest degree earned, salary, and age of all lecturers; (5) salaries for full-time appointees, excluding instructors, by program category; (6) salaries for full-time instructors, by program category; (7) tenure status, by year of possible tenure and by instructional area; and (8) number of instructors on leave, by type of leave and by tenure status. Although data are also provided for fall 1974, the figures for 1975 include an additional community college, so reliable comparisons cannot be made. (DC)

Garlock, Jerry C.

Collective Bargaining; Attitudes of College Presidents Compared with Presidents' of Academic Senates. OIR-75-25.

El Camino Coll., Torrance, Calif.

Report No.—OIR-75-25

Pub Date Dec 75

Note—6p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Administrator Attitudes, \*Chief Administrators, \*Collective Bargaining, Collective Negotiation, College Faculty, Comparative Analysis, \*Faculty Organizations, \*Junior Colleges, Presidents, Teacher Administrator Relationship

Identifiers—California

A questionnaire on collective bargaining was sent to California community college presidents and presidents of academic senates in the spring of 1975. Respondents included 101 college presidents and 101 presidents of academic senates. The questionnaire consisted of 22 statements, about which respondents were to express their degree of agreement on a five point scale. Data were subjected to probability analysis by means of the chi-square statistic to determine significant differences between the two groups responding. Only three comparisons between college presidents and academic senate presidents showed no significant differences. Two comparisons showed significant differences only at the 5 percent level of confidence. All other comparisons were significant at the 1 percent level of confidence. Listed with the greatest difference first, college presidents and academic senate presidents disagreed on statements including these: collective bargaining will destroy or significantly weaken the collegiality of the institution; presidents should directly participate in collective bargaining negotiations; collective bargaining will have a beneficial effect on higher education; collective bargaining will bring the faculty and board closer together. A comparison of the percentage results of the questionnaire is appended. (NHM)

An Analysis of the Incidence of Students Transferring from California Community Colleges to California State Universities, Fall 1973. OIR-75-24.

El Camino Coll., Torrance, Calif.

Report No.—OIR-75-24

Pub Date Dec 75

Note—9p.; Some tables may reproduce poorly due to small size of type

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Followup Studies, \*Junior Colleges, Junior College Students, Post Secondary Education, \*State Universities, \*Student Mobility, Tables (Data), \*Transfers, \*Transfer Students

Identifiers—California

This study summarizes data on the number of transfer students from various California community colleges to the 20 California state universities. Table 1 shows the distribution of the percentage of students from community colleges attending state universities. Each of seven colleges contribute 3 percent of the total, 19 colleges contribute 2 percent of the total, 44 colleges contribute 1 percent of the total, and 26 colleges contribute less than 1 percent. Table 2 shows the number of transfers from California community colleges to each of the California state universities, and table 3 translates these data into percentages. Table 4 is similar to table 2, but organizes the data by community colleges, instead of by state universities. Table 5 translates these data into percentages. Humboldt State University has students from 64 community colleges, followed by San Luis Obispo, with students from 56 community colleges. While some of the newer

community colleges transfer students to only one or a few state universities, three community colleges have students that transfer to 19 of the 20 state universities. These include Mount San Antonio College, Rio Hondo, and Santa Monica City College. (NHM)

Descriptors—Bibliographies, College Teachers, \*Inservice Teacher Education, Instructional Staff, \*Junior Colleges, \*Part Time Teachers, Performance Based Teacher Education, Program Descriptions, Teacher Improvement, \*Teacher Orientation, \*Vocational Education Teachers

Identifiers—Staff Development Programs

The lack of staff development, preservice, orientation, and inservice training programs for part-time community college instructors is considered a serious problem. This brief contains two examples of staff development programs for part-time vocational instructors. The first document, Dr. Milo P. Johnson's "Staff Development for Part-Time Vocational Instructors" is intended "to assist local continuing education and vocational education administrators in providing an up-to-date 'competency based' teacher education program as part of local staff development for part-time instructors." The second document describes the Maricopa County Community College District "Special Staff Development Program." It lists 13 learning units including a course on the community college. The Maricopa program was open to full-time and part-time instructors, and had a two-fold purpose: to enable full- and part-time instructors to qualify for Arizona certification; and to give instructors an overview of the characteristics of the adult learner and some learning principles applied to adults. In addition to an introductory essay documenting the need for staff development programs for part-time community college instructors, this brief includes a bibliography of related ERIC materials. Descriptors—Autoinstructional Aids, Autoinstructional Laboratories, Health Occupations Education, Instructional Technology, \*Junior Colleges, Mathematics Education, \*Minority Groups, \*Peer Teaching, \*Science Education, Technical Education, \*Tutorial Programs, Tutoring

Identifiers—Sacramento City College

Since fall 1972, Sacramento City College has operated a pilot project designed to provide minority students with extra tutorial and laboratory assistance and, thereby, to encourage them to pursue careers in mathematics, science, technology, and the allied health fields. The primary focus of the program was placed on one-to-one tutorials intended to remedy the problems faced by minority students in their regular classes. To this end, a laboratory was established centrally in the science complex and was staffed by a project director and six qualified peer tutors. In order to evaluate the success of the pilot project, questionnaires were distributed to students who had participated in the program and to minority students who had enrolled in mathematics, science, technology, or allied health courses, but who had not participated in the program. The responses from Asian, black, Mexican-American, and Native American students are presented separately. As a result of this evaluation study, it

is recommended that the pilot phase of this program be ended and that the program be continued on a regular basis. The questionnaires are appended, as are descriptions of the auto-tutorial aids currently utilized in the program laboratory. (DC)

Separation and Developmental English.

Pub Date Dec 75

Note—16p.; Seminar paper, University of Florida

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*College Freshmen, \*Composition Skills (Literary), \*Course Descriptions, Developmental Programs, \*English Education, English Instruction, \*Grouping (Instructional Purposes), Heterogeneous Grouping, Junior Colleges, Language Skills, Learning Laboratories, Performance Contracts, Reading Skills, Writing Skills

A plan for freshman-level composition which includes students at different achievement levels would make the developmental student an integral part of the college, and eliminate the humiliation of being branded "remedial." All students would participate in the class, write the same essays, and read the same material; however, students would be graded on a contract addressed to their individual needs. Entrance tests, which would include a writing sample, would aid the student in identifying his weaknesses and strengths in the areas of writing, reading, grammar, and spelling. In addition to the basic class, students would take special labs in their areas of weakness. Programmed materials designed for use in a lab are available in all four areas, and computer-based education programs are becoming widespread. The lab teachers would keep in communication with the classroom teachers, and vice-versa, sending reports on progress at least once a week. In class, no distinctions besides grading would be made concerning a student's ability. The class would focus on four things: expository writing, meaningful readings, discussion, and reading one another's papers. The student's contract would spell out exactly what would be expected of him in each lab and in the classroom. (Author/NHM)

Identifiers—Dutchess Community College

A college-wide steering committee worked to develop this planning process. Twenty-five planning goals were developed in a workshop where students, faculty, administrators, trustees, alumni, and sponsor-liaison representatives fully participated. This document sets forth the future directions of the college by indicating the specific actions and objectives necessary to meet the planning goals. The plan itself is based on a systematic consideration of the on-going activities of the college, and recommendations from the academic and administrative departments of the college regarding their direct, supportive, and overall coordinating roles in fulfilling the planning goals. First discussed is the institutional framework, including a general appraisal, and discussions of the college mission, budget, governance, and legal structure. The general discussion of the educational programs includes sections on academic programs, program evaluation procedures, the identification of prospective new clientele, and an appraisal of the professional staff. Also discussed are nontraditional educational patterns and methods, decision making arrangements, interinstitutional cooperation, accountability, and implementation of the enrollment plan and the facilities plan. Garlock, Jerry C.

An Enrollment Analysis of El Camino College Students, Fall 1975. OIR-76-3.

El Camino Coll., Torrance, Calif.

Report No.—OIR-76-3

Pub Date 22 Jan 76

Note—12p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adult Students, Age, \*Age Groups, College Credits, Day Students, Evening Students, Females, \*Junior Colleges, \*Junior College Students, Males, \*Student Characteristics

Identifiers—El Camino College

In order to provide a basis for enrollment projection, curriculum development, and overall college planning, the Office of Research at El Camino College analyzed various characteristics of the fall 1975 student population according to age. The eight graphs presented in this report provide the following information: (1) distributions of percent of age categories according to sex; (2) percent male and female for various age categories; (3) distributions of percent of age categories according to time of day enrolled in classes; (4) percent attending before and after 5 p.m. for various age categories; (5) distributions of percent of age categories according to number of units enrolled; (6) percent enrolled according to number of units for various age categories; (7) distribution of percent of age categories according to the total number of units attained; and (8) percent having accumulated certain units for various age categories. The graphs show identifiable points for years 18-24; beyond that age, the groups are categorized in intervals of 5 years. (DC)

The Impact of Community Colleges: Bibliography [Revised]. Report No. 1.

B. C. Research, Vancouver (British Columbia).

Spons Agency—Donner Canadian Foundation.

Pub Date Oct 72

Note—153p.; Supersedes earlier edition published October 1971

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—Administrative Organization, \*Bibliographies, College Admission, College Instruction, Educational History, Financial Support, Instructional Staff, \*Junior Colleges, \*Junior College Students, Student Personnel Services, Systems Analysis

Identifiers—British Columbia, \*Canada

In order to assess the impact of community colleges in British Columbia from the point of view of the students, the community, and the educational system, and to develop practical means for producing such information on an on-going basis for educational planning purposes, a program of research was undertaken at the University of British Columbia. This bibliography was compiled as part of the research program, and is the result of a comprehensive review of publications pertaining to community colleges in Canada and the United States, with special emphasis on Canadian material. It covers the period 1965-1971, and supersedes a previous bibliography published in October 1971. Over 1,800 entries are included, under 10 categories: (1) books and publications, 331 entries; (2) students and student personnel, 353 entries; (3) history and philosophy, 189 entries; (4) Canada—books and journals, 207 entries; (5) faculty and teaching, 199 entries; (6) admissions, 71 entries; (7) curriculum, 104 entries; (8) systems analysis, 113 entries; (9) bibliographic books, 80 entries; (10) establishment, organization, administration, and financing, 218 entries. Preliminary Report [of the] Faculty Professional Growth Committee.

Saint Louis Junior Coll. District, Mo.

Pub Date Nov 74

Note—49p.; Some pages in appendices may reproduce poorly

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*College Faculty, Effective Teaching, \*Evaluation Criteria, \*Faculty Evaluation, Faculty Promotion, Instructional Staff, \*Junior Colleges, Noninstructional Responsibility, Teacher Attitudes, \*Teacher Improvement, Teacher Participation

Identifiers—Saint Louis Junior College District

As a guide to its deliberations, the Faculty Professional Growth Committee of the St. Louis Junior College District prepared and distributed to all members of the professional teaching staff a questionnaire covering what should be included in faculty evaluations, how much weight should be given to each item, and whether teaching effectiveness could best be measured by performance or outcome. Approximately 300 faculty members responded, giving heaviest weight to classroom effectiveness, however measured; least weight to personal life style; and preference to performance over outcome as a means of measuring teaching effectiveness. With the help of the responses to the questionnaire, the committee produced this report which recommends that evaluations for faculty growth be kept separate from evaluations for promotion and retention, and makes some suggestions for ways of promoting growth. The report also specifies what should be considered in promotional evaluations, and the relative weight each item should be given. This report, accordingly, is divided into two parts, with part 1 addressed to growth and development, and part 2 addressed to criteria for promotional evaluation. The questionnaire and tabulated responses are appended. (NHM)

A Descriptive Analysis of Students in Academic Difficulty at the Harrisburg Area Community College.

Harrisburg Area Community Coll., Pa.

Pub Date Mar 75

Note—58p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Academic Failure, \*Academic Probation, College Credits, Educational Policy, Grade Point Average, Grades (Scholastic), \*Junior Colleges, Low Achievers, \*Suspension

Identifiers—Harrisburg Area Community College

The academic suspension policy at Harrisburg Area Community College prescribes minimum grade point averages which must be maintained for students to remain academically eligible. In order to study the effectiveness of this policy, the faculty council held it in abeyance for a period of three semesters. The intent of this research was to compare the academic progress of those students placed on suspension and readmitted after a period of nonacademic activity (Group 1), and those students who would ordinarily have been suspended, but were permitted to re-enroll during the subsequent semester (Group 2). Variables identified included: demographic data, curriculum admitted to, current curriculum; semester suspended, GPA of suspension semester, credits carried during suspension semester; readmit date; GPA's first and second semester after readmit, credits taken those semesters; cumulative GPA, cumulative credits, and graduation. During the period of spring 1970 to fall 1975, 1,302 students were suspended, of whom 259 returned to school, and 21 graduated. In Group 1, 82 percent did not return, and in Group 2, 77 percent did not return. The success (measured by GPA) of students after readmission was lower in Group 2 than in Group 1. Data are organized into 46 tables on the basis of the variables identified above. (NHM)

Willis, Robert N.

Utilization of Instructional Space at Central Oregon Community College, Fall Term, 1974.

Central Oregon Community Coll., Bend.

Pub Date Mar 75

Note—78p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Classrooms, Educational Facilities, Facility Inventory, Facility Planning, \*Facility Requirements, \*Facility Utilization Research, Junior Colleges, Laboratories, \*Space Utilization

Identifiers—Central Oregon Community College

This report focuses on utilization of instructional space at Central Oregon Community College during fall 1974. Utilization as herein defined is restricted in scope and applies only to regularly scheduled classes which meet during the hours listed in the registrar's schedule of class-hour meetings. This study assesses the degree to which available instructional space accommodates the various instructional programs and their corresponding student loads. An equally valuable outcome of this study rests on its value

in estimating future space requirements. Four basic types of rooms are identified: general classrooms, seminar rooms, teaching laboratories, and teaching auditoriums. Relevant considerations include the building in which the room is located, the number of square feet, and the number of student stations. The utilization of instructional space is analyzed according to the following variables: days of the week, hours of the day, building, size of room, class size in relation to room capacity. This report recommends that lectures normally be scheduled in general purpose classrooms, thus freeing laboratories for additional laboratory-oriented classes. Also discussed are courses not requiring the assignment of regular instruction instructional space, and the use of off-campus facilities. Data are organized into 10 tables. (Author/NHM)

The Emergence of the Junior College in the Evolution of American Education: A Memorandum for the Fund for the Advancement of Education.

Spons Agency—Ford Foundation, New York, N.Y.

Pub Date 10 Sep 55

Note—61p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Change Agents, \*Colleges, \*Educational History, \*Junior Colleges, Post Secondary Education, Professional Education, \*Secondary Schools, \*Universities

In an effort to elucidate the forces behind the emergence of the American junior college, this document reviews the evolution of the structure of American education from 1874 to 1921. The historical review begins with 1874 because the decision made that year in the Kalamazoo Case confirmed the right of communities to support high schools by taxation. It ends with 1921 because two pivotal events occurred in that year: first, the organization of the American Association of Junior Colleges, and second, the establishment of the first unitary two-year junior college, namely, Modesto Junior College in Modesto, California. It reviews the historical development of secondary schools, liberal arts colleges, professional schools, universities, and junior colleges in that time period. The author concludes that the junior college of today is an historical accident. A bibliography is appended. (DC)

Clay, Rex J.

The Relationship of Democratic Governance to the Needs Satisfaction of Instructors in Four Selected North Carolina Community Colleges.

Note—25p.; Page 23 of the original document is copyrighted and therefore not available

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*College Faculty, Decision Making, \*Governance, Individual Needs, Job Satisfaction, \*Junior Colleges, Management Systems, \*Need Gratification, Role Perception, Self Actualization, Self Esteem, Teacher Morale, \*Teacher Participation

Identifiers—Democratic Governance, North Carolina

A 10-member panel of judges selected two North Carolina community colleges with a high degree of democratic governance and two community colleges with a low degree of democratic governance. All full-time instructors at these four institutions were mailed a research instrument based on the semantic differential technique, and designed to test six needs: security, social, the esteem of others, self-esteem, autonomy, and self-actualization. One hundred eighty-eight usable responses were returned (59 percent). It was found that democratic governance has a positive, significant relationship to needs satisfaction, especially for academic instructors. Thus, if a community college assigns a high priority to faculty needs satisfaction, its management system should make provisions for involving the faculty in decision-making. In particular, community college administrators should attempt to involve academic instructors in decision-making. Efforts to satisfy the needs of technical and vocational instructors could be concentrated more on classroom-related issues and on benefits. To eliminate role strain, community colleges should try to attract instructors who are committed to the community college philosophy. Data are displayed in four tables, and the semantic differential instrument is appended. (Author/NHM)

Caffey, Musa B.

**The Cloze Procedure: A Measure for Determining Readability Level for Vocational Junior College Students.**

Pub Date Nov 75

Note—15p.; Paper presented at the meeting of the Mid-South Educational Research Association (Jackson, Mississippi, November 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cloze Procedure, \*Junior Colleges, Junior College Students, \*Readability, Reading Ability, \*Reading Comprehension, Reading Level, \*Textbooks, \*Vocational Education

Identifiers—Delgado Community College, SQ3R Study Formula

One hundred students enrolled in the welding and air-conditioning/refrigeration classes at Delgado Community College (Louisiana) were randomly selected to participate in a study to evaluate their effective reading comprehension level, to investigate the impact of a study skill "preview" method such as the SQ3R on their test-taking abilities, and to test the readability level of their textbooks. Fifty students (25 in each subject area) were tested by the regular cloze method of testing readability. The cloze test consists of selecting a passage of prose material of approximately 275 words from the students' textbook and deleting every fifth word. Students are instructed to fill in the blanks with words appropriate to the context. The remaining 50 students were given the cloze test after exposure to a SQ3R "preview" of the material. Since there was little difference between the raw scores of the control and experimental groups in either subject area, it was determined that the SQ3R "preview" was of no value in augmenting test-taking skills. Since students were able to fill in correctly fewer than 38 percent of the blanks, it was determined that the welding and air-conditioning/refrigeration textbooks in current use were probably beyond the readability level of the students. (DC)

Identifiers—\*Gerontology

Since June 1973, Iowa Lakes Community College (Iowa) has been conducting an in-service training program for employees of local nursing homes. The program was designed to upgrade the participants' knowledge of the mental health aspects of care for the aged and to improve their abilities to provide physical health care. The specific objectives of the program were: (1) to demonstrate the role of the community college as a lead agency in linking long-term care facilities and mental health services through the mechanism of continuing education, (2) to develop in participants an awareness and understanding of long-term care resident behavior, (3) to acquaint participants with the patterns of resident behavior throughout the aging process, and (4) to provide participants with an opportunity to upgrade their training at a low cost and with application to their work situation by conducting the training in the facility where employed. This report presents a description of the program and explains its functioning from June 1973 to June 1975. Appended are evaluations made by program participants, project staff members, and third-party evaluators. (DC)

**A Student-Oriented Individualized Learning Program for Calculus at the Community College.**

Note—35p.

## EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Behavioral Objectives, \*Calculus, \*College Mathematics, Curriculum Design, Curriculum Guides, \*Individualized Instruction, \*Junior Colleges, Multimedia Instruction, Teaching Methods

The individualized community college calculus course described here was developed to accommodate differences in student learning rates. It consists of three units: (I) limits and continuity; (II) the derivative with applications; and (III) the integral with applications. There are three sections in Unit I, four sections in Unit II, and five sections in Unit III. The student must pass an examination on each section before he/she may proceed to the next section. An examination for a given section may be repeated only twice, and the amount of points allotted for the examination decreases with the number of tries necessary to pass it. Although the course carries three units of credit, the student may elect to complete only one or two of the units in one semester and to finish the course during the subsequent semesters. Each student works with video-taped lectures and a textbook; regularly scheduled question-answer sessions and personal assistance are also available. The goals and behavioral objectives for each unit are detailed, and sample assignments and exams for Unit I are included. (DC)

General Education: The Los Medanos College Model.

Los Medanos Coll., Pleasant Hill, Calif.

Spons Agency—Bureau of Postsecondary Education (DHEW/OE), Washington, D.C. Div. of International Education.

Note—218p.

EDRS Price MF-\$0.76 HC-\$10.78 Plus Postage

Descriptors—Course Descriptions, \*Curriculum Design, Curriculum Evaluation, Curriculum Planning, Evaluation Methods, \*General Education, \*Interdisciplinary Approach, \*Junior Colleges, \*Models, Program Evaluation, Student Characteristics

Identifiers—Los Medanos College

This book-length study justifies, describes, and gives an initial evaluation of the general education model developed at Los Medanos College (California). The opening chapter presents a detailed philosophic argument in favor of general education as a principle, and in support of the innovative aspects of the Los Medanos model. The argument is for general education as a hub of the total curriculum and as a requirement for the institutional endorsement of a degree. However, Los Medanos has full-blown programs in vocational areas, in transfer fields, and in continuing education as well. The Los Medanos model provides for interdisciplinary generic courses to be offered under the categories of: the behavioral, social, biological, and physical sciences, language arts, and humanistic studies. The 10 chapters of this document address such topics as the local context, generic and discipline courses, intensive student projects, the evaluation design, evaluation of the planning phase, impact of the planning process, problems with the model, and further developments. Enrollment data, demographic data, and program evaluation data are tabulated and included in the body of the document. Also displayed in table form are the Los Medanos governance model, a list of disciplines within each general education area, and schemes of individual courses. (NHM)

Citizens Task Force Study on Aging.

Shasta Coll., Redding, Calif.

Pub Date 14 May 75

Note—46p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Adult Education, Advisory Committees, Community Involvement, Community Services, \*Junior Colleges, \*Older Adults, Program Development, \*Program Planning, \*Senior Citizens

Identifiers—Shasta College

A citizens task force of 25 persons representing the geographic areas and population of Shasta College (Redding, California) district was organized to propose goals for Shasta College in providing services for the older adult population in the district, and to make recommendations concerning a comprehensive continuing program to achieve these goals. The structure for the

study of the subject was divided into four major areas: (1) pre-retirement training and counseling; (2) talent bank; (3) continuing education; (4) health and nutrition. In March 1975, a workshop was held in which over 50 persons representing business, labor, government, churches, and "senior" organizations participated. This report contains a summary of the discussions and opinions of the workshop participants. Although specific step-by-step suggestions for program implementation are not made, general recommendations include: the assignment of a college coordinator to institute programs and services relating to the aging; the establishment of an advisory committee for senior programs and services; budget guidelines; staff development; the general principles of flexibility, coordination and support; and the involvement of regular college student in seniors classes and programs. (Author/NHM)

**The Work Experience Program at Bakersfield College: A Survey of Students, Instructor/Coordinators, and Faculty.**

Bakersfield Coll., Calif.

Pub Date Feb 76

Note—67p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Job Skills, \*Junior Colleges, Student Attitudes, \*Student Characteristics, \*Teacher Attitudes, \*Veterans Education, Vocational Education, \*Work Experience Programs

Identifiers—Bakersfield College

A fall 1975 survey was conducted to appraise Bakersfield College's work experience program. Three survey instruments were developed. The student survey was designed to obtain the characteristics of work experience students, what programs at the college and fields of employment they were involved in, and how they perceived the purposes of the program. The instructor/coordinators were asked questions concerning their teaching and employment background and plans, and their perceptions of the work experience program. Certificated staff, in addition to their perceptions toward the mix of general education and occupational courses a student should take. Respondents included 614 of the 1,053 students in the program (58.4 percent), 27 instructor/coordinators (72.9 percent), and 100 certificated staff members (40.5 percent). Most faculty and a significant minority of instructor/coordinators and students saw the program as primarily attracting students seeking easy units and veterans' benefits. Considering that 84.5 percent of work experience students are veterans, it is impossible to unequivocally deny this interpretation. However, those who are familiar with the program believe it is achieving its purpose of improving job skills and relationships. Responses are tabulated and the survey instruments are appended. (Author/NHM)

**Districtwide Needs Assessment Report. Final Project Report.**

San Diego Community Coll. District, Calif.

Pub Date Sep 75

Note—129p.; Some pages in appendices may reproduce poorly

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—College Planning, Community Attitudes, Educational Assessment, \*Educational Needs, \*Junior Colleges, \*Multicampus Districts, \*Needs Assessment, Participant Satisfaction, \*School Community Relationship

Identifiers—\*San Diego Community College District

In order to develop objective data to assist the Board of Trustees and the District in developing programs, services, and facilities which meet community needs, a comprehensive, five-phased Needs Assessment Project was undertaken. Data for the project were acquired through face-to-face interviews and comprehensive questionnaires. Participants included 725 randomly selected members of the general San Diego community, 154 selected community leaders, 428 District staff, and 965 continuing students and 636 former students. Overall, the District seemed to be a highly visible and fairly well understood resource for the community. Faculty, administrators, and support personnel were generally rated favorably by the respondents. Although the respondents indicated that "cutting back" might

be suitable in some areas, many current programs were recommended for expansion, especially in the area of vocational education. The colleges were generally perceived as having a good relationship with the community. A consensus of the respondents believe that the highest priorities of the District should be in the areas of providing educational opportunities for the physically handicapped and training students to be citizens. Data are summarized in 30 tables, and a copy of the survey instrument is appended. (Author/NHM)

Descriptors—\*Attendance Patterns, College Attendance, \*College Planning, Institutional Research, \*Junior Colleges, Junior College Students, \*Management Information Systems, \*Statewide Planning

Identifiers—\*Hawaii, Student Flow Models

This brief report outlines the preliminary plans of the University of Hawaii to develop a student flow model for its seven community colleges. This model will indicate the flow of students—progressing through class levels, changing majors, leaving or withdrawing from the institution. It will be used as a basic tool for planning and management systems. Before the model is developed, five reports will be made: (1) a summary of the number of students who apply for admission, the number who are accepted to that campus, and the number who actually register at that campus for the particular semester; (2) a study of the "no-shows," those students accepted by a particular campus who did not register there for the term; (3) a summary of attrition rates, end-of-semester changes (withdrawals and graduates), and changes of majors; (4) a study of the present activities of students who were expected to continue their registration, but who "disappeared" between semesters; and (5) a study of the present activities of graduates and their evaluations of their community college experiences. Analysis will be in terms of the community college system total and each campus. Entering students will be classified as "new to higher education" or transfers, and data by sex and program (liberal arts, vocational education, and other), will be presented. (DC)

**ED 116 751** JC 760 070  
Applications, Acceptances and Registrations, Fall 1975. Student Flow Project, Report No. 2.

Descriptors—\*College Admission, Community Colleges, Enrollment Rate, General Education, \*Junior Colleges, Junior College Students, Liberal Arts, School Registration, \*Student Application, \*Student Enrollment, Transfer Students, Vocational Education

Identifiers—\*Hawaii

This report presents the findings of one of several studies intended to form a basis for the development of the student flow model for the Hawaii community college system. In fall 1975, 9,508 students new to higher education and 4,123 transfer students applied for admission to the seven community colleges; 8,886 (94 percent) of the new students and 3,619 (88 percent) of the transfer student applicants were admitted. Three-fourths of the admitted new students and two-thirds of the admitted transfer students actually enrolled. Of the 4,636 new students applying for admission to the liberal arts programs, 4,425 (95.4 percent) were accepted and 3,293 (74.4 percent of those accepted) actually enrolled. Of the 4,073 new students applying for admission to the vocational education programs, 3,711 (91.1 percent) were accepted and 2,751 (74.1 percent of those accepted) actually enrolled. Of the 1,733 transfer students applying for admission to the liberal arts programs, 1,538

(88.7 percent) were accepted and 1,007 (65.5 percent of those accepted) actually enrolled. Of the 1,607 transfer students applying for admission to the vocational education programs, 1,333 (82.9 percent) were accepted and 929 (69.7 percent of those accepted) actually enrolled. Additional tabular data on applications, acceptances, and registrations are provided by sex and institution. (DC)

Descriptors—College Admission, College Attendance, \*Enrollment Influences, Enrollment Rate, \*Followup Studies, \*Junior Colleges, School Registration, \*Student Enrollment

Identifiers—\*Hawaii

This study presents the findings of one of several studies intended to form a basis for the development of a student flow model for the Hawaii community college system. In order to discover why students, admitted for fall 1975 by a particular community college, did not enroll at that campus, a questionnaire was sent to 3,240 "no-shows." The total response rate was 66 percent. An analysis of the characteristics of the respondents showed that they were representative of the total "no-show" population in terms of applicant status, program, and sex. Results indicate that over half of the respondents were actively engaged in other activities: 28 percent working, 19 percent attending other educational institutions, and 4 percent serving in the military. Ten percent of the "no-shows" indicated financial reasons for not enrolling and 13 percent indicated the unavailability of the program or course desired. Data is further broken down in the report to indicate the reasons cited by respondents, by sex, by program (liberal arts or vocational), and by permanent home address (State of Hawaii or U.S. Mainland), by "new" or transfer student status, and by community college applied to. Detailed data is presented in tables appended to the text. (DC)

Follow-Up of Maple Woods Community College Occupational Graduates, 1970-1974. Final Report.

Maple Woods Community Coll., Kansas City, Mo.

Pub Date Mar 75

Note—54p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Employer Attitudes, Followup Studies, \*Graduate Surveys, \*Junior Colleges, \*Participant Satisfaction, Relevance (Education), Student Attitudes, Vocational Education, \*Vocational Followup

Identifiers—Maple Woods Community College

Two hundred fourteen graduates of seven occupational disciplines constituted the survey population for this 1970-74 follow-up study. The 141 usable responses to the mail survey represent a 65.9 percent rate of return. The survey instrument was designed to initiate responses from the graduates in terms of: (1) appropriateness of the course of study to the work situation; (2) possible improvements of the course of study; (3) work history; (4) name and address of present employer and supervisor; (5) the nature of work; and (6) salary. Upon receipt and tabulation of the data, a second questionnaire was prepared and mailed to employers and supervisors to determine the adequacy of training from the college with reference to the needs of the employment position. A usable return of 86 responses (81.9 percent) was received. Results indicate that a majority of the graduates are working full-time in positions directly related to their area of study; the graduates have found the curriculum presented by the college appropriate to their work responsibilities, and are satisfied and impressed with the quality of instruction at Maple Woods Community College; employers were satisfied and impressed with the graduates in terms of their skills, general preparation, and attitude toward work. Identifiers—\*Richland College, Texas (Dallas)

Richland College's (Dallas, Texas) Human Resources Development Center (HRDC) offers many valuable non-instructional services to all members of the community, without requiring college enrollment. Services which have been requested have fallen into five basic categories: individual personal counseling, group counseling, family counseling, professional development for educators, and seminars and workshops designed for small business management personnel. The professional staff for HRDC has been carefully selected to assure expertise in each type of counseling. Staff counselors and psychologists, all of whom hold either doctoral or masters degrees, have previous work experience in mental health research centers, state hospitals, colleges and private practice. Consultants in the fields of psychiatry, finance, and management have been obtained by the center for dealing with specialized problems. The center is operated on a break-even basis. The fees paid by clients (\$13 per hour) are used to reimburse the professional staff. Administrative costs are defrayed through grants and college district funds. Since the beginning of fall semester, 1974, 918 clients have been counseled in approximately 10,000 counseling hours, in addition to the hours devoted to seminars and workshops. (NHM)

**Identifiers**—\*Los Angeles Community College District, New Dimensions College, Nontraditional Colleges

This document presents a plan for a new district-wide college, the New Dimensions College, which would incorporate a wide range of external, nontraditional programs, moving such concepts out of the realm of experimentation and into the realm of active application. The total approach presented here would have the entire Los Angeles Community College District as its service community, and would provide programs too costly or impractical for the 10 individual campuses through a college-without-walls. This report is organized along the lines of the research, discussions, and reflections of a 12-member planning Commission organized in April 1975, and is divided into eight chapters. Chapter I discusses the formation, assignment, and organization of the Commission. Chapter II discusses the need for new planning and organizational strategies. Chapter III describes current district-wide programs and services, including the overseas program, programs for individuals, cooperative and community programs, and student and media services. Chapter IV presents three possible organizational models, along with a recommended model for which personnel and financing are discussed. Chapters V and VI deal with innovations in programs and services. The concluding two chapters deal with needs assessment, detailed planning, and implementation. (NHM)

**Descriptors**—Administrative Personnel, Administrator Role, College Faculty, Comparative Analysis, \*Decision Making, \*Governance, \*Higher Education, Junior Colleges, \*Power Structure, State Colleges, \*Teacher Participation, Teacher Role

Five issues of mutual interest to faculty and administrators were chosen as the focus of this comparison of existing distributions of authority at three public state colleges and three public community colleges in Pennsylvania. Issues selected include: appointment, promotion, tenure, merit (salary increments), and curriculum. For the purpose of this study, the decision-making process was sequenced into six stages: initiation, consultation, recommendation, review, choice, and veto. At least 10 faculty and 10 administrators from each institution were interviewed and asked to describe their participation in the six stages of the decision-making process in regard to the five issues under investigation, and to relate their observations of the involvement of other personnel. Respondents based their evaluations on a five point continuum: administrative dominance, administrative primacy, shared authority, faculty primacy, and faculty dominance. The community colleges in the sample generally were characterized by administrative dominance or administrative primacy, although there was evidence of increasing consultation with the faculty. On the other hand, the state colleges were likely to be characterized by shared authority or faculty primacy. Faculty involvement was high on the curriculum issue for both types of institutions, followed by promotion, and low on merit. (Author/NHM)

sident Camp Programs, Special Education, \*Teacher Aides

In summer 1975, McLennan Community College selected 64 counselor-trainees to participate in two 2-week summer camp sessions, each of which involved 50 deaf or hard of hearing children, ranging from 7-12 years of age. Trainees had minimal manual communication skills, and were selected from applicants who were either enrolled in training programs related to working with the deaf or hard of hearing, currently working in paraprofessional roles in this field, or interested in exploring this career opportunity. Each trainee was enrolled in McLennan Community College and received either four or five semester hours of credit for the four weeks of experience and training. Trainees worked directly with the Camp Director and Resident Coordinator and were responsible for a particular instructional activity (swimming, canoeing, horseback riding, archery, riflery, and nature study). The Camp Director and Coordinator worked together in orienting the trainees in the organization and operation of the camp. Instruction was given in child growth and development, with emphasis on social development principles, behavior modification, recreation skills and crafts for individuals and groups, and total communication skills including finger spelling, signs, body language, and vocabulary. Sample training materials are appended. (DC)

McLennan Community College is presently involved in a three-phase project designed to develop and implement a coordinated program of supportive services that will enable physically and sensorially limited adults to pursue occupationally oriented training-educational programs. This report of Phase I (January-June 1975) presents the following: (1) descriptions of exemplary programs of individualized supportive services for the physically and sensorially handicapped at five community colleges; (2) the results of a survey sent to 120 post-secondary institutions in Texas to gain an overview of the number of handicapped students enrolled in those institutions and the kinds of supportive services provided for them; (3) a list of the supportive services available from local agencies; (4) a discussion of viable procedures to be followed in identifying and recruiting potential students; (5) a consideration of the psychological and physical/architectural barriers on campus; and (6) descriptions of the kinds of supportive services needed. A bibliography and a list of procedures and policies for architects and building owners are appended. (DC)

**Descriptors**—Educational Accountability, \*Educational Assessment, Educational Objectives, \*Evaluation Methods, \*Junior Colleges, Literature Reviews, \*Program Evaluation  
 This paper derives its foundation from recent concepts of accountability in education. Accountability presupposes a determination of the goals (i.e. the mission) of the educational com-

ponent and what constitutes the achievement of those goals (i.e. evaluation). The basic design for the evaluation program described here is the self-study approach by committee, which is used by regional accrediting agencies. This flexible method may be conducted entirely by internal personnel, may utilize an outside consultant, or may involve a combination of the two. It consists of three major components: (1) an assessment of the present environment, (2) an analysis of the data by members of the study team, and (3) a written summary report to be used as a basis for determining program continuance or modification. This document describes the evaluation program, discusses the various purposes and methods of evaluation, and reviews the related literature. A bibliography is appended. (DC)

 In fall 1974, Forest Park Community College (FPCC), a predominantly black, inner-city two-year college in St. Louis, Missouri, participated in the Cooperative Institutional Research Program, which is conducted annually to provide normative data on first-time freshmen students entering a national sample of colleges and universities. At FPCC, a total of 1,671 first-time freshmen completed the questionnaire, representing 83 percent of the first-time freshmen enrolled. A random sample of 1,515 returning students also completed the form. The first six tables presented here compare the characteristics of first-time freshmen at FPCC with those of the national norm for first-time freshmen at two-year public colleges. The remaining six tables compare the characteristics of first-time freshmen at FPCC with those of returning students at FPCC. Factors considered include (1) biographic and demographic data; (2) reasons for college choice, career goals, and educational goals; (3) income data and sources of financial support; (4) personal objectives and self-assessment; and (5) attitudes toward political issues, general issues, and college issues. Identifiers—\*Hawaii

In fall 1975, 4,702 students transferred into the University of Hawaii (UH) System, representing a 15.5 percent increase over the number of transfers in 1974. Of the total, 56 percent transferred from within the UH System, 6 percent transferred from other Hawaii institutions, and 36 percent transferred from out-of-state institutions. The total numbers of transfers from within the System in 1975 represents an 8.7 percent increase over the 1974 figures. The University of Hawaii at Manoa (UHM) received 1,999 transfers; Hilo College received 300; and the seven community colleges received 2,403. Sixty-one percent of the transfer students entering UHM chose arts and sciences programs, and 14 percent entered as unclassified students. Greater proportions of students entering Hawaii, Honolulu, and Kapiolani Community College selected vocational programs, whereas more of those students entering Kauai, Leeward, Maui, and Windward Community Colleges selected liberal arts programs. Data for the 1973, 1974, and 1975 academic years are organized into three tables with are appended. (DC)

Descriptors—Core Curriculum, \*Educational Alternatives, \*Experimental Colleges, \*Humanistic Education, Humanities, \*Interdisciplinary Approach, \*Junior Colleges, Program Development, Relevance (Education)

This document describes the evolution of the Exploratory College at Rio Hondo Junior College (Whittier, California) from its inception at a faculty retreat in 1970 through its first year of operation in 1972-73. The Exploratory College was designed as an alternative center for exploring new ways of learning within the college community. By being a smaller, primarily interdisciplinary nucleus, it reflects the need for modes of experience that are more commensurate with individual and group goals than is traditionally possible. Goals of the Exploratory College include: (1) the creation of a center for exploring new ways of learning; (2) the creation of

a relaxed learning setting with flexible scheduling; (3) the provision of guidance in the determination of personal and professional goals; (4) an increase in the self-awareness of students and faculty; (5) the perception of the interrelatedness of various academic disciplines; (6) involvement in the community as an integral part of the learning environment; (7) the provision of standard college credit within a non-threatening grading system; (8) the development of personal values and attitudes through exposure to the values and attitudes of different cultures. A general student evaluation is appended, along with a list of goals and specific objectives. (Author/NHM)

Descriptors—College Admission, College Choice, \*Enrollment Rate, \*High School Graduates, \*Junior Colleges, Post Secondary Education, \*State Surveys, \*Universities

Identifiers—\*Hawaii

This report summarizes data on the high school background of students entering the University of Hawaii System for their first collegiate work since high school. The population is comprised of all new students at the two-year and four-year campuses between fall 1972 and fall 1975. Each of the five tables in the report examines a select group of entering students, as follows: (1) all entering students, regardless of high school background; (2) students entering from Hawaii State high schools, only; (3) June 1975 Hawaii State high school graduates; (4) 1972-75 Hawaii State high school graduates; (5) June 1975 Oahu high school graduates. The 9,158 students entering the University of Hawaii System in fall 1975 represent an increase of 3.6 percent over the 8,837 students entering in fall 1974. Over 70 percent (6,579) of these students entered the community colleges, of which 12.9 percent came from non-Hawaii high schools. The proportion of Hawaii State high school graduates entering the University of Hawaii System immediately after graduation has remained about 43-44 percent during the past three years. Of the graduates entering the system immediately after graduation, more students are choosing to enter the community college campuses rather than the four-year University of Hawaii at Manoa. **Virginia Community College Mathematics Curriculum Study (1975-76).**

Virginia State Dept. of Community Colleges, Richmond.

Pub Date May 75

Note—35p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Articulation (Program), \*College Mathematics, Course Descriptions, \*Higher Education, Junior Colleges, \*Mathematics Curriculum, Teacher Attitudes, Textbooks, Undergraduate Study

Identifiers—\*Virginia

This report correlates the college transfer mathematics courses in the Virginia community colleges with their counterparts at 13 state four-year colleges and universities. Data were collected by examining four-year college catalogues, correlating this information with course descriptions in the Virginia Community College Curriculum Guidelines (VCCCG), and surveying mathematics department chairpersons to validate the correlations. Of the 66 different mathematics sequences described in the VCCCG, 16 have potential counterparts at the senior colleges. The remainder are either remedial or especially designed for technical or vocational programs. Of the 16 equivalent courses, six are taught by almost all the Virginia community colleges. Although it appears that the mathematics courses listed in the VCCCG are well designed to meet the needs of Virginia's two-year college transfer students, one possible exception is the absence of a course specifically designed to provide a mathematics background for the elementary school

teacher. Summaries of the general comments offered by the four-year college mathematics chairpersons concerning curriculum articulation are included, information is organized into five tables, and lists of textbooks used at the community and four-year colleges are appended. (NHM)

Identifiers—\*Learning Institute of North Carolina

This report represents a statewide survey of child care services in North Carolina, including day care centers, family day care homes, nursery schools, and kindergartens. Interviews were conducted to ascertain the extent to which North Carolinian children were receiving adequate health care, adequate nutrition, and other basic care. Data on family income, family member occupations, family life, and child care costs were compiled. The status of parent education programs and parent involvement in child care services was evaluated. Federal and state support of child care services was surveyed. Statistical data on child care services collected during the survey and by the U.S. Census Bureau are presented in tables. Analysis of these data and recommendations for improvement of child care service delivery in North Carolina are included. (BRT)

Descriptors—\*Cognitive Development, \*Educational Research, Handicapped Children, \*Literature Reviews, Parent Child Relationship, Parent Education, \*Preschool Education, Remedial Programs, Research Needs, Research Problems, Research Projects, School Organization, Severely Handicapped, \*Social Disadvantage, Teacher Attitudes, Teacher Education

Identifiers—\*England, Social Science Research Council

This report presents a review of current research on the education of British children under the age of 5 and suggests important questions for future research. The description of current research includes studies concerned with preschools, home environment and parent-child interaction, cognitive skills, severely subnormal children, and evaluation of services for under-fives. Important areas for future research are grouped into two categories: (1) topics related to the education of socially disadvantaged children, such as assisting young disadvantaged children to acquire skills, determining the characteristics of socially disadvantaged children, transmitting educational and intellectual disadvantage, and adapting school to the socially disadvantaged child; and (2) areas not directly related to the education of socially disadvantaged children, including problems of school organization, staff attitudes, transition to primary school, staff training, research into severely subnormal children's education, problems in early school socialization, problems in early cognitive development and the general provision of services for under-fives. General issues raised in discussions with educa-

tors and research administrators are also reported; these include the communication and implementation of research findings and the allocation of research funds. Appendices comprise a name index, a list of current research projects, and references. (GO)

**The Effect of Two Types of Initial Training on Discrimination Shifts by Preschool Children.**

Pub Date 10 Apr 75

Note—13p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Attention, \*Discrimination Learning, \*Mediation Theory, \*Preschool Children, \*Preschool Learning, \*Shift Studies, Transfer of Training

Identifiers—\*Attention Theory, Extradimensional Shift, Intradimensional Shift, Pretraining

This study examines the effects of initial response training and criterion training on the discrimination shift performance of preschool children; results are discussed in terms of differing theoretical orientation. After an initial task involving either criterion training or response training, 109 subjects were presented with either intradimensional shift (ID) or extradimensional shift (ED) problems. Subjects who failed to learn the criterion training task (nonlearners) were found to learn the ED shift more quickly than the ID shift. These results are best explained in terms of mediation theory, since an explanation based on the single stage process would require that preferences or dimensional dominance increased the initial habit strength for the irrelevant cue or dimension. Attention theory could also explain these results, because attention to relevant and irrelevant dimensions determines the ease of shift learning. The response-trained group, after 10 trials of reinforced motor training, learned a reversal (ID) shift more rapidly than the ED shift. This finding can be explained in terms of attention theory, because alteration of orienting probabilities would result in shift performance demonstrated by children who went through all the work of attaining criterion. Since such results are not well explained by mediation theory, the attentional model of children's learning is supported. (GO)

**A Reevaluation of Age-Related Changes in Associative Memory Organization.**

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Report No.—NE-G-00-3-0089

Pub Date 11 Apr 75

Note—10p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Aural Stimuli, Cognitive Development, \*Elementary School Students, \*Error Patterns, \*Memory, \*Paired Associate Learning, Recall (Psychological), Word Lists, \*Word Recognition

Identifiers—\*Associative Memory

This paper focuses on a study which replicates and extends earlier work employing a recognition memory paradigm to investigate children's memory and developmental changes in dominant word associations. On the recognition test the implicit associative response can lead to better memory for the original items (this is the hit rate), and it can also lead to errors on associates which are new items (this is the false-alarm rate). The paradigm predicts that children given instructions would make fewer errors on old items (higher hit rate) yet more errors on associates (higher false alarm rate). Children from second and sixth grades were presented lists of words orally and asked to state the meaning of each word and generate its associative antonym or synonym. Results indicate a number of methodological problems with a recognition memory paradigm where the false alarm rate is employed as an index of developmental change and suggests that the synonym-antonym developmental shift in memory organization should be treated with caution. Descriptors—Age Differences, \*Cognitive Development, Cues, \*Elementary School Students, \*Linguistics, \*Memory, \*Recall (Psychological), Statistical Analysis

Identifiers—\*Constructive Memory

This paper describes three studies designed to determine whether there are age-related differences in children's memory for implicit and explicit information in prose. In the first study, six experimental paragraphs were read individually to a total of 60 children in grades K-5. Each child was then asked four verbatim recall questions (specific adjectives and prepositions) and four inferential questions. The results indicated that the amount of both explicit and implicit information comprehended from the paragraphs increased with age. Due to a question about the saliency of adjectives and prepositions in sentences, the second study used verbatim recall questions with nouns and verbs. A total of 48 children in grades K, 2, and 4 participated in this study and were administered the same tasks as in the first study plus a delayed free recall task. The results showed specifically that the ability to draw and remember inferences improved with age. The third study used a cued recall paradigm to determine whether the spontaneity of inference drawing was related to age. A total of 48 children in grades 1, 3, and 5 heard action sentences with the instruments used stated explicitly in half of the sentences and only implied in the other half. They were then given a cued recall test which included the appropriate instrument nouns. Results suggested that children apply inferential operations more often and more effectively with increasing age. (JMB)

**The Meaning of Fear.**

Educational Testing Service, Princeton, N.J.

Spons Agency—National Inst. of Mental Health (DHEW), Bethesda, Md.

Pub Date Apr 75

Note—17p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Affective Behavior, \*Behavior Patterns, \*Emotional Development, Expectation, \*Fear, \*Infant Behavior, Learning, Measurement Techniques, Models, Stimulus Behavior, Stranger Reactions

Theories and descriptions of various infant fear behaviors are presented in this paper. Five examples of fear are given: (1) learned fear, in which the infant associates some unpleasant action with an agent, (2) unlearned fear, in which the infant experiences an intense sensory phenomena such as a loud noise, (3) stranger anxiety, (4) fear caused by a violation of the infant's expectancy, and (5) the child's fear of the loss of its mother. No specific behaviors have been found which are characteristic only of fear. Patterns of infant behavior can be interpreted as fear within the situational context in which the behavior occurs. Problems in the measurement of fear behavior, such as individual variability, the interpretation of stimulus meaning to infants, and the effect of prior experience are discussed. It is theorized that an infant's affective response is the result of a complex process involving the organism's status, cognition plans, and strategies, as well as the stimulus properties and the context of the situation. Descriptors—\*Child Care Centers, \*Comparative Analysis, \*Day Care Services, \*Early Childhood Education, Early Experience, \*Family Day Care, Infants, Interpersonal Relationship, Learning Experience

This paper discusses issues concerning infant family day care in terms of data gathered at the Louis Child Care Center and other related studies. Topics covered are: (1) the need for family day care, (2) the form that services should take, (3) agency supervised family day care, (4) what family day care is, (5) the continuity of care from infancy to school age, (6) convenience to parents of a community based service and service for all age siblings, (7) the family model for day care and presence of male models in family day care homes, (8) employment opportunities for young mothers, and (9) the quality of care. The special advantages of family day care over group care are indicated, and it is noted that family day care has a personalized quality not found in group care. The day care home appears to benefit infants and toddlers particularly because less adjustment is required of the child and because there is opportunity for a more individualized continuous relationship between caregiver, parent, and child. The present criticism of family day care appears to be related to the quality of personnel rather than to the actual model involved. (GO)

**Identifiers—**Erickson (Erik H.) Freud (Sigmund), Piaget (Jean), \*Stage Theories  
Similarities and differences between Erik H. Erikson's and Jean Piaget's theories concerning social development and the process of identification are explored in this report. The first part of the report is a synthesis of Erikson's concept of the developmental processes of personal growth and societal development. The second part integrates Piaget's theory of affective development and Erikson's theory of childhood psychosocial development. The third part compares major theories of identity formation, including: (1) the psychoanalytic conceptions of ego, self, and identity, (2) the theories of identity formation advanced by B. F. Skinner, Carl Rogers, and George H. Mead, and (3) the different conceptions of the relationship between self and society in these theories of identity. A reformulation of the concept of identity is suggested. (BRT)

**Identifiers—**Contingency Interview, \*Experimenter Characteristics, Project Head Start, Stephens Delys Reinforcement

Four experiments were designed to identify socioeconomic differences in preschool locus of control, develop a measurement technique for differentiating between internal and external locus of control in preschoolers, and study the effect of four kinds of preschool programs on locus of control. During the first experiment, the Stephens-Delys Reinforcement Contingency Interview (SDRCI) was developed to assess internal locus of control development in preschoolers. When used with 24 4-year-olds in a Head Start program, the measure was found to have rater and retest reliability; the race of the interviewer did not significantly affect scores. The second experiment indicated that the performance of 32 preschool boys on a mirror-tracing task was positively related to internal locus of control as measured by the SDRCI. In the third study, investigators tested 55 Head Start preschoolers and 50 middle-class nursery school children with the SDRCI. Lower internal control scores were found for the Head Start children than for the middle-class nursery school group; no differences were found between black and white Head Start groups. A final study of 114 children found a nonsignificant tendency for Montessori preschool experience (and to a lesser extent, parent cooperative nursery school experience) to increase internal control, as measured by the SDRCI, more than Head Start or a more structured compensatory preschool program. **Identifiers—**\*Community Coordinated Child Care, MALE IMAGE Project, Project Head Start

This report describes the goals and results of a 2-year project which employed 20 male high school students from low income families for two hours per week as teacher assistants in seven day care centers and preschool programs, thereby providing male contact for children from female-dominated, single-parent families enrolled in female-dominated centers and programs. Students videotaped some of their activities with the children, and the tapes are shown twice weekly to local cable TV subscribers. Personality and school attendance measures were collected for the high school students. In addition, student participants and teachers in the centers filled out several evaluation forms. Self-concept and cognitive development measures were collected for both the experimental and control groups of preschool children, a total of 214 subjects. Results indicated that the program was successful for the high school students. However, no statistically significant differences were found between the groups of preschool children. Conclusions and recommendations are offered. Appendices include description of the self-concept test, examples of evaluation forms, and case studies of several students. (ED)

**Descriptors—**After School Activities, \*After School Centers, After School Education, \*After School Programs, \*Day Care Programs, \*Elementary Education, \*Family Day Care, Legal Problems, School Recreational Programs, School Role, Space Utilization, Staff Role, State Standards, Summer Schools

This 2-year study describes existing day care arrangements for school age children and examines the problems of providing day care for these children. A total of 30 day care centers and 73 family day care homes were included in the analysis, based on observation and interview schedules developed for the study. In addition to a general description of the population served, the types of available group care experiences are described. Problems of providing day care to school age children involve space and equipment utilization, licensing, staffing and staff training, and problems caused by regulations, procedures, and legal liability. Physical separation from the community and the lack of opportunities for personal initiative are identified as basic activity program problems. Suggestions for remediation of these problems are offered; and several models for group day care arrangements in conjunction with public schools are described. (ED)

**Identifiers—**\*Harvard Preschool Project

This report describes a pilot project which involved the development and evaluation of an experimental treatment (training program) suitable

for a longitudinal study in which the effects of child rearing practices on general competence in young children are being studied. Eleven families participated in the pilot training program which concentrated on teaching parents successful child rearing practices prior to and during the period when identified educational foundations are at risk in infants 8 to 24 months of age. Both group training sessions and home visits were included in the program. Evaluation methods included home observation of parent-child interactions, child behavior in social and nonsocial tasks, and children's social competence; and several administrations of the Bayley Scales of Infant Development and the Preschool Project Tests to determine language ability, capacity for abstract thought, and the capacity to sense discrepancies. Results indicated the program was reasonably effective. Appendices make up more than 3/4 of the report and include: (1) criteria for family selection and the eligibility and preliminary interview forms; (2) the working draft of the training program (more than 1/2 of the report); (3) checklists and rating scales of the adult assessment scale; and (4) scoring information for social competence observation. **Identifiers—**\*Structured Programs

This research project evaluated and compared three educational programs of high, medium, and low structure in family day care settings for a period of 10 months, to determine their impact on cognitive and social development in 60 children aged 2 1/2 to 4 years. The high-structure program followed the Bereiter-Engelmann approach, the medium-structure program was an adaptation of Levenstein's Verbal Interaction Program, and the low-structure situation involved friendly visitation with a child by an adult with no consistent philosophy or pedagogical program. A total of 52 children was assigned to experimental groups which differed on two main dimensions: the degree of structure and the delivery system. The two delivery systems consisted of paraprofessional teachers either working alone with the children or cooperating with the day care mother. In addition, eight children were assigned to a family day care control condition. Results of pre- and posttesting with three cognitive measures indicated that children in each of the intervention groups showed improvements above those of the control group, but that there were no differences between intervention groups. No distinct pattern of effects was found on the sociobehavioral ratings made by teachers for any of the experimental groups. (GO)

Negroes, Parent Attitudes, Social Attitudes, Spanish Speaking, \*Welfare Recipients, \*Working Women  
**Identifiers**—\*New York (New York)

This study analyzes the day care-related perceptions of a group of low-income women who voluntarily enrolled their children in group day care in order to obtain or maintain employment, and explores the employment experiences of these women. Face-to-face unstructured interviews were conducted by trained black or Hispanic interviewers with 157 New York City black, Puerto Rican, or Hispanic mothers who had been on welfare when they enrolled their child in day care. Results showed that mothers maintained a strong positive attitude towards day care programs, services, and personnel. Educational benefits, supervisory services, and other child-centered factors were the primary reasons that the women perceived day care positively. The availability of group day care appeared to support their initial decision to work. Most women decided to go to work for financial reasons, although the jobs they secured were usually low status ones with low wages. Success in employment was found to be positively related to amount of education, working experience, and a favorable job market. Findings are discussed in light of past research in this area, and recommendations are made to increase the effectiveness of social welfare programs. (BRT)

**Identifiers**—\*Television Advertising and Children Project

This report, the first in a series of six reports on television advertising and children, presents the findings from a study designed to examine the impact of various advertising practices on the knowledge, attitudes, and behavior of young children. A total of 500 preschool and grade school children from both working-class and middle-class backgrounds participated in the study; over two-fifths of the sample was black. Experimental versions of advertisements were inserted into a cartoon program which was shown to the children. There were nine areas of experimental manipulations: (1) premium offer strategy (a toy offered with a breakfast food), (2) exaggerated product performance claims, (3) program characters appearing in commercials, (4) racial characteristics of the performers in the commercials, (5) rational message strategy, (6) learning about littering from public service announcements, (7) consequences of the advertising of medicine, (8) product accessory disclaimer (i.e., batteries not included), and (9) clustered versus dispersed structure of commercial presentation. A hidden camera measured the children's eye contact and reactions while they watched the program. The children were personally interviewed or placed in a play situation after viewing the stimulus tape. The findings for each of the nine experimental manipulations are presented, and the responses to the commercials by age and race are discussed. (JMB)

**Identifiers**—\*Television Advertising and Children Project

This report, the second in a series of six reports on television advertising and children, presents the results from a series of experimental studies designed to test children's intentional and incidental learning from television commercials. A total of 400 elementary school students of varying socioeconomic status participated in the study, with 50 second-third graders and 50 fourth-fifth graders in each experimental condition. The children viewed stimulus tapes containing children's news, entertainment, and advertising content and then circled answers on a questionnaire read by an experimental assistant. The content of the commercials was manipulated across conditions, with subjects seeing different video or audio versions of an ad (some subjects were exposed to a particular commercial and others not exposed). The questionnaire measured several cognitive, affective, and behavioral intention variables for each of nine experimental advertising manipulations. The manipulations were: (1) occupational sex role socialization, (2) recreational sex role socialization, (3) adolescent hygiene socialization, (4) learning about health from public service announcements, (5) learning appropriate medicine usage, (6) hero-figure endorsements, (7) sex of announcer's voice, (8) comparative message strategy, and (9) message repetition. The findings for each manipulation are presented, and the differential impact of each manipulation is considered within age and sex subgroups of children. (JMB)

**Descriptors**—Child Language, Correlation, \*Elementary Education, \*Language Development, \*Language Research, \*Television Research, \*Television Viewing

**Identifiers**—\*Television Advertising and Children Project

This report, the third in a series of six reports on television advertising and children, describes a study designed to determine how the massive exposure to television affects children's language development. A total of 153 children in grades K-6 were interviewed about the entertainment, informational, and advertising content of 24 programs popular with children. The language maturity of the children was assessed using a word association paradigm to measure the complexity of their recognition of the relationships among words in the language. Respondents were divided into four age groups, and partial correlations were computed between television viewing and language maturity, controlling for intelligence, number of older siblings, and socioeconomic status. Averaging across the four age groups indicated a slight negative partial correlation between viewing and each language variable, suggesting that television exposure generally inhibited language development. Slopes were graphed to determine how television viewing affected the rate of development across each point in time compared to the previous norms. This analysis provides further evidence of the retarding effect of television viewing, especially in the 8- to 11-year-old range. (JMB)

**Descriptors**—\*Attitudes, \*Children, \*Television Commercials, \*Television Research, \*Television Viewing

**Identifiers**—\*Television Advertising and Children Project

This report, the fourth in a series of six reports on television advertising and children, describes attitudes toward children's television advertising held by industry executives, government officials, and consumer critics. The accuracy with which each group perceives the positions of the other parties involved is also assessed. Data were collected by means of a questionnaire (mailed) which presented 29 attitude statements to be rated along an agree-disagree scale. The analysis of these data revealed that the Action for Children's Television (ACT) sample generally took a position on one side of the issue, the advertiser and agency samples took a position on the opposite side, with the government sample tending to fall in between. The areas in which the consumer and industry groups were far apart on the attitude rating scale included: (1) the need for regulation, (2) locus of regulation, (3) effects of commercials, (4) evaluations of advertisers and advertising, (5) products allowed on television, and (6) proposals for the future. The advertisers, agency personnel, and government officials tended to be highly accurate in estimating the ACT group's positions on key issues, but estimates of the advertising agency positions were somewhat more extreme than their actual attitudes. (JMB)

Processes of Language Teaching and Language Learning in the Interactions of Mother-Child Dyads.

Pub Date Apr 75

Note—35p.; Portions of this paper were presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Child Language, \*Infants, \*Interaction Process Analysis, \*Language Development, Language Instruction, Language Learning Levels, Mothers, \*Parent Child Relationship, \*Verbal Communication

This study focuses on the significance of specific maternal language teaching techniques in the early language development of the child. A recording was made of the verbal and nonverbal interactions in 20 mother-child dyads during a one-hour session in the home. The linguistic level for each of the children, who ranged from 1.9 to 5.0 years in age, was computed from the average length of utterance, and the stream of verbal actions was divided into verbal episodes. These episodes, comprising one or several utterances of each interaction partner which are temporally contiguous, meaningfully related, and form a structural whole, formed the basic unit of analysis. Results indicate that mothers actively teach all aspects of language and that the interactional structures employed in the course of this teaching encompass feedback cycles and calibration processes. The mother-child dyad is described as a self-regulating and relatively closed system and it is suggested that the amount, the type, and the timing of the observed teaching/learning processes suffice to explain the phenomena and products of first language acquisition. O'Connor, Margaret

Decentration Revisited: A Two-Factor Model for Role-Taking Development in Young Children.

Pub Date Apr 75

Note—12p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cognitive Development, Concept Formation, \*Egocentrism, \*Empathy, Identification (Psychological), Preschool Children, \*Preschool Education, \*Social Development

Identifiers—Conceptual Tasks, \*Role Taking Skills, Spatial Tasks

This study investigates spatial and conceptual role-taking at the preschool level to determine the components of and relationship between these two forms of role-taking. A total of 80 children between 3 and 5 years of age were tested individually on four spatial tasks and five conceptual tasks and rated on the levels of egocentrism employed. Analysis of the data suggests that elementary role-taking problems are most profitably understood in terms of the component skills required to solve them, and that these components have a step-like interlocking nature which suggests a stable path for advancement in the acquisition of role-taking. The decline of egocentrism appears to depend on the presence of functional relationships in the task which do not exceed the capacities of the child. It is suggested that role-taking episodes do not demand overall decentration but that various types of skills are tapped by various role-taking tasks. (GO)

Descriptors—\*Developmental Programs, \*Diagnostic Teaching, Diagnostic Tests, Grade 1, Home Programs, Individualized Programs, \*Kindergarten, Learning Disabilities, Middle Class, \*Parent Participation, Parent Teacher Cooperation, \*Primary Education, Program Descriptions, Program Evaluation, Questionnaires, Remedial Instruction

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, \*Personalized Programs

This final report describes a personalized kindergarten program which has three main features: (1) systematic observation of the individual learning needs of kindergarten children, (2) staff training to assist teachers in developing and using methods for personalizing their classroom programs, and (3) involvement of parents in implementing at-home activities, sharing information about the child, attending parent enrichment workshops, and assisting in project evaluation. Approximately 220 children in eight kindergarten classes were involved each year. The average entering subject was a middle class child 5.5 years old, who had one sibling and had attended nursery school for one year. Each child was evaluated on a basic diagnostic measure, the Kindergarten Inventory of Development (a combination of the Boehm Test of Basic Concepts and the McCarthy Scales of Children's Abilities), which identified 20 percent of the children as high risk. Half of the high risk group received an at-home parent-directed program in addition to the personalized school program received by all children. All high risk children showed good progress, with the group receiving supplementary at-home enrichment achieving highest maintained gains. Data analysis showed the percentages of entering kindergarteners who lagged in one or more areas of development. Appendices include many examples of teaching procedures and materials used in classrooms or at home. (GO)

Moral Behavior from a Cognitive Social Learning Viewpoint.

Pub Date 10 Apr 75

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cognitive Ability, \*Cognitive Development, \*Cognitive Processes, Empathy, \*Moral Development, \*Moral Values, Predictive Validity, \*Reinforcement, Social Influences

Identifiers—\*Cognitive Social Learning, Role Taking

This paper deals with one view of cognitive social learning and its applications to the psychological analysis of moral competence and moral conduct. The concept of cognitive and behavioral construction competencies is explained and cognitive competencies are said to be among the very best predictors of "honesty" in conduct. Moral competence includes the ability to reason about moral dilemmas, the skill of role-taking, and the kind of empathy required to take account of long-term consequences of actions as they affect other people. Although an individual may be capable of moral conduct, his decision on whether to act morally at any given time depends on his behavior-outcome expectancies. The young child's behavior is governed primarily by expected immediate, concrete consequences for himself, but as he matures the evaluation and reinforcement of his behavior become increasingly independent of external rewards and punishments and include more temporally distant and abstract considerations and self-reactions. It is thus concluded that age-related changes in the style and content of moral reasoning and conduct reflect changes in the individual's cognitive and verbal capacities in interaction with the social learning variables salient for him at different points in the life cycle. Moore, Bert And Others

Cognitive Factors in Delay of Gratification.

Pub Date Apr 75

Note—6p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cognitive Processes, Pictorial Stimuli, \*Preschool Education, Reinforcement, \*Rewards, \*Self Control, \*Stimulus Behavior, Visual Perception, Visual Stimuli

Identifiers—\*Delay of Gratification

The major objective of this study was to explore how preschool children's ability to delay gratification was affected when children were asked to attend to actual rewards rather than pictures of rewards. Sixty subjects, 3 to 5 years of age, were given a choice between two rewards and then placed in a delay of gratification situation. Half of the subjects were left in the waiting situation with the real reward present, and the other half had a realistic picture of the reward in front of them. Subjects were either instructed to pretend that the real or pictured reward was real, to pretend that the real or pictured reward was pictured, or the subject was not given any additional instructions. Results showed that having the actual reward object in front of the subject presented as real led to low delay of gratification and pictures of the reward, presented as pictures, facilitated delay. However, these effects were reversed by instructing the child to construe the actual object as pictured, and the pictured object as real. (BRT)

How 13 Texas Communities Started Working for Children. First Report on Planning in the TD-CA/OECD Demonstration Project.

Texas State Dept. of Community Affairs, Austin. Office of Early Childhood Development.

Pub Date 75

Note—125p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Community Programs, \*Demonstration Projects, \*Early Childhood Education, Economic Disadvantage, Financial Support, \*Intervention, Parent Participation, Preschool Children, Program Coordination, \*Program Descriptions, Program Evaluation, Program Planning, Rural Youth, \*State Programs

Identifiers—Texas State Plan for Early Childhood Development

This preliminary report describes the planning efforts undertaken by local demonstration projects involved in the development of Texas' State Plan for Early Childhood Development. Thirteen projects were begun in 1973 to demonstrate various ways in which the state government could work with local government officials, public agencies, parents, and other interested citizens to plan and implement early childhood development services in local communities. Background information on the development of the plan is provided. The report describes seven aspects of the plan: (1) project selection process; (2) notification process; (3) delegation process; (4) steering committee selection and operations; (5) planning process; (6) technical assistance process; and (7) contract review process. A summary of recommendations emanating from this initial study is given. Appendices include the memorandum describing the application of county needs indicators to the county selection process and summaries of individual projects' planning data. (Author/ED)

Descriptors—Age Differences, \*Cognitive Development, \*Communication Skills, \*Elementary Education, Literature Reviews, Perceptual Development, \*Preschool Education, Research Design, \*Role Perception, Social Development

Identifiers—Information Processing (Psychological), \*Referential Communication, Role Taking

This paper reviews nine studies which report conflicting results in assessing the relationship between children's role-taking ability and communication skills. The studies included satisfy three criteria: (1) role-taking and communication efficiency are measured independently; (2) tasks used to measure the two skills are significantly different in content and type of response required; and (3) abilities are related with chronological age held constant, either by examining the relation between skills within age groups, or by partialling out chronological age. Three studies show consistent, significant positive relationships between communication performance and role-taking, four studies have mixed results (showing some significant results and some nonsignificant results), and two studies show consistent, nonsignificant relationships between the two abilities. Conflicting results are attributed to (1) some third variable (e.g., intelligence) with which role-taking and communication are related independently, (2) statistical factors such as reliability of the tasks, (3) differing methods of measuring the two abilities, and (4) other variables besides role-taking ability which may determine communication skill. Language development, spatial role-taking skills, perspective-taking, and patterns of children's errors during tasks in these areas are discussed as they apply to the relationship between role-taking and communication. **Descriptors**—\*Child Care, Day Care Services, Decision Making, Delivery Systems, \*Early Childhood Education, Educational Policy, Educational Problems, \*Federal Legislation, Financial Needs, \*Government Role, Policy Formation, \*Public Policy, State Federal Support, State Programs

This report provides an analysis of public policy issues associated with state and federal child care developments, laws, regulations, and bills. It is intended to aid policy makers, government officials, consumers, and practitioners of child care programs. The report examines three major areas of policy: (1) federal legislative action which culminated in passage of Title XX; (2) regulations which will determine the scope of state-federal implementation of social service legislation; and (3) the proposed Federal Family and Children Services Act of 1975. Discussion includes the impact of legislation and the question of responsibility for delivery of services. Five areas of concern in child care policy are investigated: money (source and flow), eligibility, administration, control, and program quality. Several recommendations directed toward federal and state government branches are made for each of the five policy areas. The appendices, approximately one-half of the report, include statistical data, comments by legislators and excerpts from federal child care regulations. (Author/ED)

Note—82p.; Master's Thesis, University of Illinois at Urbana-Champaign

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Class Activities, Conventional Instruction, \*Elementary Education, Grade 1, \*Interest Research, Open Education, \*Student Interests, \*Teacher Behavior, Teaching Styles

This study examined the relationship between various levels of teacher restriction or accommodation of student behaviors and the levels of interest shown by pupils in certain types of classroom activities. A total of six first grade teachers in two schools were given the Open Program Structure Index (OPSI) and, based on their scores, were rated along a continuum from restrictive to accommodating. Ten students, randomly selected from each teacher's class, were observed while they engaged in each of three types of tasks: (1) closed (workcards), (2) relatively closed (books and table games), and (3) open (creative activity). Their interest in each of these tasks was rated as high, medium, or low, based on the Interest Rating Scale which measures persistence in activity, ease of distractibility, and whether contact with others is work related. The findings revealed a significant negative correlation between the teacher's OPSI scores and the students' interest ratings across all four tasks. This correlation suggests that students of restrictive teachers display higher levels of interest in common classroom activities than students of accommodating teachers. The appendix contains the Open Program Structure Index and the Interest Rating Scales. (JMB)

**Identifiers**—Experimenter Characteristics, \*Pretend Behavior

This study examines the degree to which young children are influenced by the familiarity of an adult participant in their pretend play with toys which vary in resemblance to highly prototypical objects (e.g., cup-like cups or doll-like dolls). A group of 29 children, mean age 21 months, was divided into two experimental groups balanced by sex; 15 children were assigned to an unfamiliar adult experimenter, and 14 to a familiar one. Each child was observed in two 12-minute play episodes in which pretend play suggestions were made by the experimenter. Results suggest that: (1) pretending with highly prototypical objects is enhanced by thematic proposals of a familiar adult, whereas pretending with less prototypical objects is reduced by these proposals; (2) suggestions from an unfamiliar adult produce a low level of pretending regardless of toy type; (3) children's difficulty in transforming less prototypical objects to suit proposed themes is cognitive rather than motivational; and (4) in the situations studied, girls are more sensitive than boys to the characteristics of people, and boys are more sensitive than girls to the characteristics of materials. **Identifiers**—\*Mayans

This study examined the impact of culture, language, and familiarity with materials on the ability to solve traditional conservation problems. A total of 80 Tzeltal speaking children from two traditional Mexican Indian (Mayan) villages participated in the study: 5 boys and 5 girls drawn from each of four age group (6-7, 8-9, 10-11, 12-13). The men in both villages are agriculturalists; the women in one village are potters and in the

other village they embroider blouses. Conservation of continuous quantity was examined using beans, clay, and water. Conservation of weight was studied using clay. Each child completed all tasks. Analysis of the data suggests that the ability to make conservation judgments improves with age among Mayan children as it does elsewhere in the world, but that performance lags behind U.S. norms by about 3 years. Language and culture differences which may explain this apparent performance lag are described. It was concluded that the conservation paradigm may not be a "culture free" test of cognitive competence. (ED)

**Descriptors**—\*Behavior Development, Behavior Patterns, \*Cognitive Development, \*Early Childhood Education, \*Imagination, Imitation, Infancy, \*Infant Behavior, Literature Reviews, Stimulus Behavior, Toys

**Identifiers**—Piaget (Jean), \*Pretend Behavior

Evidence which suggests that pretend activities become increasingly independent of the presence of realistic objects is examined in this paper. Results of research on pretend behavior in children 1 1/2 - 2 years of age are described and analyzed. Striking changes in pretend behavior are shown to occur during the second year of life. Pretend play is treated as a paradigm for understanding how children represent objects and relations. It is argued that the child can pretend that one thing is another when he can represent objects (or object activities) as prototypes and when he can use the core properties of prototypes to transform representations of immediate physical stimulation. The analysis suggests a three-phase sequence in the development of pretending based on a progression from the analogue mapping of representations to the selection and, eventually, the production of the core properties of object representations. **The Development of Play: Style, Structure and Situations.**

Spons Agency—Office of Child Development (DHEW), Washington, D.C.

Pub Date Apr 75

Note—27p.; An abbreviated version of this paper was presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Age Differences, \*Cognitive Development, Infancy, \*Infant Behavior, Learning Processes, \*Observation, \*Play, \*Preschool Education, Problem Solving, Reactive Behavior, Situational Tests

This study examined the extent to which situational context differentially influences components of play. Two groups of play variables were distinguished: (1) style variables, (reflecting the overall tempo and diversity of play) and viewed as relatively sensitive indicators of short term reactions of situations; and (2) structural variables, viewed as relatively sensitive indicators of more enduring aspects of cognitive development. Children were observed either in the presence of relatively familiar or unfamiliar adults in a structured play situation in the home at 18 and 24 months, and in a more naturalistic home observation at 22 and 23 months. Multivariate analyses were used to examine the sensitivity of measures of style and structure to situations and age. Style variables revealed short term situational effects; however, both types of variables revealed changes with age and differences between situations which were sustained over time. Results suggest that the manipulation of context factors and multivariate procedures might provide a useful way of analyzing components of play as a complex system of behavior. (Author/ED)

**Descriptors**—Age Differences, \*Discrimination Learning, \*Eye Fixations, \*Infants, \*Mothers, Physical Characteristics, \*Stranger Reactions, Visual Perception

**Identifiers**—\*Eye Contact

This study investigated the way 12 infants, aged 1 month and 2 months, scanned the still and expressionless faces of their mothers, of strange women, and of strange men. Each infant was placed in a padded head-restraining cradle under a half-silvered mirror which was angled at 45 degrees to enable the child to view an adult's face at an optical distance of 48 cm. Infant eye fixation was recorded on videotape by corneal photography and replays were used to score the fixations of duration greater than 2 seconds on eight facial features: hairline, chin, right eye, left eye, nose, mouth, right ear and left ear. Data indicated that at 1 month of age infants fixated away from faces most of the time, looked at their mothers' faces even less often than at the strangers' faces, and looked at a limited portion of the facial perimeter. In contrast, 2-month-olds fixated the faces most of the time, looked at more facial features, and were more likely to look at internal features—especially the eyes. These results suggest that infants as young as 1 month old can discriminate their mothers' faces from strangers' faces, a discrimination which is probably based on differences in hairline and chin. Possible bias in results across the two age levels may be due to the use of motionless expressionless faces, which have been avoided by 1-month-old infants in other studies: results are compared to those obtained for infant scanning of inanimate two-dimensional shapes. **Identifiers**—\*Play Groups

This booklet is a comprehensive report and resource manual on parent-run cooperative playgroups based on 2 years of experience by the Childcare Switchboard in San Francisco, which refers parents to playgroups, family day care homes, and child care centers in the city and offers advice and help to fledgling playgroups. Practical advice is given on the following topics: playgroup size, age range, location, equipment, finances, teachers, daily routine, medical information, and work schedule. Short descriptive reports on the beginnings and progress of four playgroups are given as examples. Licensing regulations (in California), the importance of good community relations, and guidelines for choice and design of rented community property are each described. Also provided are lists of activities and resources for playgroups in San Francisco, including suitable places to visit, and toys and other resource materials available from the switchboard's toy lending service. Suggestions for play groups in any locality include a list of indoor activities and information for obtaining books, films, toys, and free materials. (GO)

**Identifiers**—\*Project Follow Through

This study provided a review of literature related to peer tutoring and investigated the effects of three variables on peer tutor and peer tutee performance. The variables were (1) the achievement level of the tutor, (2) brief tutor training in reinforcement and corrective feedback procedures, and (3) tutor expectancy about tutee performance. A total of 112 high and low achieving second graders in a Follow Through program were selected as tutors. Half of these tutors were randomly selected to receive two half-hour training sessions. The training was conducted in a small group setting and emphasized two reinforcement and feedback procedures: (1) responding to a correct answer with a positive comment, and (2) responding to an incorrect answer or no answer by providing the correct answer and giving the tutee a chance to say the correct answer. A group of 112 first graders was randomly selected to serve as tutees. Instructions to tutors prior to the tutoring session contained either high or low expectancies about the tutees' academic performance. Both tutors and tutees were pre- and posttested on 30 sight word flash cards, with which the children worked during the tutoring session. Results showed that both tutors and tutees learned a significant number of words. Tutors' achievement level was not a significant factor, as measured by words learned, but tutees tutored by trained tutors performed better than tutees tutored by untrained tutors. Tutor expectancies did not affect tutee performance on the posttest. (Author/BRT)

**"Conservation" Responses in Very Young Children.**

Pub Date 75

Note—28p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Cognitive Development, Comprehension Development, Concept Formation, \*Conservation (Concept), \*Developmental Tasks, \*Language Development, Number Concepts, Perceptual Development, \*Preschool Education, Psycholinguistics, Research Design, Verbal Development

**Identifiers**—\*Piaget (Jean)

The role of language in conservation tasks and the development of the concept of conservation of quantity in young children are investigated in this study. A total of 50 children, aged 3.0 to 4.7 years, were divided into three groups according to age with a large number clustered around age 4.0 years. Children were randomly assigned to one of two order effects. In the first effect, called the MORE condition, the child was presented with unequal rows of M&Ms and asked "Which row is (has) more, or are they both the same?" Following the child's response, the M&Ms were equalized, then rearranged into unequal rows. The child was told "Take the row you want to eat, and eat all the M&Ms in that row." In the second effect, called the EAT condition, the same two instructions were given in the reverse order. Results indicate that children's comprehension of the "more" question increases with age; however, the children demonstrated better comprehension of numerosity when told to "eat" a row than when asked which row had "more." In addition, the children clustered at age 4 appeared to be transitional in verbal concept development regarding semantic contexts (the prior instruction "eat" cued them regarding the meaning of "more"). It is suggested that the results reflect on

the young child's verbal concept development regarding number. (ED)

**Teacher Reinforcement of Feminine-Preferred Behavior Revisited.**

Pub Date Apr 75

Note—12p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Classroom Research, College Students, Comparative Analysis, Interaction Process Analysis, Preschool Children, \*Preschool Education, \*Reinforcement, Sex Differences, Sex Role, \*Sex Stereotypes, Student Behavior, \*Student Teacher Relationship, Teacher Behavior, \*Teaching Experience

The two studies reported, on teacher reinforcement of and teacher attitudes toward children's sex-preferred behaviors attempted to clarify some issues concerning the differential treatment of boys and girls at the preschool level. The first study looked at teacher reinforcement of sex-preferred behaviors in children aged 3 to 5 years as a function of the experience of the teacher. Six children of each sex in each of four independent play groups were observed with their teachers; a coded observation schedule was used to compare the patterns of teacher reinforcement for sex-preferred behaviors and the amounts of teacher response for boys and girls and for experienced and inexperienced teachers. Results indicated that all teachers responded in equal amounts to boys and girls and reinforce feminine preferred behaviors not only in girls but also in boys. The second study compared sex stereotyping and educational attitudes of college students of both sexes who were either experienced or inexperienced in dealing with young children. Subjects were asked to rate 31 child behaviors either on sex appropriateness or on importance for future academic performance. Results showed that 12 behaviors were considered sex stereotyped, six male and six female, and that inexperienced persons rated behaviors as stereotyped significantly more frequently than experienced persons. The two studies indicated teacher experience rather than sex of teacher to be a determinant of teacher classroom behavior and brought into question the differential effects on boys and girls of being reinforced for behaviors which are preferred by girls and nonpreferred by boys. **Effects of Mother and Stranger Distance on Infants' Behavior.**

Pub Date Apr 75

Note—10p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Attachment Behavior, Distance, Emotional Response, Infant Behavior, \*Infants, Mothers, \*Parent Child Relationship, \*Preschool Education, \*Stranger Reactions

**Identifiers**—\*Object Permanence

This study measured infant responses to mother and stranger as a function of mother and stranger distance. A group of 10-month-old infants were pretested for level of object permanence and person permanence, and 18 males and 18 females were chosen as study participants. The infants were randomly assigned to one of three treatment groups: (1) stranger near, (2) stranger far, or (3) stranger absent. In each treatment group, there were three 5-minute trials with the mother near, far, and absent. Observations of the infant (proximity to mother and stranger, fussing, crying, and playing with a novel toy) were made by the experimenter, who was concealed behind a wooden partition set up in the infant's living room. The results indicated that stranger distance from the infants was unrelated to their behavior but that both mother distance and trial number had significant effects. As mother-infant distance increased, babies fussed sooner and longer, and played less with the novel toys. As the trial number increased, the infants crawled to their mothers earlier in the trial, fussed sooner, and played less with the novel toy. These findings were interpreted as supporting Bowlby's conten-

tion that attachment behavior is related to the degree of maternal accessibility. (JMB)

**Infants' Reactions to Peer Strangers.**

Pub Date Apr 75

Note—19p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975). Not available in hard copy due to marginal reproducibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—Emotional Response, Infant Behavior, \*Infants, Mothers, Parent Child Relationship, \*Peer Relationship, \*Preschool Education, \*Social Development, \*Stranger Reactions

This study examined the reactions of 45, 10-month-old infants to peer strangers. The infants were observed in two conditions: with a stranger of the identical age (10 months) and with one who was younger (5 months). In addition, each infant's behavior when he was alone with his mother was compared to his behavior when he was in the presence of strangers. There were no significant differences between the infants' responses to the 5-month-old and 10-month-old strangers. However, in the presence of strangers, infants looked at their mothers less frequently and looked instead at the strangers; vocalized less frequently but did not fuss or cry more often; did not stay as close to their mothers but were less active; and smiled more frequently and sooner. Results indicate that infants are not necessarily fearful of strangers. They may, in fact, respond to strangers in a curious, friendly, and positive manner, particularly if the strangers are peers. **Identifiers**—\*Elementary Secondary Education Act Title VII, ESEA Title VII, New Mexico (Clovis), New Mexico (Portales)

This report describes an external evaluation study of two of the components (instructional and community-parental involvement) on an ongoing bilingual intervention program for 3- and 4-year-old children. The purpose of the intervention program is to facilitate the learning of English and Spanish simultaneously in an environment designed to enhance the child's cognitive, affective, and psychomotor skills. Brief descriptions of the program's background purpose and components, and of the children served are included in the report. Evaluation of the instructional component was based on a pre-posttest design (without a control group) which measured language development in English and Spanish, school readiness, and self-concept and personality development. The community-parental involvement component was subjectively evaluated using observations, records, and self-reports by the staff. Major findings include: (1) students made significant gains in language development in English and Spanish and in general school readiness; (2) students developed and/or maintained a positive self-concept and substantially developed in various dimensions of personality growth; (3) children and parents were involved in a variety of activities through home visits; and (4) parents maintained a positive attitude toward the program. **Is Talking to Baby More Than Baby Talk? A Longitudinal Study of the Modification of Linguistic Input to Young Children.**

Harvard Univ., Cambridge, Mass.

Spons Agency—National Science Foundation, Washington, D.C.

Pub Date Apr 75

Note—15p.; Portions of this paper were presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Child Language, Imitation, \*Infant Behavior, \*Language Development, Language Patterns, \*Longitudinal Studies, Mothers, \*Parent Child Relationship, Parent Role, \*Preschool Education, Psycholinguistics, Response Mode, Verbal Development, Vocabulary Development, Word Frequency

The significance of three mothers' speech for their infants' language development is considered in a continuing longitudinal study. The study began when the children (two females and one male) were 5 and 6 months of age and will continue until the subjects are 3 years old. In the speech data reported the children were from 6 to 18 months of age. During individual one-hour taping sessions every 3 or 4 weeks, the mother and experimenter talk for about 15 minutes. During the rest of the hour, mothers play and talk naturally with their children. Children's speech appears to correspond to mothers' speech, in terms of complexity of imitated responses and speech patterns. In addition, data show that mothers modify their speech on the basis of linguistic cues from their children. (BRT)

**Descriptors**—\*Early Childhood Education, Grade 1, Grade 2, Kindergarten, \*Memory, Mnemonics, Models, \*Primacy Effect, \*Recall (Psychological), \*Research Design

**Identifiers**—\*Learning Research and Development Center, Serial Position Recall

In this study, a procedure was devised to experimentally separate the spatial and temporal task components of a serial-position recall task in an attempt to account for the primacy effect observed in experiments using this paradigm with young children and retarded subjects. A total of 48, 5- to 7-year-old, children were tested in a serial-position recall task under two conditions. In one condition, which replicated the procedure typically used, the spatial and temporal components were completely confounded; in the other, the spatial and temporal components were experimentally separated. The results provide strong evidence that the spatial component of the typical serial-position recall task, rather than the use of rehearsal, is largely responsible for the primacy effect found in the serial-position curves of young children. **Identifiers**—\*Learning Research and Development Center, Self Schedule System

This study investigated the extent to which an instructional-learning management system (the

Self-Schedule System) is effective as an intervention technique in promoting the development of young children's self-responsibility in managing their school learning. A student interview questionnaire, the Self-Responsibility Interview Schedule, was constructed to assess children's knowledge about what they do in school, and whether they perceive that they, rather than the teacher, are responsible for managing their own learning. A total of 134 second graders enrolled in individualized instruction programs at two schools were divided into three experimental groups: (1) a class which adopted the Self-Schedule System; (2) three classes (from the same school) serving as one comparison group; and (3) classes (from a second school) serving as another comparison group. The majority of children in groups 1 and 2 came from low-income black families; children in group 3 came from suburban lower middle class white families. Measures of self-responsibility for school learning, student perception of intellectual achievement responsibility, and student task performance were used in the investigation. Results indicate that the Self-Schedule System significantly affected children's perception of self-responsibility for their school learning as well as their rate of task completion. (Author/ED)

**Descriptors**—Age Differences, Educational Television, Expectation, \*Kindergarten Children, Longitudinal Studies, Predictive Validity, \*Predictor Variables, \*Primary Education, \*Reading Ability, Reading Comprehension, School Readiness Tests, Sex Differences, Socioeconomic Influences, \*Teacher Attitudes, Vocabulary Skills

**Identifiers**—Sesame Street, \*Teacher Expectation

The purpose of this longitudinal study was to describe kindergarten children's abilities, evaluate the effect of teacher expectations on kindergarten performance, and explore the predictive validity of kindergarten performance for later reading ability. An original sample of approximately 450 kindergarten children was tested with a school readiness measure. By the time the children were tested on reading ability at the end of third grade, 122 children remained in the sample. For entering kindergarteners, performance on school readiness test tasks was significantly related to socioeconomic status, age (older children performed better), and sex (girls performed better). Attending preschool and watching "Sesame Street" were also found to be slightly related to readiness task ability. Kindergarten children in 1971 performed better on most school-related tasks, except those involving perceptual-motor skills, than did kindergarten children in 1968. Teacher judgments of the subjects' abilities at the end of the kindergarten year were better predictors of the subjects' reading success in first, second, and third grades than school readiness test scores. Past reading ability was found to be the best predictor of future reading ability. Through the primary grades, girls continued to perform better than boys in the measured abilities. Data showed that children who stayed in the same school from kindergarten through third grade read better than the class as a whole, when all other factors were held constant. (BRT)

Guaranteeing Quality in Child Care.

Pub Date 3 Apr 75

Note—14p.; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—Accreditation (Institutions), Certification, Consultants, \*Day Care Services, \*Early Childhood Education, Employment Qualifications, Facility Requirements, Family Day Care, Financial Policy, \*Government Role, Information Services, Interagency Coordination, \*Public Policy, \*Standards, State Licensing Boards, State Standards

This paper presents a discussion of state and federal licensing and regulation of child care services. A hierarchy of the kinds of regulation is defined: (1) basic preventive/protective requirements (related to zoning, fire and safety, sanitation, and basic day care licensing); (2) administrative standards for publicly operated programs (equal to or better than basic private day care licensing requirements); (3) funding standards or fiscal regulation of publicly financed programs; (4) qualifications of the staff regulated by credentialing; and (5) standards of quality for model programs (accreditation). Some of the problems involved in establishing and administering these kinds of regulations are discussed. Consultation, technical assistance, education of the public, community organization, staff development, evaluation, and information centers are identified as nonregulatory ways of pursuing quality child care. (Consultation and information services are briefly discussed.) Some of the special problems involved in licensing family day care homes are explored, and a workshop sheet of questions pertinent to quality child care is provided. (ED)

A Gross Motor Skills Development Program for Children in Kindergarten-Primary.

Pub Date 1 Mar 75

Note—332p.; Practicum report, submitted in partial fulfillment of requirements for Doctor of Education degree, Nova University

**EDRS Price MF-\$0.76 HC-\$17.13 Plus Postage**

**Descriptors**—\*Early Childhood Education, Equipment Utilization, Inservice Teacher Education, Motor Development, Parent Participation, \*Physical Education, Program Development, \*Program Evaluation, \*Psychomotor Skills, \*Skill Development, Teacher Developed Materials

This report describes the activities of a practicum which developed, implemented, and evaluated a transportable gross motor skills development program for kindergarten and primary children. The practicum involved three major components: (1) program materials, (2) inservice workshops, and (3) parent training. The program was implemented for three 30-minute periods weekly for 16 weeks in eight K-third grade classes. The evaluation consisted of pretesting all the children on gross motor skills during the first week of school and posttesting them with the same skills inventory after 16 weeks in the program. The results indicated that the children as a group were able to achieve a higher level of skill in the areas tested after participating in the program for 16 weeks. Recommendations for extending the program were offered. (JMB)

**Descriptors**—Art Activities, \*Early Childhood Education, Group Activities, Interaction Process Analysis, \*Learning Activities, \*Literature Reviews, Music Activities, Observation, Personality Theories, Resource Materials, \*Self Actualization, \*Self Concept, Student Teacher Relationship, Teacher Role

Explores various aspects of the development of self-concept in young children and suggests activities which promote the development of self-esteem. A review of the literature pertinent to children's self-concept covers several areas: (1) the importance of a positive self-concept for effective adjustment in all aspects of life; (2) theories on the development of self-concept; (3) factors in interpersonal relationships which prohibit development of self-esteem; (4) the observable indicators of a child's concept of self; and (5) ways in which teachers can aid in the development of a positive self-concept. Classroom resources for developing self-esteem that are supplementary to the basic teacher/child interaction are provided. Included are general suggestions which are useful in every aspect of an early childhood education curriculum as well as numerous specific activities that can be incorporated into the educational program. In addition, activities are combined into a suggested week-long self-awareness unit for preschoolers. A list of useful books suitable for young children is included. (ED)

**Identifiers**—\*Television Advertising and Children Project

This report, the last in a series of six reports on television advertising and children, describes patterns of advertising exposure and evaluation in the naturalistic setting and examines the role of commercials in late childhood socialization. An omnibus questionnaire was administered to 775 fourth through seventh grade students in urban, suburban, and small town schools in Michigan. Two-thirds of the sample also completed a supplementary form dealing with food and nutrition, while one-third answered additional medicine-related questions. Multivariate analyses were used to assess the relationships among indices of advertising exposure and corresponding cognitions, attitudes, and behavior. The results are presented with regard to the following areas: (1) opportunity for advertising exposure, (2) attention to commercials, (3) evaluation of advertising, (4) advertising and distrust of adult authorities, (5) socialization from public service announcements, (6) advertising and hygiene socialization, (7) impact of message repetition, (8) effects of advertising on materialism, (9) effects of medicine advertising, (10) effects of cereal advertising, (11) nutrition learning from advertising, (12) effects of candy advertising, and (13) effects of advertising on general food consumption patterns. **Descriptors**—\*Child Care Centers, Day Care Programs, \*Day Care Services, \*Early Childhood Education, \*Federal Government, Financial Support, Low Income Groups, \*Policy Formation, Preschool Programs

**Identifiers**—\*Educational Policy Research Center

This study reviews existing evidence related to the question of whether or not to increase federal support for preschool services in general, and center facilities, in particular. The findings do not indicate a current or impending overall shortage of early childhood services or that low-income families suffer inequities in the costs or distribution of care. Further, no evidence was found of long-term child benefits that would justify a large, immediate increase in federal expenditures for custodial or educational services for preschool children. Five policy conclusions are drawn: (1) proposals for increased federal support of day care do not reflect any clear and present national need; (2) adjustments should be made in the present system which would provide the same profile of incentives for families at all income levels, respond to individual choices in the style and setting of day care services, and reflect realistic assessment of the value of currently demonstrated child benefits from preschool experiences; (3) studies of the mechanics of day care choices should be undertaken; (4) heavy emphasis on the development of new early childhood education models should be discontinued; and (5) research funds should be redirected to encourage the replication of successful early childhood education models in secondary sites. **Descriptors**—Degree Requirements, Handicapped Children, Models, \*National Surveys, \*Preschool Education, \*Preschool Teachers, \*State Standards, Student Teaching, \*Teacher Certification, Teacher Education Curriculum, Teaching Experience, Teaching Skills

This study reports the results of a national survey concerning the current (1974) status of the certification of preschool teachers by each of the United States. Information was obtained from the certification officers of 47 states and the District of Columbia, each of whom answered a one-page questionnaire designed to ascertain: (1) how many states have certification requirements for preschool teachers of handicapped and nonhandicapped children; and (2) the credit hour and field experience requirements in those states having certification standards. Results of the survey are summarized in table form, and a brief discussion of the implications of the results is included. (ED)

As one of several special reports on development possibilities for the agriculture and forestry sector of the Four Corners Economic Development Region, this monograph deals with the use of industrial development bonds as a means of resolving finance problems arising from inadequate or nonexistent credit in rural areas.

Distinguishing between the general obligation bond (one secured by obligating repayment through tax revenues) and the revenue bond (one secured by the industrial project itself), this report details the laws governing industrial development bonds in each of the states in the Four Corners Region (New Mexico, Utah, Colorado, and Arizona). Additionally, this document presents discussion on the following: (1) the advantages and disadvantages of industrial development bonds; (2) the historical development of industrial development bonds; and (3) the implementation procedure for industrial revenue bonds. The appendices present: (1) A Sample Ordinance Relating to Requirements for the Issuance by a Municipality of Revenue Bonds Pursuant to the Industrial Revenue Bond Act; and (2) Information Required for Applications for Issuance of Municipal Industrial Revenue Bonds. **Identifiers**—Tenure of Operator, \*United States  
Utilizing data obtained from the 1970 and 1966 June Enumerative Surveys, the U.S. farm population (both operator and nonoperator) was identified by race, tenure, and value of farm products. Data were analyzed in reference to the following questions: (1) How many and what proportion of farm people live on farms of adequate and/or marginal commercial scale?; (2) How many people live on small-scale operations which make minor contributions to farm output?; (3) What proportion of farm people have an ownership interest and what proportion have neither an ownership nor a tenant interest, but live on farms as hired workers?; (4) What is the trend in number, tenure, and scale of farming of Negro and other minority group farmers and how do these populations compare with white operator farm populations? Analysis of data revealed: (1) In both years, the great majority of all farm people resided in the same household as the farm operator; (2) About 1/10 of the farm population lived in rent-free dwelling units on farms; (3) Negroes and other racial minorities on farms were disproportionately of nonoperator status; (4) Most farm people lived on farms operated by an owner rather than a tenant or manager; (5) Despite an overall farm population decline of 15 percent during 1966-70, there was population growth on farms with annual sales of \$20,000 or more; (6) Due to population loss among Negro farm residents, farm population decline was most rapid in the South. **Identifiers**—\*United States

Presenting a continuous series of U.S. farm population estimates for 1910-70, this report also presents estimates of the farm population for geographic regions, divisions, and States for 1920-70. Annual estimates of the components of farm population change (births, deaths, and net change through migration and reclassification of residence) are presented for the United States, re-

gions, and divisions for 1920-70. Although the data presented cover the period 1910-70, the analysis of farm population change relates primarily to the 1960-70 decade. Data presented in this report are derived from: (1) the Current Population Survey of the Bureau of the Census; (2) the 1960 and 1970 Censuses of Population; (3) Statistical Reporting Service. The 1960-70 farm population analysis presented in this report indicates: (1) the 1970 U.S. rural farm population averaged 9,712,000; (2) the 1970 farm population was 38 percent less than that of 1960; (3) the absolute loss of about 6 million during 1960-70 was the least for a decade since the 1930's, though the relative loss was the highest rate of decline for a decade; (4) the Southern Regional ranked second to the North Central Region in number of farm residents; (5) ranking States in farm population were Iowa, Minnesota, and Illinois; (6) North and South Dakota had the highest proportion of people on farms; (7) the 1960-70 net loss in the farm population via migration or reclassification averaged 694,000 annually. Identifiers—\*Somerton Arizona School District 11

Since Somerton first became a demonstration school for migrant child education in 1967, three versions of the "The Somerton Story" have been prepared by consultants and the Somerton administration. However, these publications lacked the students' viewpoint on the new approaches to educating children. Therefore, this version was written by the students themselves. One of the 8th grade classes planned the entire issue. They wrote most of the articles and collected the rest from other classrooms; they planned and ordered the pictures. No adult editing was done, although some of the articles were rewritten several times in an attempt to reduce the number of errors. The articles reflect the students' attitudes toward the: (1) school; (2) subjects; (3) personnel; (4) classes—i.e., physical education, art, home economics, shop, and audio-visual; (5) math learning center; (6) library; and (7) Adventures in Growth Program. Identifiers—\*Maine

Designed for instruction at the secondary level, this curriculum guide focuses on simulated classroom experiences in prejudice and minority race relations and content materials relative to Northeast Woodland American Indian history and culture. Knowledge of the following are cited as major unit objectives: (1) Indian cultural contributions; (2) major highlights of Maine history; (3) minority white relationships; (4) the social problems having racial implications faced by Maine Indians today; (5) the way in which contemporary society influences the self-image of both on-and off-reservation Indians (Maine); and (6) identification of prejudice in self and others. Included in this guide are: (1) a map and description of a fictitious town (population and schools by racial distribution, economy, neighborhoods, citizen responsibilities, and group beliefs); (2) descriptions of the beliefs of integrationists, segregationists, neutralists (via social relations, education, jobs, housing, crime, and civil rights); (3) class member identity cards (simulated address, age, ethnic background, occupation, education, income, beliefs, and general circumstances); (4) terms to be identified (vocabulary); (5) 23 special research projects; (6) "pressure cards" (e.g., a strike); (7) a chart of contemporary American vs. traditional Indian goals; (8) a simulated town council meeting; (9) Maine Indian history; (10) a film rental list; and (11) a bibliography. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Illinois

Of the 31 migrant projects funded in fiscal year 1974 (FY 74), 27 (11 regular term and 16 summer term) were classroom programs. There were 365 children enrolled during the regular term and 1,601 during the summer. Children were recruited through: visits by school personnel to the migrant camps, information supplied by other project participants, and the Migrant Student Record Transfer System. Teacher and parent referrals and teacher-made and standardized tests were the most frequently used to determine the children's needs. Subjects taught most often were reading and oral language development during the regular term and reading and mathematics during the summer. Individualized and small group instruction, tutorial assistance, drill, and field trips were used to implement the various activities. Teacher-made tests and observation were most frequently used to assess the students' performance. During the year, medical and dental services were expanded and parental involvement was increased. This report provides: (1) a summary of data and recommendations; (2) descriptions of the migrant summer programs at Princeville, Hoopeston, and Part Forest; (3) an interview with the project director regarding his program assessment and future plans; and (4) a description of program implementation, based on information submitted by the local projects on the FY 74 Self Assessment Questionnaire. The migrant program is a national program legislatively mandated to "establish programs and projects designed to meet the special needs of migratory children of migratory agricultural workers and to coordinate these programs and projects with similar programs in other states." In Illinois, technical assistance and funds are provided to school districts and community agencies for developing supplemental educational services to meet the unique needs of 3,500 interstate and intrastate migrant children and 500 former migrant children. In order to meet the unique academic needs of these children, 5 main goals have been established: (1) extend funds to insure the success of program projects; (2) provide technical assistance to program personnel in the development, implementation, operation, and evaluation of migrant programs; (3) continue to identify impacted areas of migrant populations; (4) develop models for intercommunication between the permanent and migrant communities; and (5) encourage coordination of intrastate programs and cooperation of interstate programs and projects in order to provide continuity of educational experiences. This booklet provides guidelines to aid State Office of Education employees and local school personnel in developing effective migrant programs which comply with national and state policy. Topics are: eligibility; national, State, and local policy; State and local operations; the Migrant Student Record Transfer System; and program design. (Author/NQ)

Identifiers—\*North Carolina

The directory describes services provided to migratory agricultural workers and their families, through the governmental and nongovernmental agencies interested in and responsible for their well-being. Agencies are grouped into: (1) United States government agencies, (2) North Carolina State government agencies, and (3) private organizations. Among the services provided by the various agencies are: adult basic education; camp inspection; consumer education; counseling; crew leader registration and training; day care; family planning; health services; home care instruction; job development, training, and placement; legal services; self-help housing loans; and emergency transportation. Although the services appear to be all-encompassing, most have limitations based on such factors as definition of migrants, jurisdiction of serving agency, funding requirements and limitations, availability of staff, and limitations to indigenous population. Lists of members of the State Advisory Committee on Services to Migrants and contact persons for the various agencies are provided. An index of services available to migrants is included. (NQ)

Identifiers—\*North Carolina

During the 1974-75 school year, the North Carolina migrant program's priorities were program continuity; regular school term and summer programs for interstate and intrastate migrant children; staff development activities; Migrant Student Record Transfer System; migrant education program support team; and mobile vocational instructional program. These priorities were met through the implementation of approximately 60 projects, administered indirectly through 29 local education agencies. During the year, 9,685 migrant children were served. Emphasis of regular school term projects was to supplement and strengthen existing instructional programs offered through State, local and other Federal funding sources. Summer programs focused more directly on the interstate migrants' needs and provided a full range of instructional and supportive services. All projects used some type of achievement measurement to document attainment of major project objectives. Overall, test results reflect the program emphasis. After reading and processing all available information from project evaluations, test data, and monitoring reports, this 1975 evaluation report was prepared. All available information indicated that the North Carolina Migrant Education Program was adequately meeting the legislative requirements and the national program objectives. (NQ)

Descriptors—Agency Role, \*American Indians, \*College Students, Educational Finance,

\*Federal Aid, Grants, Higher Education, \*Interagency Coordination, Policy, \*Scholarships  
Identifiers—BIA, \*Bureau of Indian Affairs, OE, Office of Education

In order to determine the policies and procedures for developing American Indian students' financial aid packages, records and officials were surveyed from the Office of Education (OE), the Bureau of Indian Affairs' (BIA) Indian Education Resources Center, 4 Department of Health, Education, and Welfare regional offices; 6 BIA area offices, 5 State financial associations, and 3 institutions of higher learning (this included 129 randomly selected Indian and 102 non-Indian student aid packages for fiscal year 1974-75). BIA data indicated that for 1973 about 13,600 Indian students had received BIA grants and 64 colleges and universities had enrolled 25 or more Indian students with BIA grants. Findings indicated that the OE and BIA philosophies of awarding financial aid to Indians conflicted, for the BIA's operation manual stipulated that scholarship funds should be supplemental, while OE regulations did not require aid officers to disregard available BIA scholarships when determining student financial needs. Other actions which reduced OE assistance were: (1) BIA educational specialists who disregarded the supplementary philosophy; (2) late applications from Indian students; (3) the use of BIA grant funds to supplant loans and work-study funds. It was recommended that the BIA make its policy well known and take action to see that Indian students make applications on time. (JC)

Affluence, Equality, and Equity; A Case Study of Rural Development and Economic Status.

Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.

Pub Date 21 Aug 75

Note—30p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Age, Case Studies, Comparative Analysis, \*Economic Change, Education, Heads of Households, Immigrants, \*Income, Industry, Living Standards, \*Longitudinal Studies, Occupations, \*Rural Development, Sex Differences, Social Characteristics, \*Socioeconomic Status

Identifiers—\*Illinois

In order to determine the effect of rural industrial development in an historically rural area of Illinois, a stratified area probability sample survey of 781 household heads in an area experiencing limited industrial development and of 315 household heads in an area lacking industrial development was conducted in 1966. The results of this survey were compared with a similar 1971 survey (1,171 and 399 responses from the experimental and control areas respectively). Variables examined were: (1) Income (earnings and additional income of household heads and income of other household members); (2) Social Characteristics (% female-headed households, years of education, family size, status of current job, and age); (3) Group and Type of Income (female and male-headed households, farm and nonfarm households, household heads 65 years or older and those under 65 years); and (4) Social and Income Characteristics by Length of Residence. Findings indicated that development: (1) did not have a dramatic effect on level of income; (2) increased equality of income; (3) substantially and adversely affected the elderly; (4) adversely affect the average earnings of female household heads but positively affected female household heads but positively affected female income per dependent; (5) did not create a greater rate of immigration (immigration appeared to increase median earnings and decrease income equality, as immigrants were of a higher socioeconomic strata). (JC)

Identifiers—\*Older Americans Act 1965

Though amended in 1973, the Older Americans Act of 1965 has not met the needs of the rural elderly and was, consequently, the subject of these hearings by the Senate's Special Committee on Aging which consider proposed legislation under Title III of the Act to gain support for demonstration programs to assist older rural people and to improve the delivery systems of rural America. These hearings include testimony from (1) the Governor of Arkansas and the Director of the Arkansas State Office on Aging and Adult Services; (2) the Associate Dean of the University of Iowa's College of Medicine and the Chairman of the Iowa State Commission on the Aging; (3) the Executive Director of the South Carolina Commission on Aging; (4) the Director of the Title VII Nutrition Project; (5) a professor from the Department of Agricultural Economics and Sociology at Pennsylvania State University; (6) the Director of the Georgia Mountains Area Program on Aging; and (7) a consultant from the Senate Special Committee on Aging. Among the discussion topics recorded in these hearings are: (1) population distribution of the elderly; (2) revenue sharing; (3) equalization aid; (4) nutrition; (5) housing; (6) health care needs and delivery systems; (7) transportation; (8) model project funds; (9) flexibility for state programs; (10) Title III projects; (11) rural/urban differences. Identifiers—\*Rural Development Act 1972 Title V, United States (West)

Based on the available documentation of Title V (Rural Development Act of 1972) rural development programs currently underway in the Western Region (13 states), this report summarizes project endeavors to: (1) improve income and employment; (2) enrich environmental quality; (3) enhance social and health amenities; and (4) improve the quality of government processes and services. Providing a regional perspective, this summary also identifies Title V beneficiaries, benefit types, and problem areas (economic development, manpower development, public policy, comprehensive planning, and environment). The following are cited as significant dimensions of the Western Region's current rural development work: (1) Title V projects are addressing problems faced by all people living in rural areas—not just the agricultural producer; (2) Title V programs reflect locally elected officials' increasing recognition of needs and requests for assistance; and (3) Title V projects demonstrate that effective integration of research and extension activities can result in innovative and creative approaches to problems of rural development. Among some of the specific projects mentioned are: Utah's socioeconomic analysis project; Colorado's environmental research; Washington's efforts to facilitate government interaction; and Nevada's efforts to develop a data base for community decision makers. As Ethiopia has designed and implemented numerous intensive (geographically concentrated) and minimum-package rural development programs between 1967-75, the purpose of this monograph is to: (1) trace the evolution of these package projects; (2) analyze package performances; and (3) identify the implications for Ethiopian planners and policy makers. The monograph's 7 sections are identified as follows: (1) Introduction; (2) Three Major Integrated Rural Development Projects (discussion of intensive packages focusing on organizational frameworks and major components which include: development of an improved technological package; dissemination of new practices; farm credit; lending policies; performance of the credit program; output marketing; and other components); (3) The Minimum Package Project (MPP's organization and major components); (4) Overall Assessment of the Ethiopian Package Projects (agricultural output and income; income distribution; employment; and local participation); (5) the Extension and Project Implementation Department of the 1975-80 Period (role of the intensive package

projects and MPP's proposed rate of expansion); (6) Some Current Rural Development Issues (land tenure, reform, trained manpower, transportation, marketing, new technology, peasant associations, dissemination of innovations, and administrative organization); (7) Summary. (JC)

Destalking the Wily Tomato: A Case Study in Social Consequences in California Agricultural Research. Research Monograph No. 15.

California Univ., Davis. Dept. of Applied Behavioral Sciences.

Pub Date Jun 75

Note—79p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Agency Role, \*Agricultural Laborers, Agricultural Production, \*Automation, Case Studies, Change Agents, Employer Employee Relationship, \*Harvesting, \*Job Analysis, Job Skills, Organizational Change, Social Characteristics, \*Social Influences, Specialization, Technology, Work Environment

Identifiers—\*California, California Tomato Growers Association, Tomato Production

The end of the bracero program after 1965 brought about a major change in the growing, harvesting, and processing of California tomatoes which dramatically influenced the structure of the harvesting labor force. In order to determine the social consequences of the transition from man to mechanized harvesting procedures, the following areas of interest were examined: (1) the significance of the tomato; (2) tomatoes from seed to can; (3) the history of agricultural labor in California (a review); (4) the shift to the machine (the actors and the circumstances; post machine problems; and the role of the California Tomato Growers Association); (5) the technological development and job organization of mechanized harvesting (jobs and skills and working conditions); (6) the harvest labor force (identity; recruitment; supervision; and crew types); (7) the social effects of the transition to mechanized harvesting. The social consequences identified were: (1) concentration of tomato production in the State of California; (2) concentration in the number of growers and increased specialization; (3) a geographical shift in California production;

(4) the development of price bargaining for tomato growers; (5) sharp changes in the structure of the harvest labor force; (6) introduction of a system of factory-like production while maintaining primitive employment relationships. (Author/JC)

Identifiers—\*New Mexico

Fixed-choice stimulus questions were distributed to students from 12 New Mexico rural high schools (randomly selected), and responses were derived from 139 Native, 171 Anglo, and 240 Mexican American students in the 10th and 12th grades. Responses indicated educational, occupational, and residential aspirations and expectations and goal deflections. Findings revealed: (1) significant differences in occupational aspirations between grade levels and ethnic groups (sophomores aspired to less professional occupations and Native Americans aspired to less professional occupations than Anglos); (2) differences in occupational expectations due to sex (females expected less professional occupations); (3) occupational goal deflection differences due to ethnicity, sex, and the grade level by ethnicity interaction; (4) residence aspiration differences due to sex and ethnicity (males aspired to a more rural and Mexican Americans to a more urban residence than the others); (5) goal deflection between Anglo residence expectations and aspirations; (6) residence expectation differences due to sex and ethnicity (males and Native Americans had more rural expectations); (7) differences in educational aspirations due to grade level and sex by ethnic group interaction; (8) educational expectation differences due to grade level and sex by ethnic group interaction. The addition of a bilingual component enhanced the progress of "The Somerton Story." A prominent part of the instructional program in migrant education, this component was initiated with 60 kindergarten children during the 1970-71 school year. These 60 children remained in the program as a grade was added each following year. Written by the teachers presently in the bilingual program, this report discusses what is being done in Somerton today. The kindergarten through fourth grade teachers discuss: (1) the value of bilingual/bicultural education; (2) advantages and disadvantages for their respective grade levels; (3) what they do that might be different from regular classrooms; (4) special programs and features; and (5) recommendations that they would have for others considering a similar program. Identifiers—Arizona (Parker), Parker Arizona School District 27

Before the beginning of the summer school, a workshop was held for the teachers and aides to present ways to: (1) make migrant and American Indian children more aware of their heritage and (2) help them become more familiar with career possibilities. Objectives of the summer program were: (1) career exploration; (2) cultural enrichment (i.e., art, history, heritage, and music); and (3) swimming and water safety. The daily programs concentrated on these 3 objectives. Several field trips were planned to reinforce the career training objectives. Representatives from the 4 tribes on the Colorado River Indian Reservation served as consultants during the program to teach Reservation history, ceramics, jewelry making, and American Indian culture. Children had the opportunity to participate in controlled athletics every day and to visit the public library once a week. The 173 children were divided by age rather than by grade. Classes lasted until noon. A breakfast snack and lunch were served. An attitudinal test was administered to the older children as a pretest for self-awareness and as a posttest to gauge the change in attitude. The Monroe Oral Language test was given as a pre- and posttest to all classes. The summer program was very successful. (NQ)

Arizona's Migrant Child Education Program was initiated late in 1966 under the 1965 Elementary and Secondary Education Act Title I. The State Plan is designed to provide assistance to improve the instructional, nutritional, and health status of the migrant children in kindergarten through high school. Program components are career education oriented and supportive services. This report discusses: (1) instructional, health, and nutritional needs; (2) program components; (3) goals, objectives, and activities; (4) program evaluation; (5) community involvement; and (6) health, nutritional, and supportive services. Also included are: (1) a description of exemplary projects for activities which included new approaches in educating migrant children and (2) samples of remarks made by parents, teachers, administrators, and aides regarding the migrant program, both as a State and national program. The Office of Migrant Child Education, Arizona Department of Education, annually participates in a Teacher Exchange Program with other states. Arrangements are first made with other states to send teachers and administrators on an observation tour of their Migrant Child Education Programs. Objectives are to provide: (1) an opportunity for state educational agencies to share training techniques, materials, and procedures through practical application and on-site observation; and (2) training so as to develop resource personnel to assist in the state educational agencies development of future inter and intrastate programs as funds become available. Observation reports required by participants engaged in this Teacher Exchange Program enhance the interstate agreements regarding curriculum dissemination and exchange of teaching ideas and techniques. In 1975, participants traveled to Florida. Seven Migrant Child Education Projects were represented by a teacher or a program coordinator recommended by the administrator of that project. The group was led by an administrative consultant from the Office of Migrant Child Education. The participants' actual observation reports or excerpts from their reports are given in this document. Identifiers—\*Chief Joseph, Nez Perce

Written for children in grades 5-9, this biography of the Nez Perce leader, Chief Joseph, describes the conflict between the Nez Perce American Indian tribe and the United States government, known as the Nez Perce War of 1877. Describing the 1,700 mile retreat of those Nez Perce who refused to surrender their lands to white settlers, ranchers, and miners, this book traces the steps of the Nez Perce from June to early October, recounting the major battles and lesser actions which contributed to the fame and respect accorded Chief Joseph. This book also presents pertinent historical background which illustrates the cultural differences and/or conflicts inherent in the Anglo-Indian relationship of the 19th century. Titled "Defeat Without Honor", the final chapter recounts Chief Joseph's surrender to Colonel Nelson Miles; his peoples' Kansas reservation experience; his appeal to the President of the United States for reservation lands closer to the original home of the Nez Perce; and his death. Photographs of Chief Joseph and his people are interspersed throughout the text. (JC)

In 1971-72, 7,714 students were enrolled in the Colorado Migrant Education Programs. Programs were conducted in 21 different program areas, covering 42 school districts. About 85 percent of the students were in the elementary grades. Inservice training for the staff stressed individualized instruction, improving the migrant child's self-concept, cultural awareness, and bilingual teaching methods. Teachers established learning centers and expanded flexibility of instructional materials and their use. Increased curriculum or program areas were offered (i.e., dancing, singing, food) to incorporate cultural awareness. Standard tests were used extensively for student diagnosis and placement. Where criterion-referenced assessments were made, the programs reported strong results. Noncognitive student behaviors showed strength or improvement, based on subjective assessment, in the areas of independent learning, cooperation, attendance, accuracy in self-evaluation, oral expression, self-concept, and interest in school. Extensive health screening and services were provided. This evaluation report covers: student enrollment and attendance, grade placement, staff, community and parent involvement, exemplary projects, dissemination, support services, mobile units, and the Migrant Student Record Transfer System. During 1972-73, the Colorado Migrant Education Program served 5,455 migrant students. Enrollment dropped for the second straight year as weather, housing, and crop changes affected the migrant family's movement. Programs were conducted in 20 project areas, covering 39 school districts. Program offerings were expanded to include such components as parental involvement, social and natural science, vocational and high school offerings, nutrition and career education, and bilingual-bicultural activities. An integral part of the program were the Migrant Health Programs, a support system of mobile units, and the Migrant Student Record Transfer System. A variety of assessment procedures were used. All projects using criterion-referenced instruction reported their students made some gains. Eight projects reported normative results from standardized tests on small samples. Noncognitive student behaviors reported by each project showed strengths in school interest and self-concept and weaknesses in educational aspirations. All student behavior ratings showed significant improvement as compared to the previous year. More projects reported improved community attitudes. This evaluation report covers: student enrollment, attendance, and language; staff and administration; exemplary projects; new programs; support services; and student achievement, behaviors, and attitudes. The Colorado Migrant Education Program seeks to identify and meet the specific educational needs of all migrant children in the State. In providing comprehensive services to migrant students, Colorado has organized and operated its migrant educational program around the following basic program aspects: (1) conducting a year-round, statewide migrant student identification and recruitment effort; (2) providing a full, intensive and comprehensive summer educational program for all migrant students; (3) helping the local educational agencies plan and operate their programs with respect to migrant students and supplement local programs to better serve the migrant's needs; and (4) coordinating and cooperating with other state and local agencies in providing the needed educational and related services. In 1973-74, the program served 4,297 migrant students. A major program goal was to provide migrant students with specialized and expanded opportunities to improve their communication skills. Bilingual and bicultural, oral language development, reading and math were stressed in most programs. Overall, the program was successful. This evaluation report covers: student enrollment and attendance, program organization, staff, support services, exemplary programs, student achievement and behaviors, and staff and community attitudes. **Identifiers**—CMCIRP, \*Colorado Migrant Child Identification Recruitment, Elementary Secondary Education Act Title I, ESEA Title I

Funded by Title I of the Elementary and Secondary Education Act (Migrant Education), the Colorado Migrant Child Identification and Recruitment Project (CMCIRP) identifies and enrolls all migratory children in the State in educational programs. Regional field representatives also refer the migrant family to all social service agencies serving the family. In order to meet the National Goals for Migrant Education, CMCIRP developed and implemented a systematic management system to identify migrant children not currently involved in or attending migrant education classes. The system provides intra and interstate communications for exchange of information on student movement. Designed to assure a complete accountability of the State's migrant students in order to document information regarding the number of migrants and their locations within the state, CMCIRP provides such services as identifying those local educational agencies that need to establish migrant education programs to meet the migrant's needs. This allows the State and local educational agencies to develop planning procedures for the necessary educational programs appropriate in all areas where migrant children are located. This guide discusses CMCIRP's personnel and their responsibilities, forms which need to be kept, personnel procedures, and administrative policies. (NQ)

**Descriptors**—Age, \*Behavioral Science Research, Disease Control, \*Eating Habits, Education, \*Exercise (Physiology), Females, Health Education, Income, Models, Organizations (Groups), Participation, Perception, Physical Activities, \*Preventive Medicine, \*Rural Population

**Identifiers**—\*Health Belief Model, Pennsylvania (Potter County)

In order to test the usefulness of the Health Belief Model (a model designed to measure health practices, attitudes, and knowledge), a survey of Potter County, Pennsylvania was conducted, and 283 responses from adult females without chronic illnesses were analyzed. The dependent variables employed were regulating diet and getting regular exercise. Drawn from the model, the following 4 independent variables were analyzed: perceived susceptibility to heart disease, perceived difficulty of participating in the 2 selected preventive health practices, knowledge of calories, and preventive health actions taken during the last year. The control variables included: age, income, education, and organizational participation. Findings indicated: (1) perceived susceptibility was not related to either eating habits or physical activity; (2) perceived difficulty of the preventive behavior was positively correlated with both dependent variables; (3) knowledge of calories was positively related to getting regular exercise; (4) education was positively correlated with preventive eating habits. It was concluded that health educators would find it useful to attempt to reduce perceived barriers to preventive health by initiating child care facilities, food preparation study groups, etc. (JC)

**A Cross-Cultural Study of Concept Learning.**

**Pub Date** Sep 75

**Note**—208p.; Ph.D. Dissertation, University of Calgary

**EDRS Price MF-\$0.76 HC-\$10.78 Plus Postage**

**Descriptors**—Abstraction Levels, \*American Indians, Anglo Americans, Children, \*Cognitive Development, Comparative Analysis, \*Concept Formation, \*Cross Cultural Studies, \*Cultural Differences, Doctoral Theses, Hypothesis Testing, Intelligence, Literature Reviews, Memory, Models, Perception

**Identifiers**—Alberta, Canada, \*Stonies

After reviewing the literature relative to culture and cognition, an hypothetical model was developed to explain some aspects of concept learning and cognitive development. To test aspects of the model, 3 tests which had had prior use in cross-cultural studies and 5 original tests were administered individually to 34 Stoney Indian and 34 Euro-American 8-year-old children derived from the same geographic region in Alberta, Canada. Tested was the relationship between cognitive learning and: (1) field independence, (2) abilities to perceive and compare attributes, (3) category width, (4) level of abstraction, (5) memory, and (6) general intelligence. Results suggested some support for the proposed model and identified some areas of cultural differences. For Euro-American children, field independence was correlated with the ability to perceive attributes and both were related to the ability to verbalize concepts. For the Stoney children, more than one ability or set of abilities was involved in concept learning. Memory played a greater role in problem solving for Stoney Indian subjects, and they did better on the first two Stone Games and relatively better on the tests of field independence and memory, while Euro-American performance was more markedly superior on the remaining measures. **Descriptors**—\*Aspiration, Caucasians, \*Education, \*Expectation, Grade 10, High School Students, Negroes, \*Occupations, Racial Differences, Sex Differences, \*Vocational Education

**Identifiers**—\*Anderson County South Carolina School District, South Carolina (Anderson)

The hypothesis that the educational and occupational aspirations of students who choose to attend a vocational high school differ from those attending conventional high schools was tested. The educational and occupational aspirations and expectations of 10th grade high school students in a vocational high school were compared with those of 10th grade students in two conventional high schools in Anderson, South Carolina. Administered to all 10th grade students in the three schools on the day of interview in 1972, questionnaire responses were obtained for 236 and 80 white males; 250 and 76 white females; 60 and 4 nonwhite males; and 65 and 14 nonwhite females from the "normal" and vocational schools respectively. Results indicated: (1) the hypothesis was supportable; (2) a lower proportion of students from the vocational school had a preference for professional and technical occupations (with the exception of the nonwhite males, where the small number precluded conclusions); (3) a larger proportion of both white and nonwhite female vocational students aspired to clerical, sales, or service worker jobs; (4) with the exception of nonwhite females, a smaller proportion of the vocational students were interested in higher education; and (5) more of the vocational students were desirous of completing their formal training with vocational or high school. **Identifiers**—\*South Carolina

The effectiveness of a special South Carolina rural youth project was evaluated. Initiated in 1972, the project was designed to improve the quality of life of rural youth from low income families via community clubs for youth between the ages of 9 and 16. In order to measure the attitude changes (aspirations and expectations) of club members, a questionnaire was designed which included items relative to: (1) education, (2) residence, (3) occupation, (4) marriage and family, (5) community, (6) self-image, (7) self-concept, (8) concept of chance for success. Usable data were obtained from black and white, male and female, youth in attendance at club meetings (n=509) and summer camps (n=559). The research effort failed to measure any pattern of statistically significant changes in the attitudes of program participants. It was suggested that possible reasons for failure to measure change might have been: (1) the sophistication of the questionnaire, (2) the lack of overlap in interviews, (3) the variations in time lapse between questionnaires, (4) the use of responses from youth who had not been in the program long. The evaluation team did make some "impressionistic" observations which indicated: (1) program variations had met the different needs of differing groups; (2) participants and their parents had accrued positive benefits from the

program; (3) the program had been successful since members wished to continue club activities. (JC)

Descriptors—Caucasians, \*Followup Studies, Mobility, Negroes, \*Occupational Aspiration, \*Occupational Choice, Racial Differences, Sex Differences, Southern States, Tables (Data), \*Values, \*Young Adults

Identifiers—\*Goal Blockages, South Carolina

In order to examine changes in: (1) occupational aspirations, (2) perceptions of goal blockages to occupational aspirations, and (3) values associated with occupational choice, a sample of South Carolina young adults were surveyed. Usable data were obtained from 75 white and 75 black males and 50 white and 50 black females who had been contacted as 10th and 12th graders and again as young adults in 1972. Responses relative to occupational aspirations indicated no marked changes, though: (1) white male managerial and white female technical/professional aspirations had increased; (2) black male glamour aspirations had decreased and their service worker aspirations had increased; (3) black female service worker aspirations had decreased while their sales/Clerical aspirations had increased. Responses relative to value changes and occupational choice indicated: (1) the chance to make money had decreased in importance while a somewhat more altruistic attitude had increased among all groups; (2) the chance to become an important person had decreased in importance for all groups except white females; (3) steady employment had increased in importance for all except white males. Responses relative to goal blockage indicated: (1) an increase in black male and female perceptions of race as a job deterrent, (2) a decrease among all group perceptions of lack of technical schools as a deterrent, (3) a decrease among all groups in geographic immobility perceptions. Identifiers—\*United States (West)

Summarizing research conducted under the Western Regional Research Project on the delivery of rural community services, this report presents explications of the following generalizations which have been supported by research: (1) Many rural service institutions need reorganization and renewal, (2) Regionalization increases organizations' ability to provide some rural community services, (3) Rural development depends directly on citizen participation and representation of various population segments, (4) Effective leaders view development as a community process, not a personal one, (5) Public leaders seem to be drawn primarily from certain community segments, (6) Even with fewer and less adequate services, rural residents prefer rural life, (7) Availability of health-care services affects their use, (8) Rural people want innovative health care practices, (9) Mechanisms are needed for using results from rural community service research. Additionally, the following future

research needs are identified: (1) the construction and testing of social indicators, (2) perspectives on the adequacy of community services, (3) the study of the effectiveness of alternative organizational structure, (4) comparative analyses of service delivery systems and leadership structures, (5) the composite of community services appropriate for rural areas. Twenty-nine abstracts of research under the W-114 project are presented in the Appendix. (JC)

Report on an Effort to Create an Indian Community School.

New England Program in Teacher Education, Durham, N.H.

Pub Date 1 Dec 75

Note—10p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Agency Role, \*American Indians, Budgets, \*Community Schools, Conflict, \*Decision Making, Elementary Secondary Education, Government (Administrative Body), Problems, \*Program Descriptions, Reservations (Indian)

Identifiers—Canada, \*Maliseets, New Brunswick, Northern Development and Indian Affairs

Detailing the decisions and procedures involved in the development of a community school (K-9) on the Tobique Indian Reserve in New Brunswick, Canada, this report describes the initial stages of development and presents the viewpoint of the education project director. Among the procedures, processes, problems, and conflicts described are: (1) selection of the education project director; (2) use of a community survey to determine community educational needs and preferences; (3) creation of a 4-member team of advisors to aid the chief and council in deciding on facility type and program direction; (4) securing an architect who could be made to respect Reserve authority rather than that of Indian Affairs; (5) recruitment of a suitable director; (6) a communication breakdown between the school board, the chief, and the advisory team; (7) conflict between the Reserve and Indian Affairs over land, money, personnel, etc. (an "approved" budget went from \$313,000 to \$250,000); and (8) authority conflicts among all decision makers. Despite the numerous problems cited, this report indicates that the school did open sometime in 1975 but still needs: (1) an acceptable education agreement; (2) renewal of discussions between the chief, council, and school board; (3) negotiation of a realistic budget and fiscal control with Indian Affairs; and (4) on-going staff and curriculum development. Designed as a supplementary guide to "History of the Sisseton-Wahpeton Sioux Tribe of the Lake Traverse Reservation" (1972 edition), this curriculum guide presents 12 elementary/secondary education units. Among the major items included in most units are concepts; behavioral objectives; vocabulary lists; activities and the materials needed for the activities; illustrations, when appropriate; suggested reading materials; and evaluation criteria. The two primary level units are titled Family Life of the Sisseton-Wahpeton Indians in the 19th Century and Heritage of the Sisseton-Wahpeton Sioux. The intermediate level units include: (1) Migration of the Sisseton-Wahpeton Indians; (2) Fur Trading with the Sisseton-Wahpeton Indians; (3) The Minnesota Uprising; (4) Establishment of the Forts and Scout Camps; and (5) The Heritage of the Sisseton-Wahpeton Indians. The three junior high level units are titled: (1) Migration and Settlement of Sisseton-Wahpeton Bands, (2) Seven Council Fires (exploration of the peoples who made up the Seven Council Fires); (3) Sisseton-Wahpeton Leaders (Standing Buffalo, Red Iron, John Other Day, Sam Brown, and others). The senior high level units include: History of Sisseton-Wahpeton and Tribal Government (important Federal legislation is included in this unit). (JC)

As stated in the Preamble, the Sisseton-Wahpeton Sioux Tribe has established this "Revised Constitution and Bylaws" in order to "form a better tribal government, exercise tribal rights and responsibilities and promote the welfare of the people". This "Revised Constitution" consists of 11 Articles which are identified as follows: (1) Jurisdiction (territorial); (2) Tribal Membership; (3) Tribal Organization (Tribal Council, Executive Committee, and General Council); (4) District Organizations (7 districts, district councils, officers and committees, and local district jurisdiction); (5) Nominations and Elections (election requirements, voting privileges, registering procedures, etc.); (6) Vacancies, Removal, and Recall from Office (reasons and procedures); (7) Tribal Council Powers (pursuant to the "Revised Constitution" and any applicable Federal statutes or regulations); (8) Meetings (time and place, Tribal Council and Executive Committee quorum requirements); (9) Bill of Rights (equal social, economic religious, and political rights for all

tribal members); (10) Initiative and Referendum (petition requirements, ballot requirements, and voting procedures); (11) Amendments (the "Revised Constitution" may be amended by a majority vote subject to approval by the Commissioner of Indian Affairs). (JC)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Iowa

During fiscal year 1975, 4 school attendance centers were operated: (1) Migrant Action Program, Mason City; (2) Reinbeck Community, Reinbeck; (3) Muscatine Community, Muscatine; and (4) Muscatine-Scott County, serving Muscatine and West Liberty schools. Although each local educational agency (LEA) approached the migrant child's educational problems differently, the individualized instruction concept was central in all programs. There were 229 migrant children served during the year. Standardized testing, Migrant Student Record Transfer System printouts, and teacher judgement determined the grade level instructional activities. Normal age-grade criteria was used for grade classification during the regular school term; during the summer, instructional grouping was established by attainment level with the actual age range limited to a 3-year differentiation. Although summer programs were integrated with the regular Title I summer programs in the morning, afternoon sessions were for migrant children only and included such enrichment activities as art, swimming, field trips, and club activities. Coordination with other program concerned with the migrant's problems was maintained. Each LEA provided inservice training for their entire migrant program staff. Each LEA reported that the migrant educational program was successful. This report includes the Muscatine Community School evaluation report to show in more detail the LEA perspective in migrant education. (NQ)

The Bilingual Mini-Head Start program which offers service to migrant children and their families over a 6,000 mile circuit using a totally paraprofessional teaching staff, consists of 6 components: instruction, staff training, parent and community involvement, materials development, relocating delivery system, and management. An interim evaluation of the program's progress during 1971-72 was conducted. Because of the project design and data collection timetable, many of the program's objectives could not be assessed at the time as to whether they were being met. When this was the case, it was indicated that data collection had not been completed. Preliminary findings were reported when the preliminary data yield information felt to be a useful indicator of program progress. Instructional goals for children

could not be assessed until post-testing was done. However, based on available records, all the process goals concerning the instructional program to be offered were being met. Training goals were being met although on a delayed schedule. Goals for materials development were either being met or were substantially completed, with the exception of the development of the cultural heritage materials which was behind schedule. Goals for carrying out a relocating program delivery system were met beyond the minimum standard set, and far beyond the level of comparable programs in offering continuity to moving families. Identifiers—\*Texas (La Grulla)

The Bilingual Mini Head Start program is an early education program for children of migrant farm workers. The program has three permanent sites—two year-round sites in Washington which serve both mobile migrants and seasonal farm workers' children, and a home base site in Grulla, Texas which serves only mobile migrant children. Teachers from Grulla site move into the migrant stream when the families move north. Each teacher continues to serve a small cluster of migrant children in a series of temporary field locations in Washington, Idaho, and Illinois. Thus, continuity of educational services is offered throughout the migration of this mobile population from Grulla. The program consists of six components: instruction, staff training, parent and community involvement, management, materials development, and relocating delivery system. This report presents the evaluation of the program's progress for the project year 1972-73. Findings are presented by objective in each component. Overall, the objectives are being met. (NQ)

Identifiers—\*Texas (La Grulla)

Conceived as an educational experiment designed to meet the unique needs of migrant children, Training Migrant Paraprofessionals in Bilingual Mini Head Start is an early education program for children of migrant farm workers. Initiated in 1971, the program has two components: the "Mobile Component" and the "Washington State Component." The "Mobile Component" provides service to children from the home base community of La Grulla, Texas, both in Texas and as the children move with their families to northern states and back again. The "Washington State Component" provides year-round services at two stationary sites for both interstate and intrastate migrants or seasonal farm workers. Three key concepts developed by the program account for the difference in its success and the success of other models of mobile programs: (1) use of

adult migrants as teachers, (2) use of a "mini" center concept, and (3) application of "coordinated or supplementary services" concept. This evaluation report discusses the program's progress during the 1974-75 program year. The outcome and process objectives are given along with a summary of findings for the following components: instruction, staff development, parent and community involvement, materials development, and management for interstate delivery system. The Bilingual Mini-Head Start program aims to maintain contacts with migrant children from their home base through a series of northern work locations. The project has served migrant children over a 6,000 mile circuit in three different states, showing its flexibility at each site in adapting to take advantage of local programs as well as providing continuity through a continuation of the bilingual curriculum with the mobile teaching staff. This paper presents a final progress report for the 1971-72 program year. Program progress is discussed by objective for the instructional, teacher training, parent and community, materials development, relocating delivery systems, and management components. Overall, the project has achieved its objectives. (NQ)

Identifiers—\*Texas (La Grulla)

A 5-year experimental project, the Bilingual Mini Head Start program is an early education program for children of migrant farm workers. The program has 2 components: the mobile and the stationary components. In the stationary program, 2 year-round centers are operated in Connell and Moses Lake (Washington). These centers' purpose is to demonstrate how services may be provided with maximum effectiveness to a very unstable population group. In the mobile program, teachers are selected from adults whose families move with the crops. These teachers accompany small clusters of children from La Grulla (Texas) to various work stops providing continuing educational services. This program's purpose is to demonstrate how much benefit can be gained by providing continuity in an educational program as the children move. Based on the program objectives outlined in the May 1973 proposal under which the program is currently operating, this report presents an evaluation of the program's progress to approximately the 27th month of operation. The evaluation covers the instructional, staff development, parent involvement, materials development, relocating delivery system, and management components. (NQ)

Identifiers—\*Texas (La Grulla)

A 5-year experimental program, the Bilingual Mini Head Start program is an early education program for children of migrant farm workers. Consisting of a mobile and a stationary component, the program includes: (1) an interstate mobile delivery system, (2) an individualized curriculum which can be taught by migrant adults, and (3) intensive training of paraprofessional staff. The mobile component, which operates in La Grulla (Texas) during the winter months, has trained adults in migrant families to serve as teachers. As the families move north, these adults continue to teach children in small groups as they move to various work stops in Washington, Oregon, Idaho, and Illinois. The stationary component consists of 2 year-round centers in Washington. These centers serve migrant children on an in and out basis and the children of seasonal farm workers who are now "settled out" in Washington. This report presents an evaluation of progress to the end of the third fiscal year of operation. The evaluation reports findings on the program objectives outlined in the 1973-74 project proposal pertaining to the instructional, staff development, parental involvement, materials development, relocating delivery system, and management components. Identifiers—\*Washington

An early childhood education program for children of migrant and seasonal farm workers, the project provides a supplemental tutoring program, offered outside of regular school hours, by bilingual adult paraprofessionals who are former migrants or seasonal farm workers. Composed of a "mobile" and a "stationary" program, the project focuses on: (1) developing the child's ability to understand and use both Spanish and English in oral communication, (2) giving bicultural instruction, and (3) reinforcing the child's learning of the basic academic skills of reading and mathematics. In the mobile program, migrant adults are recruited in La Grulla (Texas) and employed year-round to serve the children as they relocate to various work stops. The stationary program serves both migrant children on an in and out basis, and children of seasonal farm workers in permanent locations operating year-round in Connell and Moses Lake, Washington. Covering the stationary program's progress from February 1 through March 31, 1974, this report is limited to reporting on the "start-up" objectives. These include the institutional objective involving coordination with public school personnel, contact with parents, and student enrollment;

and the procedural objectives involving recruitment orientation and initial staff training. Since the mobile program is not scheduled for implementation until April 1974, it is not covered. (NQ)

An early childhood education program for children of migrant and seasonal farm workers, the Project provides tutoring, usually outside of regular school hours, to kindergarten and first grade children. The tutoring is done by adult paraprofessionals who are former migrants or seasonal farm workers. Program focus is to: (1) develop the child's ability to understand and use both Spanish and English in oral communication, (2) give bicultural instruction, and (3) reinforce the child's learning of the basic academic skills of reading and mathematics. Tutoring is provided to migrant children in their home base in Texas as well as during the migrant season in Washington. Two year-round sites in Washington (Moses Lake and Connell) offer services to children of seasonal farm workers and migrant families who have graduated from the Mini Head Start program (see RC 008 937-942) into classrooms all over the city and neighboring communities. These children are brought together for supplementary tutoring to continue dual language teaching, cultural lessons, and reinforcement in basic academic areas in an attempt to maintain the gains made in the preschool program. This report presents the second progress evaluation, covering program operations through June 30, 1974. Also included are a brief discussion of start-up program adjustments and a letter from a public school teacher regarding the project's value. (NQ)

Initiated in February 1974, the Project consists of a mobile and a non-mobile component. In the mobile component, adults from the families who migrate are trained to serve as a teacher. These teaching adults tutor the children, usually in groups of 6 to 10 children, in each location to which they move. Since the public school has the primary responsibility for providing education, arrangements are made with the local schools to allow each adult to continue the tutoring. In the non-mobile component, the children leaving the Bilingual Mini Head Start program (see RC 008 937-942) are provided supplemental tutoring services. By continuing to work with these children outside of regular school hours, the children receive the continuation of instruction in the Spanish and English language program, the cul-

tural knowledge lessons and activities, plus reinforcement of the instruction they receive in school in math and reading through continued work in the reading and math series begun as preschoolers. Covering the program's operations from July through December 1974, this report presents the third evaluation of the program's progress toward achieving the institutional, procedural, and educational outcome objectives. Overall, the objectives have either been met or partially met. Rationale for this program is briefly discussed. (NQ)

The Bilingual Mini-School Tutoring Project offers parents a major role in their children's education as decision makers responsible for hiring and other areas of program operations and as teachers providing bilingual, bicultural instruction. The program design has two components: the mobile and the non-mobile component. The non-mobile program has been in operation since February 1974 at Connell and Moses Lake, Washington while the mobile program has only been in operation since May 1974. Program objectives are of three types: institutional, procedural, and educational product objectives. Institutional objectives involve coordination with school administrators and enrollment of children. Procedural objectives involve the use of Spanish and English, dual language teaching skills, and teaching bicultural lessons, math, and reading. The educational product objectives include gains in first and second language, mastery of cultural heritage lessons, and accelerated gains in math and reading. This fourth progress report covers program operations from July 1, 1974 through June 30, 1975. The narrative section of the report describes the functioning of the parent advisory groups, the logistics of the mobile program, and the way in which the program has managed to follow children to eight different communities in four different states. Overall, the objectives are being met or partially met. (NQ)

Descriptors—Age, \*Alaska Natives, American Indians, Boarding Schools, Counseling, \*Dropouts, \*Educational Research, Elementary Secondary Education, Eskimos, Institutional Environment, Literature Reviews, Parent School Relationship, School Community Cooperation, Self Concept, Student Attitudes, \*Student Characteristics, \*Synthesis

Identifiers—Alaska, BIA, \*Bureau of Indian Affairs

Summarizing and synthesizing seven research studies which focus on the problem of the Alaska Native school dropout, this report describes each research project, identifies research findings, and presents recommendations. The seven studies are presented via consideration of: (1) the characteristics of the student who has dropped out of school; (2) the characteristics of the student who has remained in school; (3) the differences between the students who have and those who have not dropped out of school; (4) the reasons certain dropouts have returned to school; and (5)

the attitudes of students toward the Bureau of Indian Affairs (BIA) boarding schools. In view of the studies under consideration, this report also examines: (1) the limited future orientation of the dropout; (2) the negative self-concept of the dropout; (3) the effects of school-community-planning and coordination; and (4) the relationship between parents and the educational system. Among the major recommendations presented are: (1) re-examination of school curricula and counseling services; (2) development of village procedures to prepare prospective boarding school students for boarding school life; (3) development of a school oriented identification system which would report dropouts to the appropriate agencies; (4) development of a school oriented post dropout plan; and (5) development of a planning and coordinating system within the BIA offices. The 1972-73 New Rural Society Project.  
Fairfield Univ., Conn.

Spons Agency—Department of Housing and Urban Development, Washington, D.C.

Report No.—PB-231-826

Pub Date May 73

Note—155p.

Available from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161 (PB-231-826, MF \$2.25, HC \$6.25)

Document Not Available from EDRS

Descriptors—Annual Reports, \*Business, \*Community Services, Education, Energy Conservation, Field Studies, Health, Institutions, Living Standards, Local Government, \*Pilot Projects, Population Distribution, Program Descriptions, \*Rural Development, Technology, \*Telecommunication

Identifiers—Connecticut (Northeast), New Rural Society Concept, \*Quality of Life

The New Rural Society Concept, which urges establishment of a more balanced rural-urban population distribution in response to the interdependent rural-urban energy crisis, is explicated in this report on a model project initiated in 1972 in 10 northeastern Connecticut townships. The following are cited as major project objectives: (1)

to obtain information and experience in the application of communications technology for the development of rural areas; and (2) to develop a model of organizational procedure that would be transferable to other rural areas. Organized via three major project tasks, this report details: (1) Regional Community Development Task; (2) Institutional Development Task (business and government); and (3) Experimental Communications Task (lab experiments and field tests). Focusing on the means to improve rural quality of life in the areas of health, education, entertainment, culture, and community expression via use of existing communications technology in the test area, this report indicates: (1) use of communication techniques can improve rural quality of life; (2) urban office relocation in conjunction with teleconferencing can facilitate the location of business and government components in rural towns; (3) audio-only teleconferencing can be more effective as a substitute for face-to-face meetings than has been previously thought. Identifiers—\*Ecuador, University California Intervention Study, University Massachusetts Impact Study, University of Massachusetts

As the second volume in a 4-volume evaluation report on the University of Massachusetts Non-Formal Education Project (UMass NFEP) in rural Ecuador, this volume details the evaluation design. Cited as basic to the evaluation design are questions which ask: (1) What kinds of effects (changes) can be observed? and (2) What are characteristics of the materials and procedures as they can be logically and/or empirically related to the desirable outcomes? Cited as major components of the design are: (1) The experimental field implementation and concurrent evaluation of the UMass NFEP education games that were among the most widely used/accepted education games; and (2) The UMass non-formal education intervention impact study (an impact profile, a qualitative analysis of intervention based on observations and interviews, and individual testing of game session participants). Additionally, this report describes: (1) Materials Selected for University of California at Los Angeles Field Implementation and Evaluation; (2) Instruments (a set of individually administered tests given in a pre-second-post basis to measure literacy, numerical skills, and critical consciousness or attitudes); (3) Staffing (selection criteria, training, and procedures); (4) Implementation Procedures (selection of communities and control and experimental groups); (5) Criteria for Field Supervision and Quality Control. Identifiers—\*Ecuador, University of Massachusetts

As the third volume in a 4-volume evaluation report on the University of Massachusetts Non-Formal Education Project (UMass NFEP) initiated in rural Ecuador in 1973, this volume presents an in-depth analysis of the evaluation findings. Since UMass NFEP was initiated for purposes of developing new materials and methodologies in conjunction with and in support of existing Ecuadorian non-formal education programs, these findings are presented in terms of 13 basic evaluation questions relative to the following materials and methodologies: (1) the implementation process; (2) the degree to which project objectives were met; (3) the intent of the project; (4) the learning outcomes of educational games designed to promote numerical skills, literacy, and critical consciousness; (5) the characteristics of the more and less effective materials; (6) the characteristics of materials that worked well with learners of specific characteristics; (7) the facilitator/teacher variables; (8) the motivational attributes of each of the four games selected for in-depth experimental evaluation; (9) the change in attitudes and behaviors produced by each of the selected non-formal education games; (10) the importance of game sequencing factors; (11) the effect of replay frequency for each of the games; (12) the replication possibilities for the project; (13) the components for development of materials and programs in countries similar to Ecuador. As the final volume in a 4-volume evaluation report on the University of Massachusetts Non-Formal Education Project (UMass NFEF) initiated in rural Ecuador in 1973, this volume presents appendices to volumes I-III. Appendix A includes the following items: (1) Community Demographic Profile; (2) Description of Introduction to the Community; (3) Participant Attendance List; (4) Description of Individual Game Sessions; (5) Registry of Reasons for Participant Desertion; (6) UMass Community Impact Profile. Appendix B includes: (1) Test Instructions for Animador: Pre-Test Version One; (2) Pre-Test: Version One; (3) Test Instructions for Animador: Second Test Version One; (4) Second Test: Version One; (5) Test Instructions for Animador: Third (Post) Test Version One; (6) Third (Post) Test: Version One; (7) Test Instructions for Animador: Pre-Test Version Two; (8) Second test: Version Two; (9) Test Instructions for Animador: Third (Post) Test Version Two; (10) Third (Post) Test: Version Two; (11) Third Test Annex (used with all evaluation participants); (Post) Test: Version Two; (11) Third Test Annex (used with all evaluation participants); (12) UMass Impact Annex (used with all tests given to UMass participants); (13) Standard Spanish Grading (used with all tests, both versions); (14) Attendance Information (for each evaluation participant). Appendix C presents descriptions of the experimental communities. (JC)

Identifiers—Appalachian State University, \*Outdoor Bound, Stress Experiences

In an effort to measure the impact of Outward Bound (OB) education on teacher candidates, an 18-day stress experience was arranged for 12 Appalachian State University students and then compared with the effects of the normal 11-week student teacher experiences of two other groups. The OB group underwent a series of individual and group wilderness problems involving cross-country back packing, rock climbing, white water rafting, and a three-day wilderness solo without food. The OB students were also given a dime and asked to "make do" in Atlanta, Georgia for several days. Learning by doing and group cooperation were emphasized. During the remaining 8 weeks of the semester, these students taught in a classroom. Pre- and post-assessments by OB students of their overall professional education and their personal teaching readiness and performance were positive, as were their summarization statements. Evaluations by public school classes and college supervisors did not indicate significant differences among the groups, but pre- and post-inventories relative to the total contribution of professional education to teaching readiness showed marked changes in favor of OB, while the other groups' responses did not vary. Specifically, the OB group gained in: (1) teacher self-confidence; (2) student involvement (involving students); and (3) humanism (humanistic receptivity to others). (JC)

Descriptors—Academic Achievement, American Indians, Comparative Analysis, Demography, Economic Factors, \*Ethnic Groups, Negroes, \*Population Trends, \*Socioeconomic Background, \*Spanish Culture, \*Statistical Data, Tables (Data)

Prepared as a backup resource document to the three-volume study of the socioeconomic characteristics of the ethnic minorities, this report presents data on the socioeconomic characteristics of the ethnic minorities in each of the 10 HEW regions. Data on over 20 major economic and social indices were accumulated for the major subgroups in each region. Available data are presented in comparison with data on the characteristics of the total population, Blacks, and the Spanish speaking population in that region. Tabular data for each region indicate: (1) from which states (and in some cases, cities) the available regional data have been drawn; (2) the percentage of the region's total subgroup population represented by the detailed information; (3) the percentage of that subgroup's national population living in the region; and (4) the percentage of the region's total population, all races included, each subgroup represents. In some cases, the characteristics of a subgroup population are based on a single state, even a single city, if that were the only data available. When no detailed data on a particular subgroup are available, only summary data on the subgroup population are provided. (NQ)

**Sex-Role Development of Preschool Middle- and Lower-Class Mexican-American and Anglo-American Males.**

Pub Date 18 Dec 74

Note—39p.; M.A. Thesis, University of El Paso at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

Document Not Available from EDRS

Descriptors—\*Anglo Americans, Comparative Analysis, Individual Development, Lower Class Males, Males, Masters Theses, \*Mexican Americans, Middle Class, \*Preschool Children, \*Sex Role, \*Socioeconomic Status

The sex role development of 3- and 4-year-old middle- and lower-class Mexican American and Anglo American males was compared. The sample consisted of 15 Mexican Americans and 15 Anglo Americans of low socioeconomic status (SES) and 15 Mexican Americans and 15 Anglo Americans of middle SES from day-care centers and nursery schools. Approximate SES of the parents was determined by Warner's Index of Status Characteristics; ethnic classification was determined by the parents' self-classification. Presence of a father-figure and sex of older siblings were ascertained. Teachers were asked to fill out a rating scale to measure adoption. Children were administered Brown's 1956 "It" Scale for Children in the standard form to measure orientation and a "You" form to measure preference. Parametric (analysis of variance) and non-parametric (Kruskal-Wallis one-way analysis of variance and Mann-Whitney U Test) resulted in no significant differences on the "It" Scale either for SES or ethnicity. The teacher's rating scale differentiated between the groups, showing the middle-class Anglo Americans and the lower-class Mexican Americans as more masculine than the lower-class Anglo Americans and the middle-class Mexican Americans. Identifiers—BIA, \*Bureau of Indian Affairs, United States

Written as a tribute to American Indian law enforcement officers and the Indian Criminal Justice System, this monograph details the history of the legislative, judicial, financial, and cultural problems associated with the development of Indian law enforcement. Citing numerous court cases, pieces of legislation, and individual and organizational conflicts, this history emphasizes the people, both Native American and white, who helped to establish tribal, reservation, and Federal systems of justice and law enforcement. Among the many people mentioned and pictured via photographs are: (1) San Carlos Police Captain, Eskinilay; (2) Indian Agent John Clum and the San Carlos Apache Police; (3) Sinte-Galeaka; (4) San Sixkiller, High Sheriff of the Cherokee Nation; (5) Red Tomahawk, the Indian policeman who shot Sitting Bull in 1890; (6) Crow Dog, a Captain of Indian Police at Rosebud; (7) Gall, a judge on the court of Indian offenses at Standing Rock; (8) Quannah Parker, a Comanche who served as chief judge of the Kiowa Court; (9) Julia Wades in Water, the first woman to serve as an officer in the Indian Police; (10) William "Pussyfoot" Johnson, a Special Officer for the Bureau of Indian Affairs hired to keep alcohol out of the Indian Territory; (11) the Honorable Virgil L. Kirk, Sr., Chief Justice of the Navajo Nation. (JC)

Identifiers—Rural Urban Migration, \*Rural Youth Program, United States (North Central)

The following three models in the Rural Youth Program (a program for the economically disadvantaged) were evaluated: (1) The Corn Belt Model (Iowa, 1973-74); (2) The Northern Forest Model (Minnesota, 1973-74); (3) The Central Plains Model (Nebraska, 1972-73). In addition to base line school and community data, occupational, educational, and social data were obtained via questionnaire for both experimental and control groups (graduated seniors) in each model location. The participation of the target population in summer, in-school, and out-of-school model programs was evaluated in terms of the following criteria: (1) placement in a job; (2) placement in a higher education experience or an additional training opportunity; and (3) preparation for the transition from rural to urban living. Although after the first year of operation, the Minnesota and Iowa projects attempted to bolster their vocational counseling and education programs for high school seniors and did manage to obtain a high rate of participation in one or more of the school year activities, the follow-up study indicated that either these services were not likely to have a significant impact on the post-high school behavior of these youths, or the impact was not sufficiently great to be measured in quantifiable terms. With a few exceptions, there was

no statistically significant difference between the post-high school behavior of youths in the experimental and control groups. (JC)

Note—18p.; Paper presented at the Rural Sociology Section of a Meeting of the Southern Association of Agricultural Scientists (Mobile, Alabama, February 1-4, 1976)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Attitudes, \*Change Agents, \*Community Development, \*Community Involvement, \*Community Leaders, \*Economically Disadvantaged, \*Heads of Households, \*Housing Patterns, \*Hypothesis Testing, \*Laymen, \*Program Evaluation, \*Rural Population, \*School Community Relationship, \*Welfare Recipients  
Identifiers—\*Alabama (Lawrence County)

The effectiveness of a leadership development program for rural lay leaders on promoting community improvement in Lawrence County, Alabama was evaluated. The sample consisted of 16 disadvantaged rural lay leaders who participated in the 2-month program and 24-month follow-up activities; 60 disadvantaged rural lay leaders who only participated in the follow-up activities; and 200 disadvantaged heads of households. Pre- and post-data were obtained relative to: (1) attitudes toward public school officials and school programs; (2) attitudes toward organizing local community development programs; (3) participation in local community development activities; (4) home ownership; (5) public assistance recipients; and (6) opinions on community quality. Eight null hypotheses tested via community surveys, questionnaires, community attitude inventory, and community solidarity index scale revealed: (1) significant attitude changes among the 16 and the 60 lay leaders relative to public school officials and the school program; (2) a significant attitude change among the 200 heads of households relative to organizing a local community development program; (3) a significant change among the 200 heads of households relative to participation in local community development activities; (4) a significant change in the proportion of the 200 who owned their own home; (5) a significant difference between the mean community solidarity scores. Identifiers—\*United States (Southeast)

The study's purpose was to investigate and identify the barriers to minority groups, which have resulted in under-representation in allied health professions postsecondary education programs. Two-day conferences were held in the seven Southeastern states of Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, and South Carolina. These conferences were divided into two discussion groups: (1) students, comprised of American Indians, Black Americans, and Spanish Americans, and (2) faculty members, high school counselors, administrators, and representatives of minority organizations involved in the education of minority students. A total of 160 participants attended the sessions. Priority rankings were made at the end of each discussion group. Sociodemographic characteristics were compiled for each State regarding population composition, economic activities, enrollment in educational institutions, health man-

power, and allied health manpower in order to put the findings into proper perspective. This report reflects data obtained from the conference participants as well as administrators and faculty from allied health schools in the Southeast who were not able to attend the discussion groups. Given for each State are the State profile, educational institution profile, group discussions and findings, and the priority ranking. An overview of the study is included. (NQ)

Identifiers—Ausubel (David), Research Reports

This study presents a holistic framework which can be used as a basis for decision-making at various points in the curriculum-instruction development process as described by Johnson in a work published in 1967. The proposed framework has conceptual bases in the work of Thomas S. Kuhn and David P. Ausubel and utilizes the work of several perceptual and cognitive psychologists. Also included is a critique of certain educational practices (tracking students on the basis of IQ scores, for an example); and sociopolitical implications of these interpretations are presented. Descriptors—\*Educational Research, \*Elementary Education, \*Elementary School Science, \*Evaluation, \*Group Tests, \*Process Education, \*Science Course Improvement Project, \*Science Education, \*Science Tests, \*Tests

Identifiers—Research Reports, Science Curriculum Improvement Study, SCIS, Test of Science Inquiry Skills

The purpose of this study was twofold: (1) to develop a paper and pencil science process test for fifth-grade students based on some of the goals for grades 3-5 of the Science Curriculum Improvement Study (SCIS); and (2) to use this test and other tests to compare fifth-grade students who had been in the SCIS program for five consecutive years with similar fifth-grade students who have been enrolled in traditional textbook series science courses. The Test of Science Inquiry Skills (TSIS) was administered to 310 SCIS students and to 191 "traditional textbook" students. Twelve SCIS and seven control classrooms were compared using scores from the TSIS and other tests. Evidence from this study indicated that the paper and pencil test format can function effectively as a group process test for fifth-grade students and provide a means of evaluating the students' ability to utilize process skills. Students had no difficulty with the test or in marking machine-scorable answer sheets. They could follow the questions and relate the test items to specific diagrams. Diagrams, charts, graphs, and pictures can thus be used to effectively communicate problem situations to fifth-grade students. (Author/LS)

Identifiers—Research Reports

Two problems were considered in this study: (1) to determine if there were combinations of variables in the population studied that were predictive of science-teaching practices and/or teacher satisfaction with teaching science; and (2) to determine if models could be developed to explain possible directional effects of selected teacher variables on science-teaching practices and/or teacher satisfaction with teaching science. The population for the study consisted of all the public elementary schools in the New England Region, the Midwest Region, and the Southwest Region of the United States. The sample consisted of 2,948 randomly chosen public elementary schools. Data were analyzed by descriptive analysis consisting of frequency counts, percentages, means and standard deviations. Correlational analysis consisted of Pearson-Product Moment Correlation Coefficients between teacher variables. Predictive analysis using step-wise regression procedure and factor analysis were used. Teacher variables most frequently correlated with science teaching practices were: (1) science in-service participation, (2) availability of supplies and equipment. Best predictors of science-teaching practices were: (1) grade level, (2) limiting teacher effectiveness factors, and (3) availability of supplies. (Author/EB)

The Effects of Individual Differences on Learning from Written Materials: The Control of Inspection Behavior by Test-Like Events.

Pub Date 73

Note—219p.; Ph.D. Dissertation, The University of Florida

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-9570, MF-\$7.50, Xerography-\$15.00)

Document Not Available from EDRS

Descriptors—Achievement, Content Reading, Doctoral Theses, Educational Research, Individual Differences, \*Instruction, \*Science Education, \*Textbook Content, \*Textbook Research

Identifiers—Research Reports

The purpose of this study was to examine the effects of verbal and perceptual aspects of learner aptitude, in relation to inspection behaviors performed while learning from written materials containing two modes of instructional content. Science instructional materials containing both text and diagrams were modified by (1) inserting questions that asked for information from the text or from the diagrams, or (2) providing material without questions. The sample was formed of 185 subjects. Aptitude tests were given to all subjects. Pre- and post-test measures included performance on relevant diagram questions, incidental diagram questions, relevant text questions, and incidental text questions. The analysis of data revealed that inserted questions facilitated the acquisition of relevant information while exerting little influence upon the acquisition of incidental information. A positive relationship was also found between the number of inserted questions answered and the performance on relevant post-test questions. (Author/PS)

Descriptors—Doctoral Theses, Educational Research, \*Federal Aid, \*Financial Support, \*Higher Education, Instruction, National Programs, \*Negro Colleges, Private Colleges, Science Education, \*Scientific Research

Identifiers—Research Reports

The purpose of the study was to determine the influence federal grants had on research and instruction in the sciences as perceived by 15 predominantly Black private institutions. An instrument was designed to collect the data on the following: (1) the overall science program; (2) the improvement of laboratory instruction as a result of the acquisition of student equipment; (3) the improvement of instruction through new or revised science curricula; (4) the improvement of instruction through faculty professional growth; (5) the improvement of instruction through the recruitment of science faculty; (6) the expansion of student scientific research as a result of the acquisition of facilities; (7) the expansion of student scientific research as a result of faculty professional growth; and (8) the enhancing of academic proficiency of students as a result of improved instruction and/or expanded research. On a scale of 0 to 4 (4 being very great and 0 being none), the institutions' responses indicated the influence of federal grants as being mostly great to very great. (Author/PS)

The Influence of Wait-Time on the Verbal Dimension of Student Inquiry Behavior.

Pub Date 73

Note—172p.; Ed.D. Dissertation, Rutgers University, The State University of New Jersey

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-8866, MF-\$7.50, Xerography-\$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Educational Research, Elementary Education, \*Elementary School Science, \*Inquiry Training, \*Instruction, \*Questioning Techniques, \*Science Education

Identifiers—Research Reports, Wait Time

The purpose of the study was to determine the influence of wait-time following a teacher's questions on the cognitive complexity of students' responses. The same sequence of three lessons—Exploration, Invention, and Discovery—was presented to 75 fifth-grade students randomly assigned to 18 groups. The Discovery phase of the instructional sequence was tape-recorded and transcribed. Statistically significant scores were found in the occurrence of conversational sequences and alternative explanations under long wait-time conditions. A statistically significant increase was also found in the incidence of ascending modal congruence under long wait-time conditions. The investigator suggests, based on the detailed trends in data obtained, that "wait-time" should be redefined as "the length of the silent period which occurs immediately before a teacher utterance" instead of the "time a teacher is prepared to wait after asking a question and after receiving a response." Identifiers—National Science Foundation, NSF, Research Reports, SSTP, \*Student Science Training Program

This was a follow-up study of participants in National Science Foundation Student Science Training Program (SSTP) projects designed for students from high schools which provided limited opportunities for training in the sciences or mathematics. Data were collected by means of questionnaires from the participants, high schools attended subsequently, and the peers of the participants. The analysis of data indicated that the SSTP participants were generally satisfied with the academic programs, the staffs, and the facilities. The experience influenced favorably the students' high school involvement in classroom activities in science and mathematics. As undergraduates, the participants earned more credits and gained higher grade point averages in science and mathematics than their high school peers. More of the participants planned to pursue an undergraduate degree in science or mathematics than did their peers. (Author/PS)

Identifiers—\*Project Physics Curriculum, Research Reports

The purpose of this study was to investigate the effects of the Physics Curriculum Project developed by the Science Education Center of the University of the Philippines on student achievement. The sample was formed of senior high school students. The subjects were divided into four groups according to the combinations of curriculum materials and trained or untrained teachers. An achievement test was used to collect the data. The analysis of data revealed that students taught by the teachers trained for the curriculum materials achieved significantly higher than students taught by non-trained teachers regardless of curriculum materials. No significant differences in achievement scores were found between students taught the curriculum materials and those not taught the materials. (Author/PS)

This booklet is a compilation of report proceedings of the Industry-Education Conference of the Minnesota Academy of Science. It was designed as an orientation booklet for participants in this conference and includes the text of the speeches given by a number of keynote speakers. The theme of the conference was total environmental impact, with a special emphasis on future projections. Discussions concerning education, energy, government, economics, natural resources, and transportation issues in Minnesota,

from the present to 1985, were included. Objectives of the conference were to analyze present environmental conditions and to develop a system of alternative plans to encourage environmental quality. Involvement of the state education system to disseminate this information was included. (MA)

Descriptors—Ecology, \*Environment, \*Environmental Education, \*Instructional Materials, Land Use, \*Learning Activities, Population Education, Science Education, Secondary Grades, \*Textbooks

This handbook is designed to encourage students to investigate their environment. The techniques of investigative studies are explained and the means of implementing them are discussed. Environmental problems such as air and water quality, noise pollution, land use, and population studies are the suggested targets of the students' investigations. The information is presented in an unbiased manner which allows students to experiment and then make their own conclusions about the quality of the environment. The tools necessary to make value judgments about the environment are presented throughout the book. This handbook is not designed for use as a traditional textbook, but rather as a compilation of concepts, suggestions, and methods. Students are free to use the materials for whatever topics or depths of study they need. A preliminary section of the book deals with the clarification of values in general. The final section lists numerous resources for further information. Drawings and photographs illustrate the techniques and principles being discussed within the text. Students are given background information on every technique and a table of acceptable values for the results. (MA)

This teachers' handbook outlines the philosophy of this program, the methods of teaching it, and the information needed to perform the investigations. The purpose of this program is to encourage students to identify an environmental area to work in and to provide them with the tools to investigate it. The program fosters the idea of unsupervised class time in which students can go out into the community to carry out their investigations. Teaching strategies are given to help teachers evaluate the students' work and to generate and sustain class discussions. A techniques section gives teachers the necessary information to perform the water and air quality experiments and population surveys, as well as some additional information and detailed drawings of needed equipment. Information on organizing this course and sections on required materials and needed resource materials are included. (MA)

The purpose of this booklet is to bring into the classroom the ecological processes and principles that underlie nature. Students get the opportunity to work with natural objects and to learn about the principles that regulate them. In this revised edition, a number of publications have been compiled and printed under one title. The booklet is designed to help the teacher by supplementing existing programs with these student-oriented activities. The information includes simple directions on how to build a number of different terrestrial and aquatic microenvironments, as well as the ecological principles behind their construction and maintenance. All materials are common and easily purchased, including the contents of the terrariums and turtle ponds. There are a number of diagrams and photographs to illustrate the procedures and principles being discussed. (MA)

Descriptors—Curriculum, Doctoral Theses, Educational Research, \*Educational Theories, \*Inquiry Training, \*Instruction, \*Observation, \*Science Education

Identifiers—Research Reports

The purpose of this study was to analyze the manner in which educational theorists incorporate the concept of observation into an inquiry framework for teaching, learning, and curriculum development. The analytical device used to initiate the examination was a series of questions. By investigating the various inquiry frameworks set forth by educational theorists, the investigator concluded, among other things, that: observation was more than just seeing, looking or glancing; there were limits on the teacher's ability to evaluate student observations; and there were difficul-

ties in determining the relationship which was obtained between observation and various dispositions the observer had concerning what was being observed. (Author/CP)

Descriptors—\*Astronomy, Doctoral Theses, Educational Research, Inquiry Training, \*Inservice Education, \*Questioning Techniques, Science Education, Secondary Education, \*Secondary School Science, \*Teaching Methods

Identifiers—Research Reports

The problem investigated in this study was to determine if any relationship existed between the methods of instruction used in an astronomy institute for secondary school teachers for the instruction of a certain set of concepts and the instructional preferences of the teachers concerning those concepts. Inquiry and verification methods of instruction were used with criteria which contrasted the models being developed in order to facilitate research. For each of the six sessions, participants at the institute were randomly assigned to one of the two methods of instruction. At the end of the institute, the learning and teaching preferences of 20 secondary school teachers were measured by a series of instruments. Hypotheses involving the relationship between the methods of instruction the teachers were exposed to and their instructional preferences were tested with analysis of variance and covariance. Analysis of data showed no significant differences between the method of instruction used in an institute session and the instructional preferences of the teachers concerning that session. Additional analysis revealed that the teachers did appear to prefer to teach by inquiry rather than to learn with inquiry being used as an instructional tool. (Author/CP)

Descriptors—Doctoral Theses, Educational Research, Instruction, \*Instructional Materials, \*Mathematics, \*Physics, Science Education, Secondary Education, \*Secondary School Science, \*Unified Studies Programs

Identifiers—Research Reports

Seven teaching-learning guides unifying selected areas of secondary school mathematics and physics were developed. The guides consisted of two parts, a unit and a teacher commentary. The units were used in teaching 18 high ability students enrolled in a high school unified science course over a period of one school year. The guides, findings from the student evaluation of the units, and findings from the evaluations of the guides by a nine-member jury of experts were reported. The investigator found that unification of physics and mathematics occurred in a natural way, and, further, that the topics from physics and mathematics that are adaptable to unification constitute acceptable topic outlines for physics and elementary analysis courses. **An Exploratory Study of Educational Cognitive Style as a Means of Obtaining Clues for Personalizing the Instruction of Ninth Grade Students in Biology.**

Pub Date 73

Note—287p.; Ed.D. Dissertation, Wayne State University  
Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-11,154, MF-\$7.50, Xerography-\$15.00)

#### Document Not Available from EDRS

Descriptors—\*Biology, Cognitive Measurement, \*Cognitive Processes, \*Curriculum, Doctoral Theses, Grades (Scholastic), Individualized Instruction, \*Instruction, Science Education, Secondary Education, \*Secondary School Science

Identifiers—\*Cognitive Style, Oakland Community College, Research Reports

The purpose of this study was to experiment with educational cognitive style as a vehicle for providing information to be used to personalize the instruction of ninth-grade biology students. Employed in the study was a conceptual framework called the "Educational Sciences" (as utilized at Oakland Community College in Michigan) which includes the Educational Science of Cognitive Style (a means of diagnosing student methods of obtaining meaning and planning educational experiences based on them). Cognitive style elements were used to fashion educational programs based on the students' cognitive style profiles. A sample of ninth-grade biology students was drawn on the basis of accessibility and divided according to the letter-grade categories. Cognitive style maps were then determined using the instrumentalities mentioned. Collective cognitive style profiles were ascertained for each letter grade category. The data were analyzed for clues about personalizing instruction. The study's findings indicated: (1) it was possible to map cognitive style profiles of individual students; (2) collective cognitive style profiles could be ascertained for students in certain letter grade categories; and (3) clues for personalizing instruction were apparent. Identifiers—Research Reports, Watson Glaser Critical Thinking Appraisal

This study traces the development and testing of a particular modular curriculum design that was set up where curriculum planners produced one single-level course offering for both college biology majors and non-majors. In this design, major units of study are broken into units. In each there is a basic module completed by all students in which a concept is introduced with a minimum of information. In addition, the student can select one to several option modules, the minimal path being the basic module and one option module. Over a two-year period, the performance of 298 students was compared in a pretest-posttest control group design. Control groups used a standard lecture method; experimental groups used the modular design. The design controlled for sample selection, teacher bias, and maturation. Among the hypotheses tested were: (1) t-test comparisons of unit test scores will show no significant differences between control and modular groups; (2) t-test comparisons of gains on the Watson-Glaser Critical Thinking Appraisal will show no significant differences between the two groups; and (3) t-test comparisons of change on semantic differential test will show no significant difference between the two groups. The first two hypotheses were not refuted. The third hypothesis was refuted. The prototype of this curricular design has been demonstrated to be a fundamental curricular design that functions well in the area of biology. (Author/LS)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III

This unit on camping skills is designed for special education students at the high school level. The objective of the unit is to provide students with an adequate camping knowledge and skill development to allow them to participate in camping activities. There is an emphasis on maintaining environmental quality as a part of good camping practices. Topics in this unit include reasons for camping, selecting the camping equipment, clothes for camping, selecting a campsite, and the setting up and taking down of a tent. Each of the 10 topics provides the teacher and student with an overall objective and a number of related activities. To further aid teachers, the appendix includes information on building a campfire, pitching a tent, and cooking campfire meals, plus other topics. Directions for planning the ultimate camping field trip are given in detail for the teacher and other adult participants. (MA)

Development and Implementation of Computerized Monitoring System in Mathematics Grades 4, 5, 6.

Pub Date Apr 75

Note—144p.; Submitted in partial fulfillment of the requirements for the degree of Doctor of Education, Nova University; occasional marginal legibility in examples used

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—\*Computer Oriented Programs, Computers, Curriculum, Elementary Education, \*Elementary School Mathematics, Instruction, Mathematics Education, \*Objectives, \*Scheduling, \*Testing

A computerized monitoring system was developed for grades 4-6. Objectives and corresponding test items were stored on computer. Instructors selected objectives for each monitoring period. Students were tested frequently using interchangeable forms of tests covering these objectives. Tests were computer scored and interpreted by teachers. These interpretations led to curriculum decisions as well as student feedback. After the system was implemented, student performance on both norm-referenced and criterion-referenced tests improved. #### Document Not Available from EDRS

Descriptors—Cognitive Development, \*Concept Formation, Elementary Education, \*Elementary School Science, \*Instruction, \*Learning Processes, \*Learning Theories, Mathematical Concepts, Mathematics, Science Education

Identifiers—Piaget (Jean)

The paper presented relates to a study done examining the ability of children from grades one through six to locate a point in one, two, and three dimensions and to order a temporal series of events in one, two, and three dimensions. The performance of the subjects was also used to examine a small part of Piaget's theory of cognitive development. The conclusions drawn from the analysis of data also resulted in some educational implications concerning these aspects of space

and time. Procedural information presented includes sample selection and research design, a description of the operational tasks performed, as well as how they were administered, and the scoring and data type utilized with the instrumentation used. It was noted that there was a progressive and uniform improvement in the performance of the subjects from grade levels one through six for the time independent tasks and the time dependent tasks. Some of the results seemed to disagree with Piaget's theory. (Author/EB)

Identifiers—Canada, United States

This directory is part of a continuing effort to identify facilities actively involved in environmental education. Designed as a guide for the casual visitor as well as the professional person, it aims to stimulate interest in nature centers, improve communication among facilities, and encourage development of new and better ones. This third revision contains a listing of 558 facilities, including 41 in Canada. Directory entries consist of abstracted information from a questionnaire designed by the Nature Planning Division of the National Audubon Society. Arranged alphabetically by state or province, each entry includes the name, address, telephone number, and organization responsible for operation and maintenance. Those facilities primarily school-oriented are indicated with an asterisk. Other information includes facility size, program offerings, availability of self-guided tours, and time the facility is open. In addition, this directory provides a list of facilities primarily concerned with outdoor interpretation. Operation and maintenance are by the following federal agencies: Bureau of Reclamation, Forest Service, Fish and Wildlife Service, National Park Service, Soil Conservation Service, and Tennessee Valley Authority. Listed alphabetically, entries contain the name, address, telephone number, agency responsible for operation, and a brief description. For additional information, individual facilities can be contacted personally. (BP)

Descriptors—\*Environmental Education, Instructional Materials, \*Learning Activities, \*Problem Solving, Secondary Education, \*Student Projects, \*Teaching Guides

This publication is a guide for the design of student projects in environmental education. A few advantages of problem-focused projects are: easy incorporation into the ongoing curriculum; opportunity for joint student/teacher use of knowledge, information, and skills in action-oriented activities related to local environmental concerns; identifying, weighing, and clarifying values; research and technical reporting skills; and development of divergent and convergent thinking skills. The student project provides a method for student involvement and inquiry-based learning. The five instructional objectives presented are based on the above-mentioned advantages. Under each objective are teaching strategies, specific instructional procedures, and some sample questions to raise. The objectives, strategies, and procedures serve as the basis for process activities and outcomes that can be real-

ized through all problem-solving projects. Three projects that can be utilized and adapted by secondary and college students in their study of communication on environmental issues are outlined. Two of the projects concern environmental impact; the third, environmental research. Each project is sub-divided into objectives, focus, suggested approaches, project design, and evaluation. Appended information pertaining to organizations of environmental concern, expanded problems for study, and a bibliography of materials is to be used in conjunction with the projects. (BP)

Identifiers—National Science Foundation, NSF, Research Reports, \*Unified Science Mathematics for Elementary Schools, USMES

The aspect of the Unified Science and Mathematics for Elementary Schools (USMES) project described in this paper was undertaken in an effort to observe the problem solving behaviors of elementary school children. The Notebook Problem consisted of presenting a student with three notebooks arranged so as to differ from each other in terms of such dimensions as number of pages, number of lines per page, binding, price, etc.; the subject was asked to (1) select the most appropriate one for his class, and (2) indicate the reasons for his selection. Pretests and posttests were administered to randomly selected students from both control and USMES project groups. Scoring of responses was performed along the following lines: (1) whether any of the subject's reasons for selection were stated in measurable quantities, and (2) the highest level of warrant associated with the reasons stated. Representatives of the dimensions measurable were: (1) size-volume, (2) weight, (3) cost, etc.; while levels of warrant were determined by responses being: (1) personal opinion, (2) testable, or (3) had been tested. Chi-square analysis revealed significant improvement in pretest to posttest scores for the experimental group versus the control group. (Author/CP)

Identifiers—National Science Foundation, NSF, Research Reports, \*Unified Science Mathematics for Elementary Schools, USMES

This report, part of the 1972-73 Unified Science and Mathematics for Elementary Schools (USMES) evaluation project, focuses on the effect of the USMES curriculum on the organization and operation of the classroom. For the study, 30 USMES classrooms and 30 non-USMES classrooms were used. Each trained classroom observer, utilizing classroom environment instruments for large group and for small group observation, visited USMES and control classrooms nine times in a period of one year. Several classroom activities were marked for frequency of occurrence, and interactions were tallied as either child-child or child-teacher. Chi-square analysis was used to compare USMES and non-USMES scores in a variety of categories. The most dramatic differences were found to be a greater amount of small group work in USMES classes, the far larger number of ideas added by USMES students during class discussions, and the higher incidence of child-child interaction during small group work in USMES classes. Descriptors—\*Energy, \*Environment, Industry, \*Natural Resources, \*Reports, \*Statistical Data Identifiers—Energy Use, United States

This handbook contains a comprehensive selection of United States and foreign energy statistics in the form of graphs and tables. The data are classified according to resources, production, consumption and demand, energy and gross national product, and research and development. Statistics on energy sources such as coal, oil, gas, nuclear energy, uranium, and solar energy are provided. The report also includes a list of sources for more complete information, a glossary of energy-related terms, a list of abbreviations, and conversion factors. (MR)

Descriptors—Annual Reports, Economics, Energy, \*Environment, \*Federal Government, Federal Legislation, Land Use, \*Natural Resources, \*Pollution, \*Quality Control Identifiers—\*Council on Environmental Quality

This fifth annual report discusses the state of the environment and efforts to improve it. The first chapter presents an overview of land use: the effects of development on environmental, economic, and social factors; the stimulants of development such as federal taxes, funding of public facilities, and energy-related decisions; and land use controls employed by state and regional governments. The second chapter deals with government programs in energy, air and water quality, solid waste disposal, noise, man-made pollutants, and wildlife and habitat protection. The condition of the environment and trends in environmental quality are explored in the third chapter. The fourth chapter reviews the effects of the National Environmental Policy Act emphasizing the structure of the environmental impact statement process. International environmental activities are reported in the fifth chapter. The United Nations Environmental Program and other bilateral or multilateral programs are discussed. The final chapter describes the work of the Council of Environmental Quality over the past year. Projects listed include offshore nuclear power plants, wastewater treatment, pesticides, and fuel economy. (MR)

**Air Quality and Stationary Source Emission Control; Committee on Public Works, Senate, Ninety-Fourth Congress, First Session. [Committee Print.]**

National Academy of Sciences - National Research Council, Washington, D.C.

Report No—Ser-94-4

Pub Date Mar 75

Note—953p.; Occasional small type

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock Number 052-070-02783-5, Catalog Number Y 4.P96/10:94-4, \$8.60)

**EDRS Price MF-\$1.55 HC-\$48.88 Plus Postage**  
**Descriptors**—\*Air Pollution Control, Ecological Factors, \*Environment, Health, Natural Resources, \*Pollution, \*Reports, \*State of the Art Reviews

**Identifiers**—\*Emission Control, Nitrogen Oxides, Sulfur Oxides

This report reviews the problems of sulfur oxide emissions and nitrogen oxide emissions from stationary sources. The first part of the report discusses the adverse consequences to health from combustion of sulfur-containing fossil fuels. The health problem is discussed by relating sulfur oxide levels and respirable particulate matter with morbidity and mortality figures. Present ambient air quality standards are analyzed in terms of existing data. In addition to health effects, the report analyzes emission effects on agriculture, forestry, ecosystems, and building materials. The second part of the report deals with strategies for controlling sulfur-related power plant emissions. Attention is focused on electric utility generation, relationship of emissions to ambient air quality, efficient pricing, improving conversion efficiency, fuel shifting, and fuel preparation, flue gas desulfurization, and tall stacks and intermittent control systems. The second part also contains recommendations for abatement strategies. The formula involves a comparison of marginal cost with marginal benefit, the harmful effects of emissions, and the relationships between point source emissions and patterns of dispersion and deposition as it applies to each power plant. The final part of the report assesses nitrogen oxides in terms of sources of emissions and techniques of emissions control. (MR)

**Document Not Available from EDRS**

**Descriptors**—\*Environmental Education, \*Instructional Materials, Learning Activities, Science Education, \*Secondary Education, Social Studies, \*Teaching Guides, Units of Study (Subject Fields)

This manual was developed to prepare middle school students to investigate environmental problems using primary or secondary sources of information. The modular design attempts to teach students process skills of research. These skills are interdisciplinary, including science, social studies and language arts skills such as written communication, clarifying values, conducting surveys, and library reference work. The first four

modules are highly structured, listing behavioral objectives and teaching suggestions; the fifth module is unstructured and self-paced for individual student research. The modular design is based on a hierarchy of process development resulting in autonomous student learners. (MR)

**Descriptors**—\*Charts, Instructional Materials, Mathematics Materials, Measurement, \*Metric System, \*Post Secondary Education, \*Resource Materials, Secondary Education, \*Secondary School Mathematics, Technical Mathematics

This publication contains materials suitable for reproduction as transparencies or as classroom handouts. These metric materials may be used in a variety of occupational and practical arts courses. The format of the materials is in large print, some with humorous drawing; details of drawings and charts are easy to read. Introductory pages deal with all units of metric measures but the primary emphasis is upon linear uses of metric measures. Specific topics include: reading a metric micrometer and a vernier caliper, tables of metric hardware sizes, diagrams of metric hardware (nuts, bolts, screws, wrenches, etc.), master dimensioning, dual dimensioning, conversion tables, metric sizes of softwood, orthographic projection comparisons (first and third angle), paper sizes and weights, and printer's units. **Identifiers**—\*Calcmate, Research Reports

This study investigated the effectiveness of using the Calcmate, a copyrighted commercially available product, in teaching subtraction to average, disturbed, and retarded children in third, fourth, and fifth grades. The mechanical device simulates borrowing in subtraction problems involving two-digit numbers. Forty students were given these devices for introductory work with subtraction; they were told to use the aids only as long as they needed them. The instructional phase lasted 30 days, with students performing subtraction problems each day. Third-grade students were given 20 problems to perform in 30 minutes; other subjects were given 10 problems and 15 minutes. In all groups, substantial gains in ability to subtract with borrowing were recorded. Eighty-five days after the special instruction ended, students were retested on subtraction without using their Calcmates, and achievement continued to be high. (SD)

This instructional unit of five lessons and four appendices is designed to acquaint both teacher and student with the elementary aspects of computer programming. The first two sections contain background information in computer processes and in BASIC language for a time-sharing system for those teachers who have limited backgrounds and experiences in computer science. Lessons I and II cover giving instructions in English and in BASIC; lesson III deals with translating instructions from English into BASIC; lesson IV introduces conditional control statements through simple programs; and lesson V looks into the use of subscripts in a BASIC program. Each lesson contains suggested teacher questions and related exercises for students. Appendix A contains two programs to be put on tape and checked during lessons II and IV. Appendix B contains six handouts for use with lessons II through VI. Appendix C contains the analysis of programs to find the roots of quadratic equations and also a summary of BASIC symbols. Appendix D contains programs for sums of series, dividing a line, and changing bases. (JBW)

This teaching guide is for the instructor of an introductory course in computer programming using FORTRAN language. Five FORTRAN programs are incorporated in this guide, which has been used as a FORTRAN IV SELF TEACHER. The base eight, base four, and base two concepts are integrated with FORTRAN computer programs, geoblock activities, and related exercises. Each statement of the first FORTRAN program is described in detail with suggested discussion questions and activities. (Subsequent programs are given without detail.) The FORTRAN programs included are: (1) change base eight numerals to base ten numerals, (2) determine the number of significant places for a given input data, (3) list the even numbers less than 200 for the base eight, (4) give the integral powers of ten in scientific notation, and (5) give the multiples of four in the base eight. Teaching suggestions include the modification of illustrated programs as well as activities for teaching of the design of a simple computer, unconditional and conditional transfer statements, and DO LOOPS. Fixed point (integer) system and floating point systems of computation in the digital computer are described. Problems with mathematical operation symbols complete the activities in the manual. This manual is a collection of materials and teaching strategies to motivate the development of mathematical ideas in secondary school mathematics programs or in beginning college mathematics programs. The unit is written for the instructor with step-by-step procedures including lists of needed materials. The exercises in this unit also appear in the separate publication, "Experiments in Experimental Mathematics." Contents include: geoboard activities in area and with the Pythagorean Theorem; exercises with arithmetic numerals; problems illustrating balance relationships; perfect number exercises, hidden combinations, and coordinate graphing; arrays, polynomials, and finite differences; physical problems that introduce convergent and divergent series; map coloring (Euler's Theorem); the analysis and prediction of patterns of motion with cycloids and area; and the Euler function. The unit concludes with more than 18 short investigations such as Tower of Hanoi Puzzle, box problem, Kongsberg Bridges problem, limits of sequences, and games that employ mathematical analysis. With this volume, the American Society for Engineering Education begins a series of monographs for advancing education. Although the work deals particularly with engineering education, it is intended that techniques and innovations mentioned will be applicable to all fields of education. In this volume, components of an individualized instruction program are discussed. Contributions from 14 authors identify a variety of approaches to individualized instruction. Information is provided concerning the implementation of individualized programs, the use of multisensory media in instruction, and programs currently in use. Many additional sources for information concerning individualized engineering instruction are listed in the appendices. (CP)

Descriptors—\*Ability Grouping, Achievement, \*Annotated Bibliographies, Attitudes, Elementary School Mathematics, Elementary Secondary Education, Instruction, \*Literature Reviews, \*Mathematics Education, Research, \*Research Reviews (Publications), Secondary School Mathematics

This paper examines the research literature concerning the effects of homogeneous vs. heterogeneous ability grouping on the mathematical achievement and attitudes of students. The studies examined concern all grade levels from 1 through 12, and relate to grouping on the basis of general ability and on the basis of prior mathematical achievement. Differential effectiveness of grouping patterns on students of high, middle, and low ability is examined. Grouping within individual classrooms is also discussed. On the basis of the analysis of the literature, three recommendations are made: (1) school systems should be encouraged to experiment with homogeneous grouping; (2) teachers should be encouraged to experiment with grouping students within the classroom; and (3) research on team-teaching should be done. The second part of this paper provides an annotated bibliography. Seventy-seven research reports related to ability grouping are annotated. For each report bibliographic information, a summary of the research methods, and a list of findings are provided. (SD)

Fifth- and sixth-grade students in one school were instructed using the Mathematics Target System, an individualized approach, while those at a comparable school were given more traditional instruction. Students in both the experimental and control groups were pretested using the Pupil Opinionnaire, Attitude Toward Mathematics scale, and the Stanford Achievement Test. After a year's instruction, students were again tested using parallel forms of these instruments. Differences between groups at each test administration and differences between pre- and post-test means were submitted to analyses using the Chi-square statistic. Although there were some differences between the groups at the outset of the study, the individualized approach was shown to be quite effective with fifth-grade students. The authors observe that independent influences on the control group resulting from increased systemwide emphasis on computational skills and curriculum supervision tended to enhance the learning of students in the control group. This guide is the sixth in a series of publications to assist teachers in using a laboratory ap

proach to mathematics. Twenty activities on probability and statistics for the elementary grades are described in terms of purpose, materials needed, and procedures to be used. Objectives of these activities include basic probability concepts; gathering, tabulating, and interpreting data; making predictions; pattern discovery; formulating hypotheses; and fractions, ratios and basic statistical procedures. The publication includes diagrams, charts, illustrations, and suggested questions to assist the teacher in operating an informal laboratory. (JBW)

This report presents the results of the 1973 survey of industrial research and development and is the 19th in a series extending back to 1953. Data obtained are designed to provide useful information to those concerned with evaluating the role of research and development in furthering the national welfare and in allocation of scientific resources. Data in the report were obtained from the Bureau of Census surveys of industrial research and development and cover the periods 1956-73 and January 1957-January 1974, respectively. This survey does not cover trade associations which are estimated to account for less than one percent of the industrial research and development performance total. (Author/CP)

This manual is designed to assist schools and organizations in gaining a better understanding of land use at the community, state, and national levels. The manual emphasizes interpretation of maps and photo-imagery to analyze the geographic concepts relating to landscape. The manual promotes the use of local government publications from the U.S. Geological Survey, the U.S. Soil Conservation Service, and state extension services, and the use of space photographs and satellite imagery. The manual lists projects and activities for land use study in social studies, science, vocational agriculture, humanities, environmental education, and 4-H groups. Thorough lists of documentary materials, audio-visual aids, and other resources are included. (MR)

An Effective Protocol Module for Training Science Teachers to Ask a Wide Cognitive Variety of Questions.  
Pub Date [75]  
Note—176p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**  
Descriptors—Autoinstructional Aids, \*Individualized Instruction, Inservice Education, \*Program Guides, \*Questioning Techniques, Science Education, Secondary Education, \*Secondary School Science, \*Teacher Education, Teaching Methods

A teacher education program intended to increase the variety of questioning techniques employed by science instructors is presented and evaluated. Used by four different groups of secondary teachers, this module presents a question category classification structure based on the Aachner-Gallagher system, but modified to be specific for science teaching. The bulk of instruction is intended to be done by the programmed materials which are provided and a provision is made for self-assessment. From the four groups who voluntarily participated in the program, the author found significant increases in the variety of questions used in teaching by groups composed of student teachers and graduate students, but non-significant increases for two groups of inservice science teachers. Suggestions for the improvement of the module from both those who have participated in the training groups and the author of the module are included. (CP)

Consumer Education: A Model of an Interdisciplinary K-12 Curriculum Approach to Consumer Education Processes.  
Massachusetts State Dept. of Education, Boston.  
Pub Date Apr 74  
Note—48p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
Descriptors—\*Consumer Education, \*Curriculum Development, Economic Education, Elementary School Curriculum, \*Elementary Secondary Education, Instructional Materials, \*Interdisciplinary Approach, Learning Activities, Program Design, Secondary Education, Teaching Guides

This model curriculum outlines learning objectives for teaching consumer education processes in grades K through 12; it thereby represents an organized structure for consumer education. It's an interdisciplinary guide designed to integrate consumer awareness experiences into all subject areas as natural components of existing subjects. For each of three grade levels, K-4, 5-8, and 9-12, general and operational objectives are stated in which the activities of (1) planning, (2) buying, (3) borrowing, (4) protecting, (5) sharing, and (6) investing are provided. Specifically, grades K-4 are devoted to foundation experiences, grades 5-8 deal with knowledge and skills, and grades 9-12 are concerned with application experiences. Along with objectives and activities, resource materials and possible evaluation means are also suggested. (Author/CP)

Identifiers—PDD, \*Professional Development Degree

A description of the University of Wisconsin's Professional Development Degree (PDD) program, a post-baccalaureate degree program designed to bring various opportunities for learning to the practicing engineer, is provided. The primary objectives of the program are: (1) to ex-

pose the professional to subjects necessary to combat obsolescence, (2) to keep abreast of the latest techniques in one's field, and (3) to assist the engineer in assuming changing job responsibilities. Developed as a continuing education program, the PDD program requires a bachelor's degree for admission, but no minimum grade point average. No residence requirements must be fulfilled, hence some program participants meet program requirements via correspondence. The small quantity of required courses in the program allows participants considerable latitude in pursuing personal choices in their respective technical course selections. The development, prerequisites, and description of the PDD program are provided, along with a survey of current and past participants in the program. (CP)

Mueller, William M.  
Introduction of Materials Science Through Solid State Chemistry.  
Pub Date Jun 75

Note—7p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Chemistry, Engineering Education, \*Instructional Materials, \*Metallurgy, Program Descriptions, Science Activities, Science Education, Secondary Education, \*Secondary School Science, Teaching Guides

Presented is a report of a program of the American Society for Metals, designed to introduce materials science principles via solid state chemistry into high school chemistry courses. At the time of the inception of this program in the mid-sixties, it was felt that high school students were not being adequately exposed to career opportunities in the materials field. Consequently, a 64-page student text, teacher's guide, reference book, visual aids, and kits for laboratory experiments were developed. It has been estimated that the Solid State Structure and Reactions program has reached over 100,000 students through 900 teachers. The materials are still available at a low cost. (CP)

Branigan, Thomas L.

The Role of Industry in Minority Engineering Programs.  
Pub Date Jun 75

Note—11p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—College Admission, \*Engineering, Engineering Education, \*Enrollment Trends, \*Industrial Relations, \*Minority Groups, Occupational Guidance, \*Recruitment

Until recently, U.S. engineering education and American industry drew candidates from only about 43 percent of the potential market—white males. Many segments of American business, education, and government have been involved in a process to increase minority participation in engineering; the 1974 freshmen engineering enrollment for women increased 69 percent, versus 30 percent for Blacks and 22 percent for Mexican-Americans in 1974. Efforts by industry to increase minority interest in engineering are reported, but the need for additional programs is evidenced by the low influx of minority workers into the job market. In a series of recommendations directed to this topic, the author states, that among other things, (1) companies should not concentrate recruiting efforts solely on the national level and in their headquarters community, and (2) the development of cost-effective techniques for reaching minorities outside of urban areas is needed. (CP)

Use of the Colorado SURGE System for Continuing Education for Civil Engineers.  
Pub Date Jun 75

Note—6p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Ft. Collins, Colorado, June 16-19, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adult Education, \*Engineering Education, \*Graduate Study, \*Industrial Education, Inservice Education, Instructional Aids, Masters Degrees, \*Teaching Methods, \*Video Tape Recordings, Visual Aids

Identifiers—Colorado State University

The Colorado State University Resources in Graduate Education (SURGE) program is described in this report. Since it is expected that not all the participants in a graduate engineering program will be able to attend university-based lectures, presentations are video-taped and transported to industrial plants, engineering offices, and other locations throughout the state. When combined with formal registration procedures and the administration of exams under the supervision of faculty affiliates at the remote locations, the system has provided a workable and suitable means of conducting graduate education for practicing engineers. Although many participants complete M.S. degrees, the program has also been shown to be of value for those practitioners

SE 020 192

who are interested in furthering education only in specialized topics. (CP)

The Effects of Schools on Achievement in Science. IEA Report 1975:1.

Australian Council for Educational Research, Hawthorn; International Association for the Evaluation of Educational Achievement, Hawthorn (Australia).

Pub Date Sep 75

Note—88p.

Available from—Mr. M. J. Rosier, ACER, P.O. Box 210, Hawthorn 3122, Victoria, Australia (\$3.50); Lawrence Verry, Inc., Mystic, Connecticut 06355

Document Not Available from EDRS

Descriptors—\*Achievement, \*Educational Research, Effective Teaching, Science Education, Secondary Education, \*Secondary School Science, Student Characteristics, \*Surveys, Teacher Characteristics

Identifiers—\*Australia, Research Reports

This study sought to identify factors based in schools which affected the performance of sixth form science students in Australian schools. Use was made of information collected during a study of science achievement by the International Association for the Evaluation of Educational Achievement. A sample of 37 schools was used, the probability of selection of the school being proportional to its enrollment. Within each school, a random sampling of students in the sixth form was made to select the students to take part in the testing program. Information collected enabled a predicted score for each school to be made; this was compared with the actual score obtained by averaging the effects of each student in the group. Two groups of five schools were then selected for comparative study; one group which had performed better than expected and the other which had performed below expectations. The comparison of the two groups of schools to identify school factors was achieved by the study of responses of teachers, students, and principals on survey instruments. In order to

identify school effects, allowance was made using multiple regression analysis for factors which were shown to contribute to academic performance but over which the school had no control. (Author/CP)

**Descriptors**—\*Abstracts, Cognitive Development, Elementary Secondary Education, Evaluation, \*Instruction, \*Learning, Logic, \*Mathematics Education, Problem Solving, Research, \*Research Reviews (Publications), Teacher Education, Testing

Fifteen research reports related to mathematics education are abstracted and analyzed. The reports abstracted were selected from four educational journals and three psychological journals, and deal with a wide variety of topics. The development of children's understanding of diverse mathematical and logical concepts is discussed in four articles, while learning and retention of skills is the subject of two articles. Three reports deal with instructional methods, and two concern teacher education. Topics of other articles include attitudes toward mathematics, learning strategies, problem solving, and a longitudinal study. Research related to mathematics education which was reported in RIE and CIJE between April and June 1974 is listed. (SD)

**Descriptors**—Curriculum Development, \*Educational Research, \*Learning Theories, Literature Reviews, \*Research Reviews (Publications), \*Science Education, Surveys, Teacher Education, Teaching Methods

Following guidelines established in previous summaries of research, this review for the year 1974 portrays "the state of knowledge in science education, describes any existing trends, identifies areas which need to be researched, and provides tentative answers to persistent problems, if any

seem to emerge from the research." Accordingly, research has been listed under those categories which seem most descriptive. General divisions appearing are: (1) learning; (2) education, characteristics and behaviors of teachers; (3) surveys; and (4) implications of the research reviewed. In all, 385 separate studies are cited in the bibliography, although considerably fewer are mentioned in the text. Through the use of the extensive index, however, the major thrusts of all reviewed research can be ascertained. (CP)

**Descriptors**—Algorithms, Child Development, Curriculum, \*Curriculum Research, Educational Environment, Elementary Education, \*Elementary School Mathematics, Grouping (Instructional Purposes), \*Instruction, Mathematics Education, \*Research Reviews (Publications), Teacher Education, \*Teaching Methods Identifiers—Piaget (Jean)

The four sections of this monograph review current research related to mathematics education from the points of view of studies concerning (1) the curriculum, (2) the child, (3) the learning environment, and (4) teaching methods. Topics addressed in part one include the sources of mathematics curricula, the curricular validity of "new math" curricula, the curricular implications and applicability of Piagetian theory, and several specific projects related to mathematics curriculum and assessment. Part two addresses cultural and sex differences in mathematics achievement, effects of disabilities (learning disabilities, deafness, blindness, mental retardation) and personality factors on mathematics learning, and attitudes toward mathematics. Individualization of instruction, grouping, class size, and use of mathematics laboratories are discussed in part three, together with various aspects of pre-service and in-service teacher education. Part four is devoted to discussion of a variety of instructional approaches and practices (discovery, drill, use of physical models, homework, hand-held calculators, computer assisted instruction), and to the selection of algorithms. The effects of students' grade level (four, five, or six) and of five variables related to types of open arithmetical sentences on students' ability to solve open-sentence problems were investigated. The five variables were: (1) operation symbol, (2) sentence type as determined by the symmetric property of the equality relation, (3) the position of the placeholder, (4) whether the solution was a whole number or not, and (5) whether the largest number in the problem occurs as a product in a basic fact. Two instruments incor-

porating these variables were developed and administered to 1298 students in grades four through six. Responses were coded and analyzed using the Fortap Statistical Package. Data from students whose performance meets predetermined minimal students were further analyzed using ANOVA and Wilcoxon signed rank tests. These analyses indicated that sentences with whole number solutions were significantly easier than others. Variables (1), (2), and (3) were also related to significant differences in subject performance, and several significant interaction effects were found. (SD)

This mathematics data bank of generic objectives was developed as the major element of an implementation of Comprehensive Achievement Monitoring in the Individualized and Personalized Adult Basic Education Program of the Canadore College (North Bay, Ontario) Continuing Education Division. The bank contains approximately 900 objectives organized into 88 blocks. The blocks are further subdivided into unit modules. The objectives listed range from ability to count elements in a discrete set to ability to manipulate algebraic expressions and solve work problems. (Author/SD)

This instructor's guide, designed for use with the curriculum, Plant Operations for Wastewater Facilities, represents a two-year wastewater technology instructional program based on performance objectives designed to prepare undergraduate students to enter occupations in water and wastewater treatment plant operations and maintenance. This document, part A of five parts, covers the topics of Collection, Chlorination, Screening and Grinding, Grit Removal and Primary Sedimentation. In this guide, the topics and ideas are presented as a series of modules, organized around 16 general objectives common to all processes. The module begins with a statement of purpose which explains what the student will be studying. Next, all the objectives of the module and code numbers keyed to a computerized list of instructional resources are listed. Also included in each module are a glossary of verbs and sections on learning and testing conditions, acceptable performance, instructor activity and student activity. Recommendations on evaluation techniques are included. (BT)

Descriptors—College Instruction, Geography, \*Geography Instruction, \*Ghettoes, Higher Education, Human Geography, Negro Housing, \*Race Relations, \*Racial Characteristics, Racial Segregation, Resource Materials, Social Factors, Social Problems, Urban Areas, Urban Education, \*Urban Studies

Designed as supplementary material to undergraduate geography courses, this document focuses on a contemporary social problem and its relation to geography. The paper examines existing patterns of residential separation in which ethnic and racial groups—primarily black Americans—generally are spatially clustered in segments of urban space that frequently assume a territorial identification. The purpose is to explore the operation of forces that are responsible for patterns which are molded by both economic and social behavior. After an overview of the problem is in chapter 1, a brief history of the black ghetto as a legacy of the past is included in chapter 2. Chapter 3 examines urbanization of the early 1900s and its relation to ghetto formation. The location of urban space throughout the United States is explored in the fourth chapter, determining that the ghetto is a universal spatial configuration in large urban centers. The fifth chapter presents an explanation of the mechanism which produces such spatial patterns. It includes social, economic, and political variables. These variables are examined in relation to black and white residential patterns in chapter 6. A list of references cited in the text concludes the document. (Author/JR)

Descriptors—\*Curriculum Development, Educational Change, Evaluation, \*Inservice Programs, \*Law Instruction, Learning Activities, Questioning Techniques, Secondary Education, Simulation, \*Social Studies, Teacher Education, Values

Identifiers—Iowa

This document is the presenter's guide to SO 008 871. The document is the result of three and one-half years of effort to improve social studies in the secondary schools in Iowa. Perspectives, part one of the two-part series, presents informa-

tion and background to aid in the reform, innovation, and evaluation of social studies programs. This supplement is designed to stimulate collective teacher use of Perspectives as a one-semester inservice training and curriculum revision program. The guide includes a short orientation to Perspectives and provides a brief summary of the content and methodology of the handbook. The bulk of the guide deals with the task of plugging a specific content area into Perspectives' methodological and analytical framework as a prototype for further curriculum revision. The content focus is limited to law-related education for a K-12 curriculum. The units focus on planning a program, the incorporation of objectives, questioning, values, inquiry, simulation, evaluation, and analytical perspectives. A series of appendices conclude the document. (Author/JR)

**Descriptors**—Behavioral Sciences, Curriculum Development, Instructional Materials, Learning Activities, Resource Guides, Resource Materials, Secondary Education, \*Social Sciences, Social Studies, \*Sociology, \*Teaching Techniques. Because of an increasing interest in sociology at the high school level, this publication was developed as an aid to teachers, department heads, and supervisors to incorporate sociology into the secondary curriculum. The introduction defines sociology as not merely a study of society but specifically as the observation of social relationships, a study of groups or aggregates of individuals within a society. In addition, the major subfields of sociology, including research, social psychology, and population and ecology, are examined in this chapter. The second chapter suggests teaching strategies and resources. Two methods of integrating sociology into the curriculum are explored: the separate course method and integration as a supplement to the regular curriculum. The third chapter presents seven model activities that the author has found to be successful in his own teaching. These range from 15- to 30-minute interaction activities to group research projects that can last as long as four to six weeks. A list of organizations and resources to aid in the development and evaluation of secondary sociology programs concludes the document. (JR)

**Evaluation as a Political Endeavor.**

Pub Date Nov 75

Note—52p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Behavior Change, Behavior Development, Definitions, Educational Assessment, \*Educational Objectives, \*Educational Philosophy, Elementary Secondary Education, \*Evaluation, Evaluation Criteria, Humanistic Education, Moral Development, Political Influences, \*Politics, Relevance (Education), Social Studies, Values

The politics of the behavioral modification approach to educational evaluation are examined in his position paper. In recent years the science of behavior modification has become an established political doctrine in professional education. Behavioral objectives, behavior change, performance criteria, and competency-based instruction are just a few terms of an educational evaluation system concerned with the quality control manufacture of human products with specified performance characteristics. The danger of this behavioral orientation is that it is a political approach to science and education that is being disguised as rational, scientific, and politically neutral when, in fact, it is not. The problem

with the behavioral manufacturers is that they suggest that only technical questions concerning efficiency should be asked rather than ethical, moral, and political questions concerning the humanistic development of students. Rather, evaluation should be qualitative in order to deepen our awareness of what it means to be human. It should be concerned with the quality of interpersonal relationships rather than the establishment of a management caste system. It should judge the moral integrity and intrinsic meaningfulness of tasks, relationships, and work which students are called on to do. (Author/DE)

**Descriptors**—Administrative Policy, Bibliographies, \*Conservation (Environment), Ecology, Energy, \*Environment, Environmental Criteria, Environmental Education, \*Environmental Influences, Environmental Research, Higher Education, Interdisciplinary Approach, Laws, \*Legal Problems, \*Public Policy, Resource Guides, Social Sciences

This guide is intended to assist the organization of studies dealing with the behavior of human societies and their institutions in relation to their environments. Emphasis is on contemporary industrial and postindustrial society as it expresses its environmental relationships through action defined by policies, laws, and administrative arrangements. The content and organization is essentially multidisciplinary. Twelve subtopics are organized around the following four major areas: (1) basic environmental concepts—introduction and background; (2) environment as a policy issue—origins, characteristics, and implications; (3) reconciling natural and technical systems—objectives, approaches, and processes; and (4) problems of policy implementation—economic, juridical, and institutional. Each of the subtopics is keyed to references in the comprehensive bibliographies. Subtopics are defined and described by an abstract. Bibliographic references to articles and books comprise the bulk of the document. For each topic, a set of 10 organizing questions has been provided to enable the student to estimate his comprehension of the subject. (Author/JR)

These secondary-level resource materials provide a broad study of women's current status and emphasize the specific situation confronting women in the Third World. The materials cover three general areas: (1) facts and figures outlining the broad area of equality of opportunity; (2) reports and case studies about women's participation in the social and economic development of Third World countries; and (3) excerpts and comments concerning problems created by attitudes, norms, and values that frequently reinforce traditional role definitions and inhibit effective change. Questions, statements, and sug-

gestions for classroom activities are organized around these three areas. The materials contain a teacher guide, suggestions for classroom activities, relevant readings, and an annotated list of additional related resources. Hard copy, available through UNICEF, contains an additional International Women's Year poster, International Women's Year wallsheet, 1975-76 UNICEF publication catalog, and a UNICEF brochure. This secondary-level resource unit surveys hunger and malnutrition in developing countries and the interdependent factors affecting world food supplies. The main part of the unit is divided into four sections which examine the historical and geographical, economic and political, health and nutritional, and environmental and ecological factors concerning the world food shortage. Suggested classroom activities and questions are provided for each section. Also in the unit are additional classroom activities and readings including a simulation game; comparison charts of food consumption, protein conversions, and world population data; an historical essay on hunger; a descriptive essay on the green revolution; a summary of the World Food Conference Resolutions; and an annotated list of related materials. Hard copy, available through UNICEF, contains an issue of "UNICEF NEWS," a world child emergency wallsheet, two United Nations Development Program brochures and posters, a UNICEF brochure, and a 1975-76 UNICEF publications catalog. **Descriptors**—Career Exploration, \*Career Planning, Class Activities, \*Decision Making, Higher Education, Instructional Materials, Resource Materials, Role Conflict, Secondary Education, Sex Discrimination, Sex Role, Sex Stereotypes, \*Social Studies Units, \*Values, \*Womens Studies

Designed to meet the changing needs of women by increasing their decision-making ability, this book provides practical exercises and activities which develop and clarify decision-making skills. In addition, it seeks to develop a broader concept of women's roles and emerging life patterns, to awaken women to the spectrum of new possibilities opening to them, and to serve as a catalyst for purposeful planning by women. Chapter 1, Where Are You as a Woman, examines traditional attitudes and ideas which society holds about women. Chapter 2, Who Are You, provides questions and exercises to examine individual values, abilities, interests, and special talents in order to understand how one can use this knowledge in moving toward life goals. Chapter 3, What You Need to Know, presents questions and exercises which develop knowledge of information sources in order to make the most advantageous decisions. Chapter 4, How Do You Take Action, furnishes questions and exercises which set up a program for action in developing alternative career possibilities. Lists of related readings and local women's resource centers are also included. (Author/DE)

**Identifiers**—\*China

This guide, part 1 of a two-part publication, contains resource units on Chinese history and culture which can be used with 9th-grade students. The materials and activities, gathered by American secondary-school teachers who visited China in 1973, are intended to provide a pattern for an elective course or supplementary material for regular social studies courses. Suggested teaching techniques include readings, classroom discussion, media, research, and class reports. The resource units teach the following topics: Three Views of the Recent History of China: The Maoist View, an American (Non-Maoist View), and the Nationalist View; Chinese Revolutionary Art—The Message through the Chinese Picture-Books; The Message through Chinese Paper Cuts; The Message through Revolutionary Opera; The Message through Revolutionary Songs; and The Message through Propaganda Posters. Teacher background material, student objectives, teaching methods, discussion questions, and classroom materials are provided for each unit. Additional print and media resource materials are cited. **Identifiers**—\*China

This guide, part 2 of a two-part publication, contains resource units on life today in China which can be used with 9th-grade students. The materials and activities, gathered by American secondary-school teachers who visited China in 1973, are intended to provide a pattern for an elective course or supplementary material for regular social studies courses. Suggested teaching techniques include readings, classroom discussion, media, research, and class reports. The resource units treat the following topics: Economic Life: An Analysis Module; Sex Roles, Marriage, and the Family: A Valuing Module; Education: A Comparison Module; and The Dissenter in the People's Republic. Teacher background material, student objectives, teaching methods, discussion questions, and classroom materials are provided for each unit. Sections suggesting methods for teaching students to weigh evidence and sources of information for learning about China are also included. (Author/RM)

Social Studies Instructional Objectives, K-12. Minneapolis Public Schools, Minn. Dept. of Social Studies.

Pub Date 75

Note—89p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Affective Objectives, \*Cognitive Objectives, Concept Teaching, Educational Needs, \*Educational Objectives, Elementary Secondary Education, Guidelines, Process Education, Relevance (Education), \*Skills, \*Social Studies

Knowledge objectives, skill and process objectives, and affective objectives are given for teaching K-12 social studies. Knowledge objectives are provided that help students to function rationally and humanely through a reservoir of data, ideas, concepts, generalizations, and theories in combination with thinking, valuing, and social participation. The skill and process objectives include intellectual skills, data processing, and human-relations competencies and provide students the means to achieve the knowledge objectives. Affective objectives refer to free examination of the value dilemmas underlying social issues and problematic situations in the everyday lives of students, which can be practiced in the school and in social studies classrooms. This guide is arranged in three parts: elementary (grades K-6), junior high (7-9), and senior high (10-12). Sections of the guide are presented as charts with concepts for each grade level listed across from the objectives. A teacher can select an objective and then find the appropriate concept to teach in his grade level for achieving that objective. Although developed by the Minneapolis Public Schools, this guide is applicable to all teachers of K-12 social studies. (Author/ND)

This report presents a statistical portrait of the social and economic characteristics, primarily during the 1970s, of persons 65-years old and over. Most of the estimates in this report are based on data from the Current Population Survey of the Bureau of the Census and from the Decennial Censuses of Population and Housing, particularly the 1970 census. Other data are provided by various governmental agencies. The sample population extends over 461 areas comprising 923 counties and independent cities in each of the 50 states and the District of Columbia. Data are included on family, material status, and fertility; institutional population; nativity and parentage; mobility and residence; education, vocational training, and literacy; voting; veterans; labor force participation, employment status, and occupation and industry; income and earnings; low-income status of persons and families; housing; health and health services; and crime victimization. Appendixes include reliability tables of the estimates. (Author/RM)

Note—693p.; Prepared by the Humanities Framework Committee

**EDRS Price MF-\$1.23 HC-\$34.91 Plus Postage**

**Descriptors**—\*Curriculum Development, Drama, Educational Needs, Elementary Secondary Education, Homemaking Education, \*Humanities Instruction, Industrial Arts, \*Interdisciplinary Approach, Kindergarten, Language Arts, Language Instruction, Mathematics, Music, Philosophy, Physical Education, Religion, Science Education, Social Sciences

**Identifiers**—\*California

The following disciplines are treated in separate chapters which comprise the major portion of the document: visual and tactile arts; body education; music; drama and language arts; social sciences; foreign languages; mathematics; science; industrial arts; household arts; philosophy; and religion. The standard format of most chapters includes a brief, general introduction, recommendations for teaching the discipline (including goals for teachers and students), a description of class activities which teachers are presently using throughout the state, and suggestions for interdisciplinary topics such as conflict, survival, and the changing roles of women. Ways in which the subject area can be taught in the various disciplines, student goals, and lists of pertinent curriculum materials are provided for each topic. A form designed to assist educators to review the framework is included. The appendices contain a

glossary and the Proposal for the Establishment of the California Academy for Teaching in the Humanities. (Author/RM)

**Controversial Political Issues: Providing the Participant's Eye-View.**

Pub Date 75

Note—23p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Case Studies, Conflict, \*Course Descriptions, Curriculum Development, \*Documentaries, \*Political Issues, \*Political Science, Secondary Education, Social Studies, Speeches, \*Teaching Techniques

**Identifiers**—High School Political Science Curriculum Project

Three ways to develop curriculum materials dealing with controversial political issues are described. Currently the two most popular approaches are the general theoretical discussion of important concepts and case studies. Whereas the theoretical approach may be too abstract and the case study approach too brief, a third approach combines the positive aspects of both and yet avoids their pitfalls. This documentary approach is an extensive treatment of a well-defined topic which avoids lengthy narratives of a theoretical approach and yet is more in-depth than a case study. To teach about the concept of political conflict, a documentary would present students with a wealth of information about a single political system experiencing conflict. The High School Political Science Curriculum Project under development at Indiana University uses the documentary approach in "Comparing Political Experiences." One specific unit focuses on the issue of court-ordered busing in Boston by providing participant eye views of the various actors in the conflict situation. This interview technique provides a powerful set of examples of political conflict. Guidelines for the creation of a documentary are provided. (Author/DE)

**Descriptors**—\*Academic Freedom, Administrator Attitudes, \*Change Agents, Citizenship, Democratic Values, \*Educational Change, Educational Policy, Elementary Secondary Education, Parent Attitudes, Political Attitudes, Political Issues, \*Political Socialization, School Role, \*Social Studies, Speeches, Student Attitudes, Teacher Attitudes

A survey designed to ascertain how various school-related groups perceive the school responding to nontraditional situations of nationalistic education is described. Administrators, board of education members, parents, teachers, and students indicated what they thought would and should occur in the school in response to 18 nontraditional situations. For example, one question inquires about what action the school would and should take when a teacher refuses to participate in the morning flag salute. The results indicate that students and teachers perceive that the school should be significantly more open and tolerant than parents, administrators, and board of education members. Public school teachers under age 30, nontenured, and with less than four years experience perceive the schools to be significantly less open than teachers over 30 years old with tenure. Since younger educators seldom hold significantly power positions in a school system, their impact on curriculum will be less than that of older educators. Such obstacles may help to explain the difficulties of implementation of new social studies programs which require open and critical inquiry. (Author/DE)

**Identifiers**—\*Bicentennial, Connecticut

This publication contains background reading material, photographs, sketches, and exercises to help elementary students study and compare objects and aspects of past and present life in the United States. The rationale for the approach underlying the publication is that by listening to folk songs and ballads or by talking with a senior citizen about past events, a child can come to understand that history is all around him. Students are involved in many activities. They study the characteristics of roof styles prevalent during colonial times and then go out into their community to photograph or make sketches of roofing on both old and new homes, study floor plans of colonial homes and contrast these with the layout of their own home to discuss differences in living styles, plan a Sunday meal for seven during the winter of 1798, and choose four streets in their town to write about and discuss why the street was so named and any pertinent historic anecdotes. Other areas and topics explored through the exercises include architectural decoration—colonial to Victorian, chairs, portraits and old snapshots, coins, stamps, quilts, flags, oral history, general stories, trains, and cars. Although intended for use by elementary students, the ideas in this resource can be adapted for secondary students. (Author/RM)

A more complete understanding of global perspective is provided in this essay through an examination of the modes of thought, sensitivities, intellectual skills, and explanatory capacities which contribute to the formation of a global perspective. With an emphasis on both a formal and informal educational level, the essay is divided into five sections which examine the requirements for an attainable global perspective. Section 1, Perspective Consciousness, underscores the need to recognize the concept that everyone's perspective is shaped by subtle influences and that others may have different perspectives. Section 2, State of the Planet Awareness, examines the problems and solutions for increasing the ability of individuals to intelligently interpret information about world conditions. Section 3, Cross Cultural Awareness, describes the different degrees of cross-cultural awareness and the necessity to reach a stage beyond empathy where one has the capacity to imagine oneself in a role within the context of a foreign culture. Section 4, Knowledge of Global Dynamics, analyzes the world as an interdependent system where the issue of growth may be the predominant contemporary problem. Section 5, Awareness of Human Choices, emphasizes that increased global perspective will require difficult value decisions about the solutions to our world problems. (Author/DE)

**Identifiers**—\*Australia

This study examines how the values and value orientations derived from two differing, historical traditions influence the formal education of adolescent boys attending an Orthodox Jewish day school in Melbourne, Australia. The two traditions include the Chassidic variant of the great tradition of Orthodox Judaism and the Australian adaptation of the English secular academic tradition. A fundamental dualism dominates the school in the form of two almost separate enculturation matrices between which the students move daily. The contrasts between the value orientations produce an identifiable dissonance in the boys' cognitions about their life worlds. This affects their interpersonal behavior in teaching-learning interaction settings making them prone to hyperactivity, anxiety, tension, conflict, and even aggression. Sociological explanations suggest that the differing social constructions of learning in the two traditions interact to frustrate the boys' needs to learn. Countervailing influences and enculturation interference from the school's structural-organizational and epistemological dualism make the students' reality constructions problematic which in turn hamper their ability to learn. Student activities and a teacher's guide comprise each of the ten lessons of this ethnic studies unit. The unit's goals are to focus on life, ways, and history of the Dakota/Lakota Indian people; include the transition period as well as their past and present; provide activities which are intended to improve the self-concept of students; utilize learn-by-doing activities; provide a variety of activities which will allow students to learn in different ways and at different rates; and provide content and suggested activities for the ethnic-heritage teacher at the intermediate-grade levels. Examples of some lesson titles are Friendship, Courage, Old Age, and Loneliness Dwelt in Our Minds as in the Minds of All People; We are a nature-Loving People, Or Well-being Depends upon Our Closeness to Our Mother, the Earth; Let Us Tell You How It Was with Us; and Let It Be Known That We Have Just Cause. Activities include selected poetry or prose readings, discussion topics, and exercises. Materials are reproducible as student handouts. (ND)

Seven lessons comprise this unit on the education of the Indian people, covering past and present reservation schools for children, adult education, and the involvement of parents in their children's education. Intended for intermediate grades, each lesson contains objectives, four activities, and evaluation. It is necessary to teach the lessons in sequence so that students can understand the time line of the past, transition period, and present. For example, lesson 3 is about learning in schools on the reservation. Its activities are to read the narrative about the family and school life of Elijah Blackthunder, interview parents or guardians about their school days, write a reaction paper to a visitor speaking in an Indian dialect, and answer a question about reservation schools in paragraph form. Some lessons may require more than one day to complete. An accompanying cassette tape is available from Audiovisual Center, Black Hills State College, Spearfish, South Dakota 57783 (\$1.50). (ND)

Eight lessons comprise this interdisciplinary unit for intermediate social studies classes on the memories of elderly Indians. It brings the reflections of older Indians to children for analyzing and understanding the past. Many values, perceptions, myths, beliefs, and ways of life are incorporated into the narratives of the lessons. Each lesson contains its behavioral objective, preparatory lesson plans, interpretation of the narrative, explanations of the activities, reproducible activity sheets, and evaluation. The activities are values clarification exercises, interaction processes, and class discussions. It is necessary to teach the lessons in the order provided for continuous flow and understanding of the narratives. Totally, the unit is expected to take ten classes of 40-minute periods. The accompanying cassette tape is available from Audiovisual Center, Black Hills State College, Spearfish, South Dakota 57783 (\$1.50). (ND)

A Strategy to Develop a Concept of Peace as Conflict Resolution.

Pub Date Nov 75

Note—12p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Concept Teaching, \*Conflict Resolution, Course Descriptions, Educational Research, Elementary Education, Human Relations, Instructional Innovation, \*Peace, Social Behavior, Social Studies, \*Teaching Techniques, Values

Identifiers—\*Man A Course of Study

A teaching strategy designed to help elementary students conceptualize about peace as a

process of conflict resolution is described. The Baboon Troop and Netsilik Eskimo materials of "Man: A Course of Study" provide the course content in which the students learn that cooperation is the most important ingredient in group survival. Classroom procedures focus on viewing films, reading booklets about conflict, conflict resolution, and other factors involved in social interaction. Students discuss the materials with peers and with the teacher who acts as a "consultant." The strategy works to the degree that 200 ten-year-olds conceptualized peace as social activity, a more abstract level than formerly thought possible. The major importance of using this peace strategy is that the use of high interest materials about foreign peoples beginning at age ten helps students conceptualize about peace at more abstract levels. The series of four papers document the growth in conceptual thinking of a new discipline designed to teach global awareness. The first paper, The Case for Developmentology, argues for the establishment of a fully recognized and accredited discipline in the study of global development, with relevant, general courses offered at the elementary, secondary, and college levels. This new discipline, termed developmentology, will surmount the restrictions and impediments imposed on human understanding by the nation-state concept of world order. The second paper, Developmentology—Phase II, further defines the conceptual basis of developmentology emphasizing the interdisciplinary nature of its study. The third paper, Developmentology: The Study of Global Systems and Human Development, examines the expressed suggestions and criticisms of scholars and educators who have reviewed the concept and the practical problems of developing the new discipline. The fourth paper, Developmentology: Paths Toward Implementation, focuses on the rationale and content for a developmentology discipline and discusses possible interdisciplinary curriculum components and planning strategies. Fifteen reasons for the current negative status of the social studies as a curriculum in schools of the United States are provided. The 15 reasons include (1) lack of a well-planned, issue-centered, skill-oriented social studies curriculum program, (2) overdependence upon history and neglect of other social sciences, (3) lack of a minimum set of essential national social studies goals, (4) decline of the social studies from the organizational center of the elementary school program, (5) lack of conviction by administrators of the function of social studies, (6) discouragement by the failure of certain programs, (7) authoritarian image of the social studies teachers to the student, (8) weak role of the social studies department chairpersons and supervisors, (9) failure to gather and use parental and Public support, (10) lack of valid social studies assessment and evaluation procedures, (11) lack of humane classroom environments to motivate and interest students, (12) lack of sound research in the field of social studies education, (13) overemphasis of the content in social studies at the expense of skill development, (14) isolation of the school and classroom from the real world of the community, and (15) lack of firm conviction about the ethical values which social studies teach. Suggested innovations in the Unesco Associated School Program are described in this report. Fourteen member states participated in the conference in order to improve international understanding and school-community relationships by suggesting innovations in the organizational structure, curriculum content, and teaching methods of the schools. Two separate reports of the English-speaking countries and the French-speaking countries are included. Both reports provide a philosophical foundation, strategies for change, and possible projects. A final joint recommendation report of the two groups stresses the necessity for further faculty training, UNESCO establishment of information clearinghouses and curriculum development centers within the framework of existing institutions, key structural changes in selected Associated Schools which will act as models for further curriculum development, and more emphasis on innovative teaching units in the circular, International Understanding at School. Two brief working papers submitted to the conference entitled *The School as Social Agent in the Community: Determinants of Effective Programs and Education and Community* are also included. **Moral Behavior, Moral Development, and Motivation.**

Pub Date 75

Note—15p.; Paper presented at the Annual Meeting of the American Psychological Association (Chicago, Illinois, September 1975); Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Affective Behavior, \*Behavioral Science Research, \*Behavior Patterns, Empathy, Higher Education, \*Moral Development, \*Moral Issues, \*Moral Values, Motivation, Social Behavior, Social Science Research

An experiment designed to study the relationship between moral behavior and level of moral development is described. Subjects in the experiment were faced with the choice of either remaining uninvolved observers or intervening to help another student. Their choice was affected by the presence of an authority figure which discouraged any intervention. The results indicated that people at almost all levels of moral development do not help someone in need, although they think that person should be helped. The most common reason was the presence of the authority figure. Only at level 6 of the Kohlberg moral development scale did every subject go against the authority figure and help the student. However, the analysis of behavior at stages 1-5 reveals that an increasing percentage at each level defied authority in order to help the student. Thus the results confirm Kohlberg's theory that moral judgment predicts moral behavior in a situation by determining the interpretation of the situation and consequently the response to it. Identifiers—France, Japan, \*Singapore, Switzerland

This paper discusses recent histories of labor shortages in Singapore, Japan, and several western European countries. Emphasis is upon the economic effects of severe shortages of labor. Fearing that these shortages would seriously handicap further economic progress, many people in these countries have advocated large-scale immigration or increased population growth or both. It is the author's conclusion that the existence of a labor shortage is not a valid ground for encouraging either population growth or immigration. The series of which this publication is a part is intended to increase understanding of the interrelationships between population growth and socioeconomic and cultural patterns throughout the world, and to communicate this understanding to scholars and policy makers. This paper, one in a series of occasional publications, discusses the role of the midwife, or "daya," in contemporary Egypt. The series is intended to increase understanding of the interrelationships between population growth and socioeconomic and cultural patterns throughout the world, and to communicate this understanding to scholars and policy makers. The following questions are discussed: (1) How is the traditional midwife faring in Egypt, a country where modern medicine has been practiced for many decades and where maternal and child health and family planning services are within reach of most inhabitants? (2) How have her role and her practices evolved and adjusted in the face of competition from modern medical practice? (3) What forms of interaction exist between her and the public health personnel? (4) How does she view family planning activities and is there any way in which she can be induced to help rather than to obstruct family planning efforts? (Author/RM)

Forty-two secondary-level Canadian and American world history, social studies, and geography textbooks on the Middle East are examined for errors in content, oversimplification of complicated issues, and stereotyping. Areas under examination for distortion include Middle East geography and culture, economics, and maldistribution of wealth, cultural bias and ethnic stereotypes, religious bias and stereotypes, United States relations in the Middle East, and the Arab-Israeli wars. An annotated bibliography contains critical references for 62 texts as well as a list of superior textbooks by American publishers. Two course syllabuses are also included. The first syllabus provides a guide to essential features of Muslim history and culture from the seventh to the twentieth centuries. It contains evaluation questions, student objectives, and references to suggested readings. The second syllabus provides student objectives, references to suggested readings, selected readings, teaching strategies,

and student activities about the four major Arab-Israeli wars from 1947 to 1973. (Author/DE)

With the growing interest in oral history, this booklet provides guidelines for the development of oral history projects at the secondary level. There are various options for establishing oral history in the school program including an elective semester course, an independent study project, a minicourse, a cocurricular history club project, or an interdisciplinary course involving a number of curriculum areas. Descriptions of nine oral history curriculum-program options developed in Pennsylvania secondary schools are provided. Also included in the guidelines are a list of subject areas for student investigations, tips on interviewing community residents, a copy of an interview release form, tips for the use of interview materials, and two specialized questionnaires developed by the Pennsylvania Historical and Museum Commission. These questionnaires provide subject content and questions for the study of local ethnicity, community life, and labor-management relations. A list of local and oral resources and school publications across the country which are based on the Foxfire model are also included. (Author/DE)

This curriculum guide presents the outline of a senior high school quinmester course which offers credit for participation in specific activities related to the Bicentennial commemoration. Based on the Citizen '76/American Issues Forum, the unit activities relate to special radio and television programs. The objectives of the program are to foster student interest in governmental and community concerns and to provide data to students so they may better perform as informed citizens. To meet the individual needs of students, teachers, and school programs, the course requirements are designed in a flexible manner. Series of both required and optional activities and corresponding reading lists make up the unit. Learning activities consist of participation in independent research, discussion groups, forums, and workshops related to issues underscored during the Bicentennial. (Author/JR)

This publication describes over 100 activity-oriented programs in which students learn through a combination of direct experience and associated instruction or reflection. Students are involved in cross-age tutoring, community services, on-the-job work experiences, foreign or domestic travel with an organized group, political campaigns, field trips, art show productions, movie making, and still photography. Information was gathered in the spring of 1975 when the Student Community Involvement Project of the University of Minnesota and the Minnesota Association of Secondary School Principals sent out a questionnaire to all secondary schools in the state to determine how many of them had adopted action learning. Names to contract for further information on the projects are provided for each school. Additional resources and references are also included. (Author/RM)

**Identifiers—\*Religion in Elementary Social Studies Project, RESS**

The third teacher self-instruction kit of the Religion in Elementary Social Studies (RESS) project supplements the first two kits described in ED 114 319 and ED 114 325. This third kit provides specific classroom techniques and procedures for how to teach about religion. It offers an overview of the project's objectives for students, presents a brief comment on the learning theory on which the lessons are based, and proceeds with a series of lessons drawn from the student materials. Each lesson contains references from the teacher's guides, including scripts for audiotapes, reductions of activity sheets, and classroom instructions. The exemplary lessons are organized around six major objectives which include student-experience development, cognitive-skill development, attainment of concepts and main ideas, the finding of personal meaning, self-concept and empathy development, and group participation skills. The sample lessons provide the teacher with opportunity to test the materials and teaching strategies in the classroom. Also included is an evaluation report which outlines the major conclusions of religion scholars, teacher educators, and teachers who have used the materials. (Author/DE)

Designed for the secondary level, this curriculum guide on labor unions provides an historical

background, inquiry-oriented classroom lessons, and resources. The guide contains 17 lessons which examine the structure and daily activities of unions and their members. The first six lessons explore the structure and function of local and national unions as well as how unions can bring about nonviolent change. Other lessons are included on the topics of collective bargaining, contracts, process of negotiation, the shop steward, the grievance, grievance procedure, working on an assembly line, a case study of a worker's grievance, and the relationship of the union to the community. The lessons include objectives, instructional strategies, suggested activities, and, in many cases, actual student readings. The units may be integrated into American history, political science, sociology, and economics courses or may stand alone as a six- to eight-week minicourse. Also included is a list of relevant books, films, and community resources in Pennsylvania. (Author/DE)

This report provides the technical results of the 1971-72 national assessment of social studies. The results are summarized across assessment exercises for the sample. Exhibits include comparison of age for the learning area, of each of the National Assessment's reporting groups with the national level of performance, of the various groups within an age, and of performance on subsets of social studies exercises. The reporting population and subpopulations are categorized according to age, region of the country, sex, race, level of parental education, and type of community. For most of the exhibits, the exercises are divided into the three broad themes of skills, knowledges, and attitudes. Chapters present summary comparison data for exercises related to (1) the skills of obtaining and interpreting information; (2) the knowledge areas of economics, geography, history, and political science; and (3) attitudes about First Amendment rights. Summary comparison data are provided for the overlap exercises of the three basic themes—skills, knowledge, and attitudes. The last chapter includes a copy of the five major social studies objectives and summaries of group results for each objective. Appendix A presents a cross-reference list for all exercises from theme to objective. (Author/DE)

This guide provides teaching techniques for an undergraduate philosophy course. Students examine specific philosophic issues related to the black person's experience. They are required to

apply critical and analytical procedures leading to philosophical investigations of topics of both philosophical and nonphilosophical origins. The teaching techniques used in the course range from informal classroom discussion to formal philosophical reading. In general, the emphasis is on student inquiry into philosophical problems before the class is presented with philosophers' reflections on the subject. The course, divided into four units, including epistemology, the African world view, religion, and social and political philosophy, is designed to help students become acquainted with and examine the (1) bases and structure of knowledge; (2) mythology, religion, philosophy, and social system of black Africa; (3) nature of religion and the relationship of black theology to black power; and (4) traditional problems of the relation between man and state as well as the philosophical basis for black liberation. "Of Mice and Men" is developed as an interdisciplinary unit to be team taught by math, science, language arts, and social studies teachers and team guidance counselors. Developed as an individualized program for middle school students, a variety of supplementary materials is provided to exemplify the types of activities suggested for students. Students explore the nature of learning and the nature of intelligence through observation, care, and testing of mice. Building mazes and running tests are major activities of the unit along with intensive observation and recording of learning patterns of mice. Each unit contains an introduction, learning objectives, and activity directions. (Author/JR)

**Identifiers**—\*The National Observer  
 Ten lesson plans present ways of using the periodical, "The National Observer," in social science classrooms. By providing stimulating reading, raising questions, and provoking discussion, the periodical articles are designed to expand the student's perspective on social issues. Revolving around five disciplines—political science, economics, history, sociology, and psychology—the activities are interdisciplinary in nature and focus on building student skills. Each lesson includes a copy of a "National Observer" article, an introduction, learning objectives, vocabulary, and related student activities. For example, one article shows how savings bonds do not keep up with inflation and suggests questions and activities, such as developing an investment portfolio, to better understand savings and investments. **Identifiers**—\*Market System

Included in this student booklet are a variety of learning activities for secondary students which will aid their understanding of the United States economic system. Basic concepts are introduced which show how a market mechanism resolves the conflict between finite resources and infinite desires, how supply and demand interact, and how competition among commodities and available reserves, as well as among perspective purchasers, influence pricing. Students are exposed to these concepts on a personal level, helping them to answer the following kinds of questions: (1) What kind of car should I buy considering the energy crisis? (2) Should I go to college or to work after high school graduation? (3) What summer jobs are available? Following an introduction which defines and introduces the market system, activity chapters focus on consumerism, money problems, scarcity of natural resources, distribution of goods, supply and demand, getting enough gasoline, the case for rationing, motorcycles and public safety, and future fear. Although there is some variation, most lessons begin with a newspaper article on one of the former-mentioned economic topics. Then, lists of difficult terminology and a number of questions follow to help students comprehend what they read in the article. The teacher's guide is SO 008 865. (Author/JR)

Developed as part of an ethnic heritage studies program, this historical narrative of Italian Americans can enhance cultural awareness. This document presents the story of Italians beginning with cultural roots in Italy and their subsequent

emigration to the United States, including to South Bend, Indiana. Four major areas are explored. An account of why Italians left Italy relates agrarian poverty, political instability, and economic depression as major reasons. Next, emigration patterns of the early 20th century are examined with special emphasis on the Italians of South Bend. Following is an account of Italian life in Northern Indiana and surrounding social conditions. Finally, a few Italians who have contributed to American culture, music, art, and politics are discussed. (JR)

Identifiers—\*Indiana (South Bend)

Developed as part of an ethnic heritage studies program, this historical narrative of Mexican Americans in South Bend, Indiana, is intended to increase cultural awareness of minority groups. The document opens with historical background information beginning in 1877 during the presidency of Porfirio Diaz of Mexico. The narrative follows migration and population factors surrounding Mexican Americans. Because of the recruiting effort of an organization dedicated to improving living conditions, many Mexicans Americans migrated to South Bend which provided job opportunities in its industrial areas. The adjustments of the group in trying to change their life and still retain their ethnic heritage are discussed. Family, economic, dietary, and political problems are examined. (JR)

Identifiers—\*Indiana (South Bend)

Developed as part of an ethnic heritage studies program, this document provides an historical narrative of Polish Americans in South Bend, Indiana. The document presents background information, beginning with the dating of Polish national existence in 966 when King Mieszko converted to Christianity. Emigrating to America for economic reasons, many Poles began arriving in Indiana around 1850 through 1860. Their subsequent life and cultural development in South Bend is presented. The Polish community retained strong roots and identity to their Polish heritage into the 1960s when a decline in identity ensued. Recent emphasis is on cultural pluralism. (JR)

tion, Questioning Techniques, Secondary Education, Simulation, \*Social Studies, Teacher Education, \*Teaching Models, Values

Identifiers—Iowa

Part of a continuing process of curriculum reform in social studies in Iowa, this document presents teachers with the necessary background and information to aid in the reform, innovation, and evaluation of their own social studies programs. The materials are geared toward the appreciation and eventual implementation of new social studies techniques. The document examines five areas of the process which can be implemented individually or through inservice programs. Part one is designed to whet the teacher's appetite for the new social studies and to provide him with the methodological background necessary for the revision of his own curriculum. The chapters question what should be taught in social studies and deal with the following methodological themes: questioning, valuing, objectives, inquiry, simulation, and evaluation. Part two provides the analytical tools necessary to begin the revision process. Part three takes teachers through a 10-step revision process by combining curriculum experience and analysis into a workable curriculum revision program. Part four provides an up-to-date resource guide of the newest social studies project and inquiry materials that can supplement the curriculum change. (Author/JR)

Descriptors—\*Annotated Bibliographies, Bibliographies, Family (Sociological Unit), Instructional Media, Minority Groups, Organizations (Groups), Political Attitudes, Religion, \*Research Reviews (Publications), \*Sex Role, Sexuality, Social Psychology, Social Sciences, Sociocultural Patterns, Womens Education, \*Womens Studies, Working Women

Focusing on women, this annotated bibliography reviews recent research-oriented literature that investigates sex roles. The main concern is the role and place of women in present-day United States society. The literature areas which the bibliography covers are bibliographies and sources, action organizations, media, women's movement, affirmative action, minorities, family, sex roles, sexuality, social psychology, deviance and social control, education, economy, politics, religion, culture, and history. *100 Ways to Enhance Self-Concept in the Classroom: A Handbook for Teachers and Parents.*

Pub Date Jan 76

Note—250p.

Available from—Prentice-Hall, Incorporated, Englewood Cliffs, New Jersey 07632 (\$11.95 cloth, \$5.95 paper)

Document Not Available from EDRS

Descriptors—Affective Behavior, Educational Resources, Elementary Secondary Education, Higher Education, \*Humanistic Education, Individual Development, Learning Activities, Parent Education, \*Personal Values, Psychoeducational Processes, \*Self Concept, Self Esteem, Self Evaluation, \*Student Development, Teacher Education, \*Teaching Techniques

This handbook for teachers and parents presents 100 practical and easily applicable ways to enhance the self-concept of children in the classroom or at home. The techniques are drawn from many of the newer approaches to self-development such as gestalt therapy, psychosynthesis, guided fantasy, sensory awareness, transactional analysis, expressive art, and movement. Activities are designed to help teachers develop a classroom climate of trust and rapport, encourage pupil interaction, develop emotional awareness, stimulate creative writing, raise achievement motivation, foster self-acceptance, and promote better human relations. The first chapter presents suggestions for getting started and building an environment of positive support. Through an activity such as keeping a personal journal, students can learn more about themselves, their feelings, and their goals and aspirations. The second chapter has students evaluate their strengths and weaknesses. Subsequent chapters include: Who Am I, Accepting My Body, Where Am I Going, The Language of Self, and Relationships with Others. Within each chapter are suggested student activities such as drawing self-portraits, writing short autobiographies, writing imaginary newspaper articles about their accomplishments, and developing resumes of their accomplishments. In addition, an annotated bibliography of available resources and notes for both parents and teachers on how to use the book are included. (Author/JR)

Descriptors—Design Needs, \*Evaluation Needs, \*Inservice Teacher Education, \*Needs Assessment, \*Questionnaires, \*School Surveys, \*Teacher Workshops

This document discusses how to conduct a needs assessment for inservice teacher education. It states that the form or method of conducting a needs assessment must be decided upon after first considering teacher preferences, cost, and the capabilities of the local organization implementing the survey. Three methods of conducting needs assessment are described (oral, written, and a combination of both), and the advantages and disadvantages are presented. It is stated that after consideration has been given to the form or method, the type of needs assessment survey must be decided upon. The four types listed are (1) open-ended subjective responses, (2) the checklist variety, (3) scales, and (4) the discrepancy model. Sample instruments and an outline of a needs assessment workshop are then presented. (PB)

Development, Multicultural Textbooks, \*Self  
Concept, Social Maturity, Social Problems,  
Teacher Attitudes

Identifiers—\*Multicultural Education

This is a curriculum guide for multiethnic studies. The introduction explains the importance of such studies as a part of values clarification even for young children. After the introduction there is a resource model which is divided into four sections. The first three sections (levels A-C) correspond with developmental stages in the learner. Level A fosters awareness; Level B fosters understanding and response; and Level C fosters recognition and commitment. The fourth section, Level D, deals with using the arts to explore ethnicity. Each level is laid out by goals, conceptual ideas, and suggested activities in which children learn about themselves and their own families and communities and then compare their similarities and differences with other groups and communities. Discussions on faculty development and planning and curriculum evaluation are included in this guide as well as a questionnaire for teachers to explore their own ethnic attitudes and experiences and the make-up and needs of their classroom. A list of ethnic organizations and a bibliography are also included. (CD)

\*Developmental Programs, \*Inservice Teacher  
Education, Leadership Training, \*Rural Education,  
School Community Cooperation, Teacher  
Improvement, \*Urban Education

This paper describes the history and status of the Urban/Rural School Development Program which has both community involvement and inservice teacher education as components. The paper first discusses certain important features of the Urban/Rural program. One unique feature of this program is its built-in parity mechanism that requires shared decision-making between school professionals and the community, and which sets it apart from similar programs in teacher education. Another salient feature of the Urban/Rural program is that it is aimed at inservice education. The importance of Leadership Training Institutes (LTI) in relation to this program is also stressed, since the LTI, through workshops, conferences, and newsletters, has served as a unifying element for the Urban/Rural sites. The paper then discusses the attempts of Urban/Rural programs, by including teachers in their planning, to solve certain problems found in traditional inservice education programs. A working definition of inservice education is then proposed, and strategies and mechanisms for providing inservice education are discussed. Other Urban/Rural experiences for the design of a national strategy for inservice education are considered, and the success of various projects is also discussed. The paper concludes with a list of 11 conclusions or important experiences to offer national and local educational policy makers. (BD)

Descriptors—Educational Development, Educational  
Research, \*Evaluation Criteria, \*Evaluation  
Methods, \*Program Evaluation

This paper proposes a strategy for in-house evaluations in the context of an educational research and development facility. The obstacles in conducting an evaluation of colleagues' programs are discussed; these fall into two categories. First, there is a set of problems that relate to conflicts inherent in judging the work of a colleague without the protection of anonymity or organizational authority, and second, there are problems posed by the unique characteristics of the program under consideration, which can appear more complex than they are due to the myopia induced by such close association. The proposed strategy, as presented, places the evaluator in the role of coordinator, facilitator, and synthesizer of several separate research efforts in which colleagues in a variety of disciplines combine energies and interests to assess the program being examined. The paper states that the recruitment of researchers to participate in the strategy was accomplished by persuasion and by assuring a payoff to the researchers involved in the form of contributions to their own area of research. The tactics used for organization and management are discussed in some detail. The preliminary results suggested that the evaluation effort was facilitated and its value increased by multidisciplinary contributions to the research. (Author/RC)

Centers, Subject Index Terms

Identifiers—ERIC Clearinghouse on Teacher Education

This report, prepared by the staff of the ERIC Clearinghouse on Teacher Education, analyzes the health education, physical education, and recreation education (HPR) work of the Clearinghouse, and recommends ways of improving the usefulness and comprehensiveness of that aspect of the ERIC system. The document (1) describes the ERIC system over-all; (2) provides a brief history of the American Alliance for Health, Physical Education and Recreation and ERIC's collaboration in the field of HPR; (3) explains what the Clearinghouse has done in the field of HPR in terms of its three major functions—data base building, user services, and information analysis; and (4) presents recommendations. The major recommendation is to establish a separate ERIC Clearinghouse on HPR. In the interim, it is recommended that the Clearinghouse on Teacher Education limit its resources for HPR to 20 percent; that the Thesaurus of ERIC Descriptors be improved to add more HPR descriptor terms; that there be an emphasis on acquiring documents not adequately covered in the data base; and that the Clearinghouse be more widely publicized to people in the health, physical education, and recreation community. Appendixes list the 16 ERIC Clearinghouses, members of the Administrative Committee and Advisory and Policy Council for the Clearinghouse on Teacher Education, and input forms for new HPR descriptor terms. An order form for computer searches is also included. (CD)

This is a progress report of Project Open in Mason County, West Virginia. The first part of the report details the progress made in the first year of an attempt to design and implement a new course entitled Career Education in Technology at Point Pleasant Junior High School. This part of the report lists the eight purposes of the project and contains an outline of the content of the course, including additions that were made to the original outline. Program additions to the original guidelines are also briefly discussed. An outline of the major activities of the course precedes a list of the problems encountered during the course. Observations, evaluations plans for the future, conclusions and recommendation, and an appendix containing evaluative correspondence and a metric memorandum conclude this part of the report. The second part of the report details the second year of a similar project at Wahama Junior High School. It begins with a brief introduction explaining the purpose of the project. The first section of this part describes the activities of the second year of the project beginning with the summer of 1974 and including curriculum and program revision, objectives a topic outline of the program, and selected materials. The second section deals with the implementation of the program. The third and final section contains a summary of the project including results, conclusions, and recommendations. (RC)

This is the 1974-75 progress report of Project Open at Cox Landing Junior High School in Cabell County, West Virginia. The first chapter contains a description of the Project Open concept and is followed, in chapter two, by a statement of purpose which declares that the project was established to create a uniform program in the fine and practical arts that would entail a relevant scope and sequence to assist in preparing students living in a technological society. Major achievements of the 1974-75 project year and internal and external evaluations are the subjects of the next two chapters. Future plans, and conclusions and recommendations for the project are discussed in the final two chapters. Appended are the Project Open contract, a list of identified unified arts programs, a list of sample teacher development unified arts units, the inservice schedule and workshop agenda, a draft of the Cabell County unified arts curriculum guide, the school schedule, a sample elementary technology unit plan, and a sample of a daily log. **Identifiers**—\*Project Open, West Virginia (Wetzel County)

This document describes "Project Open," a curriculum development services agreement between the Wetzel County Board of Education and the West Virginia University Board of Regents, to be implemented in two county high schools. This agreement is designed to provide the school system with a planned educational curriculum and personnel development program in the technologies. The purpose of "Project Open" is to provide opportunities for young people to understand the highly complex technological world in which they live, and thus focuses on the industrial arts. The document is divided into two parts, each of which relates to one of the high schools involved. Both of these parts are divided into six sections. Section one discusses the nature of the project in relation to the community, the school system, the teachers, and the students. The purpose of the project is set forth in section two; this section includes long- and short-range objectives, student and community needs, and a list of course descriptions. The third section describes inservice training, course design and implementation, physical facility modification, and industrial arts club activities. Section four is comprised of internal and external evaluation reports by the principal, teachers, consultants, the state curriculum development specialist, the field coordinator, and the field liaison. Future progress is discussed in section five, and section six (the appendix) includes the contract agreement and course content charts. (BD)

**Identifiers**—Canada, Denmark, England, Germany, Sweden, United States, Wales

This document is composed of two studies. The first examines the education of teachers in Germany, Sweden, England and Wales, and Denmark. It looks at the history of teacher education in those countries, focusing on (1) the fact that primary school teachers have tended to be women trained in inferior normal or teacher training schools, and (b) that secondary teachers have tended to be "educated" at universities in rigorous disciplines. The author states that teaching needs to become increasingly professionalized, that the role of the teacher has become extremely complex, and that the separation of teacher training from serious academic preparation has been harmful to the profession. The relations between teacher training institutions, schools of education, and universities in the above-mentioned countries are also analyzed and critiques are offered. The second study is of U.S. and Canadian institutions concerned with teacher preparation. As in the first study, related historical and cultural issues are examined. Issues studied in this connection include accreditation and certification, state and province relationship to education, and community demands. This study also contains numerous tables and statistics. The first study is followed by references, the second by a bibliography. (CD)

**Descriptors**—Education, \*Educational Philosophy, \*Ethics, \*Humanism, Humanistic Education, \*Philosophy, Religion, \*Values

**Identifiers**—\*Theism

The purpose of philosophy is to aid the individual in developing a unified view of the universe, the world, and the society in which he lives. In both the establishing of life-goals and the development of a philosophy of education, a clear understanding of values and facts is necessary. But in educational practice, many decisions are based on one-sided political, social, and economical considerations rather than on philosophical ones. To gain balance and completeness, man first needs God, then the knowledge and practice provided by the humanities and by natural and social sciences. Education, according to the theistic philosophy of education, is the completing and balancing of man with divine help. Humanistic values of their broader form dominate the various schools of modern educational thought. But there can be no reconciliation between humanism and theism. The questions are often asked: Life for what? education for what? A structure for a theist philosophy of education and educational value system offers answers to these questions. The axiological structure for the theistic philosophy of education must be further developed into specific values, aims and educational practices. Thus the axiological approach to the theistic philosophy of education is a reasonable alternative to humanist thought. (CD)

**Descriptors**—\*Beginning Teachers, \*Effective Teaching, Teacher Attitudes, Teacher Education, \*Teacher Evaluation, \*Teacher Programs, \*Teaching Quality, Teaching Techniques

**Identifiers**—\*Career Opportunities Program

This study assessed the performance of first-year teachers trained through the U. S. Office of Education Career Opportunities Program (COP) and a matched group of first-year teachers in the same school building and grade, but not trained through COP. The study was conducted during the 1974-75 school year at 15 sites across the country, which were drawn as a stratified sample of the 132 COP projects nationwide. A variety of instruments were used to obtain a comprehensive picture of the participants in terms of personal characteristics, attitudes, classroom behavior, and impact upon pupils. The results showed that the COP trained teacher was more likely to have a more positive attitude toward teaching, be more socially oriented, have more vigor, be more original in thought, and receive a higher rating from the principal based on his/her work in the classroom. He/she was more supportive of student initiated talk and less likely to ask questions soliciting rote responses. The children whom the COP-trained teacher taught had a more positive self-concept, their parents viewed their attitudes toward school more positively, and the children performed better on standardized achievement tests. Although many of the differences between the COP trained and non-COP trained teachers are small, the pattern of differences is clear and consistent. (A summary of the study is included.) (Author)

**Descriptors**—\*Educational Environment, \*Elementary Education, \*Elementary School Students, \*Individualized Instruction, Learning, \*Student Attitudes, Traditional Schools

**Identifiers**—\*Individually Guided Education, Multiunit Elementary Schools

This study investigated the relationship of the learning climate of pupils to Individually Guided Education (IGE) with its Multiunit Elementary Schools (MUS-E) organizational structure. IGE/MUS-E was developed by the Wisconsin Research and Development Center for Cognitive Learning and is a comprehensive educational system incorporating several innovative educational development. The study examined five attitudinal variables concerned with learning. These were pupil attitude toward (1) himself as a learner, (2) other pupils, (3) teachers, (4) instruction, and (5) school. There was also an analysis of pupil attitude toward the school plant, the school administration, and the community. Data on attendance and tardiness were also collected. A sample of 566 pupils in 13 Wisconsin IGE/MUS-E elementary schools was compared with a control group of 410 pupils in 12 traditionally oriented Wisconsin elementary schools with regard to their attitudes toward their learning environment. The School Morale Scale and the Semantic Differential of Self-Concept as a Learner were employed to collect data on pupil attitude. Based on the findings, it was concluded that the pupils in the IGE/MUS-E organizational structure generally have the same learning climate as pupils in traditionally organized schools. (Appended are (1) a letter to school districts, (2) the instruments and forms used to gather data, (3) item statistics, (4) means and standard deviations for all schools.) (RC)

**Descriptors**—\*Adults, Behavior, \*Behavioral Science Research, \*Children, Cognitive Processes, \*Listening Comprehension, \*Nonverbal Communication, Videotape Recordings

The experiment was designed to see whether children differ from adults in the ability to understand nonverbal responses of other children. Ten third-grade children were secretly filmed while watching a very easy and a very hard math lesson. Third graders, sixth graders, and adults (college students) were asked to judge, based on a film of each child's face, whether the subject understood a lot, a little, or none of the lesson. The children were more successful at this than the adults, although the degree of accuracy in an absolute sense was not particularly high for either adults or children. Participants also found it easier to tell whether males were watching difficult or easy lessons. The results should not be taken to indicate that children encode all nonverbal responses better than adults, but rather that their familiarity with the social situations of their peers helps them infer the meaning of different facial expressions of other children. The results of this experiment have clear implications for classroom teaching and tutoring by children. (CD)

**Descriptors**—Behavioral Science Research, Cross Age Teaching, Elementary Education, \*Elementary School Students, Mathematics, \*Peer Relationship, \*Peer Teaching, Reading, Role Perception, Role Theory, \*Self Concept, Self Concept Tests, Student Attitudes, \*Tutoring

Two studies explored the effects of peer teaching on the attitudes and behavior of tutors and tutees. In the first study, fourth graders tutored third graders in reading once a day for two weeks. Another group befriended a third grader over the same period of time, supervising play activities. A control group participated in neither special situation. After the experiment, the children were evaluated through personal interviews and tests to determine how, if at all, their feelings about themselves, their teachers, and their academic progress had changed. Although all the subjects liked being in the experiment, and the tutees' reading improved, few significant differences were seen in experiment and control subjects. In the second study, fifth graders taught first graders symmetry concepts in math twice a week for six weeks. Again, others befriended the first graders and others were not placed in a pair. Tutees in this situation learned a good deal and developed more positive perceptions of their intellectual performance. First graders who had a friend enjoyed the relationship, but their self-perceptions did not change as a consequence. It was speculated that this was because being in a friend relationship was not enough of a new, concrete role to foster the changes that role theory would suggest. Tutors enjoyed the experience and learned the material they had to teach, but the experiment did not seem to affect their self-concepts very much. (CD)

**Descriptors**—Collective Negotiation, Cooperating Teachers, Discipline, Due Process, \*Educational Legislation, \*Legal Responsibility, Preservice Education, School Responsibility, State Legislation, \*Student Teachers, Student Teaching, \*Teacher Responsibility

This document explains some aspects of the law which affect teachers in general and student teachers in particular. Five issues are examined. The first issue concerns state laws which affect student teachers, with Illinois and Indiana laws used as examples. Some of these laws have to do with liability insurance, credentialing, clinical training, and arrangements for student teaching. The second issue is tort liability of schools and teachers. It is suggested that supervising teachers may be held responsible for harm which befalls a student teacher through their negligence, and student teachers can be held responsible for the safety of children. The third issue is collective bargaining: teacher-board negotiations concerning student teaching. The author states that he expects the profession to demand more control over aspects of student teaching. The fourth issue concerns school discipline; two important cases are described: *Goss v. Lopez*, and *Wood v. Strickland*. The fifth issue is the emerging concept of a "right to learn"; the Peter Doe and Ianniello cases are discussed. In the former case, still pending, a high school graduate has sued the San Francisco school system for failing to teach him to read. If a right to learn becomes an accepted legal construct, the author speculates that specific kinds of responsibilities of schools and teachers will have to be clarified. (CD)

**Descriptors**—Higher Education, \*Performance Based Teacher Education, \*Program Development, State Colleges, \*Student Teachers, \*Teacher Certification, \*Teacher Education, Teacher Education Curriculum

**Identifiers**—C W Post College, Gribbin School

This report describes a practicum that was designed to meet the needs of student teachers at C. W. Post College in regard to meeting the Competency Based Teacher Education (CBTE) requirement for New York state teacher certification. The report states that, in order to develop the program, C. W. Post College and Gribbin School in Glen Cove, New York worked together for one and one-half years. The report is organized into chapters which describe the background and setting, and review related literature and research reports. There is also a chapter on program development which discusses the policy board, governance, goals, and objectives of the program and program content. Another chapter discusses the problems and progress of the program. The summary and conclusions of the report and the documentation of the acceptance of the program by the New York State Department of Education are the final chapters. Endnotes and a bibliography conclude this report. Thirteen appendixes are attached which cover the following topics: the policy board, inservice days, plans for certification, competency ratings, staff interviews, questionnaires, evaluation, correspondence, CBTE office organization, and plans for implementation for future management and modification of the program. **Improvement, Supervision, and Dissemination of a Model Cross-Age Tutoring Program.**

Pub Date 10 Oct 75

Note—90p.; Practicum submitted in partial fulfillment of the requirements for the degree Doctor of Education (Nova University)

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Academic Achievement, \*Cross Age Teaching, \*Elementary Education, Elementary School Students, Grade 2, Grade 5, Grade 6, Peer Relationship, \*Peer Teaching, \*Reading, Remedial Instruction, Sight Vocabulary, Student Projects, \*Tutoring

This practicum was developed (1) to improve, supervise, and disseminate a model cross-age tutoring program, and (2) to determine if a tutorial program would increase the sight vocabulary of 100 second grade students in the Dallas Independent School District. A secondary purpose was to determine if such a program would improve the reading grades, peer relations, and general academic performance of the 100 fifth and sixth grade tutors. Evaluation was accomplished by pretests and posttests administered to the second, fifth, and sixth grade students to measure peer relations, academic performance, and achievement in sight vocabulary in four experimental schools and four control schools. Other evaluation instruments were used to obtain reactions of parents, teachers, and principals to the program. As a result of the program, dramatic increases were observed in acquisition of sight vocabulary skills of the tutored students. Less dramatic improvements were observed in academic achievement, peer relations, and reading grades of both tutors and tutees. The principals, teachers, and parents displayed positive reactions to the program. (Author)

**Descriptors**—College Students, Females, Higher Education, \*Motor Reactions, \*Physiology, \*Reaction Time

**Identifiers**—Hypnotic Susceptibility, \*Placebo Effect

This study was designed to investigate the effect of a placebo (sugar pill) accompanied by suggestions that the pill would either (1) improve performance as a stimulant or (2) cause a deterioration in performance as a depressant when the

performance in question was the subjects' complex reaction time to a light stimulus. The Harvard Group Scale of Hypnotic Susceptibility (HGHS) was administered to 160 females enrolled in courses offered at the Department of Health and Physical Education for Women at Sam Houston State University during the fall semester of 1974 or the spring semester of 1975. Approximately equal members of physical education majors and other majors were tested. Thirty subjects scoring high hypnotic susceptibility and 30 subjects scoring low hypnotic susceptibility on the HGHS were located. Ten subjects of high hypnotic susceptibility were randomly assigned to each of the two experimental variables and the control group. The same assignment procedure was followed for the subjects of low hypnotic susceptibility. Individual pretests and posttests on complex reaction time were administered to each group. Analysis of the data indicated that no significant differences existed between any of the groups in question. (Author)

This is the handbook/directory of the Association for Intercollegiate Athletics for Women (AIAW). It begins with an introduction which discusses the history, structure, and membership of the AIAW. Next are lists of executive board members, headquarters staff, and members of committees. The constitution, bylaws, and code of ethics of the AIAW are presented in the following sections. Rules and questions concerning recruitment of student athletes are included as well as AIAW regulations for the awarding of financial aide. The following sections concern AIAW eligibility rules, rule infractions, and AIAW policies. The final sections present a position paper on intercollegiate athletics for women, and a position statement concerning women on men's teams. The appendix includes a schedule of national championships, information on local organizations and regions, sports council members, tournament sites, forms, special publications, and a directory of AIAW member institutions, and a sport listing. This publication, covering a broad spectrum of sports safety problems, is designed as a source of information for those who plan, organize, administer, or evaluate various physical education and recreational activities, athletics, or sports. In the first section, the prevention of sports injury is stressed with attention to different age groups and sexes. Some of the topics discussed are unsafe acts, qualified supervisors, effectiveness of injury control factors, safe equipment, maintenance of surfaces and facilities, enforcement of rules, and the acceptance of degrees of risk. The second section deals with preconditioning, equipment, training, supervision, and specific safety criteria in skiing, trampolining, skin and scuba diving, and boating. The topic of the third section is athletic training and emergency care. This section includes discussions of athletic facility safety, medical practices in sports, and emergency care practices for spectators at athletic and sports events. The fourth section discusses the legal liability of physical educators with regard to curriculum and negligence, the school's and coach's legal responsibilities in athletics, the legal rights and responsibilities of team physicians, the legal aspects of adult physical fitness programs, and exemptions from civil liability for physical educators while giving emergency care. This report by the Bicentennial Commission on Education for the Profession of Teaching of the American Association of Colleges for Teacher Education discusses aspects and problems of teaching as a profession and makes recommendations to upgrade the quality of teachers and of teacher education. The first chapter describes characteristics of professions and semi-professions. Chapter two assesses the extent to which teaching falls short of being a full status profession. It examines social factors which bear on teaching, conditions in the schools, and the nature of teaching. Chapter three examines the various elements involved in the governance of teacher education and explores collaborative relationships among participating partners. The fourth chapter considers the questions involved in preservice, inservice, and continuing teacher preparation. This chapter also highlights the concept of adequate "life space" within which teacher educators can conduct effective initial preparation and subsequent life-long efforts at professional proficiency. Chapter five considers the issues of individual and institutional quality control and explores their implications for certification, program approval, recruitment and selection, and supply and demand. This chapter also addresses the problems of adequate resources and

necessary funding. The final section summarizes and clarifies some concepts and themes which have special meaning for the Commission. (Author/CD)

**Application of Change Theory for Alleviation of Prejudicial Barriers to Career Advancement for Women: A Study in Two Federal Agencies.**

Pub Date Jan 76

Note—154p.; Ph.D. Dissertation, Walden University

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

**Descriptors—**\*Change Strategies, \*Equal Opportunities (Jobs), \*Females, Feminism, \*Organizational Change, \*Sex Discrimination, Working Women

This dissertation presents the application of change theory to the results of empirical research on concepts underlying the change process. It is stated that the change process is based upon the assumption that women can implement change to alleviate institutionalized discrimination in the organizations in which they work. The objective of the research is stated as being to develop and implement strategies for the alleviation of sex discrimination in promotion and training opportunities in two federal civilian agencies. Chapter one of this dissertation presents background information on the problem of prejudice, and an introduction to the study. Chapter two contains a review of the literature. Methodology and procedures are discussed in chapters three and four. Chapter three deals with the policy research and provides a description of those parts of the internal and external environment which impacted on the study. Chapter four examines the environment after the application of change strategies and describes the evaluation research. The empirical findings from the policy research appear in chapter five. A summary of the results and conclusions are presented in chapter six. (RC)

This compilation lists research completed in health, physical education, and allied areas during 1974. It is arranged in three parts. Part one is an index which cross references the listings in parts two and three. References are arranged under subject headings, which are in alphabetical order. Instructions for using the index are also given in this section. Part two is a bibliography which consists of a listing of articles published in the 180 periodicals reviewed by the Committee for Completed Research. The periodicals reviewed are also listed. Part three contains the abstracts of master's and doctoral theses from institutions offering graduate programs in health, physical education, recreation, and allied areas. Reporting institutions are also listed. Most references are accompanied by abstracts of the research and all are numbered in alphabetical order according to institution. Names of institutional representatives sending in these abstracts are indicated after the name of the institution; major professors are listed after each reference. (Author/BD)

cation, Preservice Education, Programed Instruction, \*Programed Materials, Secondary School Teachers, \*Teacher Education  
**Identifiers—**\*Distinguished Achievement Awards Entry

Professional Sequence at Illinois State University (ISU) is a self-paced, competency-based eight semester-hour program with an enrollment of approximately 1,400 students per semester. It is designed to provide preservice secondary school teachers with an integrated set of teaching skills as well as a systematic set of analytic skills. The competencies involve instructional methods, general educational knowledge, and reading methods. Professional Sequence instruction is organized in a series of self-instructional packages which have been constructed by the ISU faculty. Students are given credit for each package when they have demonstrated the required level of competence by either performance, written work, or tests. Daily computer printouts list results of evaluations submitted during the previous 24 hours. Each student's cumulative progress is reported weekly by computer printout. Following a series of orientation sessions, the student works individually with faculty members of his/her choice in the Sequence advisement room. Approximately 70 percent of the program is required. The remaining 30 percent is earned by completing optional packages, independent study, or by taking mini-courses. Thus, students are able to work at a pace suited to their needs. The teaching skills component of the program is climaxed by a series of five microteaching experiences, all clinically analyzed. In addition, students may choose to participate in a public school experience or a clinical experience in the laboratory school prior to student teaching. (Author)

**Identifiers—**\*Distinguished Achievement Awards Entry, HIP, Humanizing Individualizing Personalizing

The University of Missouri College of Education and the Columbia Public Schools implemented an alternative program for the preparation of elementary teachers. The program, Humanizing, Individualizing and Personalizing Education (HIP), is offered over a three-year period, and correlates a field experience with university classroom activities. Each of the freshman and sophomore students is a member of a learning community in a participating Individually Guided Education (IGE) elementary school, and the IGE Learning Community at the University. When students are not on their field assignments they participate in didactic activities which are designed in two to three week increments, scheduled at least one week in advance. The University Learning Community is made up of the students and an interdisciplinary team of 20 educators. The professional training embraces the laboratory, clinical, and small group seminar approach to professional preparation. The didactic content is to varying degrees competency-based and is to a large extent organized around behavioral objectives, instructional alternatives, and alternative assessment procedures. Students select an advisor from the Learning Community to coordinate the planning of the professional education learning program for each student according to his/her needs, interests, and activities. (Information concerning objectives, personnel, budget, and contributions is included.) (Author/RC)

**Comprehensive Explanation of the Cooperative Program in Teacher Education.**

New Mexico State Univ., Las Cruces.

Pub Date Dec 75

Note—8p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*College School Cooperation, \*Cooperative Education, \*Cooperative Programs, \*Cooperative Teaching, Higher Education, \*Preservice Education, \*Teacher Education, Work Study Programs

**Identifiers**—\*Distinguished Achievement Awards Entry

The Cooperative Program in Teacher Education at New Mexico State University, now in its tenth year, is a work-study degree plan which students complete in the normal four years by attending summer sessions as well as regular semesters. Graduates enter the teaching profession with exposure to several levels of public school education. From first entry, co-op students alternate semesters between a "work phase" in classrooms (for which they receive both college credit and pay), and a "school phase" requiring enrollment in fulltime university coursework. Financial support derives from the Federal Higher Education Act plus some monies from the State of New Mexico. Wages paid during the work phases are based on a graduated scale and established financial need. As freshmen and sophomores, co-op students are placed in paraprofessional roles in elementary and junior high schools. In the junior year, they hold assistant teacher classification and are assigned according to their preparations. Senior co-ops become co-teachers with broad responsibilities for teaching. A recent comprehensive comparison with a regular teacher preparation program revealed the co-op approach superior in almost all dimensions which seem representative of the quality being sought in America's classrooms. (Information on personnel, budget, evaluation, and contributions is included in this report.) (Author/RC)

The Agenda for Action is a model for institutionalizing a continuous and rational system of curriculum improvement. It defines the process and procedures whereby all teacher education and school service personnel programs in the College of Education at Bowling Green State University are to be reviewed and subsequently redesigned to assure that they are consistent with (1) state accreditation and certification standards, (2) National Council for the Accreditation of Teacher Education accreditation standards, (3) present and emergent College/University missions and goals, and (4) research findings relative to professional performance. In addition to involving four College Councils and an Administrative Staff, the Agenda has precipitated the participation of 125 professional teacher education and arts and science faculty, undergraduate and graduate students, elementary and secondary teachers, specialists, and administrators in the deliberations of six Program Area Coordinating Units and several Task Force groups. The function of the Program Area Coordinating Units is to redesign all programs within their respective areas to meet the four objectives of the Agenda. Each of the College Councils and the Administrative Staff have specified developmental and/or monitoring tasks. The immediate goal of the Agenda is the preparation of a comprehensive plan showing the process, procedures, and timeline by which specified curricular and organizational redesign will be implemented. The Comprehensive Educational Center (CEC) at Plattsburgh State University College provides pre- and in-service teachers, administrators, human resource personnel, and others with a variety of services. The CEC provides free and expert consultant and instructional services in the areas of art education, curriculum evaluation and development, production and use of instructional materials, educational research design, preparation of proposals for external funding, reading, mathematics, science education, and the analysis of teacher behavior. In addition, a Library Media and Curriculum Materials Center offers specialized books and materials to faculty of area schools. A laboratory school is provided by the Educational Research and Demonstration Center (part of the CEC). This center emphasizes research on the development of representational drawing, logical thinking, language, and personal identity. The CEC not only deals with individual needs and interests, but with those general problems affecting the quality of education in northeastern New York. (Information concerning personnel, budgeting, CEC's contributions to the improvement of education, and evaluation methods and results are included in this report.) (RC)

Greenville College, Greenville, Illinois has developed a multifaceted program designed to utilize the expertise of professionals in the public schools to help educate and train preservice teachers so that they are ready for the realities of the elementary and secondary classroom. Teachers and administrators in the public schools and education professors at the college work together in program development and evaluation. Participation in this partnership is not entirely one sided; while public school professionals have the opportunity to participate in the college program, college professors also have the opportunity to participate in public school programs, teaching in the public schools on a full time basis at certain times. Participants in the program do so on a volunteer basis. (JMF)

**Identifiers**—\*Distinguished Achievement Awards Entry, Right to Read

In July 1974, the Department of Elementary Education of Rhode Island College was awarded a two year Right to Read grant to develop a preservice preparation program for the teaching of reading. The main objective of this project has been to develop a program based on using the discipline of reading as a means of integrating the following major contemporary thrusts in teacher education: (1) competency-based teacher education; (2) field-based preservice teacher education; (3) on-site inservice staff development; and (4) college faculty development. This was accomplished by developing competency-based courses with field-based components for the areas of reading and language arts, and involving both college and public school faculties in the development of student teaching centers structured according to a competency-based design. Evaluation of the program was by means of an objective-item questionnaire administered to students

in the reading and language arts components and an open-ended questionnaire administered to both faculty and student teacher participants in the program. (Author/JMF)

**Identifiers**—\*Distinguished Achievement Awards Entry

The Teaching Skills Program for students in secondary education is a part of a sequence of varied experiences in the Department of Curriculum and Instruction, College of Education, University of Kentucky. Through microteaching, every student participates in the following five teaching experiences: (1) instructional objectives and presentation, (2) questioning, (3) interaction, (4) refocusing, and (5) summary teach. The sequence of teaching episodes allows the student to move gradually from a teacher-centered activity to a student-centered activity. In this program students apply concepts derived from various learning theories, utilize materials that are specifically related to their discipline, and develop learning strategies that were encountered in the special methods courses. Following the microteaching sessions, the "teacher" receives feedback from his/her students and instructor with emphasis placed on constructive criticism to reinforce those skills that were demonstrated effectively and suggestions for improving others. In addition, videotaping allows the student to do a self-evaluation. (JMF)

The McNeese State University's pilot program in field-oriented competency-based teacher education in early childhood education is designed for prospective teachers to develop and demonstrate competencies believed to be necessary for effective teaching in the early childhood area (K-3), as well as to develop evaluative criteria relevant to the stated competencies. The program is organized into two blocks. Block A consists of 16 semester hours of educational methods including corrective reading, science, social studies, and student teaching. Community involvement is necessary to allow each student two hours per day in the public schools in addition to his two hours per day in university seminars. Constant evaluation is of prime importance in the project, and revisions are made based on the evaluations of the programmatic system. (Author/JMF)

Identifying major trends related to the supply and demand for teachers in Michigan provides the purpose for this study. The data was gathered

primarily from the Professional Personnel Register compiled annually by the Teacher Education and Professional Service Division of the Michigan Department of Education. The data provides empirical evidence of the attrition of teaching personnel who have graduated from various institutions. It also provides a basis for estimating the extent to which teachers who leave the public schools return to teaching at a later date. Factors examined which influence the supply and demand of teachers include (1) birth rate and enrollment, (2) newly certified teachers and the increasing number of teachers, and (3) attrition rate. The study also highlights the descriptive characteristics of Michigan teachers and analyzes employment trends by curriculum. (Tables and figures are provided.) (JMF)

This report uses the 1973-74 Michigan Professional Personnel Register to update earlier studies of professional personnel in Michigan's public elementary and secondary schools. The report includes descriptions of all professional personnel employed in Michigan public schools from 1967-68 through 1973-74 school years. The topics included in this report are (1) annual attrition or loss of professional personnel, (2) return of professional personnel after leaving schools for one year or more, (3) loss of teachers with varying years of teaching experience, (4) comparison of the number of teachers and administrators prepared by each institution, (5) comparison of teacher characteristics (number of new teachers, degrees, mean salaries, race, and teaching experience), (6) comparison of administrator characteristics (number of administrators, degrees, mean salary, race, and years of experience), and (7) comparison of a number of institution graduates in the tricity area of Wayne, Oakland, and Macomb counties. The results of the study for each of the seven topics are discussed prior to the presentation of the 29 tables which give the actual statistics. (RC)

Descriptors—Elementary Secondary Education, \*Employment Experience, \*Employment Patterns, \*Employment Trends, \*Public School Teachers, \*Teacher Employment, Teachers

Identifiers—\*Michigan

The information reported in this paper is based on data from the Professional Personnel Register for the school years 1967-68 through 1974-75. The paper presents a comparison of the employment patterns by curriculum for all teachers employed in the public schools of Michigan during these periods. It illustrates patterns of employment of all teachers in the state as well as employment of new teachers in Michigan and in the particular intermediate school districts of Macomb, Oakland, and Wayne. The 13 curriculum areas identified are language arts, social science, special education, mathematics, science, health and physical education, industrial arts, music, home economics, arts and crafts, elementary education, foreign languages, and business education. The report shows (1) the total number of professionals employed annually in each curriculum and the percent change from the previous year, (2) the total number of new professionals who did not have prior teaching experience employed annually in each field, and (3) trends in employment of all teachers by curriculum. Cruikshank, Donald R. Myers, Betty

A Brief Review of Studies of Problems of Teachers Conducted by Donald R. Cruikshank with Others with Particular Attention to Instrument Development.

Pub Date [75]

Note—141p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—Educational Problems, \*Elementary School Teachers, Elementary Secondary Education, Problems, Rural Schools, Secondary School Teachers, Surveys, \*Teacher Education, \*Teacher Improvement, Teacher Response, Teachers, Urban Schools

There is a common assertion that if you can find out what teachers' problems are, you have gained enormously valuable insight into their world and are in a position to help them at some level to consider and thus accept, reduce, or eliminate those problems. This assertion has provided the basis for studies over the past 10 years. This report outlines several of these studies and the instruments used in each. The instruments include (1) the Perceived Problems Inventory (PPI) designed for beginning elementary and junior high school teachers; (2) the My Biggest Problem Today Inventory (MBPTI), a revision of the PPI used for inner-city elementary school teachers; (3) the Teacher Problem Inventory (TPI) for inner-city elementary school teachers; (4) a revision of the TPI for rural disadvantaged elementary teachers; and (5) the Teacher Problems Check List (TPCL) for secondary teachers with a revision for elementary teachers. Samples of each of these instruments are included. (JMF)

Identifiers—\*Distinguished Achievement Awards Entry, Louisiana (DeSoto Parish)

DeSoto Parish, Louisiana is a basically rural area in nature and in 1970 was recognized as below the norm in its educational program. This document outlines the plan for the restructuring of the curricular program with an attendant inservice program in an effort to correct instructional deficiencies and to create in parents, teachers, and students a feeling of pride, unity, and accomplishment. The inservice program was proposed in the following four phases: (1) development of curriculum guides in English, science, social science, mathematics, and reading for grades 1-12; (2) instruction in the utilization of the guides and in innovative teaching strategies; (3) an evaluation of the total instructional program; and (4) the deployment of coordinating teachers in each school. The program was planned to be completed in a five year span, 1970-75, and required the complete cooperation of the public school teachers and the faculty and students of the College of Education at Northwestern State University, Natchitoches, Louisiana. Data evaluated was based on observations designed to measure curriculum organization, teaching techniques, classroom social organization, classroom psychological climate, order maintaining techniques, and provisions for individual differences. A Concentration in Speech Pathology and Audiology Serving the Needs of Teachers of Various Disciplines.

Elizabeth City State Univ., N.C.

Pub Date 75

Note—21p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Audiology, Exceptional Child Education, Language Ability, Language Arts, \*Language Development, \*Language Instruction, Language Skills, Language Usage, Phonetics, \*Speech Pathology, \*Teacher Education

Identifiers—\*Distinguished Achievement Awards Entry

Elizabeth City State University has established a program concentrating in speech pathology and audiology which is nontraditional in approach. It serves as a support in giving valuable substance and current expertise to those programs already offered in the area of language proficiency. Growing out of the established educational concept that skills can best be taught by those teachers with the specific, detailed knowledge from the discipline that have proven effective in developing expertise in particular areas, the program in speech pathology and audiology was instituted to give teachers the expertise in developing language proficiency. The courses in Phonetics, Introduction to Speech Pathology, Anatomy and the Vocal Mechanism, Pathology II, and Clinical Procedure and Practice, are especially useful in teaching reading skills, designing objectives for remediating basic speech and language problems, and establishing behavioral objectives for language arts. The program is especially useful in designing objectives, procedures and materials to serve the exceptional child, both retarded and gifted, in language growth. All courses are structured to provide expertise in servicing the exceptional child. Opportunities are available for interdepartmental use of materials, equipment, and student-faculty exchange of services. (Author/JMF)

Pub Date 75

Note—28p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Conferences, Foreign Countries, \*Inservice Programs, \*Inservice Teacher Education, Organizations (Groups), \*Preservice Education, Program Evaluation, \*Public School Teachers, Schools of Education, \*Teacher Education, Workshops

Identifiers—\*Distinguished Achievement Awards Entry, Puerto Rico

The Inter American University presents a program for the improvement of teacher education in Puerto Rico by implementing the following innovations: (1) an academic retreat to serve as a forum for planning the coordination of activities; (2) the development of an Educational Resources Center to serve as the center for marshalling efforts toward the goal of improving teacher education programs and providing programs for improvement in preservice and inservice training; (3) organization of the Caribbean Teacher Education Association to serve as the body through which ideas are shared and disseminated to other educators; (4) an experimental observation room designed for clinical classroom experiments; and (5) expansion and growth of the annual education conference to reach a wider audience of educators who will work together in action workshops designed so they will have ideas to implement immediately in the home classroom. The purpose of these innovations is to coordinate teacher education activities in Puerto Rico and the Caribbean to facilitate, through the communication and sharing of ideas, a continuity of action in the improvement of teacher education. Elementary TEAM Program.

Temple Univ., Philadelphia, Pa. Coll. of Education.

Pub Date 75

Note—10p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Elementary School Teachers, Field Experience Programs, \*Instructional Programs, Practicums, Preservice Education, Program Evaluation, Schedule Modules, Student Teacher Relationship, \*Teacher Characteristics, \*Teacher Education, \*Teacher Education Curriculum, Teaching Styles

Identifiers—\*Distinguished Achievement Awards Entry

The Teacher Education Access Mode (TEAM) Program, available to juniors entering the Temple University College of Education and majoring in elementary education, exposes students to learning alternatives in meeting the basic goals of teacher education. TEAM is an approach to people, teaching, and learning based on a belief that to teach children one must develop a personal style of teaching. TEAM adjusts to individual needs with students making decisions involving

both content and methods of exploration. Modular scheduling occurs weekly, and a regular part of the schedule includes a year-long, supervised classroom practicum in urban and suburban schools in which TEAM students observe and teach children. Students return to student teach in these same schools during their senior year. Students identify the goals toward which they work in developing their personal teaching styles. Evaluation and grading emerge from the goal clarification process through conferences between student and advisor. Research results for TEAM indicate that the program develops positive attitudes in students; they see themselves as better prepared and the TEAM faculty members as utilizing teaching competencies better than other elementary education programs. Music Theory Knowledge and Skills for Beginning Music Teachers: A Descriptive Survey Report. Number 1.

State Univ. of New York, Fredonia. Coll. at Fredonia. Teacher Education Research Center. Pub Date 75

Note—52p.  
EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage  
Descriptors—\*Applied Music, Aural Learning, Choral Music, Listening Comprehension, Music, Musical Composition, Music Education, Music Reading, \*Music Teachers, \*Music Theory, Public School Teachers, Questionnaires, Singing, Surveys, \*Teacher Education, \*Teaching Skills, Vocal Music

Opinions of New York state public school music teachers were sought to (1) obtain an initial profile of the knowledge and skills needed and actually used by beginning music teachers in the areas of aural skills, written skills, combined aural and written skills, and theoretical knowledge of musical types; and (2) determine if this profile of knowledge and skill areas will vary when examined by area of specialization and level of teaching duties. Data were collected by questionnaires from randomly selected sample of the public school music teachers in the state. Of 400 inquiries, 208 response sheets were returned. An analysis of the data reveals that (1) the written skills associated with score reading, score preparation, and transportation are most needed and used; (2) the aural skills most needed are those of sightseeing and detecting errors of all types; and (3) there is a slight weighting toward the pop-commercial type of music in terms of need, but on the use side, folk, pop, and ethnic music are used most often. When examined by areas of both specialization and level of teaching duties, the differences are more a matter of degree than direction. (Author/LBH)

Identifiers—\*Distinguished Achievement Awards Entry

Two instructional models offer alternatives to the traditional lecture-discussion of undergraduate teacher aspirants. A self-paced model is composed of videotaped lectures, a learning package, and the use of both student proctors and instructor contact. Each student must develop his/her own time to be allotted structure for the course. An affective model puts students in contact with a faculty member in an informal setting. Human relations and sensitivity are developed, and students examine themselves as future teachers. The self-paced model is highly mediated and cognitive; the affective model, oriented toward personal interaction. Material for the cognitive dimension of the course was videotaped in 1973. Over 200 students who attended live lectures were compared with 200 attending TV lectures. Test results showed the mean score favoring the

TV lecture series, but attitudes toward the course dropped with TV lectures. Attitudes improved and additional gain was made on test results when the course was offered in a small viewing room and student proctors added for tutoring. The affective dimension was later assimilated into the mainstream professional sequence. Results and experimentation supported its value in aiding academic success and positive self-concepts. This is a manual for the Professional Development Seminar (PDS), a required course for all freshmen and transfer students in the College of Education at the University of Wisconsin, Oshkosh. The manual states the PDS provides a way for beginning students in education to come into academic and social contact with a faculty member in the College of Education. The manual has been designed as a suggestive resource for seminar leaders. It begins with a list of the eight major purposes of the course, and then presents suggestions for class assignments such as (1) topics for reflections by students, (2) activities that will help students get to know one another, (3) ground rules for discussions, and (4) lesson plans on various topics. Also included in the manual are items relating to the past successes of the course, for example (1) a student feedback form, (2) effective strategies used by PDS staff members, (3) a list of field trips and activities, and (4) types of social activities conducted. A list of additional resources is also contained in the manual. (RC)

Identifiers—\*Distinguished Achievement Awards Entry

This course is a team taught, 12 quarter-hour block course, which combines a general teaching, competency segment and a specialized subject area methods segment. It is required of all students seeking secondary certification and is supported out of the regular secondary department budget. The teaching competency segment has the following three interrelated phases: (1) design, development, and evaluation of mediated instructional units; (2) clinical focus on the improvement of interactive teaching skills, observation of classroom verbal and nonverbal behavior, and classroom management; and (3) human relations, including theoretical analysis of affective education and practical experience in values clarification. Specific changes that have evolved during the three year period include behavior modeling, movement from university classroom to secondary school field instruction, movement toward an inservice treatment for instructors, and production of particularized learning materials. The focus on human relations and affective teaching is concluded to have created a consideration of alternative teaching and learning models and concern for the individual learner. (Author/JBH)

Identifiers—\*Distinguished Achievement Awards Entry

This five-phase program is designed to maximize success of preservice teachers. Phase 1 consists of a two semester component which combines the study of education with directed observations in schools. Phase 2 is a one semester component in which the student tutors a child on a one-to-one basis in a participating public school. In Phase 3, the student serves as a teacher aide for one semester in an elementary school classroom. Phase 4 is a one semester component that combines professional methods courses in an integrated manner with practice of specific teaching skills in an elementary school classroom. Phase 5 is completed in the same elementary school classroom as Phase 4 under the guidance of a cooperating teacher and a college supervisor. It is a one semester, full-time commitment in which the student takes over the teaching assignment of the teacher. The program serves three functions. It (1) enables a student to make an early intelligent decision regarding teaching as a profession; (2) enables the college faculty to select and retain only those students showing aptitude and commitment; and (3) enables the student to acquire the knowledge, techniques, and experiences in a carefully guided, sequential manner. Identifiers—\*Distinguished Achievement Awards Entry

The purpose of this project was to re-educate veteran teachers to understand and conceptualize child-centered, informal education as preparation for a new, open-architecture setting. The first phase of the project consisted of a needs assessment; the second, of three training days for teachers. Training covered interpersonal relations skills, classroom environment analysis and diagnosis, visiting and evaluating open schools, formulating generalizations about informal education, and exposure to resources available on informal education. The third phase consisted of a planning day with three or four teachers to prepare for the simulation. In phase 4, each cluster of teachers moved with their classes into an all-purpose room designed to simulate the space and equipment in the new school. Following the simulation, each cluster met for phase 5 in which the teachers and consultants debriefed the experience and set goals for what they wanted to accomplish in the new school. Phase 6 consisted of 18 days of followup in the new building. Evaluation results indicated that teacher attitudes about the new school have changed from ones of doubt, anxiety, and low expectation to more positive ones. (Author)

TEPY is a unified approach to the preparation of elementary school teachers which integrates the professional education areas of language arts and reading, mathematics, science, social studies, child development, evaluation, and teaching skills into an instructional format that is team-taught, clinically-oriented, and field-based. The program includes all the professional education courses needed for elementary certification in Ohio and can be completed in one year. Modules of instruction are interdisciplinary as well as discipline-oriented, and are designed for either large or small groups or individual learning experiences. Instructional sessions are held on campus three days a week with the other two days spent in full-day classroom participation. Work in the field in the College of Education Teacher Education Laboratory Centers, supervised by a full-time faculty coordinator, offers students variety in social settings, classroom organization, learning materials, and levels of ability and interest. Emphasis in the program is on performance criteria which can promote a more realistic assessment of the TEPY student's preparation in classroom effectiveness. (Author/LBH)

Identifiers—\*Distinguished Achievement Awards Entry

The center provides an opportunity for elementary education majors to take some of their professional education courses in public school settings. After a three-week orientation period, students spend three consecutive days each week throughout the semester within the public school. Major objectives of the center are (1) to integrate theory with the act of teaching; (2) to achieve a cooperative approach to teacher education among the students, teachers, and the university; and (3) to obtain more meaningful evidence of professional growth and performance of education students. About 30 education students are enrolled in the center each semester. Other personnel include principals and staff of three public elementary schools and five university professors from the School of Education. Coordination is stressed, with courses including reading, language arts, science, social studies methods, tests and measurements, and educational psychology. Students also enroll in a "special work" course which enables them to explore aspects of classroom work unique to their particular unit or grade level assignments. Evaluation efforts include direct observation and supervision and the use of videotape cameras and recorders for feedback assessment. (Author/LBH)

The Preservice Reading Education Program (PREP) is a competency-based teacher education program for elementary and early childhood education students. It focuses on the following five major activities: (1) the coordination of an organized program in reading education around

identified teacher competencies; (2) the individualization of instruction for preservice teachers through a system of modular instruction; (3) the provision of supervised field activities for students which have direct relationships to college classroom activities; (4) the creation of a systematic means for relating college resources to a large number of identified pupil instructional needs in surrounding public schools; and (5) the establishment of a continuous program of inservice education and consultation among both college and public school personnel. Instructional models have been developed for PREP to train students in teaching developmental reading, and diagnostic teaching approaches are included in another series of modules used in the program. Modules include knowledge and performance competency objectives and opportunities for student evaluations of the system. Audiovisual and print materials are used for teaching and diagnostic techniques and procedures. (Author/LBH)

Identifiers—\*United States

This is a handbook for leaders, coaches, and managers of American sports groups and teams participating in international athletic exchanges. Chapter one presents information on financing international sports tours. Chapter two covers the basic preparations necessary prior to going abroad. It includes information on tickets, passports, visas, immunizations, health measures, money, insurance, customs, mail, clothing and equipment, gifts, and packing and freight. It also discusses whether an advance man and interpreters are needed. Chapter three suggests some guidelines on the mental preparations for a tour and includes some ideas on what an American should know about his/her own country in contacts with foreign nationals. Personal conduct on and off the field of competition is discussed in chapter four, and ways to generate good publicity are suggested in chapter five. Chapter six offers suggestions for coping with the minutiae of group travel overseas. Chapter seven contains a number of approaches and procedures that experienced coaches and leaders have found to be helpful in order to lead a successful tour. Chapter eight suggests some ways to prepare for the return trip home and adds some thoughts on followup actions after the return home. The interest of U.S. Government Agencies in tours abroad by American sports groups and how U.S. Foreign Service posts can be of assistance are explained in chapter nine. Appended are 25 forms and documents. (RC)

This book on human sexuality is a textbook which was conceived, written, and designed by teachers for teachers. It is divided into four sections, the first three of which are designed to acquaint the teacher or future teacher with basic information and concepts related to sexuality. Section 1 serves as an introduction to sex education and discusses sex education as education for love. Section 2 deals with the biological aspects

of human sexuality and includes chapters which discuss the male, the female, human sexual response, pregnancy, childbirth, lactation, contraception, abortion, and venereal diseases. In section 3, the philosophical, psychological, and social aspects of human sexuality are explored through chapters dealing with the intelligent choice of a sexual life style, masturbation, homosexuality, and population stabilization. In section 4, the scope and sequence of the sex education curriculum for elementary, junior, and senior high school are presented. The curriculum includes detailed teaching units for the various grade levels, together with the most recent list of supplementary materials. An appendix is attached which includes an atlas of teaching illustrations (especially designed for easy reproduction on transparencies for use with the overhead projector), a glossary of terms, and additional readings. The subject of this bulletin is achieving better discipline through the use of contingency management. Part 1 discusses the basic beliefs of behaviorists and the basic principles of behaviorism. It states that all human beings do what they do in pursuit of some variety or combination of tangible reinforcers, social reinforcers, and intangible reinforcers. Part 2 is concerned with ways to help teachers apply positive reinforcement in systemic ways. It begins with guidelines for using contingency management and then presents 23 contingency management techniques for the classroom. Part 3 contains questions and answers to help teachers understand and apply both the principles of behavioral psychology and the process of contingency management. The bulletin also includes lists of potential reinforcers and additional readings. (RC)

Descriptors—\*College Programs, \*College Students, Higher Education, \*Learning, Open Education, Role Perception, \*Student Role, \*Teacher Role  
Identifiers—Project Change

This paper explores the role of the student and states that it is not sufficient to conceive of the student's role as only a response to conditions set by the instructor's role. Part 1 of this paper discusses the relationship between the instructor's role and the student's role in a college program. It states that the role of the student is to learn from that which is offered, and that in a person-centered program the learning which is valued (1) is lasting rather than short-range, (2) involves process more than content, and (3) contains more personal elaborations than pieces of information. In part 2, the role of the child in the open classroom is explored, while part 3 shows the parallels between roles in an open classroom and roles in a person-centered college program. Part 4 contains practical suggestions for college instructors who wish to pay greater attention to

the role of the student. Finally, part 5 contains practical suggestions for the student to construct his/her own role as a learner. (RC)

**The Cooperating Teacher—Some Hints for a Successful Experience.**

Note—8p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Cooperating Teachers, Relationship, \*Student Teacher Relationship, \*Student Teachers, \*Student Teaching, Teacher Education, \*Teaching Experience

The role of the cooperating teacher is one of the most crucial factors in determining the success or failure of the student teaching experience. There are seven major factors to be considered in the development of an effective cooperating teacher-student professional relationship. First, the student teacher must be given a sincere sense of belonging. Setting the tone of the cooperating teacher-student teacher relationship is also extremely important and should be accomplished during the first few days of the student teaching experience. The third factor involves allowing for individual abilities to control the rate at which the student will progress into full time teaching. It is also necessary for the cooperating teacher and the student teacher to schedule a portion of each day for a conference and planning period. The fifth factor concerns allowing the student teacher to have experience in writing lesson plans for the activities he/she teaches. Next, informal observations and feedback aimed at the improvement of the individual or program must be provided by the cooperating teacher on regular basis. Finally, each cooperating teacher should be expected to formally observe the student teacher a minimum number of time while he/she is teaching the entire class. By establishing strong lines of communication at the start of the cooperating teacher-student teacher relationship, the opportunity for a positive student teaching experience is greatly increased. **Descriptors—**Females, High School Students, \*Kinesthetic Methods, \*Kinesthetic Perception, Motor Development, \*Physiology, \*Skill Analysis

This study was designed to investigate a specific skill pattern as it relates to kinesthetics and hand dominance. The specific skill pattern investigated was the ability of subjects, using either their dominant or nondominant hand, to catch a ball when they were unable to see their arm or hand. An "L" shaped curtain containing a hole for the ball to pass through was used for this study. The side of the curtain contained an arm sleeve which allowed the subject to see the ball in its parabolic flight pattern but did not allow the subject to see either her arm or hand. One hundred sixty high school girls were randomly chosen and assigned to one of the following four experimental treatment variables: (1) dominant hand kinesthetic catching ability, (2) dominant hand visual catching ability, (3) nondominant hand kinesthetic catching ability, and (4) nondominant hand visual catching ability. It was found that there was a significant difference between vision and kinesthesia in the ball catching task. A significant difference was also found between dominant and nondominant hands in the catching task. No significant difference was revealed between dominant and nondominant hand catching ability in the visual catching task. (Author)

**Document Not Available from EDRS**

**Descriptors—**\*Behavioral Science Research, \*Behavior Change, \*Class Management, Contingency Management, Elementary Secondary Education, Problems, Social Reinforcement, \*Teacher Education, Teaching

This is the participant's book for a teacher training program in behavior analysis, called Classroom and Instructional Management, and developed by the Central Midwestern Regional Educational Laboratory. Unit 1 introduces the field of behavior analysis. It contains examples of behaviors and provides solutions for changing the behavior. Unit 2 discusses several strategies that are available to strengthen desirable and weaken undesirable behaviors in children. Ways in which planning can facilitate any reinforcement program by focusing on the behaviors to be changed is emphasized in unit 3. Unit 4 shows how to use social reinforcers effectively, while unit 5 discusses how to design and implement a system of tokens to dispense material reinforcers, and unit 6 shows how to use contingency contracts. Unit 7 describes response weakening procedures and how and when to use them effectively. The final unit suggests several skills which can make implementing and managing a reinforcement program easier to accomplish. Exercises and checkups for the participant to complete are contained in each unit. (RC)

**Descriptors—**Academic Achievement, Affective Behavior, Effective Teaching, \*Learning, \*Students, \*Teachers, \*Teaching Experience, Teaching Procedures, \*Teaching Skills, Teaching Styles

This paper reports on three studies of the changes in teacher effects on student learning and attitudes as a function of teacher practice. Two studies were performed in a tutorial context, the first with 4 tutors and 16 students, the second with 17 tutors and 68 students. The third study used small group instruction with 12 teachers and 288 students. In each study, the same teachers taught a short curriculum unit three or four times, teaching different students in each trial. The results of the studies showed marked individual differences among teachers in the extent to which their students learned more or less. Few teachers showed marked increases in student learning with practice. It was also shown that, on the average, student achievement decreased with teacher practice. Student attitudes toward the learning situation and toward themselves as learners changed in a curvilinear fashion. (Several graphs are included to illustrate the data.) (Author/RC)

**Teachers' Adaptation to Students: Implicit and Explicit Matching. Research and Development Memorandum No. 139.**

Stanford Univ., Calif. Stanford Center for Research and Development in Teaching.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date Nov 75

Contract—NE-C-00-3-0061

Note—50p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Adjustment (to Environment), \*Student Behavior, \*Student Teacher Relationship, \*Teacher Behavior, Teacher Influence, Teacher Response, \*Teaching Styles

This paper examines the process by which teachers adapt their teaching behavior to their students, including (1) how adaptation is manifested spontaneously through implicit matching of students and teaching styles, (2) how implicit matching can be analyzed, (3) how

models for matching teachers' approaches to different students can be described, and (4) how the models can be incorporated into daily teaching behavior. It summarizes work done to date on the effects of "student pull" (i.e., student influence on teacher behavior) and on the means of training teachers both to be sensitive to the differences among students and to use information about those differences as the basis for modulating their behavior. The process of matching is analyzed in a six-step sequence using a Behavior-Person-Environment system. Examples of implicit matching are given, and one model for explicitly matching teaching behavior to students' conceptual levels is described. It is stated that the long-term aim of applying explicit matching ideas is to facilitate teachers' implicit matching in their spontaneous adaptation to the needs of their students. (Author)

The Special Education Early Childhood Program of The George Washington University is a one year, full time, noncategorical, 36-hour masters program. The program strives to synthesize multidisciplinary theory and integrate this knowledge into conceptual patterns that guide educators. It seeks to tie theory to practice in the service of the handicapped child. A field based training program has been designed and consists of a primary staff of five who guide the students through this learning experience. Fifty percent of instructional time is spent in the field. Clinical professors accompany students into the classroom of two demonstration centers. One center serves severely and multiply handicapped children ages zero to three; the other serves minimally handicapped children ages three to eight. Students spend seven weeks at each site designing and implementing appropriate learning instructional strategies under professorial guidance. The final internship experience sees students practicing in a range of special education sites from infant stimulation to teacher training. The broad based generic nature of the program offers students a springboard to a variety of teaching and leadership roles. Course work is designed to build insights and clinical proficiency in the following areas: (1) multidisciplinary theory, (2) child development, (3) handicapping conditions, (4) identification assessment, (5) clinical teaching, (6) counseling techniques, and (7) alternative models of service. **Identifiers—**\*Distinguished Achievement Awards Entry

Preparation, Orientation, and Induction of New Teachers (POINT) is a program of elementary teacher education at San Diego State University. It was planned cooperatively by 55 educators who concluded that a quality teacher education program should be built around significant teaching skills, rather than around mere completion of courses. Project POINT is field based: education courses are taught in public schools and are directly related to student teaching. Administrators and teachers work closely with university professors to coordinate objectives and experiences. Candidates engage in four semesters of intensive field experience and student teaching, with participation in three different

schools, at three different grade levels, and in three different programs. Five university professors work as a team to teach the education classes and supervise the participants in student teaching. Instructional skills are taught in such areas as assessment and diagnosis, planning, physical and psychological learning environments, communication and interaction, management, facilitation, and teaching strategies for various topics and classroom plans. Graduates' success rate in obtaining teaching positions has been almost double the success rate for other elementary education graduates at San Diego State University. (Information concerning program objectives, personnel, budget, contributions to teacher education, evaluation methods, and results is included in this report.) (Author/RC)

Identifiers—\*Distinguished Achievement Awards Entry

Teaching as a Performing Art is a teacher education program developed for the College of Education at the University of South Carolina. It is a methodology designed to elicit better teacher performance in order to produce more effective student performance. Designed for closed-circuit television or resource center access, the course consists of 52 half-hours of videotape, 26 half-hours of audio tapes, a student guidebook, and a textbook. The videotapes are divided equally into (1) theory and performance demonstration units, and (2) interviews and discussions with guest faculty from the arts and education. The theory-demonstration sessions consist of the principle philosophies and concepts with 80 performance illustrations. Performance demonstrations were created in ecology, language arts, geometry, history, chemistry, math, biology, media arts, music, and art to further illustrate modes and styles of performance, adaptivity, ensemble techniques, theatrical skills, the pedagogy of the arts, nonverbal communication, and the training-educative-and-celebrative teaching experience. The entire series was written and produced by students and staff at the University of South Carolina. (RC)

Wehrer, Robert A.  
A Systematized Field Experience Program: Preservice in Secondary Education.  
Gannon Coll., Erie, Pa.  
Pub Date 15 Dec 75

Note—7p.  
EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Field Experience Programs, Higher Education, \*Performance Based Teacher Education, Preservice Education, Secondary School Teachers, \*Student Teaching, Teacher Education, Teaching Skills

Identifiers—\*Distinguished Achievement Awards Entry

This program prepares secondary level teachers by providing a systematized program of field experiences which serves the purpose of both screening and of sensitizing students to the realities of a career in secondary education. Students in this program are required to test their interest in teaching by working with secondary students in local schools and other community agencies before beginning their student teaching. This program requires that each student preparing for a career in secondary education demonstrate a minimum level of competency by actually working outside the college in community learning sites. Working with teenagers at these sites enables the student to indicate that he/she has not only the ability to get along with teenagers, but also the capacity to adapt subject matter to the particular level of the learner. The systematized program allows students to follow several paths through several kinds of experiences. At each step, the student is encouraged either to go on to the next phase, to repeat the current field experience, or to consider another career. At no point is he/she locked into a career in education. (Author/BD)

Identifiers—\*Distinguished Achievement Awards Entry

The Early Bird Internship Program in Teacher Education at Union University was developed to give the sophomore student a general field orientation to the whole school program prior to the senior student teaching program. In partial fulfillment of the requirements for a beginning course for all prospective teachers taken near the end of the sophomore year, the student spends a 20-hour internship in a local elementary or secondary school. During the internship, the student becomes exposed to a broad range of experiences which acquaint him/her with the many complex operations of elementary and secondary schools. The student works in the principal's and counselor's offices, assists the classroom teachers with their tasks, works with student government and parent-teacher groups, and becomes involved in other school activities. During the internship, the student keeps an hourly log on all his/her activities and experiences. At the end of the 20-hour period, the principal of the school to which the student is assigned and the Union University instructor make a joint evaluation of the student's internship and his log. (Information concerning program objectives, personnel, budget, contribution to teacher education, and evaluation methods and results is included in this report.) (Author/CR)

The West Dallas Teacher Education Program.  
North Texas State Univ., Denton.  
Pub Date Nov 75

Note—9p.  
EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Field Experience Programs, Higher Education, Inner City, Performance Based Teacher Education, \*Preservice Education, \*Student Teaching, \*Urban Education

Identifiers—\*Distinguished Achievement Awards Entry

The West Dallas Teacher Education Program is a competency-based program to better prepare teachers for service in inner-city schools. The program utilizes a field-based, professional semester format to directly relate didactic instruction and clinical practice. The project is staffed by three North Texas State University faculty members. Approximately 40 teacher education candidates volunteer each semester for this alternative to the traditional teacher preparation program. The project is housed in three secondary schools in Dallas' inner city. During the first eight weeks of the semester, participant students teach half a day and attend instructional seminars at the headquarters school the other half a day. The final eight weeks of the semester are spent entirely in student teaching, thus giving these preservice teachers 50 percent more student teaching than received by their counterparts in the traditional program on campus. University professors are on site throughout the semester to provide structure to the clinical experiences. (Author/BD)

Project ESCAPE is sponsored by the Vigo County School Corporation of Terre Haute, Indiana, with the cooperation of Indiana State University. The unique characteristic of this project is that it is a competency-based teacher education program that has been created, tested, and implemented by practicing professional teachers. It is based on the assumption that if professional teachers assume some responsibility for the formal preparation of members of their profession, their own teaching skills will improve. Consequently, the target groups for the project include both preservice teacher candidates and inservice teachers. Fifty competency-based learning modules were written by teachers from the public/private elementary and secondary schools of Vigo County. These were then tested and placed in a tailor-made "resource center," a portable laboratory which contains (1) all the necessary references for the student to satisfactorily complete the modules; and (2) items such as color audiovisual tapes, audio tapes, and other general references. These resource centers are placed in all the schools of the county and in several locations at the university. Most of the modules are field-oriented and are designed to be completed in the public/private school classroom of the county. Practicum and prepracticum teacher education candidates from Indiana State University were placed with the participating teachers for a significant portion of their professional education course sequence. Identifiers—\*Distinguished Achievement Awards Entry, New York (Buffalo)

The Office of Teacher Education at the State University of New York at Buffalo and the Buffalo Public Schools have cooperatively developed the City Teaching Center, a preservice teacher education program which integrates theoretical learnings with field-based experiences in urban settings. Personnel of the center include both university staff (two directors and three graduate assistants) and public school staff (building administrators and cooperating teachers). Students accepted into the City Teaching Center observe and participate in classrooms in each cooperating middle and high school. In addition to the five designated center schools, students observe in many schools in various geographic and sociological settings to provide examples of contrasting philosophies of education and approaches to learning. A three component program has evolved composed of carefully designed offerings. In the first component, students examine sociological bases of education, observe teachers in various educational settings, and acquire ethnographic skills. Students in the second component of the center program obtain a macroview of teaching through involvement in a course which provides methods and techniques of teaching and requires extensive classroom participation in an urban setting. Through the use of the technique of microteaching during the final component of the center program, each student determines his/her own strengths and weaknesses and establishes both long and short range goals for individual professional development. This program, leading to specialization in reading on the undergraduate level, has been developed by the Division of Reading in the Department of Curriculum and Instruction at the University of Northern Iowa. The B.A. program in Elementary Education: Remedial Reading is characterized by early and continuous involvement with children in classrooms and clinical settings, an emphasis on the development of total language competency in the child, close supervision of students' work with children, and attention to the progress of individual students in relation to program objectives. The course work in this program is planned so that the student moves from a knowledge of the reading process and school reading programs to management and decision-making skills, first on a one-to-one basis, then in a small group, and finally in the classroom setting. The Reading Division includes five full-time faculty members representing expertise, publication, and service in the field of reading. In addition, two professional reading clinicians and graduate assistants serve in the Reading Center. (Author/BD)

The University Associated Facilities (UAF) Program of South Carolina is comprised of 24 colleges and universities under a grant awarded to Winthrop College and the University of South Carolina. Objectives of the program are to (1) provide interdisciplinary training to students from a broad range of disciplines in the evaluation and management of developmentally handicapped individuals, (2) provide inservice training to personnel in specialized and generic programs supporting normalization and mainstreaming efforts, (3) demonstrate exemplary service models, (4) foster research and evaluation, and (5) provide technical assistance. The participating institutions cooperate to share faculty, resources, and workshops. They provide direct services to parents and schools and help plan South Carolina's program for the developmentally disabled. Services are provided to the handicapped as a vehicle for training and include diagnosis, evaluation, recommendations, counseling, speech therapy, recreation, and advocacy. (CD)

**Identifiers**—\*Distinguished Achievement Awards Entry

Brigham Young University is engaged in a program to recruit and train teachers to function successfully in rural school settings. An education consortium composed of educators representative of county school districts, the university, the regional service center, and the Utah State Educational Agency was formed to initiate and operate a teacher training program for rural schools. A field based competencies centered approach to training was adopted with training manuals developed to aid the trainees participating in the program. Two rural training centers are in operation. Student teachers may complete the majority

of their professional coursework on-site as they spend 8-16 weeks in the selected rural area. Each training location has a program center where trainees may achieve rural performance based objectives, attend seminars, and gather for social occasions. Cooperating teachers are trained by the university. A center director is responsible for housing trainees, scheduling of seminars, and supervision and evaluation of training objectives completed by students. University supervisors visit trainees on a scheduled basis. The majority of students who have completed the program are now teaching in rural settings. (Information concerning program objectives, personnel, budget, contribution to teacher education, and evaluation methods and results is included.) (Author/RC)

The Interdisciplinary Teacher Education (ITE) Program at Wayne State University prepares teachers for initial certification in elementary and secondary education. It also provides the initial professional training for students in special education, physical education, music, and foreign language education. This program along with art education and vocational and applied arts education comprises the preservice component of the Division of Teacher Education of the College of Education. The operational philosophy underlying the ITE program is predicated on the following four domains: (1) philosophy of education, (2) facilitation of instruction, (3) improvement of instructional climate, and (4) fostering humane-ness. The ITE structure consists of three interdisciplinary teams. Each team develops and supervises programs involving schools in at least one of the regions of the Detroit Public Schools and in at least one suburb. The program is field-based and student assessment is based on publicly stated competency criteria. Instructors in each discipline articulate appropriate knowledge with the practicum experiences in an early and continuous contact between public schools, college undergraduate teacher trainees, and college instructors. (Information concerning program objectives, personnel, budget, contributions to teacher education, and evaluation methods and results is included.) (Author/RC)

**Identifiers**—\*Distinguished Achievement Awards Entry, SODIA

The Utah State University Elementary Teacher Education Program, SODIA, is multicultural, performance-based, field-centered, and utilizes portal schools as partners in the teacher education program. It is an interdisciplinary and interdepartmental program utilizing staff from the Departments of Psychology, Special Education, and Family and Child Development, who work in conjunction with the Department of Elementary Education. These university faculty members work in an integrated program with teachers and principals of 12 portal schools and the Utah State University Edith Bowen Elementary Teacher Education Laboratory School. The acronym SODIA represents the first letter of each of the key words, "self," "others," "disciplines," "implementation," and "associate," which describe the major focus of each of the five levels of the program. Each level involves experiences on-site in the public schools. The following three major dimensions of competencies have been identified for professional teachers: (1) personal relations, (2) teaching skills, and (3) subject knowledge.

These dimensions form the base for instruction at each level, and evaluation of SODIA is based on each student's performance toward reaching a level of competence in these dimensions. The portfolio method is used in which the student assumes primary responsibility for presenting evidence of his/her competency. (Author/BD)

**Identifiers**—\*Distinguished Achievement Awards Entry

The Lubbock Esthetic Education Program (LEEP) is being offered as a field-based experience which combines theory and practice. As an interdisciplinary arts-education program conducted by teams composed of arts and education faculty and graduate and undergraduate students of Texas Tech University, LEEP is concerned with developing esthetic awareness and knowledge of how the arts are interrelated, while dealing with the improvement of teacher effectiveness. Through interdisciplinary activities, LEEP involves public school children from Lubbock's tri-ethnic community, undergraduate and graduate students, university faculty, and public school personnel in a working and learning situation which focuses on the education of feelings. LEEP is one of the public programs offered by the museum of Texas Tech University. Future teachers are involved in learning how to use the museum as a teaching and learning resource while the museum is able to enlarge its scope as an interface between the community and the university. Museum Science graduate students participate as team members and aid in relating aspects of the museum to the esthetic experience. Undergraduate students are provided with pre-student teaching involvement with children of cultural and/or ethnic backgrounds different from their own. The focus of all activities is on providing children with opportunities to gain confidence in their creative abilities, to gain improved self-concepts, and to open new avenues of cultural and esthetic awareness. The College of Education at Texas Woman's University developed an undergraduate teacher preparation program with a specialization in reading for both elementary and secondary education majors. Graduate programs leading to both master's and doctor's degrees in reading are also available. A reading laboratory has been designed to accommodate training activities. The facilities include two teaching classrooms equipped with television recording and playback equipment available for teaching demonstrations with students and for micro- and peer teaching activities, a seminar room, 10 clinical diagnostic-teaching rooms, a secondary reading laboratory, a specialized-reception area, and storage facilities. Students are enrolled in either the elementary reading program, the middle or junior high school reading program, or the high school reading program. The students take courses and participate in extensive clinical experiences in reading. (Information concerning program objectives, personnel, budget, contribution to teacher education, evaluation, and course listings are included.) (RC)

**Identifiers**—\*Distinguished Achievement Awards Entry

Concordia Teachers College recognizes the need for creating a humane and developmental environment for student living. In an attempt to achieve this objective, a student paraprofessional housing program has been designed and implemented. Initially, this involved the removal of all professionally trained personnel in the student living units. Secondly, a sophisticated selection and training model was developed and designed to utilize students to replace the professional personnel in the student living units. As a result of this program, 45 to 50 students are trained each year in the skills of interpersonal communication, problem solving, goal development, and people management. While the paraprofessional utilizes these skills in the student living units, all students have an opportunity to observe the applicability of these skills in people-to-people types of environments. The evaluation process has indicated a strong degree of success with almost all students viewing the trained paraprofessional as a highly skilled person. In addition, graduate study surveys indicate that the paraprofessional program has added a valuable dimension to the overall teacher education program. (Author)

Note—20p.; Paper presented at the Annual Meeting of the Association of Teacher Educators (St. Louis, Missouri, February 1976)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—\*Educational Legislation, Educational Needs, \*Inservice Programs, \*Inservice Teacher Education, Merit Pay, \*State Legislation, \*Teacher Workshops  
**Identifiers**—\*Louisiana

In August 1975, the Louisiana legislature passed a bill, Act 812, which required each school board "to provide for and conduct an annual two day in-service teacher educational program for teachers during the minimum session of attendance required. . . ." The two day in-service activity was to be conducted within the required 180 days of attendance. Each school board was required to meet guidelines developed by the State Department of Education and to check the attendance of teachers. Each teacher who attended the activity for the required two days

received a merit raise of \$500.00. The action resulted in the use of (1) consultants, (2) State Department of Education personnel, and (3) higher education personnel by public schools. The guidelines developed by the State Department of Education for the planning and conduct of the in-service programs stressed assessment. Assessment instruments were utilized three-fold in compliance with Act 812. (Appended are the text of Act 812, guidelines for the implementation of House Bill No. 1100, needs assessment for parish in-service programs, assessment for the Desoto Parish in-service program, and the schedule for the Desoto Parish in-service program.) **Re-Education in Human Communications: The Laboratory Method of Learning in Groups.**  
 Indiana State Univ., Terre Haute. Curriculum Research and Development Center.  
 Pub Date Jan 76

Note—66p.  
**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
**Descriptors**—\*Group Dynamics, Higher Education, Interaction Process Analysis, \*Learning Laboratories, \*Project Training Methods, Self Directed Groups, Sensitivity Training, Teacher Education, T Groups, \*Training Laboratories  
**Identifiers**—\*National Training Laboratory

This booklet describes the learning experiences that take place in and as a result of a learning laboratory. Part one presents a brief history of the group dynamics movement, focusing especially upon the history of the National Training Laboratory of the National Education Association. Some significant characteristics of laboratory learning are presented, along with important ground rules of training group activity. Also, a brief review of some relevant learning theories is included. Part two describes the group dynamics laboratory at Indiana State University, its background and development, the staff, the students, and the training sessions. Part three is a report of the findings of a 1973 follow-up study of former laboratory participants that was designed to ascertain if the stated purposes of the course were being accomplished and whether the learning designs had any lasting effects. Finally, the present state of the laboratory approach to learning is summarized in part four. A bibliography is also included. (Author/RC)

**The Nature of and Alternatives for Teacher Competency Statements and Implications for Assessment Techniques.**

Michigan State Dept. of Education, Lansing. Teacher Preparation and Professional Development Services.  
 Pub Date Sep 75

Note—51p.  
**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
**Descriptors**—Educational Accountability, \*Evaluation Criteria, \*Evaluation Methods, Performance, \*Performance Based Teacher Education, \*Performance Criteria, \*Teacher Education, Teacher Evaluation

Competency based teacher education has been defined in various ways, but there is general agreement on at least two basic elements. The first essential characteristic is the specification of teacher competencies which form the basis of the entire program. The second is the design of assessment techniques directly related to the specific competencies. Competencies have been written in a variety of ways and have been related to various domains or competency areas. In each of the competency domains the form of the competency must be examined to determine appropriate assessment techniques. There are a number of assessment factors which need to be considered in the evaluation of competencies. The nature of the standards, or criterion selection, is essential. Other concerns are comprehensiveness and fidelity of the assessment system, validity and reliability of data, and general utility of the process. Assessment of knowledge competencies can be accomplished through paper and pencil testing. Assessment of teaching behaviors or performances, however, requires observation of the individual demonstrating the skill. This may be accomplished by rating scales or structured observation systems. Utilizing sampling and student achievement have also been used,

although it has been concluded that student learning measures cannot be fairly used to evaluate individual teachers at present. (An extensive list of references is included.) (RC)

**The Experience of Knowledge. Essays on American Education.**

Pub Date 75  
 Note—222p.  
 Available from—Waldorf Press, Adelphi University, Garden City, New York (No price quoted)

**Document Not Available from EDRS**  
**Descriptors**—\*Alternative Schools, \*Educational Theories, Human Dignity, \*Humanism, Humanistic Education, Individual Power, \*Philosophy, Progressive Education, \*Scientific Attitudes, Self Esteem, State Schools, Thought Processes  
**Identifiers**—\*United States

Part one of this book of essays concerns the need to bring thinking to life and the need for a spiritual concept of man. It argues that both traditional and progressive educators fail children in by not giving them a full sense of their humanity. It denies a conception of the universe divorced from idealism and founded only in scientific inquiry. Part two describes the teaching methods at the Waldorf School in Garden City, New York. Part three treats problems of special interest to parents and citizens. "Authority, Discipline, and Freedom" attempts to clarify the way in which full-fledged freedom emerges for the maturing human being from his/her childish imitation of example, and his/her youthful trust in an obedience to authority. "Genius as the Goal of Education" shows that every child is close to genius, and that the primary goal of education should be to preserve and further enlist this genius. "The Next Step" addresses itself to the idea of cultural pluralism in a political democracy, its thesis being that if Western civilization is to begin resolving rather than compounding its difficulties, the present state school systems must make way for arrangements that will give much more freedom and responsibility to individual schools, providing parents at the same time with a correspondingly greater freedom of choice among schools. The epilogue considers the implications of the foregoing arguments for America's leadership among nations. (Author/CD)

**Identifiers**—\*Professionalism

This book is designed to aid the professional educator in developing a high degree of analytical competence in order to grasp the special relationships linking educational theory to practice. The first section of this book contains eight articles that present an overall view of philosophy and education. The subsequent three sections deal more with those specific areas which are of interest to the educator concerned with finding solutions to today's pressing educational problems. In the second section are eight articles that deal specifically with science and education. It begins with Dewey's views on a science of education and then presents other aspects dealing with science and education. The third section focuses on liberal arts and education. It contains seven articles, most of which deal with higher education, though secondary education and American culture are also discussed. The fourth section contains eight articles concerning professionalism and education. Some of the topics discussed are teaching, public education, sex education, "new" history and social studies, and evaluation of instruction. (RC)

Document Not Available from EDRS

Descriptors—Adult Education, Alternative Schools, Continuous Learning, \*Educational Alternatives, Educational Finance, Educational Legislation, \*Governance, \*Political Issues, \*School Role, Teacher Influence, Teacher Participation

This book is a collection of articles loosely arranged under the topics of alternatives to schools, educational governance and politics, and other issues in education. The introduction states that the collection is intended to inspire thinking about non-school settings in which teachers can be employed and people can pursue continuing education, and to make a case for studying political issues such as school finance, court decisions, and other issues in which teachers have the chance to involve themselves. Examples of articles include (1) critique of the concept that everyone should go to college right after high school; (2) varieties of teacher training programs at the University of Massachusetts; (3) the uses of home study courses; (4) efficient ways of educating health care workers; (5) an article by James Coleman emphasizing that much of the socialization of young adults occurs outside of schools, and therefore schools must not be the sole institutions for transmitting skills; (6) an article on decentralization of school administration and community control; (7) an article on the financing of schools, taxation, and equal protection for disadvantaged children; (8) the issue of an adequate education as a constitutional right; (9) the legal imperative to provide education for handicapped children; (10) experiences of women teachers; (11) an article by Ivan Illich on why the concept of equal opportunity through schooling is unworkable in Latin America; and (12) a critique of Jensen's linking of race and IQ. Moral Development and Behavior: Theory, Research, and Social Issues.

Pub Date 76

Note—430p.

Available from—Holt, Rinehart and Winston,  
New York, New York (No price quoted)

Document Not Available from EDRS

Descriptors—Behavioral Sciences, Developmental Psychology, Ethics, \*Justice, Moral Issues, \*Moral Values, Personality Studies, \*Philosophy, \*Psychological Studies, Sanctions, Self Control, \*Socialization, Social Problems, Social Psychology, Social Reinforcement, Violence

This book contains selections from psychologists, social scientists, and educators on the origins and nature of moral reasoning and behavior. Part one is an introduction and is intended to help the reader organize the wealth of theory and research in the field around eight basic questions confronting a science of morality. Part two sets forth eight distinctively different theoretical views of how moral development occurs. Part three deals with research and critically examines findings in selected areas of moral functioning, pinpoints methodological problems, and suggests new methods for the study of morality. Part four looks at the moral dimensions of important social issues and attempts to derive intervention strategies from the accumulated theory and research about moral behavior. (Author/PB)

Identifiers—\*Distinguished Achievement Awards Entry

Attempting to develop an instructional program for preservice teacher trainees emphasizing students, learning, and performance skills, Prairie

View A & M University established an inter-agency task force representing the School of Education, local school districts, and the Texas Education Agency. Based on the findings and suggestions of the task force, the Experimental Education Program was designed and developed by the School of Education for prototype testing with 20 preservice interns during the academic years of 1974-75 and 1975-76. The program is an inter-agency cooperative model stressing field-based instructional programs designed by clinical professors and utilized by preservice teacher trainees as they serve internships in local schools. The programs, based on competency attainment in accordance with performance criteria, have had a significant impact on the teacher education program at Prairie View A & M University. (Included in this report is information on program objectives, personnel, budgeting, contributions to teacher education, and program evaluation.) (Author/RC)

Identifiers—\*Distinguished Achievement Awards Entry

The University of Wisconsin-La Crosse Computer Center's LACE Project is designed to familiarize teachers and students with the use of computers. The project offers a wide range of instructional computing services through timesharing computer terminals located across the state of Wisconsin. The success of the program is measured in part by its growth from 10 terminals in 1972 to 47 today. Users enjoy all the benefits of the central site computer at their terminal, including the ability to write their own programs or to use prewritten programs in nearly every subject area. The university's secondary education department has been instrumental in insuring the success of the programs and thus improving the quality of teacher education. The department has taught experienced and prospective teachers the effective use of computers in the classroom. Some of this has been done by specially designed courses, and, in addition, a notable effort has been made to expose all education students to the computer's potential in methods classes. As a result of these efforts, the LACE Project has been productive in improving the quality of teacher education at the university, as well as the quality of instruction in Wisconsin schools. Establishing Passing Scores for Professional Licensing Examinations.

Pub Date [Jul 74]

Note—6p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Certification, \*Cutting Scores, Occupational Tests, \*Predictive Validity, Professional Education, Scoring Formulas, \*State Licensing Boards, \*Test Validity  
Identifiers—Criterion Related Validity

Until data is obtained concerning the regression of job-performance on test-performance, the setting of passing scores on professional licensing and certification examinations will contain some degree of arbitrariness. Data from performance domains suggests that some tests have differential validity and an adverse impact on minority groups, disproportionately excluding them from professional practice on the absence of any data indicating criterion related validity of the licensing examinations. The measurement of content validity for these examinations demonstrates wide differences among professions and across states within the same professions. Some typical

methods for setting passing scores are shown. The author introduces his own methodology for establishing passing scores and outlines its mechanics. Some of the unresolved questions of the method are discussed briefly. (SE)

Descriptors—\*Analysis of Covariance, \*Analysis of Variance, Data Analysis, \*Educational Research, \*Hypothesis Testing, \*Mathematical Applications, Mathematical Models, Matrices, \*Statistical Analysis

Identifiers—\*Multivariate General Linear Hypothesis

The multivariate general linear hypothesis (MGLH) has received relatively little utilization in educational research and evaluation. This is surprising in view of the fact that recent publications have made the MGLH tractable by practitioners. This paper seeks to stimulate interest in the MGLH by reviewing recent applications, emphasizing the advantages of the MGLH as a general data analytic tool, and making suggestions for conducting research within an MGLH framework. Identifiers—Coleman Report, Equality of Educational Opportunity Survey, \*Simultaneous Equations Model

The basic objective of this research program was to develop and to test an accountability model of the educational process. In cooperation with the Pittsburgh School District, a major effort was devoted toward the development of a data base, the construction of appropriate models and the conduct of analyses of the data. Some analysis was accomplished and one paper, "Operational Accountability" (ED 076 666) was written based on these preliminary results. It was decided to use data from the Equality of Educational Opportunity Survey (the Coleman Report) so that models might be developed and tested while developing local sources of data. Three papers have been written based upon the Coleman data: "A Simultaneous Equations Model of the Educational Process" (TM 004 650), "Education from an Anthropological Perspective: An Empirical Investigation of Structural Differences among Blacks and Whites" (TM 004 651), and "A Simultaneous Equations Model of the Education Process: The Coleman Data Revisited with an Emphasis upon Achievement" (ED 097 404). All of these papers share a common basic idea. The educational process has several outputs which include achievement, efficacy, motivation, and expectations. The notion is that all these must be considered endogenous variables so that the educational process can only be modeled through the methodology of simultaneous equations. (RC)

Identifiers—Coleman Report, Equality of Educational Opportunity Survey, \*Simultaneous Equations Model

This paper develops and estimates a model of the educational process. Most researchers have relied on a single equation, educational production function, which is an unrealistic formulation. A pupil's achievement, motivation, expectations, self-concept, and his perceived parents' and teachers' expectations are determined jointly, not independently. For this reason, this research models the educational process by a set of simultaneous equations. Utilizing a sample of over 16,000 twelfth grade pupils from the Equality of Educational Opportunity Survey combined with information on their teachers and principals, two stage least squares are used to estimate the parameters of a linear model. The sign and significance of the regression coefficients provide important guidelines for the manipulation of policy variables such as the teacher-pupil ratio, school facilities, and racial composition. Identifiers—Coleman Report, Equality of Educational Opportunity Survey, \*Simultaneous Equations Model, Structural Differences

This paper introduces anthropologists to simultaneous equation models and to a powerful technique for estimating such models. Characteristically a simultaneous equations model consists of more than one equation and allows for interaction and joint determinancies between some of the variables. Basically these models apply to situations in which one variable depends on another variable, which, in turn, depends on the first variable. These formulations model feedbacks. Section II of this report concerns the methodology and results of the Equality of Educational Opportunity Report (EEOR), which is used to demonstrate the use of simultaneous equations models in the social sciences. Section III argues that the single equation models are inappropriate formulations of the educational process. It is argued that simultaneous equations should model the process. If the construction and estimation of a simultaneous equations model succeeds, then the results of estimating the model by a single equation may be biased and inconsistent. Consistency is an important property of an estimator. It means that as the sample size increases, the coefficient estimates tend to be the true parameter values. Using EEOR data, the estimates for the simultaneous equations model for blacks and whites are presented in Section IV. Finally, it is shown that these results differ from those obtained previously. Identifiers—Instructional Assessment System, \*Student Evaluation of Teacher Performance, University of Washington

A new system for assessing student ratings of instruction has been implemented at the University of Washington. Two major changes are in evidence. First, there is an explicit recognition that student ratings can and do serve multiple functions, and the same evaluative questions are not necessarily appropriate for each. Secondly, there is an explicit recognition that adequate diagnostic information cannot be efficiently provided instructors with use of a common set of evaluative questions for all classes. Student Rating Forms A through E are appended. (Author/BJG)

Validation of a Drug-Abuse Scale and Comparisons of Knowledge and Attitudes about Drug Abuse among College Students.

Pub Date Apr 75

Note—27p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—College Students, Comparative Analysis, \*Drug Abuse, Higher Education, Item Analysis, \*Knowledge Level, \*Multiple Choice Tests, \*Rating Scales, \*Student Attitudes, Test Construction, Test Validity

Identifiers—\*Drug Abuse Scales

Multiple-choice items were used to measure knowledge of drug abuse among four distinct groups of college students in the Los Angeles area. No difference in knowledge was found about five aspects of drug abuse measured by subscales of the instrument. These findings suggest that knowledge about drugs is remarkably uniform, although the students tested came from areas that, according to most authorities, could have been expected to have highly discrepant amounts and types of drug use. Forty Likert-scale items were used to measure attitudes toward certain aspects of drug abuse among the same four groups of college students. The data suggest that students tend toward the conservative side in their attitudes toward a drug addict and the way the addict should be handled by society; the students are however, not willing completely to deprive an addict of his personal rights and not have a voice in the way he should be treated. The Drug-Abuse Scales are appended. (Author/BJG)

A Basic Test Theory Generalizable to Tailored Testing. Technical Report No. 1.

University of Southern California, Los Angeles. Dept. of Psychology.

Spons Agency—Office of Naval Research, Washington, D.C. Personnel and Training Research Programs Office.

Report No—TR-1

Pub Date 22 Oct 75

Note—50p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Computer Oriented Programs, \*Individual Differences, Item Analysis, \*Item Sampling, Matrices, Response Style (Tests), \*Testing, \*Test Reliability

Identifiers—Ordering Theory, \*Tailored Testing, Test Theory

Measures of consistency and completeness of order relations derived from test-type data are proposed. The measures are generalized to apply to incomplete data such as tailored testing. The measures are based on consideration of the items-plus-persons by items-plus-persons matrix as an adjacency matrix in which a 1 means that the row element dominated the column element regardless of whether it is item or person which dominates. From this the number of item-item and person-person dominance relations can be derived. Indices of consistency are developed which compare the number of dominance relations in a matrix to the number that would occur

if it were perfectly consistent and to the number in a random matrix. The indices of consistency are shown to relate to test variance, the Kuder-Richardson formulas, and Loevinger's homogeneity indices. Indices of completeness are also proposed. (Author)

Identifiers—International Evaluation Educational Achievement

This is one of nine volumes describing the results of extensive research carried out by the International Association for the Evaluation of Educational Achievement (IEA) over a seven-year period. The overall aim of this extensive empirical study is to relate student competence to instructional, economic, and social factors which account for differences between students, schools, and national systems of education. In this volume, the rationale behind the model used in the analysis of data collected in the IEA Six Subject Survey is provided. A model of causation is advanced to relate the various input measures to achievement in the six subject areas of Science, Reading Comprehension, Literature, English and French as Foreign Languages and Civic Education. The compounding of variables and their organization into blocks are discussed. The order in which these blocks are introduced to the analysis reflects the belief that earlier events in the life of the individual student have influenced later events in the student's life and schooling. Details of the sampling techniques used in the survey as well as the limits of confidence which can be placed on the statistics are described. The development of the attitudinal scales used is outlined in an Appendix. (Author/BJG)

Descriptors—\*Crime, Data Analysis, Data Collection, \*Evaluation Criteria, \*Evaluation Needs, Law Enforcement, Models, Program Design, Program Development, Program Effectiveness, \*Program Evaluation, \*Program Planning

The pamphlet describes an evaluation model for crime reduction projects developed by National Institute of Law Enforcement and Criminal Justice sponsored research. It is meant to assist justice agency and project managers in determining completeness of evaluation planning by providing a framework against which to measure their evaluation components. While the model and review criteria presented were developed within the context of the Legal Enforcement Assistance Administration's (LEAA's) High Impact Anti-Crime Program, they were based upon an awareness of the difficulties involved in evaluating social programs generally and may be applicable to evaluation efforts outside of the

criminal justice sector. The paper is divided into four sections. The first (introductory) section describes current preoccupations with evaluation. The second section provides the reader with an understanding of the special context within which the model and criteria were developed via a brief discussion of the Impact Program's evaluation effort. The third section presents the evaluation planning model along with a discussion of key steps in the evaluation planning process. The fourth section elaborates general guidelines regarding the use and applicability of the model and review criteria, and develops a set of questions which need to be addressed during the review of a project-level evaluation plan or component. Prekindergarten Head Start Year End Report 1974-1975.

Philadelphia School District, Pa. Office of Research and Evaluation.

Report No.—R-7600

Pub Date Jul 75

Note—140p.

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Child Development, \*Child Development Centers, Classroom Design, Classroom Observation Techniques, Community Involvement, \*Disadvantaged Youth, Early Childhood Education, Educational Objectives, Inservice Teacher Education, \*Instructional Programs, Models, Open Education, Parent Participation, Parochial Schools, Preschool Children, \*Preschool Education, Program Development, \*Program Evaluation, Public Schools, Student Evaluation

Identifiers—Denver Developmental Screening Test, Pennsylvania (Philadelphia), \*Philadelphia Prekindergarten Head Start Program, Project Head Start

The Philadelphia Prekindergarten Head Start Program is a child development program for three- and four-year old children from low-income families funded through the Philadelphia Anti-Poverty Action Commission. The approach stresses an interacting and multidisciplinary attempt to improve the child's physical and emotional health, his family relationships, and his abilities to function better as a person. The program has been designed to implement five different early childhood education models: Behavioral Analysis, Bank Street, Montessori, Responsive Learning, and Curriculum for Social and Emotional Development. Programming according to model specifications remained the theoretical basis for daily operation. Research and evaluation activities during 1974-75 have centered around the program's goals for children. They have included classroom observations, the development of forms to assess the extent of model implementation, summarizing and analyzing the results of the Denver Developmental Screening Test, and the inclusion of the children in the Early Childhood Longitudinal File. There was found to be a wide range of practices in terms (1) extent of model implementation, (2) classroom differences within a model, (3) grouping practices, (4) frequency of parent volunteers, and (5) provisioning. Observation data yielding the above information are summarized according to model and across the total program. (RC)

Descriptors—Ability Identification, \*Achievement Tests, Aptitude Tests, \*Predictive Ability (Testing), \*Predictive Validity, \*Scholarships, Standardized Tests, Student Evaluation, \*Test Validity

Identifiers—Australia, \*Commonwealth Secondary Scholarship Examination

Of all the areas related to the validity of the Commonwealth Secondary Scholarship Examination (CSSE) tests, that of predictive validity

seems to have been studied most intensively. Since the inception of the CSSE scholarship scheme, a series of studies which have either examined the predictive validity of certain aspects of the scholarships, or which have borne directly on that topic, have been reported. Investigations have been carried out on the predictive validity of the awards, of the CSSE total score, and of the individual CSSE test papers. These studies will be reviewed in this report. This investigation will be concerned with the ability of the CSSE tests to predict performance on some measures not previously used, as well as performance on some of the previously used measures of academic aptitude or academic success. In the process, some of the earlier work will be replicated. In addition, consideration will be given to the incremental effectiveness of the CSSE tests, or the degree to which they can improve the prediction of performance provided by other measures. The investigation will then be extended into an examination of the characteristics of those students who perform well on the CSSE tests, but perform poorly on a subsequent occasion (in the matriculation examinations), and vice versa. Performance-Based Teacher Education: Results of a Recent Survey.

Spons Agency—American Association of Colleges for Teacher Education, Washington, D.C.; Educational Testing Service, Princeton, N.J.

Pub Date [73]

Note—47p.

Available from—Teacher Programs and Services, Educational Testing Service, Princeton, N.J. 08540 (\$1.50)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Data Analysis, Higher Education, \*Performance Based Teacher Education, \*Program Content, Questionnaires, \*School Surveys

The American Association of Colleges for Teacher Education (AACTE) has been very active in the performance-based movement. In the fall of 1972, the AACTE conducted a preliminary survey of 1,250 institutions asking which institutions were operating, investigating and/or planning PBTE programs. Of the 783 respondents (a 63 percent return), 131 (17 percent) said they were operating PBTE programs, 228 (29 percent) said they were not, and a large number, 424 (54 percent), said they were in some stage of investigation. The staff of Teacher Programs and Services at Educational Testing Service, in conjunction with the staff of AACTE drafted a questionnaire, aimed at examining as closely as possible the status of PBTE programs. The questionnaire was reviewed by leading educators in the movement and most suggestions were incorporated. The limitations of a paper and pencil survey are evident; the data provide a quantitative view and raise many more questions than can be answered here. If feasible, sample follow-up visits will be made in order to gain a more qualitative understanding of some of the programs. Nonetheless, the results of the survey provide the most recent and detailed information available on PBTE programs. (Author/DEP)

Descriptors—\*Computer Programs, \*Correlation, \*Sampling, Statistical Analysis

Identifiers—\*CORCOR

When a correlation is taken in a sample in which the range of the variables being correlated is limited, it is often desired to apply the correlation to groups with different ranges for the variables. In such situations, a correction for restriction of range (more precisely, restriction of standard deviation) may be necessary. Considered in this paper are four cases in which correction on the correlation coefficient is possible and a computer program to perform the correlations. The program, which includes an interactive correction algorithm for explicit restriction on both variables, is listed in the article. (Author)

Descriptors—Community Involvement, \*Curriculum Development, \*Curriculum Evaluation, Dental Evaluation, \*Dental Health, Elementary Secondary Education, Evaluation, Health Education, Humanistic Education, Inservice Teacher Education, Instructional Materials, Lesson Plans, Pilot Projects, \*Program Evaluation, Questionnaires, \*Training

Identifiers—\*Tattletooth

Tattletooth was designed to help alleviate the physical, psychological and social problems associated with dental disease by teaching proper dental hygiene techniques and by stressing the importance of good dental health to the social and psychological well-being of the whole person. The program provided for the entire community with the provision of supportive information packages specially prepared for specific community groups. Children received support in their efforts to form good dental habits from teachers, parents, dentists, and hygienists, and local suppliers of toothbrushes, dental floss, and disclosing wafers. In the pilot test, curriculum was designed by teams of teachers, dentists, curriculum designers, and evaluators. Four sets of 19 lessons each were prepared, covering grades K-2, 3-6, Jr. High School, and Sr. High School. These were pilot tested in 111 classrooms in Texas in the Spring of 1975, and this report covered the evaluation strategy, instruments, and results. This report concluded that the materials were quite successful, particularly in the early grades. It was found that the humanistic approach was generally well received and that the entire model for presenting this subject might be equally useful for many other courses. (Author/BJG)

Descriptors—\*Aptitude Tests, Cutting Scores, Job Analysis, Occupational Information, Occupational Tests, Paper (Material), \*Personnel Selection, \*Rating Scales, \*Semiskilled Occupations, Statistical Analysis, Supervisors, Task Performance, \*Test Construction, Test Validity

Identifiers—Utility Hands (Paper Goods)

Research resulting in the development of the Specific Aptitude Test Battery for use in selecting inexperienced or untrained individuals for training as Utility Hands (paper goods) was described. Aptitudes measured were form perception, clerical perception, and manual dexterity. Job analysis was performed by observation of the workers' performance on the job and in consultation with the workers' supervisors. A descriptive rating was used which consisted of seven items: (1) quantity of work, (2) quality of work, (3) accuracy of work, (4) job knowledge, (5) facility for work, (6) job versatility, and (7) all-around job ability. Statistical analysis of ratings were used to determine which aptitudes should be considered for inclusion in the battery. The objective was to develop a battery of 2, 3, or 4 aptitudes with cutting scores at five point intervals at the point where about the same percent will meet the cutting scores as the percent placed in the high criterion group and which will maximize the relationship between the battery and the criterion. Appended was a list of organizations cooperating in the study, a descriptive rating scale, and a description of job duties. (BJG)

Descriptors—\*Academic Achievement, Age, Citizenship, \*Comparative Analysis, Data Analysis, Data Collection, \*Educational Assessment, Elementary Secondary Education, Literature, Mathematics, Music, \*National Surveys, Reading, Sciences, \*Sex Differences, Sex Discrimination, Social Studies, Student Attitudes, Tables (Data), Writing

Identifiers—\*National Assessment of Educational Progress

Results of the National Assessment of Educational Progress are examined in the context of male and female differences. Considered are the first four years, beginning in 1969 and ending in 1973. Data were gathered in the learning areas of science, citizenship and writing the first year; reading and literature the second year; social studies and music the third year; mathematics and science, for the second time, the fourth year, or 1972-73. In other words, change data were first reported in science and appeared in print in March 1975. Focusing only on sex differences, the results throughout the four age levels present questions and cause speculation about the educative process, the methods, time allotment and emphasis. Some may conclude that learning opportunities are not equal for both boys and girls in the majority of schools. Some may conclude that interest is lower among boys than girls, or the reverse, in a particular learning area. The experience of the reader will facilitate in interpretation of the findings presented here. (Author/BJG)

Marco, Gary L.

Use of the Logistic Model as an Alternative to Linear Interpolation for Computing Percentile Ranks.

Educational Testing Service, Princeton, N.J.

Report No.—ETS-RM-75-6

Pub Date Oct 75

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Comparative Analysis, Intervals, \*Mathematical Models, \*Percentage, \*Scores, \*Scoring Formulas, Statistical Bias, Test Results

Identifiers—\*Logistic Interpolation, Percentile Ranks

A method of interpolation has been derived that should be superior to linear interpolation in computing the percentile ranks of test scores for unimodal score distributions. The superiority of the logistic interpolation over the linear interpolation is most noticeable for distributions consisting of only a small number of score intervals (say fewer than 10), particularly distributions that are relatively unskewed. Logistic interpolation thus should be useful in practical situations in which percentile ranks of number right scores must be estimated from very coarse groupings. The logistic method may also be applied to distributions of formula scores. However, the method should probably not be used for unsmoothed distributions of formula scores unless it is desired to smooth out the peaks and valleys that result from rounding scores to integer values. The usefulness of logistic interpolation in computing percentile ranks for test score distributions is illustrated using three score distributions for item analysis samples from 1974 Law School Admissions Tests (LSAT). Correlates of Clustering and Retention in Free Recall.

Pub Date [75]

Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cluster Grouping, \*Cognitive Processes, College Students, Correlation, \*Individual Differences, Learning Processes, Memory, \*Recall (Psychological), \*Retention, Verbal Learning

The method of organization in free recall in the form of either clustering or subjective organization is explored in this study. This is just one of the possible forms of retrieval that may be employed. Other possibilities include serial recall, alphabetization, and imagery. To the extent that subjects employ such other strategies, correlations between organization indices and recall will be attenuated. This study explores this issue in two ways: first, about half the subjects (college students) were instructed to use a clustering strategy on a categorizable list. It was predicted that the correlation between clustering and recall would be higher for instructed than for non-instructed subjects. Secondly, subjects were asked to indicate the types of strategies they employed on a post learning questionnaire. It was predicted that subjects in the instructed group would report fewer strategies. The relationship of other individual difference variables to organization and recall has had little examination. Organization has been found to vary with internality-externality, intellectual ability, with chronological age, and with impulsivity/reflectivity in children. This study examined a number of such variables. (DEP)

Identifiers—\*Minneapolis Public Schools, Minnesota (Minneapolis)

Parents of students who attended public schools in the West Area of the Minneapolis school district were surveyed in the Fall of 1974 to (1) determine parent feelings about educational alternatives, (2) give parents input into the decision-making process, and (3) provide parents with information about educational choices and alternatives. The study was conducted by a committee of West Area staff and parents, and the Minneapolis Public Schools' Research and Evaluation Department. Questionnaires were returned by the parents of 2,068 randomly selected students. Eighty-one percent of the mailed questionnaires were returned. More than seventy-five percent of the parents said that having alternative educational programs provided was important to them. Thirty-eight percent of the parents of elementary students were willing to have their child transported to any school in the West Area to get the program of their choice, 43 percent were willing to have their child transported to a school adjacent to their child's present school, while 19 percent said they would

choose the nearest available school regardless of the program offered. Parent responses for each school are included in the report. (Author/DEP)

A Survey of Parents of Students at Jordan Junior High School.

Minneapolis Public Schools, Minn. Dept. of Research and Evaluation.

Report No.—C-73-51

Pub Date Aug 74

Note—27p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Achievement Rating, Caucasian Students, \*Educational Programs, Integration Effects, Interviews, \*Junior High Schools, Junior High School Students, Negro Students, \*Parent Attitudes, Parent School Relationship, Questionnaires, \*School Integration, \*Surveys

Identifiers—Jordan Junior High School, \*Minneapolis Public Schools, Minnesota (Minneapolis)

As part of the Minneapolis Public Schools' desegregation/integration plan, boundary changes for Jordan Junior High's elementary feeder schools were implemented for the 1973-74 school year. Incoming seventh graders, who previously would have attended another junior high, changed the percentage of minority group students in seventh grade from 12 percent in 1972-73 to 42 percent in 1973-74. In the spring of 1974, a sample of 15 percent of the parents of seventh and eighth grade students were interviewed in their homes to determine their feelings about the educational program at Jordan. Overall, the parents were satisfied with Jordan's educational program. The results were similar for seventh and eighth grade parents and for parents of Black and White students. About 90 percent of the parents were satisfied with how much their child was learning in reading, mathematics, and other subjects; about 80 percent expressed satisfaction with the kinds of courses provided, the activities other than courses that were provided, the way the subject matter was taught, and the way their child had been treated by the Jordan staff. Almost all parents said they were satisfied with how well their child was getting along with other students at Jordan. (Author/DEP)

Identifiers—\*Basic Skill Centers, Elementary Secondary Education Act Title I, ESEA Title I, Gates MacGinitie Reading Test, Minneapolis Public Schools, Minnesota (Minneapolis)

Two Basic Skill Centers were set up on 1968 to help inner city students improve their reading skills. The Centers were supported mainly by the Minneapolis Public Schools although ESEA Title I funds provided teacher aides. This report covers the sixth year's operation of the project. Substantial changes in the Centers' operations are described. The goals of the project since late 1970 have been the achievement of functional literacy by disabled readers and nonreaders from grades 4 through 9 in Target Area schools and the development of an instructional program to make it possible. The newly developed Basic Skill Centers Reading Program provided all curricular materials. A multimedia approach was used which included teaching machines as well as individual instruction in related classrooms. Individualized instruction was provided for 595 Title I students from grades 4-9 from 22 public

schools. The students, who came from Title I Target Area schools, made grade equivalent gains well above what would have been expected for average children working at the reading levels of the Gates-MacGinitie Comprehension tests which were the measuring instruments. From 81 percent to 90 percent of the students made grade equivalent gains greater than expected for the pre-post-test span of six to seven months. (Author/DEP)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, Minneapolis Public Schools, Minnesota (Minneapolis)

Self-teaching machines housed in trailer-classrooms were used for the fourth year to help 351 students in two Minneapolis Title I secondary schools improve their reading skills. A gain of 1.4 grade equivalent months by 25 percent of the students (using Gates-MacGinitie Comprehension tests) for each month on roll was the specific objective of the project. Furthermore, 50 percent of the students were to show a gain of at least one grade equivalent month for each month on roll. The project featured the use of three-button response machines with both commercially and locally developed materials. Machines were housed in two large trailers which were located at Bryant and North secondary schools. Although students operated the machines and tested their own progress at the end of each lesson, assistance was available from the certified reading teacher and paraprofessional who staffed each trailer. In 1973-74 gain scores were obtained from only 39 percent of the students because of pupil transfers, truancy, and faulty testing procedures. On the basis of the small number (136) of students tested, the project met its objectives in that 71 percent gained at the rate of 1.4 grade equivalent months for each month on roll and 76 percent gained one grade equivalent month for each month on roll. It was recommended that the Mobile Learning Centers' program be continued. (Author)

The Conflict Resolution Desegregation Aides Component of the Minneapolis Schools' 1973-74 Emergency School Aid Act Project: An Evaluation.

Minneapolis Public Schools, Minn. Dept. of Research and Evaluation.

Report No.—C-73-64

Pub Date Dec 74

Note—36p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Conflict Resolution, Discipline Problems, Inservice Programs, Junior High Schools, Paraprofessional School Personnel, Program Effectiveness, \*Program Evaluation, \*Race Relations, \*School Aides, \*School Integration, Senior High Schools, Student Attitudes

Identifiers—Emergency School Aid Act Project, Minneapolis Public Schools, Minnesota (Minneapolis)

The Conflict Resolution Component of the Minneapolis Schools' 1973-74 Emergency School Aid Act Project provided 20 paraprofessional Desegregation Aides for nine desegregating public schools (8 junior highs, 1 high school). The Component also funded a Coordinator of Desegregation Aides and a program of pre- and in-service training to help Aides reduce various types of conflict in schools, to improve interracial relations, and to act as liaisons between schools

and the neighborhoods from which students were bussed. The objectives of the component were (1) prevention of major racial conflicts leading to school closing; (2) prevention of any increase in student-student conflict, as measured by suspension rates attributable to such conflicts in 1972-73 vs. 1973-74; (3) prevention of any increase in student-teacher conflict, as measured by suspensions attributable to such conflicts; and (4) among White students, an increase in liking toward minority students, as measured by 1973 vs. 1974 administrations of the Student Opinion Questionnaire (SOQ). Objective 1 was met. Attainment of objectives 2, 3, and 4 could not be measured directly, because the relevant data were not available. This report, prepared by an independent evaluator, includes a brief description of the Aides and a discussion of the Aides' enacted role. Approximately two-thirds of the Aides represented racial minorities. Aides' most time-consuming activities were monitoring the halls and cafeteria, and talking with students and school staff about interpersonal conflict. (Author/RC)

Descriptors—Achievement Gains, \*Basic Skills, Junior High Schools, Junior High School Students, Low Achievers, \*Mathematics, Minority Groups, Parochial Schools, \*Program Evaluation, Public Schools, \*Remedial Mathematics, School Integration, \*Student Improvement, Teacher Aides

Identifiers—Emergency School Aid Act Project, Mathematics Basic Skills Development Project, Minneapolis Public Schools, Minnesota (Minneapolis)

The Emergency School Aid Act (ESAA) Math Component was designed to improve mastery of math basic skills among the lowest achieving math students in 8 desegregating public junior high schools, junior-high-level grades in 6 non-public schools, and the ninth grade in one public high school. The Math Component consisted of 25 teacher aides, a part-time Math Coordinator, a curriculum of workbooks and tests of the Mathematics Basic Skills Development Project (MBSDP). The Math Component not only met, but surpassed its two objectives for mastery gain among remedial students. Objective I required 50 percent of ESAA students to maintain or improve their relative standing (percentile) among same-grade peers from fall to spring on the Minneapolis Arithmetic Computation Test (MACT). About two-thirds of the students met this objective, and therefore had a spring percentile rank which was the same as, or higher than, their fall rank. The interpretation of these MACT gains is, however, clouded by a possible regression artifact. Objective II required 50 percent of the students to earn "Mastery-Gain Points" on MBSDP units at the rate of 40 per year. Again, two-thirds of the students met this objective. Recommendations for program improvement included: (a) a more efficient system for MBSDP materials distribution; (b) a formal commitment by participating schools to use ESAA aides, to use MBSDP materials, and to organize participating teachers and staff; (c) a full-time coordinator; and (d) careful planning to avoid unintended overrepresentation of racial minorities in the ESAA Math Component. Descriptors—Administrator Role, \*Classroom Observation Techniques, Educational Objectives, Elementary Education, \*Evaluation, \*Models, Principals, \*Program Development, Program Evaluation, Questionnaires, School

Responsibility, Teacher Administrator Relationship, Teacher Evaluation, \*Teacher Rating, Teaching Methods

Identifiers—Principals Responsibility Rank Order Form, Scrivens Product Evaluation Profile, Status Questionnaire

This report describes the development, implementation, and evaluation of a model for classroom observation designed to improve instructional supervisory skills and enhance teaching and learning. The project was carried out in 10 (Broward County, Florida) elementary schools with the principals and six teachers from each school involved. The aims of the project were to provide a model for observation and get principals to use it. The model was used by 10 principals and 40 teachers for four months. A Status Questionnaire and Principals' Responsibility Rank Order Form, each developed by the author, produced no significant differences in attitudes, understanding, philosophies or reactions to classroom stimuli during observation. Scrivens' Product Evaluation Profile provided the assessment upon which conclusions were drawn about the model and overall project. Those people who reviewed and used the model support its implementation in other schools. (Author)

Identifiers—Arizona, California, MAP, \*Mutual Agreement Programming, Wisconsin

This report is an evaluation, using randomized experimental/control design, of a program involving negotiated contractual agreements (MAP) between prisoners and parole boards for specific parole dates contingent on performance in work, training and treatment activities. Contracts were generally for less than six months. Both feasibility and effectiveness of the model were analyzed. Reasonably high levels of acceptance were found among both prisoners and correctional officials in Wisconsin and Arizona; but in California, where the model involved direct release to a community correctional center, administrative obstacles hindered full implementation. Contract cancellations were almost always the result of disciplinary infractions rather than failure to satisfy work or training requirements; prisoner-initiated withdrawals were rare. At release, prisoners judged that MAP had provided them greatest service through more certainty of release, facilitating planning outside prison, and the opportunity for earlier release, but that MAP had made less substantial differences in improving staff interest, access to prison programs, or operation of those programs. Descriptors—\*Criterion Referenced Tests, Educational Assessment, \*School Districts, \*State Programs, Test Construction, \*Testing Problems, \*Testing Programs, Test Validity

This paper was presented with other papers in a forum dealing with statewide testing programs. The primary purpose of the paper is to address practical considerations and methods of resolution for large districts or states who are planning on conducting large scale testing or assessment programs with criterion or performance

referenced measures. The first section lists the parameters and limits within which these programs generally operate. These limits are translated into practical problems and decision points. Methods of resolving the problems are then addressed with emphases being given to professional and community involvement. The paper closes with comments on test validity and how it is affected by these problems and concerns. (Author)

This study was part of the evaluation of Project INSTRUCT, a Title III ESEA reading project. Project schools rated high on implementation were paired with similar control schools. Samples of 165 second-grade students were randomly selected from project and control schools. Covariance procedures were used to compare word knowledge, reading, and spelling scores on the Metropolitan Achievement Test (MAT). Previous achievement and ability scores were used as covariates. Project students scored higher on Word Knowledge and Reading. Differences in Spelling, which was not part of the project, were not significant. The results are consistent with previous evaluation findings. (Author/DEP)

Jacobson, Thomas J.  
A Study of the Differential Aptitude Testing Program in the Grossmont Union High School District.

Grossmont Union High School District, Calif.  
Spons Agency—San Diego County Dept. of Education, Calif. Regional Occupational Program.  
Pub Date 28 Oct 75

Note—30p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Aptitude Tests, Career Education, \*Career Planning, \*Decision Making, Grade 10, Instructional Staff, Occupational Guidance, Orientation Materials, Parent Attitudes, \*Program Effectiveness, Questionnaires, Senior High Schools, Student Attitudes, \*Student Interests, Testing Programs, Test Interpretation, Test Results

Identifiers—California (Grossmont), \*Differential Aptitude Testing Program, Grossmont Union High School District

The Differential Aptitude Testing (DAT) Program was developed jointly by the Pupil Personnel Services Department of the Grossmont Union High School District and the San Diego County Regional Occupational Program. The purpose was to provide 10th grade students with individual aptitude information and techniques of career exploration for the purpose of making wise career decisions. The DAT program consisted of three stages: pretest orientation, testing, and interpretation. Specially designed materials were developed to assist counselors in each stage of the program. The DAT Interpretation booklet, specially developed by counselors in the Grossmont District, was the key to the program and tied the DAT scores, occupations, and sources of occupational information together to help students reach career decisions. To determine the effectiveness of the program, a questionnaire was developed for the students, parents, and school members involved. Similar questions were included on each questionnaire in the same numbering sequence so that the responses of each group could be compared. The overall results of the questionnaire revealed that parents, students, and staff were positive about the program. The student information booklet is included. (Author/DEP)

Longitudinal Criteria of College Achievement Predicted from Aptitude, Achievement, and Interest Measures.

Washington Univ., Seattle. Educational Assessment Center.

Report No—76-8; EAC-P-76-294

Pub Date Oct 75

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Academic Achievement, Academic Aptitude, Achievement Tests, College Freshmen, College Graduates, \*College Majors, Comparative Analysis, Correlation, Degree Requirements, \*Grade Point Average, Grades (Scholastic), \*Higher Education, Longitudinal Studies, Predictive Ability (Testing), \*Predictor Variables, Student Interests

Identifiers—\*University of Washington, Washington (Seattle), Washington Pre College Test Battery

Long term criteria of college performance, i.e., graduation in four years, cumulative GPA, credits earned, and graduating major, were studied in relation to a comprehensive pre-college battery administered in the high school (HS) junior year. Despite restricting the sample to 1,633 university students who had progressed to junior standing in three years, HS GPA correlated as highly with cumulative college GPA as it does with freshman GPA in broad, national samples (.51). HS GPA was also the best predictor of graduation and credits earned, the other predictors augmenting only slightly in multiple correlation. Despite the social significance of graduation as a criterion of academic performance, it was only predicted poorly. Graduating major fields were more related to interests than to aptitudes or HS GPA, but the extreme asymmetry of these criteria precluded good prediction in a practical sense. (Author)

Selection of Subsample Sizes for the Bartlett and Kendall Test of Homogeneity of Variance.

Pub Date [Apr 75]

Note—30p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Analysis of Variance, \*Hypothesis Testing, \*Sampling  
Identifiers—Distributions (Statistical),

\*Homogeneity of Variance, Power (Statistics)  
Power and stability of Type I error rates are investigated for the Bartlett and Kendall test of homogeneity of variance with varying subsample sizes under conditions of normality and nonnormality. The test is shown to be robust to violations of the assumption of normality when sampling is from a leptokurtic population. Suggestions for selecting subsample sizes which will produce maximum power are given for small, intermediate and large sample situations. A formula for estimating power in the equal n case is shown

to give results approximating empirical results. The problem of heterogeneous within cell variances and unequal n's is discussed. (Author)

Linear Versus Quadratic Multivariate Classification.

Pub Date [Apr 75]

Note—22p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Analysis of Covariance, Bayesian Statistics, \*Classification, \*Comparative Analysis, \*Discriminant Analysis, Matrices, Predictor Variables, Probability, \*Sampling, Statistical Analysis, Tests of Significance  
Identifiers—Linear Classification, Quadratic Classification

A linear classification rule (used with equal covariance matrices) was contrasted with a quadratic rule (used with unequal covariance matrices) for accuracy of internal and external classification. The comparisons were made for seven situations which resulted from combining three data conditions (equal and unequal covariance matrices, minimal and nonminimal group centroid separation, and two and three criterion groups) for different sets of data. For the internal analysis the quadratic rule was superior in all seven situations. For the external analysis the linear rule was superior in nearly all of the situations. (Author)

**Identifiers**—\*National Longitudinal Study High School Class 1972

A sample of high school seniors was surveyed in spring 1972 to provide baseline data for the NCES National Longitudinal Study of the High School Class of 1972. The First-Followup Survey of this sample took place in fall 1973. This report describes how these young adults changed during this period of about 1-1/2 years with regard to their view of themselves, sense of control of their achievement, and their orientation toward work, community, and family goals. Statistics are presented for the population as a whole and for persons classified into subgroups based on sex, race-ethnicity, socioeconomic status (SES), academic ability, high school program, and high school location (region). A brief background description of this study and relevant definitions and footnotes are given. The data are shown in both tabular form and graphical form. This bulletin presents estimates of the net amount of change that occurred in the aforementioned psychological variables during the 18-month period between surveys. Gross changes, which take into account the fact that net changes result from increases for some individuals and decreases for others, will be described in a later report that will analyze the data in greater depth from a longitudinal point of view. **Descriptors**—College Supervisors, Comparative Analysis, Data Analysis, Data Collection, \*Effective Teaching, \*Electronic Data Processing, \*Evaluation, Feedback, \*Participant Satisfaction, Racial Differences, Sex Differences, Student Evaluation, \*Student Teachers, Teacher Education, Test Construction

The primary purpose of this project was to develop a system for the evaluation of student teachers employing automated data processing as an integral part of the system. This system employed data gathered from four sources: (1) Public School Pupils, Grades 7-12; (2) Student Teachers; (3) Supervising Teachers; (4) College Supervisors. The emphasis was placed on the first source, the data obtained from the pupils of the student teachers. This source constituted a large volume of evaluation information that had to be processed through the use of automated

procedures. Results of the project compared the several sources of data, and indicated the relative effectiveness of each. The feedback provided from the evaluation information was used to identify strengths and weaknesses of individual student teachers, and cumulatively to evaluate the total student teacher program. Finally, by subdividing the data into categories relating to pupil characteristics, information was obtained about the effectiveness of student teachers in working with black, white, male and female students. As a result of this project, an automated system for gathering and analyzing a large amount of data is available to evaluate the effectiveness of student teaching. (Author)

**Identifiers**—District of Columbia, Elementary Secondary Education Act Title III, ESEA Title III, \*Morse Crisis Intervention Center

The Morse Crisis Intervention Center is a program of survival for the youth of the D.C. Public Schools who have been removed from the public junior high school because of disruptive behavior. The Center's on-going activities were supplemented by Project Advance in the following specific areas during the 1974-75 school year: (1) Psychotherapeutic services were provided to alleviate or minimize disturbing behavior; (2) Individualized instruction was provided the students using a modified open classroom technique; and (3) Enrichment activities were provided the students. The Project Director and staff developed 23 standards, which emphasized affective, behavioral, and educational objectives. These standards formed the basis for the program evaluation. Measures of program success included a staff survey, focusing on the attainment of the 23 standards, progress on the Wide Range Achievement Test (WRAT), data from a classroom observation checklist, project director and counselor reports, and a student survey. Observational data, a student survey, A Self-Rating Scale for Students, and an Observational Rating Scale are appended. (Author/BJG)

**Identifiers**—Belgium, France, Germany, Netherlands, Scandinavia, Switzerland, United Kingdom

Examined were the purposes and problems, as well as the present status and trends, of pre-school educational evaluation in seven European countries: Belgium, France, Germany (Federal Republic), Netherlands, Scandinavia, Switzerland, and the United Kingdom. These analysis required that national surveys be written which would first give brief background information on existing provisions of pre-school education, underlying educational philosophies, and important sociological and historical factors. A description and discussion of different evaluation purposes

and procedures, with special attention to new methods, were judged desirable. Major attention would be devoted to a review of evaluation studies, both those evaluating general pre-school curricula and those assessing more specific programs, and taking into consideration process evaluation as well as short- and long-term effects. An attempt to judge strengths and weaknesses of current studies and to identify the main problems of evaluation research would be made. Possible guidelines for future evaluations were to be included. The national surveys generally followed this outline and were followed by a chapter in which the main trends reflected in the survey were summarized. Appended were special studies concerning the use of tests in evaluating pre-school educational programs, historical, social and cultural influences of pre-school evaluation, language programs, the evaluation of learning difficulties, the role of an evaluator, and an action research evaluation. Identifiers—Michigan (Royal Oak), \*Royal Oak Public Schools

The testing program of the Royal Oak (Michigan) School District was examined and evaluated under agreement of the Royal Oak Teachers Association and the Administration of the Royal Oak School District. A committee was formed of people knowledgeable of the program and/or specialists in evaluation and testing. This study represents two days of on-site investigation, the major basis of which was interviews. The committee met for a planning session, examined materials related to the testing program including test manuals and tests themselves, interviewed a broad range of teachers, counselors, school administrators, parents and other community residents, and deliberated on findings and conclusions. Specific findings under these general headings are discussed: planning the testing program; purposes of the testing program; content of the tests; application of the tests; computing, summarizing, and filing results; reporting results; and use of results. Recommendations with the intent of improving the testing program are given. (Author/DEP)

Descriptors—\*Achievement Tests, \*College Freshmen, \*Composition (Literary), English, Higher Education, \*Knowledge Level, Multiple Choice Tests, Scoring, Structural Grammar, Student Evaluation, Student Placement, \*Traditional Grammar

Identifiers—\*Test of Standard Written English

Intended to help institutions place their entering students in regular freshman English composition courses, the Test of Standard Written English (TSWF) is most useful to colleges that also offer alternate courses designed to improve students' understanding of the material explored by the test. The Test of Standard Written English assesses students' levels of achievement in standard written English. By "standard written English" is meant the conventionalized, edited language of most college textbooks and the language in which students will probably be asked to write most papers in college. The test does not attempt to assess the ability of students to write "creatively" or to communicate informally as they would with friends. The Test of Standard Written English does not ask students to do any writing. Rather, it presents a total of 50 multiple-choice questions of 2 basic types. Research comparing the scores of students on essays and multiple-choice questions shows that performance on questions of each type correlates highly with the ability to write standard written English. Sample questions as well as some preliminary findings are included in the document. (Author/DEP)

An Approach to Setting Educational Goal Priorities in the Minneapolis Public Schools.

Minneapolis Public Schools, Minn. Dept. of Research and Evaluation.

Report No.—C-73-28

Pub Date Jul 74

Note—83p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Community Involvement, \*Development, \*Educational Objectives, Elementary Secondary Education, Parent Attitudes, Rating Scales, Reliability, \*School Districts, School Personnel, Student Attitudes, \*Surveys, Teacher Attitudes

Identifiers—\*Minneapolis Public Schools, Minnesota (Minneapolis)

In 1970, at the request of the School Board, the Minneapolis Public Schools began a review of the school district's goals. Several approaches to establishing and revising goals were used. By January 1974, 1,506 people in Minneapolis had participated in the goals ranking procedure. This group included 630 community representatives, 569 school personnel, and 307 senior high school students. Agreement among the three groups—parents, school personnel, and students—was relatively high on the importance of the various

goals. All three groups gave high rankings to the goals of reading and writing, pride in work, learning to respect and get along with people with whom we work and live, and developing good character and self-respect. The three groups gave relatively low priorities to goals related to understanding skills of family living, understanding democratic ideas and ideals, understanding the ideas of health and safety, and gaining information needed to make job selections. A critique of this approach to goal ranking is given. Recommendations are made. (Author/DEP)

Assessment of Observational Items for Use in Competency-Based Teacher Education Programs.

Pub Date 75

Note—15p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Washington, D.C., March 31-April 2, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Classroom Observation Techniques, College Supervisors, Cooperating Teachers, \*Evaluation, Higher Education, Home Economics Teachers, Item Analysis, \*Performance Based Teacher Education, \*Student Teachers, Teacher Education, Test Reliability

A 50-item observational instrument was used by cooperating teachers and college supervisors to evaluate the competencies of 77 home economics student teachers from two universities at two time intervals during the student teaching experience. Two analyses of variance (AOV) for each of the 50 items were used to identify items which judges could rate reliably. Intra-class correlation coefficients were utilized to ascertain if different ratings between student teachers were due to differences in their performance. The AOV analyses suggested that judges could reliably rate 18 items. Of these, five appeared to discriminate between student teacher's performance whereas eight did not. (Author)

The Effect on Non-Normal Distributions on the Integrated Moving Average Model of Time-Series Analysis.

Pub Date 75

Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Hypothesis Testing, \*Mathematical Models, Statistics, \*Time

Identifiers—Distributions (Statistical), \*Integrated Moving Average Model, Power (Statistics)

The Integrated Moving Average (IMA) model of time series, and the analysis of intervention effects based on it, assume random shocks which are normally distributed. To determine the robustness of the analysis to violations of this assumption, empirical sampling methods were employed. Samples were generated from three populations; normal, moderately non-normal, and severely non-normal. The samples were combined with values of other quantities in the model, the resulting "observations" subjected to time-series analysis, and the effect on empirical significance levels noted. The analysis of interventions based on the IMA model was robust to violations of the normality assumption. (Author)

grams, School Integration, Student Characteristics, Teaching Machines

Identifiers—Minneapolis Public Schools, Minnesota (Minneapolis)

The Reading Component of the Minneapolis Schools' 1973-74 Emergency School Aid Act (ESAA) Project was designed to improve reading comprehension among the poorest-reading students in eight desegregating public junior highs and the poorest-reading junior-high-age students in six nonpublic schools. The Reading Component not only met, but surpassed, its objectives for comprehension gain among disabled readers. Objective I stated, in part, that students with pretest comprehension grade-scores of 0-3.9 would show a median of 1.5 months comprehension gain for every month in the ESAA program; in fact, these students achieved a median gain rate of 2.4. Objective II stated, in part, that students entering the Component with pretest scores of 4.0-6.0 would have a median rate of 2.5 months gain per program month; the actual median rate for Objective II students was 3.1. Also, within each separate school, the ESAA students usually surpassed Objective I and II. In every public school approximately 60 percent of the Objective I students exceeded the expected median gain-rate of 1.5. Factors possibly accounting for differences among schools in gain rates were discussed. (Author/DEP)

Identifiers—\*School Curriculum Objective Referenced Evaluation, SCORE

The School Curriculum Objective-Referenced Evaluation (SCORE) system is an item bank that can be effectively and inexpensively used to develop criterion referenced tests which reflect an institution's educational objectives. SCORE also allows for test construction, formatting, and reporting. Flexible in design, SCORE educational objectives are organized in a three-level hierarchy of goals, intermediate objectives, and performance objectives. SCORE attempts to test each educational objective in the most appropriate way and may require special equipment. Student performance reports are shared with the student, parent, school, and school district. (B/G)

A Validity and Reliability Study of a Report of Self Concept Scale: Adolescent Form.

Note—16p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adolescents, \*Developmental Tasks, \*Secondary Education, \*Self Concept Tests, \*Test Reliability, \*Test Validity  
 Identifiers—\*Report of Self Concept Scale (Adolescent Form)

In this self-concept scale for adolescents based on Havighurst's developmental task, the person is asked to read a paragraph which explains the task and to report the way he sees and feels about his ability to achieve the task in relation to what he can do, what others do, and what it takes to be successful at the task. Response is on a scale of from one, the poorest estimate of his ability to perform the task, to five, the highest estimate, on each of the relationships in question. After a readability test (Dale-Chall) was applied to each of the task areas, the scale was administered to 255 adolescents in grades seven through twelve in various suburban Chicago school districts. To derive validity data, the Pearson Product Moment Correlation was used to compare student to teacher responses by relationships within each task. The mean of the teacher responses was used as the criterion against which student responses were tested to derive reliability. The Kuder-Richardson 21 formula was used resulting in a coefficient of .88. Moderate correlations of the kind derived in this study place the instrument well within the acceptable range insofar as validity is concerned. Reliability is also sufficiently high to give adequate assurance of consistency in subsequent administrations. (RC)

Descriptors—\*Achievement Gains, \*Achievement Tests, \*Cluster Analysis, \*Effective Teaching, \*Elementary School Students, \*Evaluation Criteria, \*Scores, \*Student Teacher Relationship, \*Teacher Evaluation

Identifiers—\*Comprehensive Tests of Basic Skills  
 The instructional effectiveness of elementary classroom teachers is investigated through the use of distributions of student achievement scores. The data used for this investigation were reading, language, and arithmetic subtest scores on the Comprehensive Tests of Basic Skills for fifth and sixth grade public school children. Students were classified by their grade equivalent scores on each of the subtests. For each teacher in each of the grades, the scores were computed for each of their students. Upon grouping of students, each teacher received nine data points; mean gain scores for slow, average and fast students in reading, language and arithmetic. It was then determined which cluster of teachers was most effective with certain students and then to follow these teachers the second year of the study and reinvestigate their effectiveness. Results indicate that it may be possible to determine that certain teachers are more successful in working with certain types of students in various subject areas and at differing abilities. (DEP)

Nine Performance Procedure Competencies with Which to Analyze, Organize, and Develop Hands-On Performance Evaluation.

Pub Date 16 Jul 74

Note—13p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Criterion Referenced Tests, \*Elementary Secondary Education, \*Guides, \*Performance Tests, \*Psychomotor Skills, \*Test Construction

This document contains a number of processes and criteria levels with which the progressive test writer should be familiar in order to measure more than cognitive success. These processes allow test writers to examine existing paper and pencil examinations in order to sound out impli-

cations for performance testing. Hands-on performance testing is referred to as criterion-referenced testing (CRT) in the psychomotor or performance domain. This is one step beyond paper and pencil tests (PPT) which function mainly in the cognitive or knowledge domain and hardly ever at all in the performance domain of practical application. It should be sufficient for the typical test writer to work through these processes and criteria levels with two or three examples in order to derive maximum benefit. This experience will sharpen the purposes, yardsticks, and repertoires of experienced test writers enough to enable automatic application of these processes and criteria level without the necessity of constantly referring back to this procedures manual. This document is intended to help develop better hands-on performance evaluation instruments. (Author/DEP)

Descriptors—\*Computers, \*Delivery Systems, \*Display Systems, \*Efficiency, \*Information Networks, \*Information Systems, \*Input Output Devices, \*Man Machine Systems, \*Measurement, \*Models, \*On Line Systems, \*Performance Criteria, \*Time Sharing

Identifiers—\*Network Measurement System

The Network Measurement System (NMS) represents the implementation of a new approach to the performance measurement and evaluation of computer network systems and services. By focusing on the service delivered to network customers at their terminals, rather than on the internal mechanics of network operation, measurements can be obtained which are directly relevant to user needs and management concerns. Furthermore, the type of measurement necessary to implement this approach can be made directly, without perturbing the network system under test. This technical note introduces the service concept and other background information necessary to understand the need for and use of the NMS. The fundamental distinction between service and internal efficiency is clarified, both in general and in the environment of computer networks. A number of different measures of service are then discussed, followed by the presentation of several models of interactive use of networks. Then, the practical aspects of gathering data and applying this information to service measurement are reviewed, leading to a presentation of the NMS as it is implemented. The note ends with a discussion of applications for the NMS. (Author)

State Summary of Results: 1974-75 Michigan Educational Assessment Program.

Michigan State Dept. of Education, Lansing. Research, Evaluation, and Assessment Services. Pub Date Mar 75

Note—16p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Achievement Tests, \*Criterion Referenced Tests, \*Educational Assessment, \*Educational Objectives, \*Elementary Education, \*Grade 4, \*Grade 7, \*Mathematics, \*Reading, \*School Districts, \*Scores, \*State Programs, \*Student Evaluation, \*Testing Programs, \*Test Results

Identifiers—\*Michigan Educational Assessment Program

The State Summary of Results presents a compilation of the scores of Michigan's fourth and seventh grade students who participated in the educational assessment along with discussion of the possible meaning and significance of the results. It also attempts to respond to the controversy which has surrounded the assessment program since its inception in 1970 by delineating its purpose which is the provision of information for decision-making at the state, local, and individual student levels. Because these data are derived from students taking objective referenced

tests, they reflect student attainment of a specific set of learner performance objectives which were developed by Michigan educators in an attempt to articulate the skills which students should achieve in school. The tests used to measure attainment of the objectives were developed through a cooperative effort between the Michigan Department of Education and local district educators. (Author/DEP)

Utilizing a Pupil Typology to Evaluate Change in Remedial Reading and Remedial Math Programs in Title I Schools.

Pub Date Dec 75

Note—47p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Academic Achievement, \*Achievement Gains, \*Classification, \*Comparative Analysis, \*Compensatory Education Programs, \*Evaluation Methods, \*Program Effectiveness, \*Program Evaluation, \*Remedial Programs, \*Student Characteristics

The authors advocate the use of a pupil typology in which the variables of sex, race, family status, and I.Q. range are combined to form a pupil classification system. This systematic arrangement of data when combined with change in pupil performance, allows the creation of local norms. A scheme for comparing the change in pupil performance among the various schools involved in remedial reading and remedial math programs is demonstrated; also the comparison of the performance among the various schools involved in the programs is shown. The comparison of the performance changes in similar types of students is illustrated with a ranking procedure according to results obtained. Although this system of analyzing the output of various remedial programs is more revealing than gross comparisons, sole reliance upon this procedure for purposes of program accountability is not advocated. Measurement of student performance as analyzed by the proposed method, over a period of at least three years, should produce useful information upon which decisions for change can be made. Descriptors—\*Academic Achievement, \*Comparative Analysis, \*Curriculum Evaluation, \*Data Analysis, \*Elementary Secondary Education, \*Mathematical Models, \*Predictor Variables, \*Research Methodology, \*Statistical Analysis

The purpose of the present study is to demonstrate the utility of data analysis methodology in evaluative research relating pupil and curriculum variables to pupil achievement. Regression models which account for achievement will result from the application of the methodology to two evaluative problems—one of curriculum comparison and another exploring the relationships between achievement and instructional processes in different schools implementing the same curriculum. Evaluative studies focusing on such questions should yield more information about pupil achievement than evaluations following other models when the following practices are reflected in the design and execution of the study: (1) several dimensions of the curriculum, including material and instructional process aspects, are represented in the set of independent variables; (2) curricular and pupil variables are chosen whenever possible from those conceptualized by educational researchers and known to have a likely relationship to achievement; (3) direct measurements on all variables are incorporated in the data set rather than categorical representations of variables, as in a factorial design; (4) the shape as well as the location of the distributions of pupil achievement before and after instruction is represented in the analyses;

(5) the techniques of the data analyst guide the model development process. These recommendations result from a review of substantive and methodological literature. (Author/BJG)

Presented is an operational, comprehensive plan for measuring a Competency Based Teacher Education (CBTE) program. This assessment and evaluation system is a part of the competency-based program of Vocational and Applied Arts Education (VAE). Its seven major goals are: (1) to provide objective public measures for each performance objective in the program; (2) to provide for field assessment of intern teachers and pre-interns using classroom teachers as the primary evaluators; (3) to identify student skill deficiencies prior to instruction; (4) to provide means by which students can be exempt from unneeded instruction; (5) to provide means by which student reactions can be systematically gathered for use in revising instruction and instructional materials; (6) to provide means by which data can be collected to give direction for program revision and improvement; and (7) to determine the effects of the program upon the graduates' teaching and upon their pupils. The assessment and evaluation system is perceived as the most crucial aspect of CBTE. Procedures for determining test reliability, test item validity instruments, a pre-intern field experience check list, data collection instruments and reports available from the Assessment Data Bank are appended. The Application of Attribution Theory to Educational Evaluation.

Pub Date 75

Note—8p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Administrative Personnel, \*Bias, Discriminatory Attitudes (Social), \*Individual Characteristics, \*Job Applicants, \*Teacher Selection

Identifiers—\*Attribution Theory

The importance of out-of-role behavior in teacher evaluation was investigated. Sixty administrators were presented one of two variations of a teacher's application form from which they assessed the personality traits of the teacher and indicated their interest in interviewing the teacher. A multivariate analysis of variance (MANOVA) revealed that altering responses for out-of-role behavior (positive vs. negative) resulted in significantly lower trait-ratings and likelihood of an interview for the teacher with negative out-of-role behavior than for the teacher with positive out-of-role behavior. This finding is consistent with the theoretical expectations. The importance of this finding for administrative accountability is discussed. (Author)

Identifiers—Michigan

The Michigan Department of Education implemented a large-scale social action program through its Compensatory Education School Aid Act of SY 1971-72. Schools received \$200 per pupil and were held accountable for pupil achievement. This paper describes the educational delivery systems in three urban schools, the evaluation of pupil achievement, and the state validation process. The results showed that the downward trend in achievement among inner-city students was reversed, and that promising educational practices were documented and replicated. The success of the programs has resulted in the continuation and recent large increase in funding for Michigan schools. (Author)

Descriptors—\*Course Evaluation, Experimental Curriculum, Higher Education, \*Paranoid Behavior, Questionnaires, \*Student Attitudes, Student Reaction, \*Teaching Assistants, \*Womens Studies

Identifiers—\*Cultural Paranoia, University of Minnesota

The present report describes the results of an evaluation study of the first course in the new Women's Studies program at the University of Minnesota and the resistance of the teaching assistants for the course to the evaluation. A hypothesis to explain this resistance is that an outside evaluator may face inherent difficulties in evaluating new social-political curricula such as women's studies because of the understandable suspiciousness of students, to which Grier and Cobbs' (1968) term "cultural paranoia" has been applied. Suggestions are offered to future evaluators of the social-political curricula that may lessen this "paranoia." (Author)

Descriptors—\*Expectation, Higher Education, Individual Differences, \*Questionnaires, Statistical Analysis, Student Attitudes, Test Reliability

Identifiers—\*Student Evaluation of Teacher Performance

The primary purpose of this research is to determine if there exists covert confounding in student perceptionnaires which significantly affect instructors ratings. Eight calculus classes were randomly selected. Each student completed a Texas A & M University (TAMU) student perceptionnaire the first day of class, envisioning having completed the course with it meeting the highest ideals of expectation. Using the same form, each student evaluated his instructor at the end of the semester. Significant differences (.01 level), between class means existed in the students' ideal perception, as well as in the students' evaluative perceptionnaire. The results indicate that research using student perceptionnaires as an independent variable should provide for preconceived expectations of students. The perceptionnaire is included in the appendix. The Contributions of the Bureau of Occupational Education Research towards Establishing an Education Evaluation System.

Pub Date Oct 71

Note—21p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Educational Assessment, Educational Objectives, Evaluation Needs, \*Guidelines, Information Dissemination, \*Program Evaluation, \*State Departments of Education, Vocational Education

Identifiers—\*Bureau of Occupational Education Research

This report specifies the contributions of the Bureau of Occupational Education Research (BOER) towards establishing an education evaluation system in the New York State Education Department. Section I shows what BOER has done since 1968 in developing an education evaluation system. Thirteen documented examples are given to demonstrate samples of the understandings, insights, personnel, skills, media, data, objective measures, applications, systems, and other resources developed by BOER that can be integrated into almost any type of education evaluation system that is likely to emerge. Section II goes beyond the obvious requirements of more time, money, and manpower to make any such system workable by suggesting the need to coordinate existing departmental functions through a number of organizational "linking pins" and the need to "tool up" existing resources to produce a departmentwide effort to bridge the evaluation gap in a humanistic fashion. Specific examples and directives are given to spell out exactly what is meant by "linking pins" and "tooling up." The report concludes that evaluation is best achieved when the goals of a particular function or unit are expressed so clearly and succinctly that even a stranger walking in off the street can get a clear idea of what is going on and how well it is being done. Descriptors—\*Administrator Attitudes, \*Compensatory Education Programs, Elementary Education, \*Elementary Schools, Evaluation Needs, Models, Parochial Schools, \*Principals, \*Program Evaluation, Public Schools

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Minneapolis Public Schools, Minnesota (Minneapolis)

An evaluation committee of Minneapolis Board of Education Title I principals initiated the Minneapolis Elementary Secondary Education Act (ESEA) Title I Principals' Building Level Evaluation Project. The purpose of the project was: (1) to help the committee assess the evaluation needs of Minneapolis Title I principals; and (2) to study the feasibility of using alternative evaluation models for conducting building level evaluation. The five phases of the work plan were: (1) area meetings with Title I principals in Minneapolis North, East and West Areas, and from parochial schools, to determine interest in building level evaluation; (2) in-depth interviews with ESEA Title I principals who expressed interest in building level evaluation; (3) literature search for evaluation models relating to building level evaluation; (4) preparation of an evaluation "menu" consisting of a simple, nontechnical pamphlet designed to stimulate discussion on building level evaluation; and (5) preparation of a final report of the project. Through a series of meetings, questionnaires, and interviews, it was possible to ascertain the interests of Title I principals in building level evaluation. Their main areas of concern, in order of frequency, were: (1) overall program effects on pupils; (2) attitudes of staff, pupils, and parents toward the program; and (3) best allocation of Title I funds. **Identifiers**—\*Georgia Statewide Testing Program, Iowa Tests of Basic Skills, Tests of Academic Progress

**BENCHMARKS** is intended as an aid to the proper use of Georgia Statewide Testing Program scores. It provides information about the program and the tests; reading and understanding the various reports; understanding what the scores mean; and applying test results for the improvement of learning opportunities for Georgia children and youth. It is organized into nine sections; each providing answers to these questions: (1) What are the objectives of the Georgia Statewide Testing Program?; (2) Who is tested? What tests are used? What do the tests test?; (3) What scores are reported? What do the scores mean? What are some uses of the scores? What are some limitations of the scores?; (4) What reports are provided for use at various levels? What do the reports look like? How may the reports be read and understood?; (5) How may the test results be assessed and interpreted?; (6) What may be done to improve students' learning?; (7) How may scores be released to the general public?; (8) How may a local inservice program be conducted?; and (9) How may students be prepared for testing? Test scores seen often to be misused or not used at all. Perhaps, this is due either to misunderstanding of testing terminology or to a lack of knowledge of what the scores mean. In this guide special attention has been paid to communicating in a simple, straight-forward manner by using words common to most educators and by making liberal use of samples, examples and illustrations. (Author/BJG)

This guide is intended to assist in the evaluation of career education programs. It has been developed around the concept that the evaluation should be viewed as a management tool for the improvement of program performance. The guide recognizes the key roles of the evaluators and program managers in the evaluation process. It is addressed principally to the program managers and their staffs to provide the background on evaluation techniques, issues, and problems needed for decision-making and program direction and for implementation of changes indicated by the evaluation studies. At the same time, it highlights techniques and procedures that evaluators will find useful in planning and implementing evaluation studies. The objective of the guide is to contribute to the improvement of career education efforts in local school districts. It strives to convey the importance and utility of program evaluation to the management of career education programs and to offer practical assistance in conducting such evaluations. This guide, in draft version, was published and disseminated for trial use. Hundreds of personnel provided feedback resulting in this final version. USOE undertook a review of instruments which attempted to measure career education student outcomes. For two summers a review panel reviewed instruments, and the results of these reviews are included in the appendix. (RC)

**Descriptors**—Curriculum, \*Curriculum Evaluation, \*Elementary Secondary Education, \*Instructional Programs, \*Program Evaluation, Program Improvement, \*School Districts, Suburban Schools

**Identifiers**—Ohio (Strongsville), \*Strongsville City Schools

An intensive study of the K-12 instructional program of the Strongsville, Ohio, City School District was conducted during the 1974-1975 school year by the Educational Research Council of America. Survey teams gathered data and developed recommendations and suggestions for strengthening each subject area within the instruction program. The mental health program and pupil personnel services were also examined, and recommendations and suggestions for improvement were offered. Results of the analyses showed that Strongsville's instructional program provided its children with an adequate school career. The Strongsville school system, challenged with the problems of a growing suburban school district, needs to concern itself with accommodation to change and planning of revision so that its instructional program can keep pace with its growth as well as educational innovation. Among the elementary schools, the science and social science programs were considered good. The junior high schools' programs in languages, occupational education, science and social science programs were also good, and the services rendered by the library were excellent. At the high school, the mathematics program was rated as excellent, and the language arts and social science programs had the potential for excellence with some revision. The physical education and health programs, however, were limited at all levels. The rest of the subject area programs ranged from fair to good. Two hundred and twenty-eight specific recommendations and suggestions were made for improving Strongsville's curriculum. (RC)

This paper discusses some approaches to the evaluation of social environments of learning that extend traditional evaluation beyond what intelligence and standardized achievement tests capture as the outcomes of schooling. Students can provide an important judgement or perspective on the suitability of the social environment as shaped by curriculum, instruction, and learning. This type of assessment holds promise for suggesting curriculum and instructional changes. A number of learning environment scales showing predictive validity from previous studies are utilized in four evaluation studies involving assessment of learning environments. The first two demonstrate instructional effects on the learning environment or classrooms, the third documents the assessment of a major curriculum change through measurement of changes in the learning environment, and the fourth illustrates the sensitivity and usefulness of learning environment data to changes brought about by racial integration. All studies were done in public schools to answer specific problems. The four studies are discussed. (Author/RC)

**Descriptors**—Community Involvement, Data Analysis, Data Collection, \*Educational Objectives, \*Guides, \*Needs Assessment, \*Program Development, Program Planning, \*School Districts, Surveys

The steps involved in conducting a valid needs assessment are described and some problems to be avoided are discussed. Needs assessment begins with a set of educational goals. It is important that community opinion be obtained regarding the goals to ensure that they represent the interests of all involved in the educational process. Once the goals are established data can be gathered related to goal attainment in order to uncover discrepancies between desired conditions and the actual state of affairs. Two kinds of data should be used: "hard" data which includes measures such as test results, absentee rates, etc. and "soft" data which shows perceptions of people about the goals. The survey instrument should be designed to measure how important the goal is and the extent to which it is being achieved. Reconciling the differences between the respondent groups as to where the greatest needs lie is usually followed by establishing priorities, the first step in a total program-development cycle. Performance objectives are then developed for each identified need, providing a basis for planning new programs. After programs are implemented and evaluated, a reassessment of the original needs can take place to see how much progress is being made and whether new priorities are needed. This is the cycle of program

development and evaluation that the original needs assessment sets into motion. (RC)

**Identifiers—**Individually Guided Education

This paper examines the evaluation of instructional materials from three viewpoints. First, an analytic system is described which has been found useful by practitioners and researchers for examining the instructional design of materials. This system can contribute to selection among competing materials and to improved use of materials in the teaching-learning process. It is suggested that instructional materials be examined for the quality and completeness of their instructional design and their compatibility (fit) with the curriculum design of the school. Second, a broader system is described which holds promise of analyzing, developing, and maintaining a reference file on the thousands of instructional products now on the market. Schools would be able to retrieve from the reference file information on the particular instructional design constructs of materials. Third, the significance of materials evaluation in meeting the goals of two different curriculum designs is discussed. A selected analysis of the literature and the major emphases in materials evaluation is presented. (Author)

The purpose of this paper is to: (1) discuss the reasons for applying the experimental method to program evaluation; (2) review the basic elements of the experimental method; (3) illustrate refinements and variants of the experimental method with examples from program evaluation in the social sciences; (4) describe ways in which funding directives can be adapted to the experimental method; and (5) discuss potential problems connected with the experimental approach. Thus, the intent is to present a comprehensive, but nontechnical, discussion of the issues surrounding program evaluation and the experimental method to help administrators, educators, graduate students, novice researchers, and program and project directors conceive of ways to effectively apply program evaluation to their own programs and other endeavors. **Descriptors—**\*Criteria, \*Educational Researchers, \*Evaluation Methods, \*Job Skills, \*Personnel Selection

Aimed at those individuals who are in a position to hire or promote educational researchers or evaluators, this paper provides some practical suggestions for assessing these personnel. Selection of a research or evaluation (R and E) firm is not treated separately from the task of hiring an individual; the quality of work done by a firm depends largely on the people who do the job. Much consideration should be given to specifying job descriptions and requirements. The value of R and E competencies depends upon the specific tasks expected to be performed. A synthesis of the efforts of a task force of the American Educational Research Association to identify educational R and E competencies grouped under 25 general tasks is included in the document. In an effort to identify a universe of evaluation competencies, Stufflebeam and Bunda produced approximately 250 items grouped under eight major categories. The categories and examples of corresponding self assessment items are also included. Several strategies for assessing whether an individual possesses the competencies needed for a specific job are considered. These include discussions of certification, formal training, testing, R and E output, bibliographic and academic characteristics, and membership in special professional associations and directories having more stringent entry requirements than presently exist. Systematic observations of classroom behavior of both teachers and pupils are effective measures of process in education. Until a few years ago, the classroom process—what actually does and does not happen as a result of instituting a new program—went unmeasured for want of tools and techniques to do that job. In this article, examples of observational systems are provided as well as suggestions for tailor-making your own observation items for the evaluation of highly unique programs. (Author/RC)

**Descriptors—**Elementary Secondary Education, Evaluation Criteria, \*Grades (Scholastic), Higher Education, Reliability, \*Student Evaluation, \*Validity

**Identifiers—**Contract Grading, Criterion Referenced Grading, Grade Inflation

Although grades have been criticized for lack of reliability, end-of course grades and grade-point averages are reliable enough for most uses. The charge of unreliability applies only to grades on themes, tests, or other individual pieces of student work. On the other side of the controversy, grades have been said to be essential to the learning process because they provide for the evaluation of student performance. But performance is evaluated and its results reported to students independently of any grading system. The justification for grades must lie elsewhere. The critical issue in grading is the validity and usefulness of grades for the variety of purposes they are called on to serve—conveying information on student achievement, providing incentives for students to study, serving as selection criteria, providing material for administrative records, helping in the evaluation and monitoring of the instructional process, and assisting students in educational and occupational planning. Until better information is available on the effectiveness of grades with respect to these various functions, the continued trading of unsupported assertions about them will be fruitless. New approaches to grading, such as contract and criterion-referenced grading, do not change the basic issues. (Author/RC)

**Descriptors—**\*Annotated Bibliographies, \*Effective Teaching, Elementary Secondary Education, Higher Education

**Identifiers—**\*Student Evaluation of Teacher Performance

This 163-item annotated bibliography was compiled to provide access to research and discussions of student evaluation of teacher effectiveness. It was not limited to any educational level nor confined to any specific curriculum area. Two data bases were searched by computer employing three groups of subject terms—evaluation terms, teacher and effective teaching terms, and student terms. A complete list of terms used is included in the appendix. The two data bases were ERIC, yielding documents announced in Resources in Education (RIE) and Current Index to Journals in Education (CIJE), and Psychological Abstracts, an index providing summaries of literature in psychology and related disciplines. ERIC was searched in February 1975 and the data base was complete through December 1974, collecting information for RIE since 1966 and CIJE since 1969. Psychological Abstracts was searched in March 1975 and the data base dates from 1967. A subject index consisting of ERIC descriptors and identifiers reflecting major emphasis is provided. (RC)

Descriptors—\*Bibliographies, Early Childhood Education, Grade 1, Kindergarten, \*Learning Readiness, \*School Readiness Tests, \*Student Testing

The determination of when a child is ready to enter kindergarten or first grade varies from school district to school district. Currently, many school systems are reevaluating their criteria for school entry. In some school systems, chronological age appears to be the sole criterion; in others, social and learning readiness are also primary considerations. Frequently, educators turn to various testing procedures in order to make an objective determination of readiness. The 113 entries contained in this bibliography, chosen after careful review of items retrieved from a computer search of five large data bases (ERIC, National Technical Information Service (NTIS), Psychological Abstracts, Exceptional Children, and Dissertation Abstracts), should facilitate this process. Most problems with tests have to do with their use, misuse, or lack of use. Test scores can be of value to teachers who know how and how not to use them. The purpose of this booklet is to provide a brief overview of standardized testing and to explain some of the commonly used terminology. Topics discussed include: teacher-made and standardized tests, uses of standardized test results, types of standardized tests, test validity, scores and norms, derived scores (percentile ranks, grade equivalent, stanines), working with student profiles, and aptitude test scores. The bibliography is confined to a few readable sources which emphasize the understanding and use of tests in more detail. (RC)

Identifiers—\*Statistical Outliers

To the data analyst, outliers can present both a problem and an opportunity. Stray or outlying observations can severely distort estimates of a distribution's central tendency (like the mean) and estimates of one variable's relationship to another (like the regression coefficient). These problems are frequent and serious, and as a result, increasing numbers of statisticians are developing new estimating procedures that are robust in the face of outliers. But outliers may also present an opportunity. An unusual observation may indicate the existence of a process not operating in the rest of the distribution. In education, for example, an outlier may turn out to be an unusually effective school, perhaps one worthy of emulation throughout the educational system. Finding the best by locating outliers may be particularly important in the evaluation of public policies. Can one find exceptionally good police forces and study the causes for their success? What about outstanding rural development projects, exceptional hospitals, and unusually effective manpower training programs? Indeed, one may suggest a worthwhile general rule for policy evaluations: For exceptions to the general rules, include a search for unusual performers. (Author)

Descriptors—Effective Teaching, Elementary Secondary Education, Feedback, \*Formative Evaluation

Identifiers—\*Student Evaluation of Teacher Performance

Current practices and controversial issues pertaining to student evaluation of instruction are briefly reviewed and followed by a discussion of the application of formative evaluation to this endeavor. Two reasons are generally given for conducting teacher evaluations by students: identification of good teachers and instructional improvement. Summative evaluation appears to provide the identification but does not appear to improve instruction. The use of summative evaluation alone ignores the dynamic and process characteristics of teaching and makes teaching seem to be a static product which is unchanging and unidimensional. A formative approach appears best suited to provide information on improving instruction and should meet these three criteria: (1) it should be specific to a lesson, objective, or teaching behavior; (2) it should be conducted frequently; and (3) it should yield information which may foster the improvement of instruction during the teaching process. Such evaluation must be an integral part of the teaching process. In this way a closed feedback loop is created wherein information may be continually recycled. Formative evaluation should be embedded in a series of comprehensive and systematic procedures designed to evaluate instructional quality. Using formative evaluation by students effectively and in concert with other forms and sources of information should help teachers answer many questions about their teaching effectiveness and ultimately result in teaching improvement. (RC)

Descriptors—Data Collection, Diagnostic Tests, Intervention, \*Predictive Validity, Preschool Education, \*Preschool Tests, School Readiness Tests, Scoring, \*Screening Tests, Test Construction, Testing, \*Test Reliability

Identifiers—\*Developmental Indicators Assessment Learning, DIAL

In 1970, the Illinois Legislature passed bills requiring that elementary school districts institute procedures to identify and treat preschool children who, without such intervention, would not progress satisfactorily in a normal school environment. Efforts in this regard resulted in the screening instrument called Developmental Indicators for the Assessment of Learning (DIAL). Despite initial administrations of the battery and several research efforts, information regarding the reliability and predictive validity of the DIAL was insufficient to promote its general use for preschool screening. This project was funded in an effort to supply the missing data and to address additional questions. The major activities and findings of the project are described in the second section of the report. These concern the content validity of the DIAL as judged by consulting experts in child behavior and development, the predictive validity of the DIAL, the reliability of DIAL administration and scoring procedures, and various recommended modifications of the DIAL. The final section of the report summarizes conclusions and outlines recommendations concerning subsequent steps in the development and use of the DIAL. (RC)

Descriptors—Anglo Americans, Comparative Analysis, \*Cultural Awareness, Ethnic Stereotypes, Factor Analysis, \*High School Students, Item Analysis, \*Mexican Americans, Questionnaires, Secondary Education, \*Secondary

School Teachers, \*Teacher Attitudes

Identifiers—Cultural Awareness Inventory

Mexican American and Anglo secondary school teacher perceptions of Mexican American students were investigated and compared. The instrument used to retrieve the data was administered to 112 teachers in the three Dona Ana (N.M.) county school districts. Six constructs resulted from the factor analysis of the instrument, namely, achievement, time orientation, acculturation, family identification, economic, and religiosity. Reliability of factors was established through Cronbach's Co-efficient Alpha, and item reliability was obtained through item analysis. Forty of the original 50 items were used to compare the groups on each of the six dimensions. Using ethnicity, age, and teaching experience as variables, t tests were computed to test for significant differences. Differences with respect to ethnicity were found in four of the constructs: achievement, time orientation, acculturation, and religiosity. Age and teaching experience were not variables influencing the differences in attitude between the two teacher groups. Educational importance, implications and recommendations based on the findings of the study conclude the paper. (Author)

From an individual's viewpoint, it is argued, culture establishes a meaningful context of social institutions, ecological practices, and personal rules of conduct which provide each group member with a blueprint for social existence. But, behavior is also conditioned by unconscious internalized patterns, which tend to be accepted by everyone as normal facets of "human nature", thereby originating the false premise on which so much crosscultural miscommunication is based—the belief that behavioral deviance must be contrary to nature. Men who live and work in the same community tend to develop certain common features. In the area of intercultural relations the importance of assessing accurately this elusive, but powerful, activator of human behavior cannot be overemphasized. Misunderstandings between members of different societies are apt to occur as a result of the speakers' compulsion to communicate with each other through different viewpoints based on variant mental models of reality. If a Frenchman may be seen as cognitive-oriented, for example, and if an American may be characterized as psychomotor-oriented, then a Spanish speaking individual must be depicted as affective-oriented. One may easily predict that any confrontation between members

of these three cultures is apt to generate a host of misunderstandings. (Author/JM)

Verbal and nonverbal patterns of communication found in the black community are discussed in this paper. They have been selected on the basis of their potential as interference factors in intergroup communication. A section on black language describes and explains the following categories: rapping, running it down, jiving, shucking, copping a plea, sounding, playing the dozens, signifying, and marking. Besides these specific verbal styles, there are other verbal communication patterns prevalent in black culture such as inversion and loudtalking which are included. Major kinesic patterns (body language) found in black culture are described, along with their significance in an instructional situation. These include eye movements (eye-aversion, eye-rolling, and other uses of eye-movement), hand movement, and walking (the limp stance, pimp strut or pimp walk, black walk, and rapping). In order to achieve an effective level of communication with blacks, the white middle-class teacher is recommended to stop believing that, and acting as if, all black students are inferior or culturally deprived; and to stop believing that, and acting as if, black students must be made over into the superior image of the white middle class. Descriptors—Acculturation, Adult Educators, American Culture, Anglo Americans, Bias, \*Changing Attitudes, Cultural Factors, \*Culture Conflict, \*Ethnic Groups, Human Relations, Instructional Materials, Spanish Culture, \*Teacher Attitudes, Teacher Education, \*Values

Values tend to become distorted at the intercultural level. What is considered "good" in one society may be criticized as "bad" or "incom-

prehensible" in another. For example, American culture tends to value time to the point of obsession, whereas Hispanic cultures subordinate temporal considerations to interpersonal relationships. The resulting clash which will occur between representatives of divergent cultures may then be predicted accurately. It should convince teachers, it is argued, of the necessity to adopt a flexible frame of reference and an attitude of suspended judgment in dealing with any crosscultural circumstances. What is needed, is the ability to look at the world through someone else's eyes and to perceive it in the manner determined by the viewer's own cultural filter. Such a skill is simply a matter of acquiring the needed competences in cross cultural understanding. Without this empathy for other cultures, the effectiveness of an adult educator will be considerably reduced, as a result of restrictive communication at the cognitive, as well as the affective and psychomotor levels. The task of the adult educator is not so much that of "changing" the learners' values as that of helping him (1) acquire an additional and different set of values, and (2) learn to behave differentially according to context. Identifiers—Magnet School Plan, \*Texas (Houston)

On June 1, 1970 The United States District Court for the Southern District of Texas, Houston Division, entered its Memorandum and Order requiring the Houston Independent School District to operate its schools beginning with the 1970-71 school year under an equi-distant zoning plan. The pairings and rezoning as finally ordered were fully implemented by the District at the beginning of the 1971-72 school year. There was, it is asserted, a failure of pairing to maintain an acceptable level of integration over its five-year history, and community dissatisfaction with the

pairings. A community Task Force was appointed to develop an alternative to the pairings. The Task Force presented its report to the Board of Education on February 24, 1975 in which it recommended the use of magnet school programs to replace the pairings and to supplement the integration efforts of the District. The Defendant Board of Education on March 10, 1975, unanimously voted to implement the magnet school concept and appointed an Administrative Task Team for Quality Integrated Education. The Board adopted the Administrative Task Team Report on May 12, 1975, and instructed the school attorneys to proceed with the filing of this motion to amend this Court's Amended Decree of September 18, 1970. The Court ordered that, effective at the beginning of the 1975-76 school year, the Defendants shall implement the Magnet School Plan. (Author/JM)

**Descriptors**—Caucasians, Comparative Analysis, \*Economic Factors, \*Economic Research, Economic Status, \*Housing Discrimination, Housing Opportunities, \*Housing Patterns, \*Negro Housing, Neighborhood, Racial Integration, Residential Patterns, Social Discrimination, Social Factors

This document reports the findings of a national study of black-white differentials in housing consumption. The main issue is said to be whether blacks pay higher prices and/or consume different residential packages than whites as a result of racial discrimination and segregation. Results indicate that blacks purchase different residential packages and pay different prices for the attributes contained in their respective packages. These differences are considered to result from whites' higher income levels, different housing preferences, and willingness to pay a premium for housing in white neighborhoods. Results of comparisons of blacks living in all black neighborhoods with blacks living in mixed neighborhood indicate that the former purchase smaller quantities of residential services, but pay higher prices. These differences are seen to result from variations in the elasticity of the supply of housing for black occupancy and from variations in the residential packages consumed. Since this analysis focuses on the outcome of the residential market transaction process, how the results obtained can be translated into policy programs is said to be unclear. (Author/AM)

**Identifiers**—\*Ohio

This handbook contains an overview of programs along with a five-year fiscal summary of federal support for federally funded educational programs administered by the Ohio Department of Education. Programs include adult basic education, the Comprehensive Employment and Training Act, Elementary and Secondary Education Act, federal surplus property, federally affected areas, major disaster area assistance, National Defense Education Act, school food services, special education, veterans' educational assistance, and vocational education. Each program is described in terms of authority, purposes, participating Ohio agencies, application procedures, state-level responsibilities, local-level

responsibilities, matching requirements, federal support for fiscal 1975, grant award for fiscal 1976, notes, legislative changes, contact names, and local implications. (AM)

**Descriptors**—\*Educational Research, \*International Education, \*Research Utilization, School Administration, \*School Environment, School Location, School Organization, School Personnel, Special Schools, Student Attitudes  
**Identifiers**—\*American Sponsored Overseas Schools, ASOS, Overseas Schools

This publication provides a source of information and research to the people interested in and responsible for American Sponsored Overseas Schools (ASOS). The first section includes an overview of six major categories of research, namely: school setting, school institutionalization; school organization and administration, school program, personnel, and pupils. Each category is treated by three approaches: (a) one or more vignettes to provide fictionalized but illustrative examples of the human element in the ASOS; (b) sets of the author's premises and examples which illustrate the ambience in which the schools exist, and (c) a narrative providing a conspectus of the included research about the ASOS as related to the major category. The second section discusses the research matrix, said to provide a ready reference to many of the common problems and potentials in the ASOS. Included here are the coding system, regional code, simplified coding system, matrix outline, school setting, institutionalization, organization and administration, school program, personnel and pupils. This model classifying pertinent research is considered to provide the serious researcher not only with a means of classifying existing research but also for identifying the voids in the research base. **Identifiers**—Aspira et al v Board of Education City of New York, Civil Rights Act 1964 Title VI, Four Point Memorandum, Lau v Nichols, Serna v Portales

This document provides a detailed discussion of two laws and three court cases affecting the education of non-English speaking children. Title VI of the Civil Rights Act of 1964 addresses equal education opportunities for all Americans. The Four Point Memorandum issued by the Department of Health, Education and Welfare specifically deals with discrimination and denial of services on the basis of national origin. The Lau vs. Nichols legal case was filed in San Francisco to protect the rights of Chinese speaking students who were not receiving adequate education because of their ability to speak English. This landmark case in the movement for equal educational opportunity for non-English speaking people considered to have spurred bilingual education programming. The Serna vs. Portales case continued the push for bilingual education by directing its efforts to Spanish-speaking persons in New Mexico. A court evaluation of the merits of bilingual/bicultural education concluded that (1) bilingual education was the best way of meeting the needs of the Spanish-speaking children, and (2) ordered an expansion of these services.

The Aspira et al vs. the Board of Education case was brought to court in the interests of youngsters born in Puerto Rico or recent adult immigrants who are also parents. The Aspira decision led to a consent decree signed by both parties to provide bilingual programming for New York City children needing help in language. (Author/AM)

Brief descriptions for 45 ESEA Title III projects operating during the 1974-1975 fiscal year are given. Eighteen of these projects have completed their first year of operating with Title III funds. Among these are improving secondary reading, advisement, education by objectives, career education, tapes and techniques for underachievers, early childhood, parent and child enrichment, individualized mathematics, and improved communications. Systematically designed career education, home centered early childhood, learning disability laboratory, individualized instruction for the handicapped, skill training special education students, and complementary instructional motivational programs are among the 15 programs that have completed their second year. Twelve projects have closed out Title III funding and are now totally the responsibility of the local district. These comprise upgrading reading in content areas, drug abuse prevention education, area school vocational guidance, prevention, diagnosis of reading problems, right to read, and early-expanded education for auditorially impaired. Capsule summaries of 14 new projects that began operations in July 1975 are also given. (AM)

**The Historically Black Public College in an Integrated Society.**

Pub Date 24 Oct 75

Note—19p.; Address at the National Urban League inaugural ceremonies (Nashville, Tennessee, October 24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Black Community, \*College Integration, \*Higher Education, Integration Effects, \*Negro Colleges, Negro Culture, \*Negro Education, Negro Institutions, \*Negro Students, Racial Integration, Social Environment

The nature of institutions of higher education and their interaction with the larger society is discussed. The societal environment in which the university operates is said to be characterized by national withdrawal from the goals of equal opportunity and from humane principles that make up the basis for a viable educational system. In light of recent economic and fiscal problems, restricted access to college education for blacks and minorities is said to be occurring. Two important facts about the black college experience are said to be the vital role played by traditionally black institutions and the equally important role played by public institutions. Although the dismantling of dual educational systems is seen as necessary, ways to preserve valuable attributes of those institutions that have historically served the minority community within the framework of integration need to be developed. The concept of integration is said not to be at issue here, but the manner in which integration is conducted. Integration that becomes synonymous with the destruction of historic black institutions and black community strengths is not accepted. (Author/AM)

**[Education and Economics—a Black Minority Point of View.]**

Pub Date 1 Jul 75

Note—24p.; Address at the Annual Meeting of the Education Commission of the States (Kansas City, Missouri, July 1, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Compensatory Education Programs, Economically Disadvantaged, \*Economic Factors, Educational Demand, \*Educational Economics, \*Educational Finance, Equal Education, \*Equalization Aid, Financial Policy, Learning Processes, Low Income Groups, \*Minority Group Children, Minority Groups

This paper comments on a few of the intricate relationships between the dollar, the degree, the society, and the school. Education and economics are said to interact in three ways: on an elementary level of funding an educational system, the influence of economic factors on individuals who are consumers of education, and education viewed as an economic subsystem of the society. These three issues are then considered from a black minority point of view. The necessity for federal financial intervention at the elementary, secondary, and higher education level that is both more extensive and more sharply targeted than has been the case is suggested. The need to get more federal dollars into the hands of the people who need them is sharply stressed. Lastly, it is stated that any consideration of economic barriers to educational opportunity must concern itself with basic societal changes that include a full employment policy, a replacement of the welfare system with an economic security plan, the improvement of schools that serve minorities, and special programs of compensatory education. Descriptors—\*Compensatory Education Programs, Data Collection, \*Elementary Education, Evaluation Criteria, Federal Programs, \*Individualized Instruction, Mathematics Instruction, Measurement Techniques, National Surveys, \*Program Evaluation, Reading Instruction, \*Research Design, Sampling, Statistical Analysis, Teaching Methods

The research design discussed here focuses on four major questions: (1) what the relative effectiveness of well-implemented "individualized" instruction vs. well-implemented "standardized" instruction for recipients of compensatory education in terms of reading achievement, mathematics achievement and classroom climate is; (2) how specificity of treatment of the instructional tasks, taken one at a time and in sequential combinations, relates to cognitive and affective outcomes; (3) how specificity of the treatment of instructional tasks taken along with other variables of concern relates to student achievement; and, (4) what the conditions that contribute to differences in degree of implementation are. Instrumentation for assessing program implementation at both the selection and observation stages of the study has been produced. The sampling and selection design was structured to sample systematically along all basic dimensions including the instructional setting dimension. The use of both the California Achievement Test and selected items from the National Assessment of Educational Progress are recommended as criterion achievement measures. The analytic procedure recommendation for the first study question is a two by two factorial design employing univariate and multivariate analysis of covariance (controlling for IQ and socioeconomic status) on reading, mathematics, and student perceived classroom climate. Identifiers—\*California (Oakland)

This paper summarizes the development of a new approach to survey research in black urban communities, in part by adapting standard techniques. Attention is directed at a group of salient assumptions underlying social science investigations, namely: (1) the universality of majority culture models of attitude structure; (2) sociolinguistic and linguistic styles in black communities; (3) the utility of majority culture cognitive frameworks to understanding black attitudes toward sensitive topics; and, (3) the adequacy of traditional survey research procedures to garner valid samples in urban black communities. Research pursued during summer 1975 involved eliciting a domain of thoughts about television in open-ended interviews with a cross-section of black respondents, refining that to a number of categories, and construction of an attitude scale reflecting those categories. Experienced black interviewers approached black residents of San Jose, East Palo Alto, San Francisco, and Oakland, California, in a variety of settings to ensure a mix of relevant and "irrelevant" factors. The interviewers attempted to structure the intercept as a conversation, so that the black respondents would feel free to utilize a similar communication style. The emphasis was on generating as much information about the cognitive categories people utilize to think about television as possible. (Author/JM)

This report was submitted by Education Turnkey Systems, Inc. and its subcontractor, Kirschner Associates, Inc. and key University of Maryland and other consultants in response to the needs of the National Institute of Education as specified in the Request for Proposal "to develop a Design to Study Individualized Instruction, as part of a general study of compensatory education activities". The ultimate purpose of this two-phase effort is to provide both Congress and NIE with policy-relevant information on the effectiveness and effects of well-implemented individualized math and reading programs as they compare with similar standardized programs. In light of the findings which arose during the design phase, it is stated, two additional major study objects are proposed: (1) to determine the relative cost-effectiveness of the process dimensions of individualized instruction and (2) to determine the degrees to which potentially well-implemented

programs are implemented during the period of observation and in turn, the relationship between degrees of implementation and program outcomes within and among programs. The proposed sampling design requires data from approximately 800 classrooms with equal or proportional representation in each of four categories, defined, for example, by whether or not specific performance objectives are assigned to each student. Identifiers—\*Minority Teacher Recruitment Program, MTRP

This pamphlet provides a brief profile of independent schools, intended for minority teachers who are seeking a new and different teaching experience. It is said to provide answers to questions such as what an independent school is, what independent schools have to offer, who the students are, why there are few minority teachers, how best to serve the minority community, whether independent schools are located in white areas, and what the salaries and other benefits are. Teachers interested in independent education, or who desire additional information are urged to contact the Minority Teacher Recruitment Program, an informal clearinghouse stated to be designed to inform minority teachers of vacancies in independent schools and to announce the availability of minority teachers to member schools. Identifiers—\*California, Elementary Secondary Education Act Title I, ESEA Title I

Coordination, planning, legislation, parent involvement, handling complaints, applying affirmative action and employment practices, preparation of program guides, contribution to consolidated regulations, preparation of materials for the State Board of Education, and other factors involved in the administration of the compensatory education activities are described in this report. Among the programs and services profiled are management service, professional development in education, reading and mathematics, special incentive projects, follow through, compensatory education in state institutions, community services unit, migrant education, guided school visits, school housing aid, ESEA Title I, and educationally disadvantaged youth program. Programs are described in terms of purpose, participants, objectives, eligibility, authorization, funding level and achievements. Evaluation and pupil achievement of compensatory education are seen to reveal definite evidence of the effectiveness of these projects in all six components of language development, mathematics, auxiliary services, parent participation, community involvement, staff development, and intergroup relations. Evaluating Compensatory Education Program Test Results Using Each Compensatory Teachers' Pupils as Subgroups for Analysis.

Connecticut State Dept. of Education, Hartford.

Bureau of Evaluation and Educational Services.

Pub Date Jan 75

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, \*Compensatory Education Programs, \*Educational Assessment, Educational Testing, Grouping Procedures, Group Structure, \*Measurement, Measurement Instruments, \*Program Evaluation, Reading Achievement, \*Student Grouping, Tables (Data), Testing Problems, Test Results

The practice of analyzing all available project children in as large a group as possible is considered not to be justifiable when distinct subgroups of pupils are represented. Instead, the approach suggested here determines the test score gain a pupil achieves from the beginning to the end of the year, with all of the pupil gain scores of a single compensatory teacher being compared to those presented in the Metropolitan Achievement Test (MAT) Gains Tables. These tables present typical gains that should be made on a particular subtest of the MAT, according to the grade level of the pupil and according to whether the pupil's pre-test achievement level is high, average or low. These tables differ from the norm tables provided in the test publisher's manual in that both the pre and post-test were administered to the same pupils to obtain the gain scores. The tables have two major limitations: (1) they are only useful for pupils' test results who are in grade levels 2-8; and, (2) the interval between testing is short. Implementation considerations and implementation procedures are included in the discussion. MAT Gains Tables are presented in this publication. (Author/AM)

Attitude and Achievement as Measures of Effectiveness. Connecticut Compensatory Education Programs.

Spons Agency—Connecticut State Dept. of Education, Hartford. Bureau of Evaluation and Educational Services.

Pub Date Oct 74

Note—90p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Academic Achievement, Attitude Tests, \*Compensatory Education Programs, Economically Disadvantaged, Educationally Disadvantaged, Evaluation Methods, Federal Programs, Mathematical Enrichment, \*Minority Group Children, Program Evaluation, \*Reading Achievement, \*School Attitudes  
Identifiers—\*Connecticut, Connecticut Act, Elementary Secondary Education Act Title I, ESEA Title I

This report investigates the question of whether a combination of attitude and achievement results of pupils can be used in an objective way to identify the more effective reading and math compensatory programs in a state. This question is held to have particular relevance in Connecticut since two-thirds of the state's compensatory programming is aimed at improving reading and math skills. Chapters focus on background and purpose, attitude responses of pupils, reading and math gains of pupils, combining attitude and achievement of pupils, additional findings, discussion of results, and value of the evaluation design used in the study. Findings indicate a low and non significant association between pupil attitude and achievement test results. Evidence of this study is considered to indicate that school districts spend more of their compensatory dollars to help those eligible children who are furthest behind in achievement. Other findings showed that reading gains equaled expectations, that poor children achieve less, and that concentration was least in large schools. More emphasis is said to be needed in selecting those most in need of help. Results are reported in the form of tables listing the outcomes of statistical analyses, together with brief descriptions. The Educational System as a Reinforcer of Institutionalized Racism.

Pub Date 75

Note—27p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Educational Benefits, Educational Discrimination, Educational Equality, Educational Needs, Educational Objectives, Educational Philosophy, Educational Planning, \*Educational Policy, Educational Practice, Educa-

tional Trends, \*Equal Education, Racial Attitudes, Racial Discrimination, \*Racism, \*Reinforcers, \*Socialization, Social Reinforcement

The educational complex is seen to act as a subsystem of the overall societal system whose main function is said to lie in the socialization of individuals for membership in the larger society. The socialization process, including mastery of norms, beliefs, attitudes, and behavioral patterns of the society, are seen to be permeated with institutionalized racism. As a vehicle of the socialization process, the educational system is considered to incorporate racist norms, standards, behavioral patterns, morals, and sense of social position in such a manner that the socializee is unaware of his absorption of a curriculum that is fundamentally racist. While American institutions contribute to institutionalized racism, the focus on the educational system has particular relevance since minority groups, ethnic minorities, and poverty groups attach high significance to education, particularly as the road to upward mobility. The major conclusion formulated from the evidence presented is that a pervasive and effective institutional racism permeates the entire education system. (Author/AM)

Socialization of Black Children: A Critical Review of the Literature on Parent-Child Relationship and Socialization Patterns Within the Black Family.

Pub Date 75

Note—84p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Child Care, Child Development, Child Welfare, Environmental Influences, Family Background, Family Characteristics, Family Environment, Family Involvement, Family Life, Minority Group Children, Models, \*Negro Institutions, Negro Role, \*Negro Youth, \*Parent Child Relationship, \*Social Development, Social Factors, \*Socialization

This review examines some of the basic sociological, psychological, and philosophical issues of childhood socialization, and briefly discusses some of the significant influences which impinge upon all children as they grow and develop within their society, sub-culture, and family. The stated purpose of the review is to provide a perspective for examining the basic assumptions which underly current research on parent-child relationships within the black family. Research in the 70's concerning the socialization of black children that also addresses various aspects of the influences in the black child's development is also examined. Research in general is said to be characterized by poor methodology, to ignore black families, and to concentrate on the black poor, father-absent families, the mother-child dyad, and to have an ethnocentric approach. The literature is seen to be discussed in terms of popular but misleading assumptions that seem to be explicitly involved when hypothesis are made concerning socialization patterns within black families. What are stated to be more promising approaches are also pointed out and two recent research projects are described in detail. In conclusion, the paper suggests a black child family-society interaction model said to be useful in the conceptualization of the socialization process, policy making, and program planning. Descriptors—Bilingual Education, Court Litigation, Integration Litigation, \*Integration Plans, Parent Conferences, Parent Participation, Parent School Relationship, Parent Teacher Conferences, Public Schools, \*Racial Discrimination, Racial Integration, School Community Cooperation, \*School Districts, \*School Integration, School Responsibility, Vocational Education

Identifiers—\*Massachusetts (Boston), Morgan v Kerrigan

Findings of fact and conclusions of law that constitute many but by no means all of the factual and legal underpinnings of the court's student desegregation plan and related remedial orders are described. Numerous findings descriptive of the Boston public school system, its facilities, student body, curriculum, administration and the like, are considered to appear in the plan itself. The memorandum of decisions contained here deals mainly with the reasons for particular features of the desegregation plan that have been of major concern to the parties. Major headings include an introduction, prior proceedings, findings and conclusions, plans submitted by the parties, general principles governing remedy, school districts, guidelines for assigning students, examination of schools, school closings and capacities, magnet schools and programs, citizens participation, monitoring, reporting and conclusion. The plan and the demands of its implementation on the people of Boston are seen to be as diverse and complex as the needs of the city's schools. The student desegregation plan is also included in this document. Its major categories are: the community school districts, the citywide school districts, vocational education, guidelines for assigning students, transportation, cost considerations, citizen participation, monitoring, reporting timetable for implementation, further remedial orders, and retention of jurisdiction.  Identifiers—\*Early Push Program, New York (Buffalo)

This curriculum guide addresses the physical, intellectual, and emotional growth of children. Four categories, those of physical growth, social growth, emotional growth, and development of communication skills, are said to have been selected in an effort to promote total development. Each category is described in terms of desirable concepts, along with accompanying or matching behavioral objectives. Each child may not be ready to perform the stated behavioral objective, even by the end of the school year. Some objectives are more appropriate later in the school year. However, these are included as goals around which the learning program is developed. The behavioral objectives for a given concept are sequenced in order of difficulty. A brief introduction to each component is provided. Since room arrangement is said to be closely allied with the instructional program, a basic list of equipment, a sample floor plan, and suggestions for room arrangement are also included. Parent participation activities which are said to be essential to the success of this program are described. To provide an example of a typical daily program for four year olds, a case study is presented. (Author/AM)

 This study successively tests simple modeling, normative influence, and conditional positive

modeling hypotheses about the working mother's effect on her daughter's work orientation. Four hypotheses are postulated and tested separately by race to examine possible racial differences. The most complex hypothesis is that if modeling is conditioned by other characteristics of the mother than those considered, that modeling will be heightened by the following two characteristics: increasing the work orientation of girls with working mothers, and decreasing the work orientation of girls with nonworking mothers. It is also hypothesized that white girls' work orientation is more likely than black girls' to be a function of commitment to the exclusive homemaker role. Data from a 1973 urban population of black and white high school girls and a sample of their mothers revealed no evidence of either simple positive modeling or normative influence, but simple negative modeling occurred for black girls whose mothers worked in blue collar jobs. Conditional positive modeling is evident for all girls. Findings are contrasted with those from studies of male achievement socialization, which are said to stress the importance of direct normative influence. (Author/AM)

 Identifiers—\*Emergency School Aid Act

This report summarizes the national implementation and impact of the Emergency School Aid Act (ESAA) Basic and Pilot Programs during the 1973-74 school year—the first year of their operation in school districts across the nation. Sections deal with evaluation sample selection; district, community, and school characteristics; student and family characteristics; resource allocations; funds and services; basic program desegregation; student gains in achievement test scores; exploratory analyses; and summary of results. Two important facts are stressed: (1) that this report deals only with the first year of implementation, and (2) that because of difficulties in obtaining outcome data that might more directly reflect desegregation activities in the first year of the study, the present report is based on a single set of criterion measures - achievement test scores in reading and mathematics. Findings indicate that: (1) the assumption on which the legislation was based is, indeed, associated with educational disadvantages; and (2) that students in minority-isolated schools and many students in desegregated schools have needs associated with their educational and economic disadvantage that are directly related to the objectives of the program.  Identifiers—Third World

The second in the series, this selected annotated bibliography deals with new and recently

discovered materials that address racism, Blacks, Chicanos, native Americans, and multi-ethnicity. This bibliography is considered to be not all inclusive but to reflect only on that material which is considered to be most representative of the realities that relate to the involvement and contributions of Third World groups in the development of the United States, and the climate of the times during which such involvement and contributions occurred. Listing of materials usable at the elementary level are increased over those in Volume I. Contents deal with racism, including printed materials, film, filmstrips, records and tapes; Black materials, including printed matter, films and filmstrips; Latino materials, including printed matter, films and filmstrips; native American materials, including printed matter, films and filmstrips; and multi-ethnic printed material. A list of Third World publishers is included. (Author/AM)

 Descriptors—\*Facility Improvement, Financial Support, Foundation Programs, Housing Deficiencies, Housing Discrimination, \*Housing Industry, \*Housing Needs, \*Housing Opportunities, Housing Patterns, Low Rent Housing, Middle Income Housing, \*Private Financial Support, Public Policy, Racial Integration, Slum Environment, Social Integration, Urban Renewal Agencies, Urban Slums

This report describes some of the major efforts undertaken by the Ford Foundation to provide decent housing. Their approach to the problem is said to have evolved through three interlocking stages: increasing the supply of housing through support for technical advisory services to nonprofit groups engaged in building low and moderate-rental housing for the poor, minorities, and the elderly in both urban and rural areas; the support of open housing through assistance to groups that spearhead the fight against residential segregation; and inner-city renewal. Topics addressed are: housing development, the role of nonprofit organizations, the housing packagers, rural housing, state housing corporations, new options in public housing, open housing, the public policy arena, equal housing, integrating apartments, open housing in Connecticut, the Denver experience, rebuilding the slums, the New Detroit Committee, and new directions in housing. An appendix includes grants in housing from 1958-1970. Among new programs in the housing field

are those considered to be designed to improve the existing inventory of housing through better management and maintenance and by extending individual and cooperative home ownership. The Foundation is also reported to be working on housing within the framework of community development. (Author/AM)

Descriptors—Affective Objectives, Art, Cultural Background, Cultural Factors, \*Curriculum Enrichment, Dance, Elementary Grades, Elementary School Curriculum, \*Elementary School Students, Ethnic Groups, Ethnic Origins, \*Ethnic Studies, Handicrafts, \*Italian Americans, Literature, Music, Religion, Social History, Student Centered Curriculum  
Identifiers—\*Michigan (Detroit)

This study is considered to have been designed as an experimental plan for upper elementary grades with the hope that it would be tried, revised, expanded, and improved upon. Two factors are stressed: communication with children in the affective domain, and drawing upon resources and people from the children's immediate environment. The length of the ethnic studies unit is eight weeks, one topic per week. Class periods are 30-40 minutes daily, with the fifth day used for review and summary. The model unit is Italian culture. The contents of the unit include introduction, language, geography, music, art, literature, dance, fashion, clothes, crafts, religion, holidays, foods, Italians past and present, and the culmination - Festa Italiana. Each weekly unit is described in terms of a series of objectives and activities for those objectives. The unit is expected to be field-tested in East Detroit and other Southeast Michigan schools in 1975. It is stressed that the material in this document is in a working stage form. (Author/AM)

Identifiers—\*Michigan (Detroit)

The purpose of this paper is to outline a rationale and procedure for surveying and mapping the ethnic composition and community characteristics for local units both in the City of Detroit and neighboring suburbs. Both educational and practical benefits are claimed for this project. Data will be collected for a small section of the city. Generally such data are not available in published reports since data collection units usually are not at such a fine scale. The nature of the data it is proposed here to collect differs from that available in the census and most other published reports. The ethnic map of local areas will be of value, it is argued, since it will not only portray the ethnic make-up of the area but also will show the degree to which spatial clustering has been maintained. The monograph is divided into five sections. The first is an outline of the rationale for conducting a community survey. The second, a theory section, focuses on ethnicity, neighborhood, and community. The third section outlines methodological considerations for mapping and surveying a community. Suggestions for ethnic research projects in the Detroit area are then discussed. Finally, a sources section follows, with references and information related to Detroit ethnic bibliography sampling, questionnaire design and interviewing technique, and data and agency sources. Identifiers—\*Bicentennial, Michigan

This booklet is intended to provide teachers with suggestions and ideas for various activities they can undertake with students to acquaint them with the ethnic heritage of their country, their city, and themselves. Suggestions and ideas are modifiable or adjustable to fit each individual classroom situation and teaching style. The booklet is not intended as a curriculum or teachers' guide for a unit or class in ethnic studies. Suggestions and ideas presented have the aim of helping an elementary school child appreciate his heritage and tradition. Part I addresses the necessary background in the study of ethnicity and explores "who am I; where did I come from, and reasons for immigration." Part II addresses "what is my heritage," focusing on the ethnic festival, including a series of activities such as ethnic parades, potluck suppers, and celebrating a holiday a month. It is concluded that ethnic studies represent one way of helping children develop a positive image. The inclusion of ethnic studies into the school curriculum is urged. (Author/AM)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Oregon (Portland), Project FOCUS

This guide is based on the experiences and procedures generated in the FOCUS Project at a Portland, Oregon high school. The document includes an overview which addresses the basic FOCUS philosophy, overall goals and objectives, staffing, and student audience. The instruction section contains the curriculum model, cross peer instruction, utilizing community resources, and performance objectives. Counseling and Guidance functions, analyzing student attitudes, anecdotal records, and attendance procedures are included under counseling and guidance. The support component addresses the physical resources, utilizing school resources, financial resources, and student teaching programs, while the management component addresses evaluation design, dissemination, and staff development. Among the special procedures listed are field trips, emergency health procedures, periodic parent contact, media-aware and materials, and "unclassroom" policy. Ready-made answers to the ten most frequently asked questions regarding FOCUS are provided. General considerations pertinent to transportability of the FOCUS model seen to be helpful to others planning or developing similar programs are discussed under the headings of do's and don'ts. Appendices include special forms used in FOCUS, and an outsider review of the program. (Author/AM)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Oregon (Portland), Project FOCUS

The goal of the FOCUS project is the development and implementation of an alternative school program for high school students which will provide relevant opportunities for student growth, both personal and academic, and thereby reduce the number of dropouts, academic failures, and pupil indifference and disenchantment. Part I of the document deals with project information and project descriptions, including the context, effectiveness, costs, dissemination, and others. Part II addresses project effectiveness and success, citing each objective and providing for each a description of needs assessment and findings, activities for objective attainment, evaluation design, procedure, sampling technique, instruments, present evidence of objective attainment, and conclusions. Part III includes cost information. Part IV addresses exportability. Appendices include evaluation plans, evaluation reports, rating scales, and pre/posttest scores for individual students. The FOCUS Project is considered to have been accepted as a viable, educationally credible program capable of providing learning experiences congruent with the needs of students across all high school grades. Recommendations for Cultural Pluralism in the School Curriculum in Desegregated Schools.  
Michigan Education Association, East Lansing.

Pub Date 75  
Note—12p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—Cultural Awareness, Cultural Differences, Cultural Factors, \*Cultural Pluralism, Curriculum, \*Curriculum Development, \*Curriculum Planning, \*Ethnic Groups, Ethnic Studies, Guidelines, Minority Groups, \*School Segregation, Sociocultural Patterns  
Identifiers—Third World

Addressing the issue of desegregation and its implications for cultural pluralism in the school curriculum, this report states that it is in the desegregated setting that the institution through its officials, staff, and curriculum can interact with all children in a manner which demonstrates respect for student and his heritage, recognizes the needs of students, facilitates the acquisition of survival skills, and encourages individual and group problem solving to improve conditions of life for all persons. A brief discussion focusing on the rationale for cultural pluralism in the school curriculum provides comments by persons who have researched school curricula and found them inadequate relative to their treatment of Third World people. A listing of what some state groups are doing about cultural pluralism is provided. A series of recommendations for developing a curriculum that speaks to the realities of cultural pluralism are listed. In addition to modifying the instructional material, other facets of the school environment that must be present if cultural pluralism is to be realized are noted. Some of the possible strategies that the educational units or institutions might employ in institutionalizing the recommendations are delineated. (Author/AM)

This program is stated to have been designed as a new state-administered categorical aid program, with the purpose of making available additional state educational resources to students who have or are likely to have low levels of achievement, especially in relation to social and economic factors. Chapters include an introduction which describes the history of the program and accountability development; evaluation procedures with limitations of the evaluation results; enrollment and financial statistics; program characteristics; program evaluation with an analysis of program operation and program effects; evaluation of program objectives; results of program objectives; and evaluation of pupil achievement. Results obtained from evaluation results submitted by each project indicate that this program is considered generally effective with the greatest impact on students, with parent and teacher groups also benefiting from the program. More than one quarter of the student population is evaluated as meeting or having exceeded 100 percent or all of the objectives which were established for them. (Author/AM)

**Identifiers**—\*Elementary Secondary Education Act Title I, ESEA Title I, Rhode Island

This bulletin provides information on financial and participation statistics, including the number of programs, Title I programs, State compensatory education programs, and joint State and Title I funded programs. Children served are given in terms of grade, ethnic/language group characteristics, and public and non-public participation. Program characteristics are described in terms of parent advisory committees, time of operation, personnel, program activities, and training programs. Summer programs are described in rela-

tion to financial and participation statistics, participation by grade, ethnic/language group composition, program characteristics, time of operation program activities, professional staff, and training programs. Comparisons between the current year and previous years is not possible in some instances due to a modification of data-gathering procedures which now aims to gather more detailed data. It is recommended that the modification process continue and that particular attention be paid to a number of issues, among them being the use of standardized tests for math programs, the conversion of raw scores on reading and math to standard scores, and an examination of the modified data for the purpose of identification of variables which appear to be related to program effectiveness. **Descriptors**—\*Bibliographies, \*College Programs, \*Course Descriptions, Cultural Centers, \*Educational Needs, Educational Philosophy, Educational Resources, Ethnic Groups, \*Ethnic Studies, Humanism, Instructional Materials, Interdisciplinary Approach, Program Development, Program Proposals, Resource Centers

This report is in four sections. The first describes the needs for ethnic studies, their role, how they can best be effected, and the philosophy behind them. The interdisciplinary nature of ethnic studies is noted: that they must draw on many disciplines within the social sciences and humanities. And as with all interdisciplinary programs, it must be established that the combined multi-academic program is as scholarly and strict as its individual parts; strong scholarly work in ethnic studies is needed. Multicultural ethnic institutes should be created which would function as resource centers within schools, subject to the rigorous criteria of other academic disciplines. The "outreach" responsibilities of ethnic studies center -- to work with local ethnic communities and to provide adult education -- are emphasized. Discussing the philosophy behind ethnic studies, European history and the origin of humanities are drawn on in the second section. The third section of this working paper includes some sample courses in the various studies, submitted by professors who have taught such classes. In addition, the fourth section gives a listing of ethnic studies resource centers. There is also an extensive bibliography, categorized by ethnic groups, appended to the report. (Author/JM)

Predicting IQ from the Young Child's Everyday Experience.

Spons Agency—Carnegie Corp. of New York, N.Y.; National Institutes of Health (DHEW), Bethesda, Md.; Office of Economic Opportunity, Washington, D.C.

Pub Date Oct 75

Note—38p.; Paper presented at the Symposium "Soziale Bedingungen für die Entwicklung der Lernfähigkeit" (Bad Homburg, West Germany, October 1-4, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Early Experience, Human Development, \*Intellectual Development, Intellectual Experience, \*Intelligence Quotient, Learning Activities, \*Learning Experience, Learning Processes, Longitudinal Studies, Maturation, Mental Development, Predictive Measurement, \*Predictive Validity, Preschool Children, Sensory Experience, Social Experience, Thought Processes

The present study states as its purpose the delineation of everyday transactions with the environment of a group of children observed longitudinally in their own homes and neighborhoods from age one to three. This research is considered to have been designed to answer: (1) what types of experiences are intellectually valuable to the young child; (2) whether and when it is important that he construct such experiences for himself as opposed to receiving them from his environment; and, (3) whether and when it is im-

portant that he encounter such experiences in context in which he relates to the human in contrast to the non-human environment. Topics addressed are: sources and situations associated with intellectual experiences, the interactor as a source of the child's intellectual experiences, television as a source of the child's intellectual experiences, intellectual competence (tested and spontaneous), the interactor as participant in the child's intellectual experiences, and the process of interaction. It is concluded from the supporting data that the class of intellectually valuable experiences that are observed in this study are more deeply implicated in the child's development of intelligence insofar as this is measured by IQ than other types of everyday experiences, and that it is the incidence and sources of the former type of experience that must be examined in detail if one is to understand how everyday experience becomes the basis for his development of intellectual competence. The primary purpose of this project is stated to be to meet the expressed need for a more complete and continuous program of high school orientation for eighth grade students about to matriculate into high school. In order to achieve the objectives, a wide range of personnel, including elementary and high school teachers, school counselors, administrators, parents, and community representatives, along with the students were involved in this program. The narrative report is separated into sections which deal with such topics as feeder schools, objectives of the project, program activities, evaluation format; evaluation check list tables, findings, follow-up study, summary of findings, conclusions, sample evaluation sheets; change in the local educational agency and cooperating agencies; project continuation; and dissemination activities. The analysis of findings is organized on the basis of the six objectives of this program and the third year follow-up study of the students involved in this project. The tables for all three years of the project are included in the analysis. In the discussion of each objective, the original (first year) objective is stated, followed by the objective utilized during the remaining two years. (Author/AM)

**Identifiers**—\*Michigan

The Ethnic Heritage Experience, a training program for educators and other persons who are interested in the development of new curriculum, interpersonal relationships, and increased cultural awareness that may be gained through Ethnic Studies, was developed by the Michigan Ethnic Heritage Studies Center under a Title IX, Ethnic Studies grant, and field tested for one year throughout Southeast Michigan. Participants for

the pilot training program were drawn from public and private schools as well as from district administrative offices and universities and colleges. The training program is considered to be designed to increase self-awareness of the multicultural community, and awareness of local and nonlocal resources related to ethnicity. It also provides an introductory historical and social perspective from an academic standpoint through a series of readings and discussions on ethnic studies, and introduces activities relevant to the development of this discipline in the classroom. The basic scope of the training program is five workshop sessions. Although said to be designed to be carried out in five sessions, the activities and materials can be presented in either fewer compressed presentations, or additional sessions, according to the needs and convenience of those involved. The Validation of a Scale Designed to Measure Cultural Attitudes.

Pub Date 75

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Anglo Americans, \*Attitude Tests, Cultural Awareness, Cultural Background, Cultural Factors, Cultural Images, \*Elementary School Students, Item Analysis, Measurement Techniques, \*Negro Culture, \*Puerto Rican Culture, \*Student Attitudes, Test Construction, Test Reliability

Identifiers—Cultural Attitude Scales

This document comprises two papers. The stated purpose of the first paper was to describe the development of the "Cultural Attitude Scales" (CAS), a pictorial measure designed to assess attitudes toward the black, Puerto Rican, and Anglo-American cultures. The development of the CAS encompassed: (1) the derivation of an item pool from interviews and discussions with parents, pupils, and teachers of each of the target cultural groups; (2) systematic selections and selections by a group of adolescent student judges representing each of the target cultures; and (3) item analysis based on the responses of 336 students in the elementary grades representing these three cultures. The end product was a scale of 15 pictorial items for each of the three cultures with Likert-type response options in the form of faces. The stated purpose of the second paper was to report a study designed to determine the reliability and validity of the CAS using a sample of 330 Anglo-American, black American, and Puerto Rican pupils in grades 1-6. Evidence of construct validity was revealed in the pattern of the mean scores for each cultural group in the same sample of pupils. Evidence of criterion validity were revealed in terms of its statistically significant relationship to the results of a teacher rating scale ( $r=.32$  to  $.46$ ). (Author/JM)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, Georgia

This report provides descriptions and statistics on Georgia's ten Youth Development Centers designed for the care of delinquent children. Title I courses include business education, cultural enrichment, small appliance, furniture repair, and basic skills, with an emphasis on the latter. Results of the enrichment courses fall in the cognitive, affective, and psychomotor domains. Gains such as increased knowledge of jobs available and training necessary for each, improved peer relationships, and development of marketable skills are reported. Program content is said to be determined through a needs assessment which takes

place at each center. Performance objectives are written for the programs once needs and priorities are established. This area is stated to be of greatest potential for the centers. Although some centers state objectives in limited, observable, and behavioral terms, other centers state their objectives in non-behavioral terms establishing no definite criteria for measuring the impact of these programs. Another area of potential for the entire system is said to be that of instructional activities and methods. The incorporation of a more comprehensive system of describing instructional activities and methods is seen as a way to remedy the situation. Additional areas of possible common interest for all the centers are said to be systems used for scheduling and patterns of organization. (Author/AM)

Title I Outstanding Programs, FY 74-75 in Georgia's Schools.

Georgia State Dept. of Education, Atlanta. Div. of Compensatory Education.

Pub Date 75

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Basic Skills, Compensatory Education Programs, \*Early Childhood Education, Elementary Education, Elementary School Students, \*Federal Programs, Kindergarten, Mathematics Instruction, \*Program Descriptions, \*Program Guides, Reading Programs, Remedial Instruction, Writing Skills

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Georgia

Most school systems in Georgia received some sort of assistance during fiscal years 1974 and 1975 from Title I of the Elementary and Secondary Education Act. Since its passage in 1965, Title I has been the major federal funding source for education, providing a broad range of services. The aim of Title I is to serve culturally and economically deprived students. Georgia's FY 75 allocation for Title I provided more than \$55 million to the State. Over 150,000 students benefited from the funds, with almost all school systems receiving some sort of assistance. With so many systems involved, it is stated that it is considered not practical to feature each program in this document. The 23 projects described in this report of FY 74-75 represent the range of instruction offered through Title I, and show how some projects labeled outstanding serve their students. Projects from FY 75 are shown first, followed by FY 74. All address the problem of how to give students the help they need to "catch up" in the basics—through reading, writing, math or kindergarten. Title I in Georgia: Annual Evaluation Report 1973-74.

Georgia State Dept. of Education, Atlanta.

Pub Date 75

Note—109p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

Descriptors—Basic Skills, Communication Skills, \*Compensatory Education Programs, Cost Effectiveness, \*Demonstration Programs, Economically Disadvantaged, Educationally Disadvantaged, Educational Programs, Expenditure Per Student, Federal Programs, \*Minority Group Children, Preschool Programs, Program Costs, Program Descriptions, \*Program Effectiveness, \*Program Evaluation, Reading Programs, Socially Disadvantaged

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I, Georgia

This evaluation report identifies recent trends of Title I and examines their cost. The question said to be addressed is whether Title I financed activities in Georgia have any positive effect on the learning outcomes of participating children. Chapters deal with basic statistics for FY 74, pupil participation, expenditures, impact on achievement, analysis of objectives, other facets, exemplary programs, summary, and recommendations. The summary section is discussed in terms of participation, expenditures, and evaluation. Recommendations include the following: that Title I in Georgia be continued, that the concentration on the improvement of basic skills for students be increased, that local educational agencies strive for more formal, more formative evaluation efforts, and that compensatory aid to education be continued on the basis of three-year

funding segments rather than the present one-year segment. More system-oriented approaches that define areas of student needs are seen to be the trend. (Author/AM)

Education and the Earnings of Poverty-Area Residents.

Wisconsin Univ., Madison. Inst. for Research on Poverty.

Spons. Agency—Manpower Administration (DOL), Washington, D.C.; Office of Economic Opportunity, Washington, D.C.

Report No—IRP-DP-298-75

Pub Date Sep 75

Note—30p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Comparative Analysis, Economically Disadvantaged, Economic Disadvantage, \*Educational Background, Educational Benefits, Educational Demand, \*Educational Economics, Educational Opportunities, Educational Supply, Income, Investment, Low Income, \*Low Income Groups, \*Occupational Surveys, \*Poverty Research, Racial Differences, Social Opportunities, Socioeconomic Status, Training

This paper employs data from the Census Employment Survey (CES) to analyze the effect of education on the earnings of poverty-area residents. Section I compares the definitions of the poverty area used by this survey with that of the Survey of Economic Opportunity (SEO). Section II examines their implications for truncation bias. In Section III, the CES data are described and the effect of education on the earnings of poverty-area residents is estimated. It is shown that for the sample under consideration, education has a significant impact on the economic welfare of both whites and blacks despite the presence of truncation bias. It is concluded that to say that education and training are profitable investments is not to say that they are the optimal investment. The large impact of industry on employment in the regression analysis is considered to suggest that policies that alter labor demands may yield higher return to poverty-area residents than policies that emphasize education and training. An Inquiry Into Asian American Preschool Children and Families in Los Angeles. Asian American Education Project: Preliminary Report.

California Univ., Los Angeles. Graduate School of Education

Pub Date Jul 75

Note—132p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—\*Asian Americans, Chinese Americans, \*Cognitive Processes, Ethnic Groups, Family Structure, Filipino Americans, Hawaiians, Japanese Americans, Korean Americans, Language Development, \*Learning Characteristics, Maturation, Mental Development, Minority Group Children, Parent Child Relationship, \*Preschool Children, Psychomotor Skills, Social Development, \*Socialization

Identifiers—Asian American Education Project, \*California (Los Angeles)

This report presents the preliminary findings of an in-depth study of small samples of Japanese, Chinese, Korean, Filipino, and Hawaiian children and their families living in the Los Angeles metropolitan area. Children's learning characteristics and style as well as their socialization for schooling prior to their entry into formal public schools are investigated. Section 1 reviews the literature, while Section 2 reviews the methods used. Section 3 is divided into seven parts. Each part presents a preliminary analysis of the data collected. Child testing, observations of test-taking behavior, mother-child observations, and home interviews are described. Section 4 offers recommendations for future inquiry. Recommendations are divided into two general areas. Firstly, project reports are outlined, and then directions for future inquiry are suggested. Among the former are patterns of learning characteristics in each ethnic group, patterns of family socialization, mother-child interaction, and language behavior of child. Among the latter are a replication of the present study, studies of learning characteristics, studies of Asian American families, and the relationships between verbal and

nonverbal assessments of competence.

Descriptors—Civil Rights, \*Comparative Analysis, Data Analysis, Educational Policy, Elementary Grades, Metropolitan Areas, \*National Surveys, Racial Segregation, School Districts, \*School Integration, \*School Segregation, Secondary Grades, Social Discrimination, Statistical Data, \*Trend Analysis

This paper reports work in progress concerning student desegregation among elementary and secondary schools in districts regardless of the source of segregation, and between school districts for the period of 1968-73. The data sources, the statistical reports collected by DHEW, are stated to allow for a detailed statistical analysis of the status and trends in school segregation by race throughout the U.S. First, the state of racial integration among schools within a district in 1968 is examined, followed by an examination of the changes that occurred over the period 1968-1973. The differential changes that occurred over that period of time in different kinds of school settings—in different regions of the country, in school districts of different sizes, and in particular large cities—is seen to be of special interest. Data indicate that, by 1968, desegregation of schools was a far from accomplished task in cities and towns of all sizes in the South, but that in the largest cities, it was equally high in many places where dual school systems had never existed: yet the trend for the next four years tends toward desegregation. It is concluded (1) that the emerging problem with regard to school desegregation is the problem of segregation between central city and suburbs, and (2) that current means by which schools are being desegregated are intensifying, rather than reducing the problem. Descriptors—Admission Criteria, Ancillary Services, Bibliographies, Counseling, Curriculum, Educational Assessment, Educational Innovation, \*Educational Programs, Educational Research, Evaluation Needs, \*Higher Education, Instructional Materials, Organizational Development, \*Program Content, Program Development, \*Program Evaluation, Research Problems, Testing, Tutoring

Identifiers—HEOP, \*Higher Educational Opportunity Programs

A summary report of the available literature on research in the principal components of Higher Educational Opportunity Programs, (HEOP) i.e. curriculum, instructional techniques, admissions policies, and others. This paper focuses on the discussions of HEOP's organizational format, materials, innovative educational techniques, and philosophies or theories of learning which have significant impact on student performance. A secondary focus is the identification of studies that have been done on the parts of the HEOP programs, individual counseling, tutoring, testing, and other supportive services aimed at academic development of the students. This report also identifies evaluative studies of Higher Educational Opportunity Programs which explore the degree of success and effectiveness of the program. Bibliographies are provided for sections on curriculum and instruction, tutoring, counseling, testing, and instructional program policies. The dilemma for these programs is held to be in how to produce substantial evidence of their contribution when their funding does not provide for this sort of research. (Author/AM)

**The Urban School Administrator -- A Black Perspective.**

Note—18p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Administrative Personnel, \*Administrative Problems, Chief Administrators, Communication Problems, Discipline Problems, \*Negroes, Negro Leadership, \*Negro Role, Negro Stereotypes, Racial Discrimination, \*School Administration, School Personnel, School Supervision, Social Problems, Urban Schools

Blacks are said to be often called upon to serve in difficult administrative positions located in school districts with financial difficulties where personnel and/or students are in revolt, where discipline is non-existent, where academic achievement levels are low, and where the community is divided. Major problems that arise when examining the urban school administrator from a black perspective are: the brief tenure of superintendents and other administrators, the urban school administration's reluctance to change, the lack of black people serving on school boards, and the lack of faith in education. Among the challenges and needs of urban school administrators listed are: (1) quality of education to enable all students to meet and deal with society; (2) a redirection of the school's focus from tax burdens to useful tools for the populace; (3) a provision of quality education for all students; (4) to instill in students interest in education; (5) to issue self-challenges; (6) to eliminate segregation; and, (7) to recognize that the present educational efforts are dysfunctional. Issues such as the future of the predominantly black urban center, black education in the North, urban school problems as compared with rural or community systems, federal financing, and revamping of the school curricula are discussed. Pub Date Aug 74

Grant—OEG-0-70-1816(7251)

Note—160p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

Descriptors—Child Development, \*Conference Reports, Cultural Disadvantage, \*Disadvantaged Environment, \*Disadvantaged Youth, \*Educational Problems, Environmental Research, Heterogeneous Grouping, Homogeneous Grouping, Labeling (of Persons), Language, \*Learning Disabilities, Learning Experience, Learning Modalities, Linguistics, Research Problems, School Role, Sensory Deprivation

The present report on the sensorium includes the general format, hypotheses, procedures, and contributions of the participants. For the purpose of the study, different sets of variables, hypotheses and procedures were chosen. The variables included the collective and overall perceptions of individuals representing various academic disciplines. It is hypothesized that professionals representing various disciplines related to the problems of deprivation as perceived here would substantiate a number of points -- that the syndrome of deprivation and disadvantage is universal and affects all in general and greater in specific groups of individuals within a given time and space, and that stylistic features displayed by individuals under deprived conditions are universal. Issues discussed in sensorium are: labeling, types of learning; disadvantaged children; teaching styles and methodologies; effect of the schools on children; language/linguistics; community; school relevancy; segregation/integration; children's growth and development; dominance theory in sociology change within the schools; the ideal school; homogeneous/heterogeneous school groupings; observation of the child; evaluation of the child; evaluation of school programs; teacher preparation and behavior; and survival and institution. Identifiers—\*California (Alum Rock)

A brief review of a school system in Alum Rock, California that uses the voucher, this paper focuses on an educational strategy intended to maximize the school's responsiveness to the expressed needs of the parents. The ideas and values underlying the development of the voucher school, the problems of operationalization, as these are said to influence the measures used in the research cited, are discussed. The paper also deals with (1) some of the Alum Rock data on rates of parental participation, where the indices of participation include both school and non-school context and rely on both attitudinal and reported behavioral measures of participation; and (2) some correlates of parental participation such as education, ethnicity, income, and occupation in the voucher schools, drawing inferences about the implications of these varying rates of participation on the educational processes shaped by the voucher school system. The pattern of findings is said to be interpretable in terms of social class differences, parental participation being of key importance in the voucher school plan. The intentions of the planners of the voucher school system are considered not to have been fulfilled in the Alum Rock school system by the time of its first evaluation. (Author/AM)

**Identifiers**—\*Milliken v Bradley

Six papers from a variety of related disciplines discuss basic issues involved in Milliken vs Bradley, the papers reflecting the following areas: legal implications, political science perspectives, educational implications, housing implications, economic implications, and implications for desegregation centers. Scholars and authorities comment on each of the papers. The report is divided into six major sections, one for each of the subjects covered. Each section contains the pertinent paper, followed by the portion of the transcript dealing with the subject matter, including the author's summary, the remarks of the reactors, and an interchange among them and the Civil Rights Commissioners. Papers included are: Milliken vs Bradley: the meaning of the constitution in school desegregation cases; the political implications of Milliken vs Bradley; a sociological view of the post-Milliken era; Milliken vs Bradley and residential segregations; minority education; some economic questions; and, Milliken vs Bradley; implications for desegregation centers and metropolitan desegregation. **Descriptors**—Comparative Analysis, \*Educational Benefits, Educational Disadvantage, Educational Economics, Educational Environment, \*Educational Equality, Educational Finance, \*Educational Opportunities, Educational Policy, Equal Education, Income, Racial Differences, Sex Differences, \*Social Mobility, \*Social Opportunities, Social Stratification

These two volumes bring together writings on technical and scientific problems such as distributional justice, the impact of government policy on equality between generations, and the viability of economic policies. Volume 1 encompasses four areas. Area 1 is composed of background papers including the major policy issues of education, inequality and life chances, inequalities in the distribution of education between countries, sexes, generations and individuals, and inequality in the distribution of personal income. Area 2 covers the distribution of educational opportunity. Area 3 addresses educational policy options and includes papers on strategies for educational equality and distributional impact of methods of educational finance. Papers on social mobility and equality are addressed in the last section. Volume 2 includes two major topics; the impact of education on earnings, and the role of education in the overall framework of equalizing policy instruments. Among the papers from the former topic are income equality and economic development, a case study. Income distribution policy in the United States is one of the issues raised in the latter topics. Conclusions on the issues raised in the seminar are provided. (Author/AM)

**Identifiers**—\*Education Amendment Act 1974, Nebraska

The information presented here describes the Federal and State Laws that school officials must adhere to with respect to student records. The sections of the Education Amendment Act of 1974 that deals with the maintenance and release of student records, protection of the rights and privacy of parents and students, protection of pupil rights, and limitation on withholding of Federal funds are listed. The Nebraska State Statutes also delineate specific responsibilities that school district employees accept when student records exist. These deal with such aspects as: listings under everything in the folder, parents may challenge records, personally identifiable records, data-gathering, over 18 children, parents must be told of rights, experimental programs and limitations. Suggested guidelines accompany each category of law. Included under guidelines complying with Nebraska State Law are sections on categorizing student records, academic records, behavioral/disciplinary reports, maintaining student records, academic or administrative records, behavioral/disciplinary records, security of student records, and destruction of records. **Descriptors**—Correctional Education, \*Delinquent Rehabilitation, Delinquents, Disadvantaged Youth, Junior High School Students, Minority Group Children, Probationary Period, Program Effectiveness, \*Program Evaluation, Rehabilitation Programs, Retarded Readers, Self Concept, Self Esteem, \*Underachievers, Urban Youth, Youth Problems, \*Youth Programs

**Identifiers**—New York (Staten Island), \*Richmond College Reading Center

This program serves a population of disaffected, underachieving inner-city youth of junior high and high school age who are known to the Family and/or Criminal courts and are at least two years retarded in reading. In most cases, the first efforts of the center are said to be directed to the provision of remedial reading services, and toward helping the learner rebuild a positive self image and self confidence and motivation for learning. The evaluation consists of a two-fold process that of assessing the impact and the degree of success of the center as based on the proposed criteria and that of assessing the administrative processes operating within the program. Along with major topics such as description, student population, and program, the evaluation section provides the three major objectives along with their procedure, findings, and interpretation. Among the recommendations made are that formal attitudinal measures be employed to assess the amount and degree of growth for future planning and record keeping purposes; that an initial in-depth case conference for the new learner be attended by all staff assigned to the enrollee; that periodic case conferences be held to ascertain what has or has not been accomplished and to plan and set future goals for the youth, particularly those that are most in need of extensive assistance; and that black and Spanish-speaking tutors be hired. **Descriptors**—\*Evaluation Methods, Exceptional Students, Family Environment, Family Influence, Group Tests, Health Conditions, \*Human Development, Identification, \*Identification Tests, \*Kindergarten Children, Language Development, \*Learning Difficulties, Screening Tests

**Identifiers**—Project HELP, Project Highlighting Early Learning Problems

This paper describes Project HELP (Highlighting Early Learning Problems) stated to have been designed to determine or to develop a battery of screening instruments to identify those K-1 students who manifest learning problems indicative of exceptionality. The purposes, objectives, and a summary of the types of evaluation questions the study sought to investigate are provided. The methodology section contains a description of the sample involved and the screening instruments used. The instruments used in the identification of potential learning problems at level one include a teacher checklist of development, parent checklist of development, teacher observation survey, and language and health screening form. A summary of the procedure involved with each instrument is discussed. The results of the study indicate an overall high risk percentage of approximately 22 percent which is considered to approximate theoretical high risk percentages of potential learning problems specified by professionals in the field of special education. Several recommendations are made, among them being a projected information retrieval system, a proposed diagnostic/assessment center, and in-service training program. (Author/AM)

**Identifiers**—\*Coleman Report

The purpose of this report is to document and describe the origin, procedures, and progress to date of the longitudinal study of students from James Coleman's "The Adolescent Society" study. The organization of this report follows chronologically the sequence of events that were initiated by Coleman. A historical account of Coleman's early work is included to provide the core of intellectual context in which the followup is conceived. Details about the technical problems encountered and research strategies employed in the design of the longitudinal study along with the techniques of the data collection methodology and detailed analysis of the results are presented. New applications of computers are discussed in relation to the execution of the research itself and in the design of research. Summary overview of the data base itself is presented with samples of the types of problems that are intended for investigation, as well as other "interesting" possibilities for secondary analysis. Appendices are included which contain copies of all survey instruments used in the initial study and the followup, and other items used in the data collection procedure during the followup activity. Descriptors—Adolescents, \*Dropout Rate, Employee Attitudes, Employment Patterns, Employment Potential, Employment Practices, Employment Trends, Evaluation Methods, Individual Characteristics, \*Job Placement, Manpower Utilization, \*Program Evaluation, Youth, \*Youth Employment, Youth Opportunities, \*Youth Programs

Identifiers—WIN, \*Work Incentive Program

This study was undertaken in response to expressions of concern about the apparent high dropout and low placement rates for young under-22 Work Incentive Program (WIN) participants. The analysis is based on interviews with 518 young people in 13 cities across the United States who were in the program at some time between July 1971 and the spring of 1973. The objectives of the analysis were to examine patterns of program exposure and to assess their effect on the post-WIN labor force behavior of the respondents. Chapters deal with background of the study, study approach, and significance; the respondents; WIN program participation and leaving the program; the post WIN experience; and a summary with conclusions. Findings presented in the report are said to be interpretable in the context of limited possibilities underlying the goals and structure of the program. As such, WIN is considered not to have strong effects on the lives of those who appear most to need help to become prepared for full, self-sustaining participation in the primary labor market. Findings are seen to show a consistent tendency to provide the higher-potential program exposures to the clients who already have the greatest initial preparation for the labor market. (Author/AM)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Illinois (Rockford)

This is the final report of a three year program for preventing dropout attitudes from developing in the middle schools in grades 6,7, and 8. The project plans focused on three major goals: staff training for leading the project activities the development of materials for assisting teachers in the project activities, and the provision of teacher-led circle discussions for the students. Tabular sections on student and teacher data include objectives, together with the evaluation technique used to assess each objective and the results obtained. A subsequent section discusses the effects of the project on the clientele. Factors which facilitate the accomplishment of the objective are cited. Two major projects are said to have been met: staff training and the provision of circle discussion activities for all middle school students. Statistical data are seen to indicate significant gains and/or trends in the areas of personal inventory, self-perception, desirable self-traits, personal adjustment, and school related self-esteem. Classroom atmosphere is also said to have improved through this program. (Author/AM)

**The Economics of Enforcement of Title VII of the Civil Rights Act of 1964. Discussion Papers No. 313-75.**

Wisconsin Univ., Madison. Inst. for Research on Poverty.

Spons Agency—American Association of Univ. Women, Washington, D.C.; Ford Foundation, New York, N.Y.; Manpower Administration (DOL), Washington, D.C.; Office of Economic Opportunity, Washington, D.C.

Report No.—IRP-DP-313-75

Pub Date Oct 75

Note—64p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Civil Rights, \*Discriminatory Legislation, Economic Factors, Employment Opportunities, Employment Problems, \*Equal Opportunities (Jobs), Labor Economics, Labor Market, Minority Groups, \*Negro Employment, Policy Formation, Racial Discrimination, Social Discrimination

Identifiers—\*Civil Rights Act 1964 Title VII

The purpose of this paper is to estimate the effects of enforcement of Title VII to determine whether and to what extent it has helped to achieve the elimination of employment discrimination. The model developed in this paper is considered to depart from those of previous Title VII studies in two ways. First, it incorporates the effects of the law's enforcement on nonrespondent covered firms in addition to the effects on respondent firms. Second, it analyzes separately the effects of enforcement of the law's employment and wage provisions. Primary data sources are a matched sample of covered firms, 1966-70, and the U.S. Censuses. Evidence is said to suggest that, in the aggregate, from its inception through fiscal year 1970, enforcement of Title VII at best left the economic position of black males unchanged and at worst caused it to deteriorate. While enforcement of the employment provision increased relative employment in covered firms and relative employment and wages in the economy, enforcement of the wage provision had precisely the opposite effects. The latter effects appear to have dominated the former, although the net negative impact is, in general, statistically insignificant. Two possible directions for enforcement given are: (1) concentrating limited resources on enforcement of the employment provision, and, (2) accompanying enforcement of the wage provision by strict and extensive controls on minority employment. **Recommendations to Implement State Board of Education Policy Regarding Racial/Ethnic Concentrations in Schools.**

California State Equal Educational Opportunities Commission, Sacramento.

Pub Date 10 Jul 75

Note—15p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Civil Rights, Civil Rights Legislation, Educational Discrimination, Educational Equality, \*Educational Opportunities, Educational Policy, \*Equal Education, Integration Effects, \*Integration Litigation, Integration Methods, Minority Group Children, Racial Integration, Racial Segregation, \*School Integration, School Segregation

Identifiers—\*California, Santa Barbara School District v Superior Court

This report contains information on the constitutional decision to prevent and eliminate racial and ethnic segregation in the State of California. The implications of the California Supreme Court decision on the constitutional duty of schools to eliminate segregated education are presented, along with the State Board of Education declaration of policy regarding de facto segregation. Six characteristics resulting from the efforts of the Equal Educational Opportunities Commission to assist the State Board to implement the policy are listed. Among them are that academic achievement of all ethnic groups will meet or exceed accepted national norms, that self concept and attitudes toward school and learning will be equally positive among all ethnic groups, that status roles and participation of pupils, school staff, and parents in the life of the school will be comparable among all racial and ethnic groups, and that school staffs will be representa-

UD 015 669

tive of all racial and ethnic groups. Listed among the conclusions are that integration schools and integrated education programs are essential elements of quality education, that integration cannot be achieved without desegregation, that the process of achieving integrated education is not quick, easy or painless, and that further delay in the development of affirmative steps will lead to additional problems. EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Asian Americans, Bilingual Education, Educational Needs, Educational Programs, English (Second Language), Ethnic Groups, Federal Programs, Financial Services, \*Immigrants, \*Indochinese, \*Information Services, Language Programs, Migrant Children, Migrants, \*Minority Groups, Program Descriptions, Program Guides, Refugees, \*Special Programs, Special Services

Identifiers—Cambodia, Indochina, \*Vietnam

Among the services, programs, and assistance, and contact persons included in this document are several types of assistance provided by HEW for the education of Vietnamese and Cambodian refugees, the national Indochinese Clearinghouse, the college assistance hotline, fellowship offerings, the refugee orientation handbook, and Red Cross aid. A general information series section addresses such issues as fundamental principles and curricula of education in Vietnam, elementary curriculum guides for grades one through five, testing English language proficiency, and hints for tutors. A section on the elementary education series includes the topic of keeping lines of communication with Indochinese children open. Suggested here are the use of services of a Vietnamese speaking teacher or teacher aide and peer group instruction in the child's language. An educational administrator series section covers the English language needs of Indochinese students, and the assimilation of Vietnamese and Cambodian students into U.S. Schools. A brief guide to bilingual education programs is also provided. (Author/AM)

Identifiers—\*Vietnam

Twenty-five nonfiction and 18 fiction and folklore listings are included in this bulletin on Vietnam in children's books. Slides, filmstrips, and film listings are also included. Each listing is accompanied by a brief annotation. Subjects include customs and culture, the country and the people, Ho Chi Min, the Vietnamese revolution, Vietnamese cookery, a history of Vietnam from ancient past to uncertain future, stories from Vietnam, folk tales, fairy tales, legends, and folk poetry. The filmstrip included concerns living in South Vietnam. The film's main focus is stated to be the progress after the bombing halt in 1973. An introduction to American involvement from World War II through 1965 is presented in the slide materials, which include historical photos, Vietnamese artwork, and images of a land and people at war. Teaching, Human Relations, \*Interaction Process Analysis, Intergroup Relations, Social Relations, Student Teacher Relationship, Systems Approach, \*Teacher Behavior, Teacher Improvement, Teacher Influence

This document presents in graphic form a system of interaction analysis, in which methods are presented for the teacher to study his teaching behavior in terms of the behavioral objectives he has established for himself. A summary of categories of interaction analysis is provided, which are labeled as indirect and direct influence. The former includes a teacher's acceptance of feelings, teacher's praise or encouragement, acceptance or use of students' ideas, and teacher's use of questions. The latter involves lectures, teacher's use of directions, criticism or justification of teacher authority, student-talk (response and initiation), and silence or confusion. Charts for plotting classroom interaction with examples used to illustrate student talk following teacher talk and teacher talk consisting of lectures are provided. Among areas identified to differentiate types of teacher response are: indirect teacher talk, direct teacher talk, student talk, silence or confusion, acceptance of feelings, offering praise, using student ideas, giving criticism, lengthy student responses, and teacher responding to termination of student talk with direct influence. That there is no single standard of what is best in assessing interaction is stressed. (Author/AM)

Document Not Available from EDRS

**Descriptors**—Case Studies, Census Figures, Community Role, Cultural Background, Cultural Differences, \*Cultural Factors, \*Cultural Pluralism, Economic Factors, Ethnic Grouping, \*Ethnic Groups, Ethnic Origins, \*Immigrants, Metropolitan Areas, \*Migrants, Political Influences, Racial Characteristics, Sociocultural Patterns

Identifiers—\*Michigan (Detroit)

Among the purposes stated to be served by this book of readings are: the description of several ethnic communities in the Detroit metropolitan area; a questioning of what is meant by ethnics, ethnic groups, and ethnicity; and a look at what ethnicity means when ethnics interact in the institutional world. The document is divided into five sections which are separate entities and do not depend on each other. Part I outlines what ethnicity and ethnic groups are all about. Part II illustrates three different perspectives or ways at looking at ethnic groups. Part III focuses on six different areas within the ethnic world—that of the person, community, culture, institutions, politics, and economics. Part IV centers around the analysis of five different Detroit ethnic communities. Part V provides data sources for the reader who is interested in quantitative information or who wishes to explore more fully a specific ethnic group. The book is considered not to be a comprehensive statement about ethnic communities in Detroit. Difficulties encountered in generation of the book were seen to include the acquisition of short pieces concerning recent Detroit ethnic communities, the length and datedness of some documents, the scarcity of research on ethnic communities in Detroit, and the failure of some manuscripts to describe the people. Bilingual Bicultural is Two Way Education.

Massachusetts State Dept. of Education, Boston. Bureau of Transitional Bilingual Education.

Pub Date Jun 74

Note—47p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

**Descriptors**—Biculturalism, Bilingual Education, Bilingualism, \*Bilingual Students, Bilingual Teachers, \*Court Litigation, Educational Certificates, Educational Legislation, \*Educational Policy, \*Equal Education, Minority Group Children, Non English Speaking, Parent Con-

ferences, Parent Participation, Parent School Relationship, Program Descriptions, Public Schools, Second Language Learning, Teacher Qualifications

Identifiers—Massachusetts, \*Transitional Bilingual Education Act

This manual is said to be intended to bring together under one cover the fundamental documents relating to the landmark legislation, the Transitional Bilingual Education Act. A general synopsis of Chapter 71A of the Act includes what a program in transitional bilingual education consists of, who has the right to it, and what the obligations of the local school committees and the department of education are. The five sections of that chapter, declaration of policy, amendment of chapter, authorization for reimbursement, establishment of bureau of transitional bilingual education—its powers and duties, and repeal of Chapter 852, are outlined and briefly discussed. Criteria set down to determine bilingual teacher competencies in language skills and culture include requirements of foreign service institute native or bilingual proficiency rating, requirements of foreign service institute minimum professional proficiency in English, and requirements of culture competency in English and other languages. Approval procedures are also outlined. Several guidelines for parental involvement in transitional bilingual education programs are provided that address the "when", "how", "why", "who", and "what" of the programs. Appendixes include parent participation regulations. (Author/AM)

Identifiers—\*Minnesota (Minneapolis)

A team of researchers from Teachers College, Columbia University visited selected schools in the Minneapolis Public Schools system for the stated purpose of studying and documenting key processes within the school district and community which effectuated a desegregated system. The study team consisted of five members who conducted structured and unstructured interviews with a sampling of Central administrative staff, school faculty and staff, students, parents and community leaders, and observed both formally in eleven school settings. Observations in class rooms, study halls, lunch rooms, hallways, etc. were complemented by group as well as individual interviews, it is stated. The instruments used for data collection were structured to more readily ensure consistency and adequacy of reporting. In summarizing key factors that have made for successful desegregation in the school district, it is stated that such components as communications skills among teachers and support staff, more flexible academic program, promotion of the team-teaching method, and an increasing willingness of teachers to be open with each other and to deal with conflict were mentioned most often by respondents. It is noted that this report makes extensive use of individual quotes as a means of providing a clear picture of the wide range of views held among school and community people. (Author/JM)

Identifiers—\*North Carolina (Durham)

In May 1974, a research team of four persons, representing Teachers College, Columbia University, went to Durham, North Carolina to study and document the processes the Durham City Schools engaged in during its transition from a segregated to a desegregated district. Durham was one of five school districts included in the comparative study of desegregated settings, funded by the National Institute of Education, which had as its goal the documentation of key processes that are associated with the implementation of successful desegregation plans. The team spent four days in the Durham city community meeting with central administrative office personnel, principals, teachers, students and parents attempting to gather, through formal and informal interviews, their knowledge of, involvement in, and perceptions of the city's desegregation process and plan. In addition to interviews, the team made formal and informal observations in eight of the districts' 26 schools. A total of 12 instruments were used to insure consistency in the collection of data across the districts' schools. This study, it is stated, does not attempt to evaluate the long range effects of desegregation on the populace. It is noted that in order to establish the chronology of desegregation related events, the school files at the local newspaper were searched and copied, in part. (Author/JM)

Identifiers—\*Alabama (Birmingham)

In May 1974, a five member study team from Teachers College, Columbia University spent four and one-half days in Birmingham, Alabama, for the purpose of (1) collecting information that describes the desegregation process as it evolved, (2) interviewing principals, administrators, teachers, students and community leaders relative to their impressions of the desegregation move and its impact, and (3) observing random classrooms, hallways, cafeterias, and playgrounds of 12 selected schools. Birmingham City School District was selected to participate in this study because it was identified from a collection of resource data as a district that developed and implemented a conflict-free (the current plan) and effective plan. The major purpose of the overall project was to identify districts that have been effective and successful in their attempts at desegregation and to describe the processes that led to their effectiveness and/or success. The Birmingham sample included schools (1) with an almost equal distribution of black and white students, (2) those having both a 60 percent black and white population, (3) those having almost an 80 percent black and white enrollment, and, (4) those that had all black students and several having an almost all white student body. A total of 12 schools were sampled from the more than 90 that serve the young people of Birmingham. (Author/JM)

**Identifiers—**\*Connecticut (Bloomfield)

On June 16, 1971, after a number of public hearings, the Board of Education of Bloomfield, Connecticut approved a plan for redistricting the Bloomfield elementary Schools, to take effect at the start of the 1971-72 school year. Several guidelines were recommended: (1) all voluntary busing will cease, (2) reassignments shall be made on the basis of residence, grade level space, and facilities for each pupil, (3) adherence as closely as possible to the current Board of Education policy on Reasonable Walking Distance to school shall be maintained, (4) classes shall be integrated so that not more than seven percent difference of racial minority pupils between schools, and, (5) in reestablishing school boundary lines, consideration be given to reduction of fragmented districts. As a continuation of a series of studies on school desegregation in the United States a team of four members from Teachers College, Columbia University, spent two days, November 15 and 16, 1973 in Bloomfield, Connecticut meeting with town and school officials, citizens, parents, teachers and schools and observing in four schools. The purpose of the visit was to study the system and to gather information about the schools and people involved in the desegregation process. This report presents the content of those interviews and observations with no attempt to judge the effectiveness of the desegregation-integration process. (Author/JM)

During the 1972-73 academic year, a research team working out of Teachers College, Columbia University, conducted case studies in districts where comprehensive and effective desegregation processes had been implemented. Greenburgh Central No. Seven, Greenburgh, New York, was selected as a site which had provided evidence of practices and policies associated with effective school desegregation. A research team visited Greenburgh over a four week period during March and April 1973. The purpose of the study was to document effective school desegregation practices and procedures under a variety of conditions. Variables examined include: student contact, assignment and grouping at all levels, regrouping within classrooms, staff interaction, student representation in school activities, student groupings in such settings as lunchrooms and lounge areas; parent representation in the schools, current concerns of staff, students and parents, and, the roles of the district staff and black and white community prior to and during district merger activities. Individual and group interviews were held with district administrators, teachers, parents, community members, and students. Observations took place in classrooms, lunchrooms, hallways and playgrounds. (Author/JM)

In January 1974, a research team from Teachers College, Columbia University spent four days in Ewing Township, New Jersey studying and documenting the efforts made by the school district and community in bringing about a desegregated system. Ewing School District was one of four districts to be included in the Comparative Desegregation Project designed to document key processes that are associated with bringing about effective school desegregation. Variables examined include: student contact, assignment and grouping at all levels; staff interaction; student representation in school activities; student interaction; parent representation in the schools; current concerns of staff; students and parents; and, the role of the district staff and community prior to and during desegregation. The research team consisted of six members. During the four-day visit, the team visited six of the ten schools in the district, met with some staff from the central administration, and conferred with some parents and community persons in the evenings. The study consisted of formal and informal observations, i.e. in classrooms, hallways, cafeterias, etc., and structured and unstructured interviews with central administrative staff, students, parents and community leaders. A total of twelve instruments were used to insure adequacy and consistency in the collection of data. (Author/JM)

This book is the result of a series of studies conducted in several historically black colleges from 1964 to 1970. With a focus that changed from a study of activists to a study of students in an institutional context, the book is considered to aim at revealing and clarifying the concerns and dilemmas of black students during an uneasy period when many questions are being raised about the relevance of education. A first purpose of the book is to examine the relationship between relevant identity goals and the traditional academic goals of higher education. A second purpose is to present data gathered from questionnaires and interviews with several thousand black students that either counter common expectations or fill the void of information about black students. Separated into three parts, major topics addressed include individual achievement, collective achievement, and how the two are polarized, independent, or integrated. Data presented are said to document the extraordinary commitment of black students and their families to education. (Author/AM)

**Descriptors—**Aesthetic Education, \*Affective Objectives, Art Activities, \*Art Education, Art Teachers, \*Cognitive Objectives, \*Disadvantaged Youth, Doctoral Theses, Educational Needs, \*Educational Objectives, Grade 9, Organization, Organizational Theories, Role Perception, Secondary Education

This investigation identifies the goals in art education that high school teachers and college professors consider important in formulating a hierarchy of goals in terms of students' behavior, as guidelines for developing a ninth year general art course for disadvantaged youth in urban areas. Art goals to meet the special educational needs of the disadvantaged are derived from the recent literature in the field, and submitted to a panel of college professors in art education and to a panel of high school teachers of art for evaluation. Priorities assigned by the professors to the goals are then compared statistically to priorities assigned by the teachers to the goals. First level goals consists of affective factors such as self concept and perception, and cognitive factors such as conceptualization and art creativity. Middle level goals are interdisciplinary help and art appreciation. All lowest level goals are cognitive but for two exceptions: art techniques in breadth and depth, which are psychomotor. A conclusion drawn from the study is that goals derived from the art education literature are consistent with the general educational goals of schools, and important for inclusion in an art program for the disadvantaged.  Identifiers—Mini Schools, New York (Manhattan), \*Project Haaren

This book documents the Haaren Project, believed to be the only one involving the conversion of an entire existing high school to a mini-school format. It outlines the shortcomings of the existing system that gave rise to the alternative-school movement, traces the history of the early alternative schools citing their successes, shortcomings and failures, and discusses the reasoning behind the project. The future of this mini-school project, along with the future of alternative education and school renewal in general and the potential impact of the alternative-school movement on established school systems particularly in the inner city is addressed last. The concluding chapter is presented as a guide for educators and community groups interested in launching their own alternative-school programs based on the mini-school approach and the processes involved. It offers a step-by-step "road map" covering such areas as planning organization, management, financing, administration, staffing, day-to-day operation, involvement of the business community, and facilities planning and acquisition.  Identifiers—\*California

This report details concerns of specific Asian and Pacific American Communities and examines the degree to which government agencies at federal state, and local levels have made efforts to resolve these problems, or, in some cases, contribute to them. The study deals with educational opportunities afforded Chinese American youth; housing and redevelopment problems faced by Japanese Americans; allegations of inadequate social services allocated to Pacific Americans; the various problems faced by the elderly within the Filipino communities; and the difficulties encountered by Korean and Philippine-educated professionals in obtaining state licensure. State licensure policies are examined in four health fields as they affect the large number of Koreans and Philippines born and educated professionals residing in California. The difficulties encountered by these subgroups in resuming their professions are said to present significant socioeconomic problems within the Asian and Pacific communities that they lack adequate health care and medical services and are deprived of the services of trained medical personnel with whom they could communicate effectively. Among the recommendations made are that the state licensure boards review their standards to see that qualified professionals are not screened out, and that they endorse and actively support training programs for foreign-educated in the medically-related professions. **Body Dimensions and Proportions, White and Negro Children, 6-11 Years; United States. National Health Survey Series 11, No. 143**

Health Resources Administration (DHEW/PHS), Bethesda, Md.

Report No.—DHEW-HRA-75-1625

Pub Date Dec 74

Note—72p.

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 Order Publication No. DHEW (HRA)75-1625; \$1.30

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Age Groups, Body Height, Body Weight, Caucasians, Child Development, Children, Comparative Analysis, \*Growth Patterns, Maturation, Negro Youth, \*Physical Characteristics, Physical Development, Racial Characteristics, \*Racial Differences, \*Sex Differences, Statistical Data, \*Statistical Surveys

The fifth in a series of reports presenting analyses and discussions of data on height, weight, and 28 other body measurements taken from a probability sample of noninstitutionalized children in the United States aged 6-11 years, this document compares the growth patterns of white and Negro children for 20 body measurements. Emphasis is placed on comparisons of age and sex specific means and medians for Negro and white children. These national estimates are based on cross-sectional data, which are said to limit the analyses to attained size rather than velocities of growth. All dimensions are said to increase almost linearly with age from 6 through 11 years in Negro and white children, both males and females. Conclusions derived from these data are considered to agree generally with most other anthropometric comparisons of American white and Negro children with these statistics providing figures held to be current, comprehensive, and reliable national estimates. Twenty-six detailed tables of statistical material are provided. (Author/AM)

Identifiers—\*Aspira v Board of Education, New York (Manhattan)

This document contains a press release and consent decree dealing with establishing city wide basic elements in the education of children whose functional language is Spanish. The major elements of this agreement extend on a city-wide level the best practices that are currently being attempted and implemented for target children in the New York City schools. Certain provisions of the agreement specify the class of children entitled to the full program: that is, those whose language deficiency prevents them from participating in the learning process and who can more effectively participate in Spanish. An improved method of identifying and classifying children who are Spanish speaking or Spanish surnamed is also being developed. The elements of the program that are to be provided in full by September 1975 are: (a) intensive instruction in English; (b) instruction in subject areas in Spanish; and, (c) the reinforcement of the pupils' use of Spanish and reading comprehension in Spanish where a need is indicated. Additionally, and not at the expense of these three elements, these students are to spend maximum time with other children as to avoid isolation and segregation from their peers. The basic program will be operable in a number of schools which will set up pilot programs by February, 1975. (Author/AM)

**A Bibliography of Asian and Asian American Books for Elementary School Youngsters.**

Washington Office of the State Superintendent of Public Instruction, Olympia.

Pub Date Jan 75

Note—58p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Annotated Bibliographies, \*Asian Americans, Audiovisual Aids, Chinese Americans, Cultural Background, \*Cultural Context, Cultural Factors, Educational Resources, \*Elementary Education, Ethnic Groups, Fiction, Folk Culture, Japanese Americans, Junior High Schools, Minority Groups, Resource Materials

This annotated bibliography, initiated and produced solely by Asian Americans, contains books on both the Asian American experience and on the ethnic and cultural setting of the old country. Ratings with the following criteria are assigned to each book: (1) sensitivity in dealing with differences; (2) accuracy of fact or situation; (3) readability of the book; and, (4) interest level and attractiveness of the book. The rating schedule consists of poor - given to books with little ethnic sensitivity and/or low interest to the reader; average - books which neither detract nor improve the reader's perspective of Asian Americans; and excellent - highly recommended reading material which can help bring about understanding of the Asian experience. Recommended grade levels are based on interest rather than reading levels. Six major topics include fiction: folk and fairy tales; resource books such as history, song, game, and culture; books/media/curriculum supplement outlets; audiovisual; and publishers of books offered in the bibliography. The bibliography is limited to elementary and junior high level resources. It is said to alleviate the problem related to the lack and shortage of appropriate Asian American curricular materials. Identifiers—Harlem College Extension, \*New York (Harlem)

This article documents the conception and development of a tool for providing academic and counseling support to meet the needs of minority adult students in an urban community college environment. Specifically, the tool is a course having as its base the proper assessment of student needs and the revision of the syllabus to fit those needs. Aspects of course development, the objectives and methodology of the seminar aspect of the course, and the objectives and methodology of the study skills aspect of the course are addressed. They study skills aspect of the course is evaluated at the end of the term, with the seminar aspect being evaluated as early as the second session. The end of term evaluation is somewhat more formalized, with students responding in writing to a questionnaire. The significant aspect of this tool is considered to be that it was developed at the request of and with the critical evaluation of the student body. After two years, the course's effectiveness is said to be reflected in the positive feedback from students and faculty. The course has now become a part of the core of required courses for all freshmen. (Author/AM)

This "Civil Rights Directory" is distributed as a service of the U.S. Commission on Civil Rights under its Clearinghouse functions. The information was supplied by the agencies and organizations listed. Section 1 is a listing of key Federal officials responsible for monitoring, administering

ing, coordinating, and enforcing various aspects of equal opportunity laws and policies. Officials are listed under the following major areas: Title VI (Civil Rights Act of 1964), Federal Employment (Title VII of the Civil Rights Act of 1964 and Executive Order 11478), Contract Compliance (Executive Order 11246, amended by Executive Order 11375), Equal Opportunity in Employment (Title VII, Civil Rights Act of 1964, as amended by Equal Employment Opportunity Act of 1972), Direct Federal Assistance, Equal Opportunity in Housing (Executive Order 11063), and, Revenue Sharing. Section 2 lists "National Private Civil Rights Organizations". Other sections list "Research Organizations with Civil Rights Information", "National Organizations with Civil Rights Programs", "National Women's Organizations". Section 6 lists "State Commissions on the Status of Women", "Local Commissions on the Status of Women", "State Agencies with Civil Rights Responsibilities", "Official Agencies with Civil Rights Responsibilities for Puerto Rico and the Virgin Islands" and "Local Agencies with Civil Rights Responsibilities".  Descriptors—Curriculum Development, \*Field Interviews, \*High School Students, Metropolitan Areas, National Surveys, \*Racial Attitudes, Racial Differences, \*Role Perception, \*School Attitudes, Social Differences, \*Student Attitudes, Student Problems, Student School Relationship

Extensive interviews of students were conducted by Commission staff from mid-1968 through early 1969 with the purpose of examining the attitudes and perceptions of students concerning the education they were receiving. Among the issues addressed by the students were the following: how the schools can respond constructively to the needs and aspirations of today's youth in these turbulent times; how students can participate constructively in the decisions that affect their education; what innovations in educational technique or curriculum are necessary to

improve the quality of education; what must be done to meet the educational needs of minority group children; and, what steps must schools take to promote successful adjustment to desegregation by students and teachers alike. In all, 277 students from 17 cities and towns were interviewed at length. Efforts were made in each of the communities to interview substantial numbers of both minority and majority group students. Most of the student interviewed were high school juniors and seniors. In most cases, the race of the student interviewer were matched. Questioning was directed toward bringing out the student's views on specific topics. These topics appear as chapter headings in the report: Education Overview; Administration; Teachers; Curriculum; and Perception of Others. (Author/JM)

 Identifiers—Third World

Volume Four of this selected annotated bibliography is composed of the most recently discovered materials, pertaining to blacks, Latinos, Native Americans, multi-ethnicity and racism. Like the three previous annotated bibliographies, it is considered to reflect only that material which is held to be most representative and most relevant in terms of the involvement and contributions that Third World people have made in the development of the United States and the climate of the times during which such

involvement and contributions occurred. The contents of the bibliography are organized into nine sections, focusing respectively on the following topics: racism materials, black printed material; black audio-visual materials; Latino printed material, Latino periodicals, Latino films, native American printed material, native American films, and native American records. Information provided on each item covered in the first eight sections includes where to obtain the item, the suggested usage of the item, and a brief description of the item. The last section lists three films which issue catalogues of native American music: Everest Records, Indian Records, and Canyon Records. (Author/JM)

On the twentieth anniversary of "Brown v. Board of Education" the U.S. Commission on Civil Rights undertook to commemorate the Supreme Court's decision with an examination of civil rights progress between 1954 and 1974. The Commission is publishing a series of concise reports summarizing the status of civil rights in education, employment, public accommodations and housing. The first report in the series provided a brief historical background; the second covered equality of educational opportunity, and the third dealt with equality of economic opportunity. This fourth report looks at national housing policies and the extent to which they have been effective in providing equality of opportunity in housing for all America's citizens. It is stated that, at this juncture in our Nation's history, the Commission finds that the forces promoting discrimination in housing hold powerful, if less than universal, sway. These forces will be curbed only by new dedication of national resources and fair housing enforcement efforts to the creation of many more rental and home ownership opportunities for minorities and women of all incomes, in good housing located in a full variety of viable urban neighborhoods, and in rural areas and on native American reservations as well. ## Introduction

**Resources in Education** is prepared monthly by the Educational Resources Information Center (ERIC) to make possible the early identification and acquisition of reports of interest to the educational community. ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating the most significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

All the documents cited in the Document Résumé Section of the journal, except as noted, are available from the ERIC Document Reproduction Service. Availability and prices of document collections are to be found on the How To Order ERIC Document Reproductions page.

**Identifiers—Consortium of States, \*National Occupational Competency Testing Institute, Illinois**

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)

**Career Development Resources: A Bibliography of Audio-Visual and Printed Materials K-12.**

Minnesota State Dept. of Education, St. Paul. Pupil Personnel Services Section.

Spons Agency—Bureau of School Systems (D-HEW/OE), Washington, D.C.

Pub Date 75

Note—139p.

EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage

Descriptors—\*Annotated Bibliographies, \*Audiovisual Aids, Career Awareness, \*Career Education, Elementary Education, \*Indexes (Locators), Instructional Materials, Junior High Schools, Kindergarten, Post Secondary Education, \*Resource Guides, Secondary Education, Vocational Development

The annotated bibliography identifies, organizes, and describes audiovisual and printed career development resource materials for grades K-12. The guide is arranged alphabetically by abbreviations for manufacturers. For each manufacturer listed the following information is given: (1) an abbreviation for the manufacturer, (2) reference number for index purposes, (3) catalog number, (4) distributor, (5) title of the resource material, (6) cost, (7) copyright or production date, (8) description of the media, (9) description of the resource material, and (10) grade level. Cross reference indexes are included for manufacturers' abbreviations, titles, type of media, and grade level. The abbreviations index is an alphabetical listing of manufacturers according to abbreviations used in this bibliography. The title index is an alphabetical listing of the titles, followed by the manufacturers' abbreviations. The media index can be used to locate materials according to type of media (books, booklets, workbooks, papers, audiovisual aids, guidance materials, kits, games, spirit masters, and subscriptions). The grade level index can be used to locate materials according to a particular grade level (primary, intermediate, junior high, senior high, college, and adult). For each of these sections there is a listing of resource materials alphabetically arranged according to manufacturers' abbreviation and including reference number and title. (Author/BP)

Identifiers—EBCE, \*Experience Based Career Education, Pennsylvania (Philadelphia)

The final evaluation report provides an assessment and discussion of the FY 1974 activities of the Research for Better Schools' Career Education Program, one of four employer-based career education programs currently funded by the National Institute for Education. The introduction (section 1) provides an overview of the evaluation activities and the conduct of the project. Student population (section 2) describes the experimental and comparison groups utilized in the project. Formative evaluation (section 3) describes the program elements and how they functioned during FY 1974. Summative evaluation (section 4) focuses on the testing of hypotheses posed for the project. Summary and recommendations (section 5) contains an overview of the major findings and the implications and recommendations of these findings for further program development and expansion. It was concluded that students, parents, employers, and public school representatives reacted positively to the program, both personally and as an educational contribution. (Author)

Identifiers—EBCE, \*Experience Based Career Education, Pennsylvania (Philadelphia)

The report provides an interim assessment and discussion of the activities of the Research for Better Schools' Employer-Based Career Education Program during FY 1974. The introduction (section 1) outlines the report's format and summarizes the evaluation staff's activities. The summative evaluation overview (section 2) and the formative evaluation overview (section 3) present the rationale for both types of evaluation and generally describe the processes used for each. Section 4 and 5, on student populations and instruments and procedures, describe the students in the activities of the career education program, the groups of students used for comparisons, and

the tests and means of administration used to make the comparison between the groups. Section 6 deals with pretest results for which the analysis is completed. Section 7 deals specifically with the common instruments being cooperatively developed by the four employer-based career education programs and the National Institute of Education. Section 8 presents summative evaluation results which deal with testing hypotheses relating to the career education program in general. Section 9 presents formative evaluation results which are specific to the Research for Better Schools' implementation of a career education program. Section 10 summarizes the report and makes recommendations. (Author)

**Identifiers**—California (Oakland), EBCE, \*Experience Based Career Education, Far West School

The interim report for FY 1974 is the first program evaluation, conducted midway through the first year of operation, of the secondary level Experience-Based Career Education Program at Far West School (FWS). A brief introduction surveys the FWS program and discusses the organization of the report. Section 2, descriptions of data collection instruments and procedures, discusses instrument development and administration and data processing. Section 3, student recruitment and selection, summarizes and analyzes past recruitment policies and discusses recruitment plans. Section 4, student samples, discusses the composition of the FWS student group and the comparison and control groups and their respective demographic characteristics and standardized test results. Section 5, mid-year data, analyzes the results of the student opinion questionnaire, the parent opinion questionnaire, the resource opinion questionnaire, the student attitude scale, and interviews. Section 6, program development data, discusses instrumentation, student learning programs, resource development and use, student diagnosis, and student orientation. Section 7, student use and staff perception of the program discusses the differential use of resources and the staff program questionnaire. Section 8 summarizes the report's major findings, generally concluding that the program was positively received by students and parents. Survey instruments and results are appended. (JR)

The report for FY 1973 describes the planning and implementation of the secondary level Employer Based Career Education Program at Far West School (FWS). The report's introduction briefly describes the program's nature and objectives. Section 2, student recruitment and enrollment, describes the student population and the recruitment and selection procedures. Section 3, learning resources, discusses the procedures for recruiting, analyzing, and developing community resources, resource persons, and large employer organizations. Section 4, student program planning and monitoring, discusses the procedures developed for planning, implementing, and monitoring individual student programs. Section 5, learning outcomes, describes student progress as assessed through interviews, questionnaires, rating scales, standardized tests and inventories, and student records. Section 6, project management, discusses the project's decision-making process, external liaison, financial planning, and cost control. Section 7, summary and conclusions, outlines recommendations for FY 1974 based on the FY 1973 evaluation findings. Eight appendixes include excerpts from the 1972 Operational Plan, a sample resource person guide, and various forms and instruments used in evaluating the students and the program. (Author/JR)

The final evaluation report summarizes the FY 1974 operation of the Experience-Based Career Education Program at Far West School (FWS). The report's introduction provides a brief overview of the secondary level program and the evaluation design. Chapter 2 focuses on the procedures for the recruitment and selection of program students, discusses comparison and control student groups, and compares the demographic characteristics of these groups. Chapter 3 deals with program outcome data, discussing students, parents, and resource perceptions, attitudes and opinions about FWS and assessing student achievements. Chapter 4, outcome backup research, considers anthropological observations, an analysis of program components, test-taking attitudes, and staff-program issues. Chapter 5, model development and implementation, examines the formative evaluation of student-related procedures, and the assessment of the FWS instructional system. Chapter 6 provides a summary and conclusions, presenting generally favorable student and parent reactions to the program, and reporting success in achieving most FWS program goals in self-development, career development, and basic skill and interpersonal skill development. The program was also viewed as successful in keeping students in school and achieving community support. (JR)

**Identifiers**—EBCE, \*Experience Based Career Education, Oregon (Tigard)

The Employer-Based Career Education Program in Tigard, Oregon was designed to have students participate in a variety of individualized learning activities. Most of the 29 students completed eight employer site explorations, spent 108 days in learning experiences on three employer sites, completed seven projects and five single objectives, were tutored in two skills, and participated in many hours of independent study, seminars, counseling, and enrichment activities. In tests of student growth, the students remained about the same in basic skills and self-concepts, but reached competence level in a number of survival skills, and improved their writing skills. Seniors reached a high level of career maturity. As judged by employers, students improved in their work performance, adherence to work schedules, acceptance of responsibility, interest in and enthusiasm for work, judgment, ability to work with others, and ability to learn through work experience. All those involved were enthusiastic about the program. The evaluation lists the project's goals and an evaluation of the progress made toward each goal. Evaluation questions and statistical data are presented and discussed. The presentation of program results include data on: employer learning sites; student learning experiences; student growth; employer, parent, and student appraisal; and outside evaluation. **Identifiers**—EBCE, \*Experience Based Career Education, Oregon (Tigard)

The experience-based career education program was intended to have students participate in a variety of individualized activities designed to provide meaningful learning experiences in basic skills, life skills, and career development. Approximately 50 high school juniors and seniors participated in the project on a full-day basis, dividing their time equally between a learning center and various employer and community sites. Students showed a statistically significant gain in reading, mathematics, and study skills, but no significant gain in language mechanics. Against a psychosocial maturity scale, students showed a positive gain in the areas of self-reliance, work, communication, and trust. The test for measuring career maturity was found to be faulty. The report is an extensive summative evaluation of student achievements in terms of the project's goals, and a formative evaluation of the program based on a survey of participating instructional staff, students, parents, and employers. Half of the report is devoted to appendixes which discuss the evaluation instruments, and reproduce relevant correspondence, forms, questionnaires, statistical tabulations, and two student case studies. **Descriptors**—City Officials, \*Collective Bargaining, County Officials, \*Course Content, Curriculum Guides, \*Industrial Relations, Labor Unions, \*Management Education, Public Officials, Simulation, State Officials, \*Teaching Guides, Unit Plan

The instructor's manual for a four to five day course designed to assist public sector managers in attaining a stable and productive labor relations environment is intended for use with two other books, the Reference Materials and the Case Materials. The course, created principally for use in a formal classroom setting, can be

adapted to suit the needs of the participants. The subject matter is structured in seven units, basically keyed to the stages of the collective bargaining process. The unit topics are: collective bargaining process overview; why and how workers join unions; petition, election, and recognition stages; the negotiations process; negotiations (a simulation); contract administration; and an in-basket exercise (used as a tool for summarizing the entire course). Suggested total teaching time, teaching methods, and training aids are specified for each unit. The units are presented in a two-column format. One column provides instructor guidance such as notes, references, objectives, and further suggestions for techniques and teaching aids. A 33-item list of selected sources for instructors concludes the manual. (Author/MS)

**Descriptors**—Career Awareness, \*Career Education, \*Educational Programs, Educational Resources, Elementary Secondary Education, Graphs, Learning Activities, Occupational Clusters, \*Program Content, \*Program Descriptions, Program Evaluation, Self Evaluation

The report describes a career education project for grades K-12, developed for a rural school district in Maine, consisting of six elements: all subject matter tie-in, hands on experiences, resource persons, field trips, role playing, and career awareness. The chapter summarizing the project's results graphically demonstrates the various relationships between the career clusters and the numbers of field trips, resource persons, and students. The summary of the elementary school component of the project presents the result of a student evaluation, discusses the various aspects of the project at the elementary level, and lists career education projects completed at the elementary level. The summary of the junior high school component discusses objectives, procedures, and activities, and graphically presents the results of a student evaluation of the Inside/Out Programs, and of the eighth graders' responses to the Self-Image Inventory. The summary of the senior high school component discusses goals of the project at the senior high school level. The report's observations and recommendations cover such things as: the overall project, administrators, teachers, workshops, the project director, the advisory committee, school-industry relationship, guidance, finances, and public relations. A 10-page third party evaluation is also included. (JR)

**Concord (New Hampshire) Career Education Project: Final Evaluation Report.**

Unco, Inc., Rye, N.H.

Spons Agency—New Hampshire Supervisory Union 8, Concord.

Pub Date Jun 74

Note—59p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

**Descriptors**—\*Career Education, \*Educational Objectives, Elementary Secondary Education, Program Attitudes, \*Program Evaluation, Questionnaires, School Districts, \*Summative Evaluation

**Identifiers**—New Hampshire (Concord)

A summative evaluation of the first year of the Concord career education project is presented in the report. Major first-year goals of the project were the introduction of career education concepts and activities in the classroom, development of career education curriculum programs, and development of student testing and a process for exploration of and preparation for the world of work. A career education evaluation questionnaire distributed to approximately 400 staff members of the Concord school district had a 20% return. The questionnaire results are presented in full and indicate community approval of the program. Comments and recommendations on each

of eight specific program goals and objectives are detailed in the report. Recommended priorities for fiscal year 1974-75 include critical review of the objectives to make maximum use of existing staff and resources, what resources should be available, and development of a testing center and a curriculum guide. **Identifiers**—\*Career Guidance

The conference papers focus on an effort to identify strategies for improving the professional delivery of guidance and counseling services to students. The first paper, Career Education: A Broadening Educational Perspective, presents a definition of career as a purposeful life pattern of work-related activities and assorted life styles. Career education should therefore be involved with a broadened educational perspective which includes student development and the community. The second paper, Career Development as Self-Development: Beyond Career Education, discusses the guidance approach to career education which would unify academic, vocational, and guidance efforts around individuals and their needs. Several characteristics of the self-development approach to career education and a conceptual career development curriculum model are presented and related to a discussion on how they relate to the self-development needs of women. The third paper, The Role of Assessment in Career Guidance: A Reappraisal, discusses common misconceptions about the use of tests in counseling and the importance of test information in career guidance and career exploration. The vital need for counselors to acquire skills for a comprehensive career guidance program for all educational levels is emphasized in the fourth paper, A Summary—Future Directions. (Author/EC)

**Descriptors**—\*Comparative Analysis, Educational Research, \*Educational Strategies, Elementary Education, \*Industrial Arts, Learning Experience, Performance Factors, \*Psychomotor Skills, \*Task Performance, Vocational Education

The study investigated the effects of practice on the mastery of two industrial arts skills (hammering and sawing). The major question asked was whether a film followed by practice leads to better mastery than a film presented without practice. The relationships among cognitive, affective, and psychomotor aspects of the task were explored. The subjects were 148 fourth to eighth grade boys and girls with no previous industrial arts experience. Students were randomly assigned to experimental and control groups and provided different types of instructional treatment. The students were given attitude and knowledge tests on the films they were shown and rated by experts on their skill performance; they were administered a battery of achievement, intelligence, and attitude tests as well as the Rod-and-Frame test, to identify their cognitive styles. Results are described by instructional treatment, by sex, and by level of intelligence. Correlations among knowledge, attitude, and skill performance are presented, as well as the factor analysis of the

major variables in the study, and regression analysis. A summary of the results and their instructional applications are presented, with implications and recommendations. The groups that had practice had higher mean scores than the groups that just saw the film. (Author/AJ)

The manual is intended for use as a practical guide to selecting teaching strategies. Based on compiled research findings, published methodological suggestions, and ideas related to the teaching-learning process, the manual consolidates a review of the results of major research into simplified principles and instructional strategies to be utilized in various educational settings. Where appropriate, specific illustrations are offered as practical examples of how these principles can be applied in classroom situations. The book is organized by types of learning, conditions which affect learning, and teaching functions and instructional strategies. Each of the book's five units opens with a statement of objectives, followed by several learning activities or exercises, apparently intended for teacher educators to employ with classes of education students. These suggested learning activities are followed by information presented in outline form and divided into chapters. (Author/AJ)

Identifiers—Career Intern Program, CIP, OIC, Opportunities Industrialization Center

The project's goal was to enhance the outside evaluation of the Opportunities Industrialization Center's Career Intern Program (CIP) with supplementary, criterion-referenced assessment measures identified through a literature review and an analysis of CIP's goals. The review (presented separately) referred to over 100 programs of dropout prevention and vocational development for the disadvantaged; in reports having an evaluation component, assessment measures have been identified. Described in the document, these are not limited to criterion-referenced techniques, which were infrequently found. Measures tended to be obvious and already included in the CIP package. Unique measures are discussed in the document within the framework of a generalized evaluation model, constructed to place the data from literature in perspective and to determine the requirements for additional assessment measures. In general, the document concludes, the measures found in the literature were related to specific, short-term program expectations, based on immediate program outcomes, and not empirically tied to ultimate, long-range goals; the data

presented incomplete and fragmented pictures of programs' progress and success. A new approach is suggested, which asks not whether the program objectives have been met, but whether they were the correct objectives: "What have we really done for this individual?" (Author/AJ)

The second national project in career education to be sponsored by the Council of Chief State School Officers was intended to provide for continued collaboration with State directors/coordinators, to add significantly to the body of career education knowledge in the various States and State education agencies (SEA), and to strengthen State leadership. It attempted to ascertain the status of career education in the States, the use of newly developed curricular materials, trends of growth, and State evaluation methods. Information was obtained exclusively from SEA personnel responsible for career education, as the SEA is considered to be the critical agency within the educational system's organizational hierarchy. From the available data (presented and discussed in the report), it is concluded that the general status of career education is good. The data suggest that there have been gains for career education in the various States in these areas: (1) SEA career education positions, (2) numbers of pupils involved in career education, (3) inservice teacher programs, (4) State legislation, (5) appropriation of State funds, (6) use of Federal monies, (7) State plans, (8) State advisory councils, (9) evaluation techniques and instruments, and (10) establishment of career education as an SEA priority. The teaching outline presents career education activities for grades K-6 structured into 10 subject areas (minicourses) with the rationale listed for each. The subject areas are: arts and crafts, culinary arts, hand sewing and clothing art, horticulture, lettering and layout, outdoor living education, personal banking, photography, practical home repairs, and woodworking. A philosophy of career education, definitions of terminology used in the outline, general rationale for the minicourses, and 12 basic goals for career education are included. The role of the counselor, considered the dominant factor in the program, is described. Each subject area section has a list of activity titles with brief descriptions, grade level designations, and student cost. For each activity a behavioral objective, an equipment list, a detailed outline of the procedure, and a list of instructional materials or sources of information are provided. The guide also contains evaluative instruments for instructors, students, curriculum writers, and parents to use in assessing the program. (MS)

Identifiers—\*Florida

The document provides the guidelines issued by the Florida State Commissioner of Education for school districts to use in implementing mandatory job placement services and followup studies. This comprehensive program includes all students, begins when students enter secondary or postsecondary educational programs, and continues until students are placed in gainful employment or formal programs to continue their education. The placement services guidelines contain objectives, definitions (placement services, school graduate, school leaver, secondary school, and areas of placement), statement of assignment of responsibility for services and the population to be served, procedure for implementing services, statement of duration of placement services, procedures for data collection and analyses, and report requirements. The followup studies guidelines include objectives and a definition of followup studies. Assignment of responsibility, the population to be followed up, schedule and information needed for conducting studies, and report requirements are covered. (Author/MS)

The booklet is for participants in a Project GROW (Gaining the Realities of Work) career education inservice training session and is part of

a package which includes slide/tape presentations, handouts, a game, and graded classroom activity packs. Three sequential modules comprise the training session; the third module is to be postponed until after participants have used the activity packs in their classrooms. The booklet, organized according to the modules, provides a resource of examples for activity-based career education and offers the basic information needed to implement activities developed by the GROW staff or to develop new activities using the GROW format. Elements of the format are: (1) title, activity elements, relevant career clusters, suggested subject areas, concepts or skills; and (2) purpose statement, performance objectives, materials, procedure, and other suggestions. The training sessions, which represent seven to eight hours of training qualifying for basic or up-dating categories of inservice training, are designed for teachers who have had a general orientation to career education and who have actually carried out career education instruction in their classrooms. **Vocational Evaluation and Curriculum Modification.**

Iowa State Dept. of Public Instruction, Des Moines.

Pub Date Aug 72

Note—187p.; Papers presented at the Vocational Evaluation and Curriculum Modification Special Study Institute (Des Moines, Iowa, February 1-3, 1972)

**EDRS Price MF-\$0.83 HC-\$10.03 Plus Postage**

Descriptors—Conference Reports, Educable Mentally Handicapped, \*Employment Potential, Individual Needs, Interest Tests, Job Analysis, \*Job Placement, Job Training, \*Mentally Handicapped, Q Sort, Special Education, Test Construction, Trainable Mentally Handicapped, Vocational Education, Vocational Interests, \*Vocational Rehabilitation

Identifiers—Reading Free Vocational Interest Inventory, Vocational Evaluation, \*Work Samples

The 13 papers compiled in the document serve to meet the needs of personnel serving the mentally retarded and can also be adapted for use by educators not directly serving the handicapped. They discuss relevant information and procedures that can be used to help the mentally retarded become well oriented to the working world and to themselves. The document includes the full text of the following papers: Adult Needs of the Educable Mentally Retarded; Evaluating the Vocational Potential of the Educable Mentally Retarded; Job Analysis—the Key to Effective Job-and-People Matching; Matching Students with Jobs; Vocational Evaluation through the Use of Work Samples; Reason for Work Sampling at Kennedy High School; Evaluation of Work Sampling; Job Samples; The Reading-Free Vocational Interest Inventory; Measurement of Job Preference in the Educable Mentally Retarded; The Evaluation and Modification of Work Behavior of Educable Mentally Retarded Clients; The Employee Q-Sort; Student Q-Sort; and Combining Information and Procedures Related to Rendering Students Employable. References are listed for some of the articles. The agenda for the special study institute, list of participants, and future related activities are appended. (Author/EC)

**Training of Medical Laboratory Technicians: A Handbook for Tutors.**

World Health Organization, Geneva (Switzerland).

Pub Date 75

Note—87p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—Audiovisual Aids, Curriculum, Evaluation Methods, Health Occupations Education, Instructional Media, Job Training, Medical Laboratory Assistants, \*Medical Technologists, \*Teacher Education, \*Teaching Methods, Teaching Techniques, Testing, \*Training Techniques

Designed to serve as a guide to medical laboratory personnel seeking to improve their skills in teaching and instruction in the absence of a suitable course, the manual presents an extensive discussion on instructional techniques. Chapters include: Theory and Practice of Instruction, examining general considerations, individual and

group instruction of technicians, and lesson plans; Objectives and Curriculum, discussing training aims and course content; Analysis and Presentation of Material, examining syllabuses and schemes of work, teacher preparation and presentation of instructions, demonstrations, and notes; Choice of Media, discussing a variety of aids; Examinations and Assessment, presenting external, internal, written, practical, and oral examinations and their design; The Student Medical Laboratory Technician, discussing the student's knowledge, skills, attitudes, selection, and induction; The Medical Laboratory Tutor, examining the tutor's character, role, duties, and training needs. All chapters contain reference lists. Appendixes supply specific and detailed information regarding: (1) the functions and responsibilities of various categories of technical laboratory personnel; (2) planning the training of medical laboratory technicians; (3) detailed planning of a training program for medical laboratory technicians; (4) a proposed program for training; (5) an example of a programed learning scheme; and (6) safety in the medical laboratory. Descriptors—Educational Programs, \*Flight Training, Operations Research, Planning, Post Secondary Education, Program Effectiveness, \*Research Methodology, \*Research Projects, Simulation, Simulators, Teaching Methods, \*Training Techniques

The study reports the work done by a panel of experts in training research toward defining priority research investigations to be undertaken through the Human Resources Laboratory, Flying Training Division (HRL/FT). A list of recommended investigations judged to be important for increasing the effectiveness of beginning pilot training was formulated based on their suggestions and in conjunction with the capabilities of the HRL/FT facility. Methodological considerations in the planning of long range training research are the difficulties inherent in carrying out classical transfer of training experiments and the configuration of the training simulator. The major elements of an overall plan for a research program in undergraduate pilot training are discussed. These include the six technological base phases and the research phase. The discussion on suggested research is divided into two areas: training methodology and simulator requirements. A list of 23 references is included. Materials used in the different processes of the study are included in a 35-page appendix. (Author/EC)

The K-8 career education project (Jan. 1, 1972-Aug. 1, 1973) was intended to establish a demonstration testing and development model of career education in a consortium of 18 rural school districts participating in the Unified Schools Association for Vocational Education (USA-VE) organization, encompassing nine counties in northwest Kansas. The project

focused on two major phases of inservice teacher education: (1) the formalized inservice training of administrators, counselors, and teachers; and (2) the informalized continuing inservice education of teachers using visiting career awareness assistants and mobile media centers. The report briefly covers: the need for the project, the project's goals and objectives expressed as teacher outcomes, the procedures followed in setting up administrator workshops and inservice teacher education and workshops, selection and utilization of media and instructional materials, developing a handbook for teachers, advisory council operation, information dissemination, and the project's results and conclusions. Concluding the document are four appendixes: USA-VE Unified School Districts' population characteristics, a Career Significance Study questionnaire for teachers, a parental survey form, and an employer survey form. Identifiers—Vocational Education Act 1963  
An analysis of vocational education legislation and major issues is presented in the document, which opens with a survey of recent trends and an explanation of the 10 parts of the existing Vocational Education Act. A brief review of evaluations of Office of Education (OE) program administration points out controversial findings. Current issues include the percentage allotment of funds, program consolidation, OE program administration, career education, the role of guidance and counseling, the composition of State boards, funding authorization level, and facility construction. Congressional hearings are examined in terms of: organization; interested parties, including those sponsoring or testifying about legislation; various bills, with detailed descriptions and comments on six bills; and recommendations, with brief descriptions of the public position taken by six groups who have made recommendations for legislation. Next steps for legislation are outlined. Discussion of the Vocational Education Act as amended through 1974 and its program statistics, involving authorization and appropriations, expenditures, enrollment, and proposals are appended. (LH)

Descriptors—\*Career Ladders, Drug Abuse, Equal Opportunities (Jobs), Job Satisfaction, \*Military Personnel, \*Occupational Surveys, Racial Discrimination, \*Task Analysis, \*Task Performance

The report describes an occupational survey of the Social Actions career ladder, AFS 734X-O/A/B/C, conducted by the Occupational Survey Branch, USAF Occupational Measurement Center, from September 1974 through March 1975. The report describes the development of the survey instrument, its administration to job incumbents, and resulting summaries of tasks performed by airmen grouped by skill level, shred, experience level, and similarity of tasks performed. The social actions career ladder was found to be divided into three major clusters based on task performance. Each cluster is

clearly identified with one of the three designated shreds in AFM 39-1 Specialty Description, and each is clearly distinct from the other clusters. The clusters were: equal opportunities, drug/alcohol, and race relations. Results are compared to current training and career field structure documents and recommendations for further study are presented. Much of the volume of this report is concerned with the comparison of task performance and course documentation. (NTIS)

Descriptors—Change Strategies, \*Conference Reports, \*Continuous Learning, \*Curriculum Development, \*Developing Nations, \*Educational Development, Educational Planning, Educational Problems, Educational Strategies, Foreign Countries, Relevance (Education)

A group of 40 education professionals, mainly from Asia and Africa, attended a seminar in Hamburg in December 1974 to consider curriculum development emphasizing lifelong education and adapted to local needs. The majority of participants were professionals involved in national curriculum development programs and with UNESCO curriculum projects. The document presents background material regarding the seminar and a discussion of the three major topics on which the seminar was based, examining problems the participants faced from country to country. Lifelong Education—Meaning and Implications, examines the ideas of lifelong education and its implications for educational practices in Asian and African societies. Basic Education and Its Curriculum discusses the features, functions, and content included in a basic stage of education in terms of the lifelong learning process. Directions of Change presents four categories of strategies to be adopted in the perspective of the countries and institutions represented at the seminar: (1) diffusion, (2) research, (3) development projects, and (4) limited changes. Twenty concept characteristics for lifelong education, identified by R. H. Dave; an extract from another UNESCO document entitled The Basic Cycle of Study; brief descriptions of international developments in lifelong education; and a seminar participant list are appended. The report is concerned with research performance and results at the Savoy Aviation Research Lab. Research accomplishments are described according to eight tasks which are of two general types, those dealing with human resources research and those dealing with manned systems research. Specifically, four tasks deal primarily with pilot selection and training, performance assessment, and the prediction of future operational effectiveness; three tasks deal with human perceptual and decision processes and with principles of aviation display, control, and computer-assisted manned system design; and one task bridges both major research categories. Several of the tasks are aimed at advancing human factors research methodology and theory. The report lists: scientific reports published (12), articles published in scientific journals (13), theses and dissertations (3), and reports to scientific societies (13). A brief aviation research laboratory program review concludes the report. (NTIS)

**Education and Job Satisfaction: A Questionable Payoff.**

Pub Date Aug 75

Note—19p.; Not available in hard copy, due to marginal reproducibility; Paper presented at the Annual Meeting of the American Sociological Association (San Francisco, California, August 1975)

**EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Educational Background, Employment Level, \*Job Satisfaction, \*National Surveys, Need Gratification, Occupational Aspiration, Statistical Analysis, Work Attitudes, Work Environment

The relationship between education and job satisfaction has not been sufficiently well documented to qualify as unquestionable. Published research on the subject either fails to adequately assess the influence of education on job satisfaction or is too occupationally and/or geographically limited to form the basis for generalization. To examine on a larger scale the association between education and job satisfaction, four national household surveys of the American work force conducted by the University of Michigan's Survey Research Center in 1969, 1971, and twice in 1973 were analyzed. One hypothesis was that in small occupationally homogeneous samples those with higher educational levels would be less satisfied than others. Regarding education and

overall job satisfaction, no support was provided for assuming that job satisfaction increases with each advance in educational level attained. On the other hand, overall quality of employment was associated with educational level, but large increments in quality of employment occurred only at those points where educational credentials are conferred. Future work on the relationship should involve several types of secondary analyses: treating education operationally in terms of quality and type rather than simply level; identifying the contribution of education to the relative importance that workers assign to different aspects of their jobs; and accounting for modifications in individual aspirations throughout life. **Identifiers**—Maryland (Prince Georges County)

Prepared to assist school staff in the development of community resources in the career education process, the document provides suggestions and guidelines for the recruitment of community resource personnel to help orient students to the world of work. The program implemented by Prince George's County Public Schools, Maryland, serves as the basis for this report. Career development in terms of community resources, objectives, and goals are discussed. Community resource persons should be used when they motivate, enhance, or add to any classroom unit of study. A list of approaches is given, including contacting civic organizations, surveying the school community, and contacting county agencies. Preparations for developing a working relationship between the community and school includes: inservice training for school personnel, regarding career education; well planned and scheduled visits by resource persons; well prepared field trips; and thorough teacher followups. Suggestions to aid in the planning of a career day or night program, involving numerous consultants and resources, are given. Forms and letters used to implement the community resource program are appended. (LH)

**Identifiers**—Career Progression Systems, CPS

The report presents the design and installation of a Career Progression Systems for a Multi-Plant Manufacturing Corporation. The project explored the obstacles to increased occupational mobility for workers at a Multi-Plant manufacturing firm. Analysis of job histories of workers at two plants found advancement opportunities to be limited and inequitable because narrow departmental units were used as the basis for defining eligibility for promotions. Through the use of job task

requirements analysis, a Career Progression System (CPS) was designed to redefine the eligibility pools for promotional decisions in accord with common skill requirements. Efforts to implement the CPS were only partially successful due to collective bargaining agreement constraints coupled with the economic turnaround. (NTIS)

**Identifiers**—\*Work Adjustment Project

The report is concerned with the feasibility of matching people and jobs as proposed by the Theory of Work Adjustment; according to the third proposition of this theory, satisfaction is a function of the correspondence between the reinforcer system of the work environment and the individual's needs, with certain qualification. In the study, the construct of correspondence is explicated in terms of statistical measures and applied to the prediction of job satisfaction. Measures of needs and general job satisfaction were administered to 635 employees in six different occupations for which occupational reinforcer patterns had been previously obtained. Nineteen indexes of need-reinforcer correspondence were compared in terms of the efficiency with which they could predict general job satisfaction across the six occupational groups. Using the criterion of consistency of outcomes across occupational groups, the results show product moment correlation and d squared prime to be the best statistical indexes to measure correspondence. Implications for the operational and theoretical development of the concept of correspondence are discussed. (Author/AJ)

**Descriptors**—\*Armed Forces, Demography, Employment Patterns, Manpower Utilization, Military Personnel, \*Minority Groups, Models, \*Officer Personnel, \*Recruitment, Simulation, Socioeconomic Influences, Tables (Data)

Findings regarding minority officer procurement in the Armed Forces are analyzed in terms of concepts and standards regarding minority officer representation and of methods for achieving minority representation goals. Chapter 1, Concepts and Standards of Representation, discusses sociopolitical and socioeconomic criteria subdivided through the use of basic demographic variables. Chapter 2, Minority Officer Representation: Status and Objectives, presents a statistical analysis of the current composition of the officer corps in terms of end strengths, loss patterns, and accession patterns with a summary of objectives set by each Service. Chapter 3, Simulation Models, describes Army sources of procurement, compares them with other Services, and discusses simulated methods for achieving Army minority officer goals. The analysis is supplemented by 4 charts, 7 graphs, and 46 tables. Major findings indicate: a lack of coordinated Department of Defense policy regarding minority officer accession; no significant educational gap between minority and white officers; minority officers are in predominantly lower ranks, with lower loss rates; minority officer accession percentages are increasing for the Navy, Air Force, and the

Marine Corps, with Army accession variable; and the Army simulation model of officer sources of procurement indicates that the Army can reach any procurement level it defines. (LH)

**Descriptors**—\*Labor Market, \*Low Income Groups, Minimum Wage, Models, \*Statistical Analysis, Tables (Data), Unemployment, \*Welfare, \*Welfare Recipients

Two models of the duration of stay on welfare are developed and estimated using panel data from the California Aid to Families with Dependent Children AFDC panel survey. The first model characterizes the distribution of length of stay on welfare as drawn from the lognormal distribution with a truncation at the duration of the experiment (sixty months). The second model analyzes the movements on and off welfare, and duration of stay on welfare as a Markov process. Methodological findings indicate that statistical procedures fail to account for the special characteristics of the limited duration of observation and can be quite misleading. Substantive findings indicate that the welfare population as a whole involves an enormous turnover and modest length of stay. Those earning below the minimum wage are less likely to leave welfare and are more likely to return, stay off welfare for shorter periods and stay on for longer periods, and are more likely to be on welfare in a steady state than those earning above the minimum wage. Persons with high expected unemployment or low non-wage incomes respond similarly to those with below minimum wage earnings. Seven tables supplement the discussions. (Author/LH)

**Descriptors**—\*Blue Collar Occupations, Clinical Diagnosis, Community Resources, \*Delivery Systems, \*Demonstration Projects, Employment Qualifications, Interagency Cooperation, Interagency Coordination, Labor Unions, Mental Health, Mental Health Clinics, \*Mental Health Programs, Mental Illness, Persistence, Personnel Management, Program Descriptions, Psychotherapy, Semiskilled Workers, \*Social Science Research, Work Environment

The book presents important and innovative aspects of using the work setting as a vehicle for finding workers in psychological/social trouble (an estimated quarter of any work force at any time) and helping them stay on the job. It describes a four-year demonstration project in which a pioneering team of researchers combined the resources of trade union, management, and ancillary organizations (an outpatient medical clinic, an insurance company, and community mental health programs) to enable a large portion of 293 garment workers with emotional problems or mental illness to continue their employment, by restructuring both treatment goals and the work environment. Four specific questions shaped the demonstration: (1) how to locate people at work who suffer from emotional problems;

(2) how to engage and sustain the worker's involvement in treatment; (3) what is the nature of treatment and how does providing it within the work setting influence it and (4) what should be the labor division among patient, clinician, work representatives, and community agencies. Closing chapters present research data and conclusions: mental health professionals stationed in the work setting as a network hub can increase workers' survival rate, but substantial changes in clinical technology and service delivery systems are required. Descriptors—Emotional Problems, \*Feasibility Studies, \*Job Training, Labor Force Nonparticipants, Medical Treatment, Physically Handicapped, Rehabilitation Counseling, \*Rehabilitation Programs, \*Special Health Problems, Tables (Data), Vocational Rehabilitation, \*Welfare Recipients

The first 19 pages of the document describe a study carried out to examine the feasibility of using health intervention as a means of increasing entry of welfare clients into job training. Objective screening procedures were used to define physical and mental health problems and handicaps in a New York State sample population. Common health disabilities identified in the experimental group included emotional handicaps such as sick-role behavior, aversive handicaps including obesity, dental decay, and locomotor handicaps with limited mobility. Health intervention included treatment of sick-role behavior and other emotional problems by group counseling, weight reduction, exercise classes, and treatment of specific medical and dental problems. Job motivation classes were also provided. Improvement in health status and solution of problems was correlated with compliance in relation to treatment. Clients with initial medical handicaps, successful in the health rehabilitation program, entered CETA job training and gained employment, doing as well as controls without chronic

health problems over the same period. Appended materials include: all forms used, a short job motivation course outline, 70 case resumes, code words and definitions, and tables summarizing all measures (educational, social, personal, and medical) and correlations between all measures. (Author/BP)

**Upward Mobility Career Counseling; A Self-Instructional Text for First-Line Managers.**

Internal Revenue Service (Dept. of Treasury), Washington, D.C.

Pub Date [75]

Note—111p.

**EDRS Price MF-\$0.83 HC-\$6.01 Plus Postage**

Descriptors—\*Career Ladders, Career Planning, Counseling, \*Government Employees, \*Guides, Job Skills, \*Personnel Management, Promotion (Occupational), \*Vocational Counseling, Vocational Interests

Identifiers—\*Internal Revenue Service

The handbook is a guide for Internal Revenue Service (IRS) personnel managers charged with providing career counseling for employees involved in the voluntary Upward Mobility program. Any IRS employee in a career ladder where the journeyman level is grade 7 or lower is eligible to compete for an Upward Mobility Target Position. Every employee in grades 1-7 is given a skills and interest survey; two completed example surveys are included to acquaint personnel managers with their use in counseling interviews. The next step involves the identification and matching of projected vacancies with employee interests, or the recommendation of alternate career goals. A problem-solving exercise (helping an employee decide between taxpayer service representative and revenue agent) offers counseling techniques. At this point, the employee is ready to develop an individual development plan of objectives and activities for the coming year. The plan needs to be responsive to competition, the possibility of failing to achieve a stated objective, and to revision. For self-instructional purposes, a number of possible employee situations are presented with overall ways of handling them. Sample projection vacancy charts are included as well as sample occupational information for 11 IRS positions. (EA)

Identifiers—\*Youth Conservation Corps Act 1970 Amendment

The document is a copy of Public Law 93-408 enacted by the 93rd Congress, September 3, 1974 to amend the Youth Conservation Corps Act of 1970 in order to expand and make permanent the Youth Conservation Corps. The amended provisions deal with policy and purposes of the Corps, and qualifications, equal opportunity, employment, and term of employment of the participants. The duties and functions of the Secretary of the Interior and the Secretary of Agriculture in carrying out the act are outlined. They involve regulations, availability of Corps facilities not in use to educational institutions, cost responsibility, use of unoccupied Federal facilities and surplus equipment, and contract authority. Provisions concerning the grant program for State projects include application requirements and approval and grant limitation, payments and appropriation percentage. Also covered by the amendment are secretarial reports and authorization of appropriations. (MS)

Descriptors—\*Advisory Committees, Community Colleges, Elementary Schools, \*Organization, \*Planning, \*School Community Cooperation, School Community Relationship, Secondary Schools

Designed for administrators and teachers at the community college/secondary/elementary levels, the guide is a reference source for establishing and developing citizen advisory councils. A section on Advisory Councils—Planning discusses the need for citizen advisory councils, definition and purpose, advisory council types, and operational structures. The following section on Advisory Councils—Organizing outlines necessary steps pertaining to: written guidelines, charter, selection committee, selection of members and committee members, ad hoc committees, member qualifications, nomination of members, number of members, member term, attendance, officers, school representative, meetings, agenda preparation, and the first meeting. Sample agendas for first and second meetings and a sample charter also are included. A third section, Advisory Councils—Utilizing, presents topics related to operating techniques: successful operational techniques, common characteristics of an effective council, written recommendations, school action-council recommendations, absenteeism, member recognition, a checklist of what an advisory council can do, effectiveness and criticisms, and precautions for success. **EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Career Education, \*Concept Formation, \*Educational Philosophy, \*Vocational Development

Identifiers—Council of Chief State School Officers

The Council of Chief State School Officers defines career education as "essentially an instructional strategy, aimed at improving educational outcomes by relating teaching and learning activities to the concept of career development. Career education extends the academic world to the world of work. In scope, career education encompasses educational experiences beginning with early childhood and continuing throughout the individual's productive life. A complete program of career education includes an awareness of self and the world of work, broad orientation to occupations (professional and nonprofessional), in depth exploration of selected (occupational) clusters, career preparation, an understanding of the economic systems of which jobs are a part, and placement for all students." In addition, the council believes that career education is for all learners, is in all levels of education, includes all work (paid and unpaid), includes the total community, and is lifetime education. It represents a concept that actively involves students, parents, educators, and the community. It is not a separate program, but rather a concept that is integrated into and throughout the existing educational structure. Career education offers the emphasis and the means to deliver educational experiences which prepare individuals for a changing and increasingly complex society. (Author/EA)

Pub Date Jun 75

Note—134p.; This document is available in Spanish as No. CE 006 684

**EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage**

Descriptors—Coordinators, Elementary Schools, \*Guides, Organization, Organizational Development, Organizations (Groups), Paraprofessional School Personnel, Program Coordination, Program Costs, \*Program Development, Program Guides, Program Planning, \*School Aides, Secondary Schools, Student Volunteers, \*Voluntary Agencies, \*Volunteers, Volunteer Training

The coordinator's handbook provides a basic outline for establishing or improving volunteer programs; it is primarily directed toward assisting fledgling programs. The handbook defines a school volunteer program as an organization of persons who work in schools under the professional personnel's direction, strengthening the school program or offering special skills to enrich students' educational experience, or, outside the school, providing homework assistance or other special educational aid as needed. Responsibility for program organization rests with the person willing to establish working arrangements with the central school administration and participating school staffs to get the initial project underway. Chapter topics include: (1) funding sources and proposal preparation, (2) organizing and developing a volunteer program, (3) administering a volunteer program, (4) recruiting volunteers, (5) interviewing, selecting, and assigning volunteers, (6) volunteer orientation and training, (7) orientation and training of professional personnel, (8) using students as volunteers, (9) career education implications for volunteers, (10) maintaining volunteer morale, and (11) evaluating volunteer programs. Selected references are offered for the reader's further information. The handbook incorporates materials from eight organizations or volunteer programs, and is a revised and updated version of Washington Technical Institute's popular "ABC's: A Handbook for Educational Volunteers." Identifiers—Assessment of Career Development, Career Maturity Inventory, \*Texas

The report focuses on the development of measurement instruments and criteria for forming statements about student attributes which should result from career education. Two measurement instruments (the Assessment of Career Development and Career Maturity Inventory) were tested on approximately 15,000 9th and 11th graders in Texas. Questionnaires based on the results of the survey were sent to educators to gather their opinions regarding the usefulness of the instruments. The results showed that no preference between the two instruments existed. Results from the student survey indicated some degree of career maturity and ethnic differences among students. Criteria for career education student accomplishment were developed based on the question: What does an individual "look like" when he or she is 17 years old and has become adequately developed in terms of career education? A total of 279 learner outcomes were identified and rated in a Statewide survey of students, parents, educators, and persons from business and industry. These were reduced to 177 learner outcomes which were compared with areas covered previously by the two instruments. The results showed that only 11 percent of the outcomes were measured either partially or indirectly. Surveys, questionnaires, and other related materials used in the study are appended. (Author/EC)

Identifiers—Texas

In order to evaluate and obtain information about the usefulness of the Career Education Measurement System, a questionnaire was developed to survey school personnel perception and interpretation of the reporting system in Texas. The responses to the questionnaire were examined for 22 test instruments used in a pilot test to determine if the items were adequate measures of learner outcomes. An evaluation questionnaire was sent to 524 test administrators on 136 campuses which field tested the career education instruments. Approximately 29% returned useable evaluation forms. The respondents were asked to rank five types of reporting formats: outcome mastery, level of outcome mastery, areas of proficiency, item response, and school curriculum objective-referenced evaluation (SCORE). The SCORE format was most often preferred while the outcome mastery format was least often preferred. The respondents were asked for the following information: the usefulness of the interpretative guide ("Reading the Report") sent with the test results, the usefulness of the information contained in the test results, suggestions on who should receive copies of the test results, when the test results should be received, testing time available, and who should be test administrators. The evaluation form for the career education reporting system is appended. (Author/EC)

Identifiers—Partners in Career Education Project, \*Texas

A criterion-referenced measurement and diagnostic system for career education was developed using 79 of the 177 basic learner outcomes identified in Texas. Approximately 500 test items, referenced to the outcomes, were developed and submitted for student and professional review and statistical analyses following item tryouts and field testing of the instruments. A sample of schools was selected for each instrument at each of two levels, with 10 instruments at the lower level (grades 7 and 10) and 12 instruments at the upper level (Grades 8 and 11). In all, 506 classes

were distributed among 130 campuses in 84 school districts. Various statistical procedures were used in item and instrument validation for item tryouts and field testing. Forty-four of the learner outcomes were tried out with students who had received instruction specifically designed to develop the behavior described by these outcomes. Data were obtained on 51 objectives measured by 215 items for the 44 learner outcomes. The test results were reported to give the student and school personnel diagnostic information about student performance on the outcomes by using the school curriculum-reference evaluation format. Over two-thirds of the document contains appended materials related to the processes involved in the study. (Author/EC)

Representing a group effort by the author and the National Manpower Institute, the prospectus focuses on ways to improve the integration of the traditionally separate world of work and education—ways to break up the "time traps" of education for youth, and work for adults. It especially speaks for the 16-19 year old population, working women, workers needing training or retraining, minority group members, and people over 60. Part 1, Youth, discusses the 20 percent youth unemployment rate, the mismatch of competency development and available jobs, and the necessity of "infusing" liberal arts and vocational education. Part 2, The Career Years, explores work in light of improving the quality of life, not merely expanding the Gross National Product, and perceives the imminence of the revolution against the injustices toward older people. Part 3, The Prospect, grapples with the economic and political questions involved in instituting education-work policy. Some features of the proposed change strategy include: establishment of Community Education-Work Councils and a Work Institute, an Occupational Outlook and Career Information reporting system of national/local information, increased career counseling, youth community work/service programs, unemployment insurance law revision, and elimination of age structures on public education. The volume, consisting of seven papers, provides some data-based inferences about how women choose and implement their careers, principal factors that influence the choice, and barriers that interfere with women's vocational potentialities. Chapter 1, Demographic and Social Factors in Women's Work Lives, and Chapter 2, Measuring the Vocational Interest of Women, are brief overviews of related research and problems. Chapter 3, Parental Influences on Women's

Career Development, examines the influence of the mother's employment history as well as paternal identification and influence. Chapter 4, Individual Factors Related to Career Orientation in Women, explores ability and achievement, personality, self-concept and self-esteem, and relationship of values to career orientation. Chapter 5, Marriage and the Employment of Women, examines six variables: marital status, marital satisfaction, male attitudes, family size, influence of husband's income, and wife's educational level. Chapter 6, Sex Role Stereotypes and Career Versus Homemaking Orientations of Women, reflects how the socialization process of childrearing and educational practices tends to restrict women's behavioral choices. Chapter 7, Barriers to the Career Development of Women, discusses potential individual and social roadblocks resulting in underachievement, overcompensation, and exclusion. The concluding chapter by the editor summarizes changing attitudes, existing problems, and future implications. (EA)

Intended for teachers and administrators in trade, industrial, and technical education, the book is organized so that each chapter may stand on its own. A broad spectrum of areas is covered in the 13 chapters: (1) historical background; (2) trade and industrial education and the labor market; (3) definition and objective of trade, industrial, and technical education; (4) determining program needs; (5) trade, industrial, and technical education programs; (6) the administration of trade, industrial, and technical education; (7) labor, management, and community relations; (8) guidance and counseling; placement and followup; (9) staff recruitment and development; (10) professional organizations; (11) VICA: trade, industrial, and technical education's youth club; (12) program evaluation and accreditation; and (13) major issues in trade, industrial, and technical education. Each chapter concludes with a questions and activities section and a list of suggested source materials. Appended materials contain additional examples and information, and include: discussions held over a three year period by a joint committee appointed by the Industrial Arts and Trade and Industrial Education Divisions of the American Vocational Association; a list of Industrial Service Occupations Educational Programs; and program questionnaires. **Identifiers—**\*Career Intern Program, CIP, Opportunities Industrialization Centers of America, Urban Career Education Center

The report describes the first year of development and present operation of the Career Intern Program (CIP), a component of the Urban Career Education Center's alternative school for high school dropouts and potential dropouts. The purpose of the program, operated by the Opportunities Industrialization Centers of America under a contract from the National Institute of Education, is to provide opportunities for students with school problems to achieve their career aspirations. The program begins with 10 weeks of intensive orientation, counseling, and career investigation. Its second phase, lasting from 11 weeks to four semesters, features individualized instruction in basic academic subjects integrated with education; career exploration and hands-on experience highlight this phase. Disadvantages of the program's informality have included manipulation of staff by some students, conflicting staff standards for academic credit, and the great effort required to retrain the staff. Advantages have included a personalized school atmosphere liked by the interns, students' feelings of acceptance, and program flexibility. The document recounts the program's development, describes its students and the short-term effect on them, identifies those for whom the program works best, presents followup data, and discusses the program's implications. The New Haven Institute of Allied Health Careers has been involved in a project to (1) assist educationally disadvantaged students in preparing themselves for health careers opportu-

ilities through guidance services and (2) address the lack of access to and mobility within the health professions systems through educational change. Made up of a consortium of independent institutions, the institute worked as an extra-school agency supplementing school career education curricula through: institute staff experiences for grades 10-12. Program components are described and include: academic assistance, guidance services, career and educational exposure, and interinstitutional educational planning. Component methodology, evaluation and description of programs developed, analysis and demographic information regarding the 200 selected student affiliates, guidance personnel perceptions, effectiveness of career exposure, anticipated job opportunities in Allied Health and the employability of high school graduates, and program related forms and questionnaires are presented. The institute has attempted to nurture an adequate enough minority student constituency to encourage more responsive admission policies in area allied health professions programs, and 100 of its past graduates are attending college. Descriptors—\*Disadvantaged Groups, Entry Workers, Federal Programs, \*Government Employees, Middle Class Values, Personnel Data, \*Questionnaires, Research Methodology, Tables (Data), Underemployed, \*Values, \*Work Attitudes

Identifiers—Public Service Careers Program

The study attempted to measure world-of-work values and perceptions at entry and after a period of employment of enrollees in Plan D of the Public Service Careers (PSC) Program, a Federal program designed to bring disadvantaged individuals into Federal employment. A PSC Enrollee Questionnaire, developed from a logical taxonomy of world-of-work values based on an extensive review of related literature, was administered twice, along with supervisor evaluations, for initial testing and at six months after employment. The first session involved 328 enrollees in the entry-level component, 106 individuals in the upgrade component, and 95 Federal employees holding equivalent positions to those of PSC entry-level workers. The second session involved 211 PSC entry-level enrollees and 137 of their supervisors. Project background, methodology, data analysis, summary of findings and recommendations are presented, with 27 tables. Appended material, encompassing half the document, presents the data collecting instruments and responses. Conclusions state that PSC enrollee perceptions of world-of-work values were congruent with the "middle-class value system", these values were maintained through job experience, and the PSC employee is generally underemployed in the entry job and might continue to be after one promotion. Descriptors—Educational Programs, \*Flight Training, Operations Research, Planning, Post Secondary Education, \*Research Methodology, \*Research Projects, \*Simulation, Simulators, \*Training Techniques

The document presents a summary description of the Air Force Human Resource Laboratory's Flying Training Division (AFHRL/FT) research

capabilities for undergraduate pilot training. One of the research devices investigated is the Advanced Simulator for Undergraduate Pilot Training (ASUPT). The equipment includes the ASUPT, the instrumented T-37 aircraft, the T-4G and T-40 trainers, and the formation flight trainer. Methodological considerations and the development of a research program are discussed. Instructional procedures and practices are described for three phases which will be used in establishing a technological base: equipment familiarization and operator performance measures for the T-40 study, ASUPT, and instrumented aircraft. One area of suggested research is visual display which will include investigation of visual cues, the use of a visual model as a research tool, and four studies on the content of visual display. Another area for suggested study is motion cue research which will attempt to determine the necessary axes of cockpit motion for training simulation. A third area of suggested research focuses on training methods in the areas of cognitive pretraining, feedback, sequencing of training tasks, contextual training, and individualized training. A list of reference is included. A list of AFHRL/FT research programs for 1975 is appended. (EC)

Descriptors—Adult Education, \*Articulation (Program), \*Continuous Learning, \*Curriculum Evaluation, Curriculum Research, \*Educational Attitudes, Educational Research, Elementary Secondary Education, Foreign Countries, Research Methodology

Identifiers—\*Sweden

An examination of the lifelong learning aspect of the central and nationwide curricula in Sweden has been made by the UNESCO Institute for Education. The concept of lifelong learning is defined and criteria for developing positive attitudes and opportunities for its development are discussed. The analysis of the curricula in the basic and upper secondary schools involved five main criteria, with a number of subgroups within each: (1) horizontal integration; (2) vertical integration; (3) individual maturity—self realization; (4) autodidactic—development of readiness for new learning and relearning; and (5) directing studies toward creativity, flexibility, and equality. Discussion of the curriculum analysis takes up more than half the document. No empirical research was undertaken for this report, but already completed studies concerning school curriculum analysis in Sweden were investigated and are discussed with reference to the five criteria used in the analysis. Conclusions state that school curriculum and everyday school activities do not necessarily correlate, with the desired development of attitudes towards lifelong learning being neglected. Adult education is briefly discussed in terms of developing lifelong learning concepts among adults and educators alike. (LH)

Descriptors—\*Demonstration Projects, Doctoral Programs, \*Graduate Study, Individualized Programs, Interdisciplinary Approach, \*Internship Programs, \*Leadership Training, Masters Degrees, Performance Based Education, Program Descriptions, Vocational Directors, \*Vocational Education

Identifiers—Education Professions Development Act, EPDA

Seven graduate students were awarded Office of Education Professional Development Act (EP-

DA) fellowships to participate in the occupational education leadership program developed by Southern Illinois University during the 1974-75 academic year. All were enrolled as full-time students, three at the master's degree level and four at the doctoral degree level. During the year, each Fellow engaged in at least four distinctive types of leadership development activities. Each earned at least six semester hours of credit in individually arranged internships; completed administrative processes, theory, and planning courses; participated in an exclusive series of leadership development seminars; and engaged in related enrichment activities such as serving on an Illinois Division of Vocational and Technical Education public school evaluation team. The EPDA Leadership Development program has been evaluated and, in general, its objectives have been achieved. The interdisciplinary, performance-based, individualized program has been awarded continued status and funding for the 1975-76 year. The report gives an eight-page description of the leadership development program, a six-page description of the university's occupational education program, and a four-page description of the program evaluation. Approximately one-third of the documents is comprised of a list of personnel and the Fellows' vitae. (Author/AJ)

Ideas for Activities Designed to Combine Career Development with Subject Matter Instruction.

Michigan State Dept. of Education, Lansing.

Note—232p.

**EDRS Price MF-\$0.83 HC-\$12.71 Plus Postage**

Descriptors—Career Awareness, Career Choice,

\*Career Education, Career Exploration, Career Planning, Decision Making, \*Elementary Secondary Education, Integrated Activities, Integrated Curriculum, Intellectual Disciplines, \*Interdisciplinary Approach, Job Placement, \*Learning Activities

The organization of the ideas for career education activities is based on four components of career development; these form the four sections of the book: (1) self-awareness and assessment, (2) career awareness and exploration, (3) career decision making, and (4) career planning and placement. The book is further divided into elementary and secondary education sections, and an easy access guide for each section provides a grid listing 10 subject matter areas and the four career development components. All activity ideas relevant to a given career development component and appropriate to a given subject area appear by number in the grid matrices. Each activity idea in the book has six elements: (1) title; (2) subject matter content area/s; (3) purpose, two statements, one pertaining to the subject matter area and one to a career development performance goal; (4) primary activity, which contains the grade group designation and the major steps for carrying out the activity, presented to stimulate the teacher's thinking in his/her development of detailed instructional plans; (5) specification of materials; and (6) variations, which expand or contract on the primary activity so that teachers may develop applications for any grade groups. Descriptors—Anthologies, Case Studies, \*Community Health Services, Cultural Factors, Environmental Influences, Field Studies, \*Hospitals, Medical Education, \*Nurses, Nursing, Organization, Organizational Climate, Public Health, Social Factors, \*Task Performance, Work Attitudes, \*Work Environment

A major portion of the collection of 20 readings authored by practicing professionals consists of field observations presented both as raw data (field notes) and as analyzed and organized data. About the work of nurses in a variety of settings, a recurrent theme is that work behavior is greatly influenced by organizational and structural elements in each place of work, as

well as by social and cultural features in the society at large. Part 1, Inside the Hospital, includes the following sections: the head nurse, two perennial problems (death, pain), some special wards (managerial agent versus therapist role, mental illness and the tuberculosis patient, intensive care, the premature nursery, and the pediatric ward), the emergency room (health care system, a student's perceptions, and value transmission to student), and the guest role of nurse educators in health agency settings. Part 2, Outside the Hospital, covers: the development of a community clinic by two nurses, the nurse as leader in the Lamaze experience, surveillance in long-term illness, aspects of public health work, dying at home, the work of the visiting nurse, and social isolation and strategies for managing life in chronic illness. Each chapter concludes with discussion questions. (Author/MS)

Descriptors—Activism, American Indians, Asian Americans, Aurally Handicapped, \*Behavior Patterns, Black Community, Career Opportunities, \*Career Planning, \*Disadvantaged Groups, Females, Filipino Americans, Manpower Utilization, Mentally Handicapped, Mexican Americans, \*Minority Groups, Occupational Guidance, Physically Handicapped, Program Descriptions, Racial Integration, \*Socioeconomic Influences

Various existing theoretical, empirical, and policy issues regarding facets of the career behavior of special groups are explored through a series of essays presenting a variety of viewpoints. Special groups are defined as "collectivities of people set apart from the white male majority in terms of race, ethnic group, sex, physical disabilities, residence origins, and commitment to alternatives roles and values." Career behavior covers various processes, stages, and milestones in the career life cycle. Essays are divided into the following sections: (1) Theoretical Issues and Alternatives, presenting data, information, alternative theoretical approaches, and directions for further study regarding status attainment of special groups and career development; (2) Special Groups and Career Behavior, describing and analyzing the career behavior of Asian-Americans, activist youth, rural blacks, physically and mentally handicapped, native American Indians, women, Mexican-Americans, and rural Filipino youth; and (3) Manpower, Methodology and Policy, presenting policy strategies being utilized to aid special groups in their career-related problems. It is suggested that the document be utilized as a supplementary text in occupational sociology, minority-relations, vocational psychology, and education and guidance courses. (LH)

Schulz, Harriette *Survey of Adult Education Programs for the Disadvantaged.*

Institute for Community Studies, Kansas City, Mo.

Pub Date Sep 75

Note—132p.

**EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage**

Descriptors—\*Abstracts, \*Adult Basic Education, Adult Dropouts, Adult Education, \*Adult Education Programs, \*Annotated Bibliographies, \*Disadvantaged Groups, Illiterate Adults, Literacy Education, Program Descriptions, Reports, Research Projects

The publication contains abstracts and annotated bibliographical references of research projects and programs in adult basic education. The projects and programs cited represent the results of a survey to search out studies that delineate project population, methods, materials, and results. The survey was designed to limit the time period covered (1965-75) and the educational area covered (academic rather than vocational). The abstracts are arranged alphabetically by author in a 60-page section. A discussion section contains observations drawn from the survey

supporting the conclusion that basic questions concerning adult education (what kind of teachers, teaching what kind of students, with what kind of content, at what level of complexity, and in what teaching style) have not yet been definitively answered. Those studies which seemed to be peripheral to the main survey and those which did not include sufficient achievement data are listed alphabetically by author in an annotated bibliography (Appendix A, 47 pages). Other appended materials include: approximate figures on grade level gains per unit of time, a suggested checklist for future research, and a list of sources contacted in gathering the documents (includes computer searches and references). Descriptors—\*Annotated Bibliographies, Audiovisual Aids, Career Awareness, \*Career Education, Career Exploration, Career Planning, Educational Games, Educational Resources, Elementary Secondary Education, Instructional Materials, \*Instructional Media, Post Secondary Education, \*Resource Guides, Simulation, \*Vocational Development

Intended to provide those involved in career education with a catalog of career development-related resources, the bibliography presents over 645 entries (most with annotations) for use in career development programs for all levels. The resources described are on display at the Indiana Career Resource Center (South Bend) and are available for loan to schools in Indiana. Included are an introductory guide for use of the bibliography and charts which assist users in finding resource descriptions by utilizing grade/age, career goal, and curriculum categories. The largest portion of the bibliography, printed materials, is grouped into four sections: professional materials (for the educator), youth through adult (student materials in the categories of early childhood and primary, intermediate, middle school, high school, postsecondary, adult, and women), reference materials (for the educator and student), and periodicals and journals (primarily for the educator). Other parts list: sound filmstrips (mainly for elementary through postsecondary level), games and simulations (middle and high school level), audio tapes and records, kits (for student use), tests, films, film loops, transparencies, slide programs, and video tapes (for educators). Also listed are some publishers and sources of the materials. (Author/MS)

Descriptors—Educational Counseling, Educational Facilities, Educational Philosophy, Educational Planning, \*Educational Programs, \*Individualized Instruction, \*Individualized Programs, \*Program Content, Program Design, Program Development, Students, Teacher Role, Teachers, \*Teaching Methods

Individualized and personalized (I and P) programs place learners at the center of all the activity. The eight main elements of such programs are: philosophical and taxonomic considerations; instructors as resource persons and learning managers; peer tutoring, personal and academic counseling, and cognitive style maps of students; instruction employing such techniques as pre- and posttesting, computerized data banking, individual diagnosis, and designed instructional mediation; financial prioritization; inservice training for administrators and educators, and individualized student orientation; open architecture of physical facilities; computerized management information and evaluation systems; and accountability and planning models. The development of the elements of the I and P program is a dynamic process. Since the computer, a full range of mediation, and paraprofessionals can adequately dispense information, instructors are able to become designers and managers of learning, prescribers of instructional material, and interpreters of evaluation data. Instructors are able to select a proper mix of a large variety of elements and tools for each individual student. Educational technology thus does not replace instructors; it merely frees them to humanize the educational process. (Half the document consists of explanatory notes of terminology used in the text.) (JR)

Descriptors—\*Administrative Personnel, Administrative Problems, Administrator Background, \*Administrator Characteristics, Administrator Education, Administrator Evaluation, \*Adult Basic Education, Adult Education Programs, Adult Educators, \*Comparative Analysis, Educational Needs, Program Administration, Questionnaires, \*State Surveys, Tables (Data)

Identifiers—\*Nebraska, Part Time Administrators

Nebraska Adult Basic Education (ABE) program administrators have been studied in terms of their general characteristics and part- or full-time positions in an attempt to gather data to assist in future program development, administrator recruitment, and administrator training programs. A questionnaire was sent to all known administrators in the State, with a 93.44% return. Four major sections sought information regarding: (1) demographic/biographic data; (2) the nature of each respondent's program, including problem evaluation; (3) administrator task analysis; and (4) perceptions of competencies and need for additional education. Data analysis is presented in 19 tables and major findings are enumerated. Most administrators were found to be male, part-time, between 30 and 50 years old, having some graduate training, and no specific training for adult education work. A variety of competency training and educational needs were uncovered, with part-time people indicating more need in this area. Results are stated in a variety of formats, and recommendations include that the State Department should continue to seek additional funding for hiring full-time administrators. The questionnaire, location of courses and programs, high school equivalency diploma statistics, and 1970 Census information regarding Nebraska's educationally disadvantaged adults are appended. (LH)

The document describes a workshop designed to provide participants with information, competencies, and skills pertaining to working with adult learners. Eleven persons from central and western Nebraska participated. The workshop's program included participants' self-appraisal of their competencies and their involvement in talk sessions and small group work sessions. Workshop requirements included developing a plan and evaluation scheme for an adult education program and a workshop project (such as planning, implementing, and evaluating a program, course, or conference; evaluating an existing program; or keeping a log of readings in periodic literature related to a specific aspect of adult education). Three resource persons conducted special sessions on basic educational media, values clarification, and methods and materials. Participants evaluated the workshop individually on special forms and in small groups in open-ended sessions. The report includes a brief description of the program and participants, a five-page glossary of terms, a one-page bibliography, the conference schedule, a six-page outline of the workshop's rationale and requirements, and the participant evaluation of the conference. Appendices (12 pages) provide a participant list, a self-evaluation form, learning activity guidelines, project suggestions, and a basic educational media workshop worksheet. (JR)

**Identifiers**—Learning Preference Inventory, Luscher Color Test, Manzo Bestiary Inventory

The study described in the report identifies personality characteristics and learning styles of adult basic education (ABE) students on the basis of three instruments: the Luscher Color Test, the Manzo Bestiary Inventory, and the Learning Preference Inventory. The volunteer sample consisted of 83 ABE students. Subsample comparison groups consisted of sixth graders, stock brokers, and GED students. Data on the total of 158 subjects were analyzed by computer to display individual and group profiles. Results of the Luscher Color Test indicated a sense of fragileness, a slight degree of social-emotional dependency, and a need for healthy release from tensions on the part of the ABE students. The Manzo Bestiary Inventory findings corresponded to the Luscher findings but also indicated a need for ABE students to appear highly aggressive and cautions about intimacy with others. The Learning Preference Inventory indicated their preference to learn by direct teaching approaches such as lecture, tutoring, and group interaction rather than by less direct approaches. The study concluded that ABE students are like other segments of society, especially those with newly heightened aspirations. Unlike other undereducated adults not enrolled in ABE classes, however, ABE students are probably more aggressive, intense, and conflict-prone. (Author/JR)

**The Status of Women in the Adult Education Association of the United States of America.**

Pub Date Jun 73

Note—30p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—\*Adult Education, Educational Background, Equal Opportunities (Jobs), \*Females, Income, \*National Surveys, Participation, \*Sex Discrimination, \*Status

**Identifiers**—\*Adult Education Association, AEA

The study's purpose was to gain information regarding the status of women in the field of adult education. Questionnaires were mailed to a randomly selected sample of 1,312 members of the Adult Education Association (AEA) to determine general member characteristics and male/female differences in income, educational levels and aspirations, participation levels, and awareness of sex discrimination. Based on a 70.8% response return, the survey indicated an approximately 60% male membership with a median age of 43.3 years for men and 50.2 years for women. A female earnings gap of approximately \$1,500 existed for 11-12 month employment and approximately \$3,000 for 9-10 month employment. Advanced degrees were held by 75.4% of male members and 70.9% of female members; male members were significantly more active at the national level. An awareness of some type of sex discrimination was indicated by 47.7% of the women and 28.1% of the men. Females responses to being a victim of sex discrimination were indicated concerning hiring, promotions, and salaries. Recommendations included more research in specific areas of adult education, a review of graduate school policies, legal action by the discriminated, and female recruitment for high administrative posts. The survey instrument is appended. (EA)

**Identifiers**—Nurse Practitioners, School of Health Professions, SHP

The report describes and evaluates the concept and implementation of an interdisciplinary School of Health Professions (SHP) as well as its key

educational features and financial requirements. SHP focuses on primary health care, interprofessional education and care-delivery, and self-paced curricula. Six types of health professions comprise the initial student body: primary-care physicians, primary-care dentists, nurse practitioners, clinical pharmacists, graduate social workers, and health care coordinators. The University of the Pacific's program prepares students to deliver the specific kinds of primary-care services required in professional practice. The following aspects of the SHP are discussed: (1) roles and responsibilities, selection, and orientation of faculty; (2) criteria and procedures for student selection; (3) SHP organization and governance; (4) systematic procedures for evaluating students, curriculum, faculty, administrators, and the organizational structure; (5) a communications system for the flow of information among the people involved in SHP; (6) steps for developing a full curriculum; (7) the support and participation of health professionals during the feasibility study; (8) requirements for accreditation and licensure in California; (9) the stages in the implementation of SHP; (10) financial projections; and (11) remaining tasks. A list of sites visited and a bibliography are included. (Author/EC)

According to recent census figures, 10% of today's population are over 65 years old. It has often been stated that individual learning needs and capabilities decline with age. To challenge this idea, a study was conducted to gather information about older adults, their learning interests, activities, and obstacles. Four hypotheses were tested through a series of interviews with 256

adults (55 and over) in Nebraska. The interview schedule was tested for reliability and validity. Data were analyzed utilizing tables with frequencies, percentages, and mean scores as well as a crossbreak analysis and t-test of significance for testing some hypotheses. Data from the study revealed a need for more suitable continuing education programs based on the following findings: (1) obstacles to learning selected most often were "don't like to go out at night," "not enough time," "cost," "home responsibilities," and "job responsibilities;" and (2) courses selected as an indication of learning interests included "Stretching Your Retirement Dollar," "Tax Benefits for Older Americans," "Outdoor Flora," "Medical Care in the Retirement Years," and "Laws Affecting the Aged." The study's design, findings, recommendations, and implications of the study are presented. Data collection materials, miscellaneous tables, and comparison data on learning projects are appended. The supplement to the Career Orientation Curriculum Guide: 7-8 provides actual units of instruction which have been utilized in career orientation programs throughout the State of Ohio. In general, the units contain teacher and student objectives, student activities, teaching procedures, information on career opportunities in specific fields, and resource lists. These items, for some of the units, are presented in chart form. Some of the units contain instructional material for use with the activities. The units are organized around the following subject areas: art, guidance, health, home economics, industrial arts, integrated units (concerned with the seven basic developmental areas of self, the individual and the environment, economics, world of work, education and training, employability and work adjustment skills, and vocational decision making), language arts, math, music, science, social studies, and typing. The supplement to the Career Exploration Curriculum Guide: 9-10 presents concrete approaches that school districts in Ohio are utilizing to implement and integrate career exploration throughout the curriculum. The lessons and units in the supplement contain objectives, learning activities, suggested teaching procedures, and resource lists. Specific information on skills required for certain jobs is provided. Some of the content is presented in chart form. The supplement is organized into seven major sections: integrated career exploration simulations (45 pages) consisting of outlined guidelines for mathematics, science (electricity), and social studies (urban government, economics); career exploration lessons (54 pages) in home economics, journalism, foreign languages, and art; and career

exploration units (60 pages) offering learning packets for jobs in photography, advertising, and horticulture. A nine-page decision-making unit entitled "Know Thyself" and a brief hands-on implementation guide conclude the document. (Author/MS)

**Career Education: Suggested School-Industry Programs.**

Warren City Schools, Ohio.

Pub Date [75]

Note—30p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—\*Career Education, \*Cooperative Planning, Elementary Education, \*Elementary Secondary Education, Guidelines, Industrial Education, Industry, Manufacturing Industry, Models, Program Coordination, \*Program Development, Program Guides, School Community Cooperation, \*School Industry Relationship, Secondary Education

**Identifiers**—\*General Motors Corporation, Ohio

The document, produced to aid Ohio communities in linking their schools' kindergarten through secondary career education (CE) programs with the needs and interests of local General Motors (GM) plants, defines some central concepts of career education and discusses successful, cooperative interaction between industry and career education. The focus throughout the brochure is on various aspects of GM operations. The following concept areas are to guide the development of school-industry cooperation: (1) education and training as related to one's career choice, (2) economics as related to career choice and the responsibility of the worker to industrial economics, (3) employability and work-adjustment skills, and (4) the sequence of development of decision-making skills. Three outlines for linkage are offered: (1) implementation of CE-GM Corporation linkage; (2) format for development of local career education: GM plant-city programs; and (3) suggested list of student performance objectives to aid in evaluating CE-GM linkage activities. Activities are suggested for plant involvement in career education programs, and a sample career education program at a Packard electric division is outlined. A map illustrates the relationship of Ohio career education program sites to General Motors Corporation plant sites. (Author/AJ)

The Career Development guide for teacher use in Grade 9 was developed and evaluated with the help of classroom teachers in Idaho in response to the need for additional emphasis on career awareness and exploration and for opportunities for career planning. It is intended as a basic core and focuses on both the personal and world of work aspects of career development. The document opens with an 8-page teacher's guide explaining the course outline, with suggestions for presenting and supplementing the basic core and a suggested sequence of lessons for integrating the three components. The body of the document contains lesson plans in the three component areas: self understanding (52 lessons focusing on economic, social, and psychological reasons for work, a study of general personality traits with reference to job selection and success on the job, and lifestyles); occupational information (46 lessons focusing on types of occupation, employment qualifications, and career exploration); and implementing career plans (24 lessons focusing on occupational choice, planning for employment or further education, and obtaining and keeping a job). Each lesson guide includes aims and objec-

tives, procedures and activities, and resources and references. Supplementary material and detailed lists of resource materials and supplies are appended. (BP)

**Identifiers**—Michigan, Project MICE

The Macomb Intermediate Career Education (MICE) regional project was designed to provide a network of coordination, technical assistance, and leadership to assist local education agencies in developing career education programs. Twenty school districts participated in the project which utilized inservice training, task forces, and local work session teams. Project goals were: to identify services necessary for regional coordination of career education in constituent districts; to select and pilot test strategies to facilitate development, adoption, and implementation of career education objectives; and to plan a strategy for local education agencies to adopt and develop career guidance plans. Evaluation of inservice training by pre- and posttest and self-assessment indicated that the majority of the participants increased their basic career education knowledge. There was evidence also of functioning committees to form a basis for future career education efforts. Approximately 100 pages are appendices consisting of: pre- and posttest survey, agenda for inservice training programs, survey to rate materials disseminated, opinionnaire to evaluate inservice training sessions, directory of district team members, and extensive task force reports (communication and reporting, computer usage, assessment and evaluation, goals and objectives, infusion, and career guidance). A copy of the Career Development Inventory, Form 1, also is included. (EA)

**Work and Welfare Patterns in Low Income Families.**

Brandeis Univ., Waltham, Mass. Florence Heller Graduate School for Advanced Studies in Social Welfare.

Spons Agency—Manpower Administration (DOL), Washington, D.C.

Pub Date Jun 75

Note—249p.

**EDRS Price MF-\$0.83 HC-\$12.71 Plus Postage**

**Descriptors**—Demography, Employment, \*Employment Patterns, Employment Problems, Income, Labor Force Nonparticipants, Labor Market, Legislation, Low Income, \*Low Income Groups, Manpower Development, \*Policy Formation, Predictor Variables, Public Policy, Social Mobility, \*Social Science Research, Unemployment, Welfare, \*Welfare Recipients, Welfare Services

The study's objective were: (1) to describe the patterns of work and welfare experience in low-income families and to explain their causes, and (2) to apply the findings to the policy problem of deciding which groups of welfare recipients should be required to work and provided with what mix of manpower services. The effectiveness of work registration requirements was analyzed. The intention was to isolate the extent to which the welfare system itself causes job instability. The data sources were the Graduate Work Incentive (Negative Income Tax) Experiment and the Panel Study on Income Dynamics. The many findings are reported in terms of (1) work patterns, (2) the effects of welfare on work, and (3) welfare dependency. It was learned that those

who can and cannot work are not easily distinguished on the basis of characteristics that could be specified. Labor market problems are not clearly linked with demographic characteristics. Overwhelmingly, males in the low-income population move from welfare to work on their own, and so, apparently, do most female heads of low-income families, over time. However, there is much movement from work to welfare, and little movement out of the low-income ranges. (Author/AJ)

A study of the economic characteristics and occupational status of the Chinese in the United States, based primarily on a special tabulation of the 1970 census, has resulted in a demographic profile of this bicultural and physically distinct ethnic group. Potential improvement and expansion of the occupational sphere of the Chinese is discussed in terms of cultural aspects. Extensive tabulation accompanies the text, including 89 tables, 7 charts, and 9 maps. Each of the 14 chapters contains a list of findings relating to employment aspects of the Chinese; titles include: (1) Patterns of Chinese Immigration; (2) Foreign-born and Alien; (3) Geographical Dispersion; (4) Educational Level; (5) Labor Force and Occupational Pattern; (6) Working Women; (7) Chinese in Government Work; (8) Unions a Major Hurdle; (9) Income; (10) Unemployment and Underemployment; (11) The Chinese Work Ethic; (12) Self-employment and Small Business; (13) Cultural Baggage; and (14) Racism Modified. A listing of 34 summary findings, cultural anchors and differences, and 24 recommendations are provided, with four tables appended. It is stated that the study may be useful to social scientists, government agencies, administrators, and social service organizations. (LH)

Descriptors—\*Apprenticeships, \*Building Trades, Comparative Analysis, Construction Industry, Craftsmen, \*Employment Qualifications, Employment Statistics, Entry Workers, Individual Characteristics, Industrial Training, Interviews, \*Labor Unions, Minority Groups, Occupational Information, Occupational Surveys, \*On the Job Training, Surveys, Tables (Data)

The study focuses on the issue of entry into building trades unions, detailing union procedures and standards, journeyman's background, and comparing training routes. Various basic construction trades were investigated: bricklayers, carpenters, electrical workers, ironworkers, plumbers and steamfitters, and sheet metal workers. Data were collected through interviews and surveys. About 49% of the journeymen interviewed (from a total of 1,234) had served apprenticeships and were younger, better educated, more likely to have friends and relatives in the trade,

and learned the trade faster than those trained informally. Craftsmen obtain work in the jurisdiction of most building trades local unions in four ways: graduation from an apprenticeship program, admission to the union as a journeyman or by being upgraded into the union's construction branch, transfer from other locals, and working under temporary permits. A large majority of informally trained journeymen learned their trade either by working as laborers or helpers or by working on the job in open shops. The study provides strong evidence that apprenticeship training gives construction craftsmen considerable advantage over the informally trained. Sixty-six tables illustrate minority representation union entry requirements (by trade) and other comparative data. A bibliography, list of persons interviewed, and survey instruments are appended. The book contains exercises for the participants in a collective bargaining course designed to assist public sector managers in attaining a stable and productive labor relations environment. Each exercise has been keyed to an appropriate point in the instructor's manual. A number has been assigned to each exercise; the exercise is designated as "CM" to denote "Case Material", a roman numeral which corresponds to the unit in which it is used, and an arabic numeral which places it in sequence with the rest of the materials in the unit. Types of materials include quizzes, completion charts, discussion question, and background information on labor situations to be used with the course negotiations simulation and other exercises. The units are: The Collective Bargaining Process: An Overview (1 item); Why and How Workers Join Unions (5 items); Petition, Election, and Recognition Stages (5 items); The Negotiation Process (11 items); Negotiations (Simulation) (3 items); Contract Administration (17 items); and an In-Basket Exercise. It is recommended that each course participant have a copy of the book. (Author/MS)

**Is Commitment Enough?**

Pub Date 31 Oct 75

Note—11p.; Speech prepared for the Annual Meeting of the Adult Education Association of the USA (Salt Lake City, Utah, October 31, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Adult Education, Citizenship Responsibility, \*Community Education, Consumer Economics, \*Educational Needs, Educational Objectives, Educational Programs, Educational Responsibility, \*Remedial Programs

Since two-thirds of all adult learners plan their own education programs without professional help, outreach to these learners in their own community settings is the next important movement in education. Outreach also applies to those many adults who need help simply in coping with everyday life in this complex society. A recent study found that Americans have more trouble with everyday problems in consumer economics than in any other knowledge area, that one-fourth of Americans do not understand their rights and obligations under our system of government, that one-fifth of adults have trouble with occupational knowledge, and that people had more trouble with arithmetic than with any other learning skill tested. The responsibility for rectifying the situation in the case of adults rests with the adult education community. A set of 65 learning objectives covering occupational knowledge, consumer economics, health, community resources, and government and law, which the aforementioned study identified, is the core around which remedial instructional programs can be built. The task in adult education is to find people who would not otherwise seek help on their own and involve them in instructional programs committed to innovation and change built around real world situations. Descriptors—Administrative Problems, \*Civil Rights Legislation, \*Equal Opportunities (Jobs), Federal Legislation, \*Federal Programs, \*Industry, Program Administration, Program Effectiveness, Program Evaluation, \*Program Improvement, Racial Discrimination, Sex Discrimination

Identifiers—Compliance Agencies, Federal Agencies, \*Nonconstruction Industry

The report reviews the effectiveness of management of the Federal contract compliance program in the nonconstruction industry. The following areas were evaluated: (1) Department of Labor guidance to and control over the 13 other Federal agencies assigned compliance review responsibility for nonconstruction contractors, (2) compliance agencies' efforts in implementing the Department guidelines for conducting compliance reviews and complaint investigations, (3) application of enforcement measures available to the compliance agencies, and (4) coordination of compliance review and complaint investigation activities between the Department and the Equal Employment Opportunity Commission (EEOC). Several areas that need improvement in the Department's administration of the program and weaknesses found in the compliance agencies' implementation of the nonconstruction program are discussed. The problems of coordination between the Department, the compliance agencies, and EEOC were due to lack of information exchange and duplication of some compliance activities at contractor facilities. An analysis of comments from the Department, Department of Defense, and General Services Administration are

presented. Recommendations to the Secretary of Labor are included. Appended materials include correspondence, reviews, and comments related to the report. (Author/EC)

**Identifiers**—\*Nurse Training Act 1975

The report on the Nurse Training Act of 1975 focuses on the legislation to provide funds for nursing education through an amendment of title VIII of the Public Health Service Act. It proposes to continue, without change, for fiscal year 1975 the nurse training authorities of title VIII of the Act and to continue the authorities for fiscal years 1976-78 with modifications designed to meet the current needs in nursing. Support to schools include grants and interest subsidy payment for construction of nursing education facilities, institutional support in the form of capitation grants, financial distress grants, nursing student loans and scholarships, special project grants, professional nurse traineeships, contracts for improvement in nurse training, advanced nurse training programs, and nurse practitioner programs. A copy of a communication from President Ford which disapproves with the amendment due to economic needs of other priorities is included. A 46-page section focuses on a detailed analysis of the Act. Additional and minority views related to the passage of the bill are included. (Author/EC)

**Descriptors**—Adult Education, \*Annotated Bibliographies, Change Agents, \*Educational Alternatives, Educational Assessment, Educational Innovation, Educational Methods, Educational Objectives, \*Folk Schools, \*Foreign Countries, \*Relevance (Education), Social Change, Social History

A partially annotated bibliography of literature dealing with folk schools throughout the world has been arranged under the following heading: (1) philosophical and historical material; (2) folk schools in social movements; (3) area and developmental studies; (4) methods and materials; and (5) related materials on popular education, social movements, and social change. Folk schools are defined as a type of residential adult education carrying out both additive and social change-oriented programs. Emphasis in this guide is placed particularly on those seeking new social, economic, or cultural relations, and also on those trying to adjust students to existing reality or to defend an ethnic minority or subculture. The compiler states that this collection on the folk school experience in different national settings offers a research tool to facilitate examination of the contribution of folk schools to induced change. Where appropriate, code letters have been included to indicate geographical areas mentioned in the work. Within each section the entries are listed alphabetically by author. Author and geographical area indexes are provided. (LH)

The guide represents an effort to implement the first phase of an exploration of careers curriculum designed to provide in-depth exploration of jobs previously surveyed by students in the seventh and eighth grade career awareness phase of the program. The following three units are included for each of 11 subject areas: an awareness unit, 4 to 9 weeks in length, through which the student takes another look at himself and at the subject he is studying in terms of its relevancy to the 10 identified clusters of career opportunities; a communications unit, 9 to 14 weeks in length,

during which the student has an opportunity to focus on what each subject contributes to his acquisition of communication skills necessary for success in each cluster of career opportunities; and an exploration unit (one semester in length) which provides each student an opportunity to assume a number of the job roles for which a particular subject prepares him. Each of the three types of units contains objectives, activities, materials and resource lists, and suggested evaluation measures. The subject areas covered in the units are art, business, electronics, English, graphic communications, home economics, mathematics, music, science, social studies, and woodworking. (Author/MS)

**Identifiers**—\*California

The catalog contains titles of curriculum, instruction, guidance, and management materials for career education available in microfiche format. The compilers state that the materials vary in quality and format. Some are professional documents, while others are early unpublished drafts. The catalog has three major sections. A subject index, covering 58 subject areas, is organized by age span (elementary, secondary, community college, and adult). An institutional index identifies where the materials were developed (25 institutions in California). A one-page section lists position papers and management documents. The listing of materials gives a code for use (teacher, student, counselor, administrator, or a combination of uses). An asterisk is used to signify that the unit can be utilized in an interdisciplinary approach. The number of pages in each item is indicated. Information on using the catalog and on ordering documents is also included. The CE numbers cited are document control numbers used by the Educational Resources Information Center, not ERIC Career Education Clearinghouse numbers. (Author/MS)

Descriptors—\*Career Education, \*Educational Objectives, \*Educational Programs, \*Elementary Secondary Education, Program Content, \*Program Descriptions, Program Development

The document presents an account of project activities that evolved around the development and implementation of career education in Leon County School District, Florida. The purpose of the project was to begin effecting needed educational changes at the K-14 level by developing a comprehensive career education program designed to increase student self-awareness and to develop work attitudes and decision-making skills. Activities in the following areas are reported: (1) program objectives and accomplishments of each resultant program; (2) major activities for: total staff, curriculum, guidance, evaluation, and placement and followup component activities; (3) problems; (4) publicity activities; (5) dissemination activities; (6) data collection and evaluation plans; (7) staff employment and utilization; and (8) staff development activities and inservice programs for project school personnel. The bulk of the document consists of 160 pages of appended materials which include: program models, objectives, and implementation strategies, and samples of objectives and materials from the Fusion of Applied and Intellectual Skills (FAIS) project; counselor's record and guidance activities summary forms; placement and followup model, forms, and data; listing of inservice workshops; correspondence; 32-page listing of resource materials provided to pilot schools with cost data; reporting forms and examples of feedback; and publicity activities. Descriptors—\*Career Education, Career Exploration, \*Elementary Secondary Education, \*Guides, \*Integrated Curriculum, Occupational Clusters, \*Science Curriculum, Study Guides, Teaching Guides, Unit Plan

Five guides for the implementation of career education elements in the middle school (Grades 6-8) science curriculum are presented. Part 1 opens with a suggested implementation plan and includes unit guides containing suggested learning activities for each grade level, focusing on selected occupational clusters and occupations to provide for in-depth exploration. Part 2 focuses on a career education syllabus for use by middle schools science teachers. Unit guides, with suggested activities and resources, are presented for orientation and exploration in several occupational clusters which can be related to the existing curriculum at each grade level. Part 3 is a career guide for science and Parts 4 and 5 for biology, all at the secondary level. Each career guide is correlated with the text used and contains two parts: (1) teacher's handbook—implementation strategies, objectives, utilization of supplementary activities and resources, student evaluation form, career clusters, and related appendices; and (2) student's career guide—directions, objectives, activities, career choices, career clusters selected for exploration, careers correlated with text, evaluation of student outcomes, locally available resource materials, and appended material including information about job application. A module is presented for delivering basic language skills in German at the secondary level in combination with elements of career education, including career awareness/exploration, self-awareness, decision making, employability skills, and job preparation. The module includes a teacher's guide and five student career units (business and office, communications and media, health and related occupations, hospitality and recreation, and marketing and distribution). The teacher's guide includes the following information: strategies for implementing the student units and incorporating related resources, specific objectives/activities of the student units, and descriptions of contents of each unit. Vocabulary quizzes, texts for listening comprehension tests, career exploration form, and a resource list are appended. The student units are based on different clusters and consist of two sections: (1) the learning activity package (list of selected occupations, basic vocabulary list, multiple choice basic vocabulary test, skit, supplementary vocabulary, and supplementary activities) written in part in English and German and designed to provide the student with basic skills in the language relative to the occupational unit being studied, and (2) the career research package (information on selected occupations and career exploration form) which provides occupational information and activities to assist the student in exploring a career. **EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—Career Education, Discriminatory Legislation, Equal Opportunities (Jobs), Federal Legislation, Females, Nondiscriminatory Education, Occupational Aspiration, \*Sex Discrimination, \*Sex Role, \*Sex Stereotypes, \*Social Attitudes, \*Vocational Development, Womens Studies

The five major papers whose full texts are included address themselves to various topics that can influence the lives of women in their career choices and advancement. Federal Legislation: Impact on Women's Careers, Mary Allen Jolley, discusses sex discrimination, legal gains made over the past 10 years, sex role stereotyping, and vocational education. Management Factors Affecting Women's Career Development: The Myth of Shared Roles, Francille M. Firebaugh, presents statistics regarding women's career patterns and home responsibilities. Stereotyping of Career Development Opportunities: High School Students, Louis Vetter, discusses reasons why professional educators, counselors, and researchers should be seriously concerned with continuing sex role work stereotyping at the high school level. Stereotyping of Career Development Opportunities: Professional Women, Mary Bach Kievit, discusses where women are as professionals, reasons for their present conditions, and what the trends are. Second Sex Syndrome: Culturally Ascribed Roles, Carol A. Fought, presents societal reflections of women in terms of intelligence, inferiority, passivity, dependency, physical beauty, emotionality, and destiny, and examines career education. References accompany each paper. A bibliography of items related to women's career development is included, together with a list of relevant center publications. (LH)

Descriptors—\*Adult Education, \*Career Education, \*Correctional Education, Corrective Institutions, Delivery Systems, Educational Planning, \*Educational Programs, \*Models, Program Development

The program was designed to provide training in adult career education to selected individuals employed in corrections and corrections-related agencies and to develop a generalized planning model with implementing delivery systems of adult career education for correctional settings. The report describes basic training provided in four regional 10-day seminars which equipped participants with basic skills and knowledge for planning, implementing, and evaluating delivery systems of adult career education in correctional settings. Advanced training provided in a national

five-day seminar and 10-day internship for participants selected from those successfully completing the basic training program is detailed. The advanced training enabled participants to effectively implement leadership roles in the planning, implementation, and evaluation of the correctional programs. The design of the planning model is discussed, including such aspects as testing by simulations and internal and external evaluations. The method of designing adult career education delivery systems, utilizing the planning model, is described. As a result of the program, 64 individuals received basic training, 17 received advanced training, a generalized planning model was developed, and 21 delivery system models for correctional agencies in 16 States and Canada were designed. The model was designed to provide a guide for systematic planning, implementation, and evaluation of adult career education in correctional settings, utilizing a systems approach. It consists of seven chapters and a flowchart presenting seven major functions which must be carried out: (1) establishing a conceptual framework, (2) setting up an information processing system and analyzing data to describe the actual correctional setting, (3) assessing needs for adult career education in such a setting, (4) establishing management subgoals and objectives to implement major goals, (5) formulating a management plan to optimize delivery of education, (6) implementing the programs, and (7) evaluating the delivery system and the programs. The flowchart is a graphic representation of the functions. A numerical coding system relates the flowchart to the narrative specifications for the model's functions. Directions for using the model are provided. Appended material (59 pages) includes: a glossary of terms; a bibliography; a list of career education-related periodicals; information on the development of the model; names of resource personnel, conference and seminar participants, national advisory committee members, and design committee members; and a subject index. Apprenticeship Handbook for Educators.

California State Dept. of Education, Sacramento. Bureau of Industrial Education.

Pub Date 74

Note—145p.

Available from—California State Dept. of Education, 721 Capitol Mall, P.O. Box 271, Sacramento, California 95802 (\$3.50)

Document Not Available from EDRS

Descriptors—Administrator Guides, Agency Role, \*Apprenticeships, \*Educational Administration, Educational Objectives, Federal Legislation, \*Labor Legislation, \*Program Administration, School Community Relationship, School Industry Relationship, State Legislation, Teacher Qualifications, Teaching Methods, \*Trade and Industrial Education

Identifiers—\*California

Intended primarily for educators participating in already established local apprenticeship programs, the handbook provides information on the laws and agencies of apprenticeship, its traditions and practices, and administrative alternatives implemented in various programs. Modern apprenticeship programs are defined as combining on-the-job training and related instruction in the classroom to help apprentices achieve competence in the technical and related aspects of their occupations. Ten chapters trace the essen-

tial components of apprenticeship program: (1) Why Apprenticeship?, (2) Legislation for Apprenticeship, (3) Administrative Organizations, (4) Apprenticeship Committees, (5) The Local Apprenticeship Program, (6) Operation of Apprenticeship Classes, (7) Selection of Apprentices, (8) Selection of Teachers and Coordinators, (9) Industry's Role in Apprenticeship, and (10) Public Relations for the School Program. Approximately half of the document is taken up by appendixes, which present: The Fitzgerald Act of 1937; the Apprenticeship Law in California; organization charts from the California State Departments of Education and Industrial Relations, California Community College, and the U.S. Department of Labor; California Apprenticeship Council standards, rules, and regulations from the California Administrative Code; sample forms for apprenticeship advisory committee meetings and apprentice ratings; California Plan for Equal Opportunity in Apprenticeship; and Digest of California Attorney General Opinions. Identifiers—\*Canada

Canadians experienced in the field of immigration and representing the academic community, government, and community-based organizations discussed major policy issues regarding the Canadian Federal Green Paper on Immigration Policy and the possibility of a national council on immigration and migration at the conference. A variety of topics were considered and condensations of each discussion and who was involved are presented in the 41-page report for the following areas: immigration and population growth, immigration and provincial responsibilities, immigrants and cities, immigration and Francophone Canada, refugee policy, the case for a National Immigration and Migration Council, Canada's selection policy, immigration and the labor force, the illegal immigrant, the brain drain, Canada as a multicultural society, and immigration policy forum. The text is in both French and English, with tables supplementing the discussions. A proposal to create a National Immigration and Migration Council is appended, along with the conference program and a list of participants. It is stated that more can be done to facilitate the economic and social integration of immigrants into Canadian society, with institutions cooperating in their integration and the alleviation of discrimination. Health Aide Education and Utilization: A Task Identification Study. Final Report. Volume 1.

Homemakers Home and Health Care Services, Inc., Kalamazoo, Mich.

Spons Agency—Metropolitan Washington Regional Medical Program, Washington, D.C.

Pub Date Mar 74

Note—342p.; Some tables will not reproduce well

EDRS Price MF-\$0.83 HC-\$18.07 Plus Postage

Descriptors—Core Curriculum, Curriculum Development, Data Analysis, Health Occupations, Health Occupations Education, Health Personnel, Health Services, \*Home Health Aides, \*Manpower Utilization, \*Nurses, \*Nurses Aides, Paramedical Occupations, Questionnaires, Surveys, \*Task Analysis, Task Performance, Vocational Education

A study of the Licensed Practical Nurse (LPN), Nurse Aide (NA), and Homemaker-Home Health Aide (H-HHA) occupations was conducted during 1972-73 in Metropolitan Washington, D.C. Questionnaires were administered to 600 LPNs, NAs, and H-HHAs in 30 health facilities who rated the frequency and importance of 346 tasks. Usable questionnaires numbered 492. A representative sample of em-

ployers also rated the tasks for each job title. The data revealed considerable task overlap between job titles and between patient care settings, and much agreement between job titles concerning the frequency and importance of task performance. On this basis, the study constructed an outline for an experience based core curriculum containing four modular units of instruction and organized to provide exit points for various job titles leading up to the LPN level. The study also developed a model for community-wide involvement in aide education and utilization to maximize the career mobility and effective use of aides. Appendixes comprising 125 pages provide: a brief glossary; an inventory of hospitals, nursing homes, and providers of home health care in the Metropolitan Washington area; the employer and employee task inventory questionnaires; data cross-tabulations by patient-care setting, shift, education, and years of experience; and a bibliography. Identifiers—Education Professions Development Act

The research, based on 49 doctoral dissertations concerned with or related to career education, presents tabulated and narrative summaries on their areas of emphasis, research methodology, implementation, domains, and significance. Recommendations for further research are listed in the 31-page presentation. The 160-page appendix contains abstracts of the dissertations studied. Each abstract provides a cover sheet listing author, title, sponsoring institution, date of approval, chairman of dissertation committee, and availability data; and provide a check list specifying major and minor emphases in the following areas: relation to the Federal definition of career education (seven categories), focus on a specific stage of career development (five categories), method of research (six categories), type of study related to implementation (three categories), domain (four categories), and researcher's and reviewer's judgments on significance of research (six categories). Each abstract also discusses in detail the research problem, the methods and procedures, and the major findings. The appendix also lists eight career education dissertations by EPDA Fellows unavailable for inclusion in the study and a list of 84 dissertations by EPDA Fellows which did not pertain to career education. Finally the document lists EPDA project directors by State. (JR)

Distributive Education 1: Course of Study.

Oklahoma State Dept. of Vocational and Technical Education, Stillwater. Curriculum and Instructional Materials Center.

Pub Date 73

Note—405p.

Available from—Oklahoma State Dept. of Vocational and Technical Education, 1515 West Sixth Street, Stillwater, Oklahoma 74074 (\$12.00)

EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors—Classroom Materials, \*Course Content, \*Curriculum Guides, \*Distributive Education, \*Individualized Programs, \*Instructional Materials, Reference Materials, Visual Aids, Worksheets

The document is a distributive education (DE) course of study whose major goal is to help stu-

dents gain the knowledge and skills that will facilitate their work and advancement in management. The nine topics comprising the course are: orientation, importance of distribution, careers, personal development, human relations, job skills, employment, financial management, and business math. The 25 units of instruction are designed to account for approximately 15 weeks of individualized instruction time; the other six weeks are left to the discretion of the DE teacher-coordinator. Each instructional unit includes behavioral objectives, suggested activities for DE teacher-coordinator and students, information sheets, assignment sheets, transparency masters, tests, and answer keys. Units are planned for more than one lesson or class period. The suggested activities are outlined in steps to follow to achieve specific objectives. The teacher activities are largely related to the provision of instructional materials and resources. Information sheets provide a guide for presenting background knowledge. (Author/AJ)

Descriptors—\*Career Education, Counselor Functions, \*Counselor Role, \*Counselor Training, Individualized Instruction, Inservice Education, \*Instructional Materials, Models

The individualized instructional unit is intended for use in inservice or preservice education of counselors and was designed to provide a clear, concise overview of career education and to help counselors understand precisely what their support duties are. The unit is divided into five sections, each based on performance objectives. At the completion of the unit, the participant should be able to demonstrate an understanding of: (1) the basic concepts of career education, (2) the rationale for career education, (3) four models for implementation of career education, (4) the structure of the school-based model, and (5) specific activities which the counselor can perform at each educational level to support career education. A suggested supplementary reading list is given at the end of the unit. Other appended materials are a sample survey form, a sample parent letter, and a sample student interview. The unit has been field-tested in three inservice workshops and in several college classes, and was reviewed by recognized career education and guidance and counseling leaders; the material has been revised in accordance with their suggestions. **Articulation with Secondary Schools.**

Pub Date 7 Dec 75

Note—16p.; Paper presented at the Annual Meeting of the American Vocational Association (69th, Anaheim, California, December 7, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Administrator Role, Admission (School), \*Articulation (Program), Educational Accountability, Educational Responsibility, Guidelines, \*Interinstitutional Cooperation, Leadership Responsibility, Noninstructional Responsibility, \*Post Secondary Education, Program Planning, \*Secondary Education, Teacher Role, Unemployment, Vocational Development, Vocational Directors, \*Vocational Education, Vocational Education Teachers

Hampered by budget restrictions and looked to for innovations to influence national economics, postsecondary educational leaders should not overlook an obvious responsibility: articulation of

programs with the secondary systems to counteract youthful unemployment, a problem whose magnitude statistics reveal. A continuum of education without unnecessary duplication of instruction or delay in students' attainment of career objectives must be developed, for educational separatism has reached a point of diminishing returns. The establishment of an articulated agreement between educational levels is a three-phase process: (1) a formal letter of agreement between the systems involved, based on meetings between administrators; (2) program letters of agreement, based on meetings between faculties; and (3) evaluation, review, and revision, based on input from all involved parties. Seven items should be considered for inclusion in the first letter of agreement. The next phase, more laborious, can be achieved by taking outlined steps; there are three minimum requirements for the second letter of agreement. There are broad guidelines for the evaluation phase. The greatest problem is attitudinal: educators should remember that allowing or refusing persons enrollment in postsecondary studies significantly influences their chances of success throughout their lives, and contributes to the nation's economic and social situation. Identifiers—British Columbia, Canada, \*University Of British Columbia

The activities of the Centre for Continuing Education, University of British Columbia, and its professional staff are reviewed for the 1974-75 year. A statistical report shows an overall enrollment increase of 13.74%, with part-time, evening, and correspondence credit courses showing expanded student participation and course offerings. A broad review of general education programs includes descriptions of: creative arts, daytime program and Women's Resources Centre, humanities and sciences, language institute, public affairs, social sciences, urban and regional studies, and weekend programs. Continuing professional education and special projects are described and include the following courses: adult education training, aging, agriculture, community regional planning and architecture, criminology, education-extension, engineering, forestry, continuing legal education, and social work correspondence program and human relations. The center's professional and administrative staff and its publications, as well as individual activities and publications of the professional staff are listed. The Women's Resources Centre, now firmly established, is one of the most important outreaches of the university into the community, and the center also makes available noncredit general programs free of charge to senior citizens, with 456 having participated during the past year. **Felt Needs for Training by Adult Basic Education Administrators and Teachers in Texas.**

Texas A and M Univ., College Station.; Texas Education Agency, Austin. Div. of Adult and Continuing Education.

Pub Date Sep 72

Note—76p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—Administrative Personnel, Administrator Attitudes, \*Adult Basic Education, Adult Education Programs, \*Adult Educators, Educational Attitudes, \*Educational Needs, Inservice Education, \*Inservice Teacher Education, Program Attitudes, Program Coordination, Questionnaires, \*State Surveys, Tables (Data), Teacher Responsibility, Teacher Role

Identifiers—Texas

The reported study attempted to determine for program planners the felt training needs of adult basic education (ABE) directors and teachers in Texas. The questionnaire (appended) was prepared at Texas A and M University and revised after review and field-testing. Of 1,900 questionnaires mailed, approximately half were completed and returned; the questions were cross-tabulated and the data analyzed by computer. The report is largely comprised of tables, representing five major data areas: (1) biographical data of local ABE program staff, (2) local program information, (3) student-related information, (4) inservice training needs, and (5) higher education-related services. Among implications drawn from the data are these: Most ABE staffers, although educated beyond the bachelor's degree, have not received any adult education training; they are dedicated, but uncertain about their roles, concerned about testing procedures, and wish to spend more time teaching. Many directors are not in the program by choice. Participation in inservice training is widely discrepant; a significant number of those who have participated were dissatisfied. Both teachers and directors have definite feelings about their specific training needs, which should be met quickly. There are also indications of a need for adult education training at the undergraduate level. (AJ)

gram Administration, Program Content, \*Regional Planning, Regional Programs, Reports, \*Staff Improvement, Staff Utilization, State Departments of Education, \*State Programs, Statewide Planning

Identifiers—\*DHEW Region V

The document presents a report of the approach, activities, and achievements of the Adult Basic Education Staff Development Project undertaken by Health, Education, and Welfare Region 5. The region is composed of six States: Minnesota, Wisconsin, Michigan, Illinois, Indiana, and Ohio. The purpose of the joint venture is to strengthen and develop the individual State's capabilities for continuous staff development. This permanent delivery system would encompass the State department of education, institutions of higher learning, and local education agencies. The States will develop long-range goals which would involve research, dissemination of resources and assistance, and practical applications and innovations. The administrative structure of the project staff is discussed. The implementation of project objectives was achieved in three phases. Final reports for each participating State, making up the body of the report (78 pages), are presented and contain information on State activities and planning in the staff development project. Appended are: a third party year end evaluation report of Phase 3, names of staff development committee, guidelines for a coordinated reporting system, letter of agreement, Phase 3 activity checklist, a brief vitae form, and a needs assessment instrument. **National Apprenticeship and Training Standards for Dental Technicians. Revised.**

National Association of Dental Labs., Inc., Washington, D.C.

Spons Agency—Manpower Administration (DOL), Washington, D.C. Bureau of Apprenticeship and Training.  
Pub Date 75

Note—39p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Apprenticeships, Curriculum Guides, Dental Associations, \*Dental Technicians, \*Educational Policy, Health Occupations Education, Job Training, \*National Norms, National Programs, Performance Specifications, \*Standards, Time Blocks, Wages

The guidebook presents a systematic and uniform method for training dental technicians throughout the industry, incorporating basic standards recommended by the Bureau of Apprenticeship and Training. The first section defines terminology and establishes rules and regulations regarding apprentices and apprenticeship programs in 16 areas, including qualifications, program requirements, work experience, and certification. The National Association of Dental Laboratories Apprenticeship and Training Policy is presented. The second section examines nine areas of adapting national standards to local use through program supervision by the National Association of Dental Laboratories. Topics include committee formation, employers and supervisors of apprenticeship and training, apprenticeship ratio, consultants, registration agency, term of apprenticeship, rates of pay, supervision, and modification. The third section outlines job skills and hours necessary for their learning in the following areas: dentures, with 16 units of instruction taking 6,000 hours; crown and bridge, with 13 units of instruction taking 6,000 hours; ceramics, with 10 units of instruction taking 4,000 or 4,665 hours; casting, with eight units of instruction taking 4,000 hours. Copies of apprenticeship agreements between apprentice and employer and apprentice and joint apprenticeship committees are presented, and a listing of regional bureau offices and State and territorial apprenticeship agencies are provided. Descriptors—\*Aviation Technology, Charts, Data Analysis, Data Processing, Diagrams, Electrical Systems, Electronics, Feasibility Studies, Guidelines, \*Human Resources, \*Manuals, \*Material Development, Military Science, Systems Analysis, \*Systems Development, Tables (Data)

Identifiers—Air Force, Avionics, \*Fire Control Systems

The methods and problems encountered in the development of a prototype human resources data handbook are discussed. The goal of the research was to determine whether it was feasible to consolidate, in a single comprehensive handbook, human resources data applicable to system design and development. Selected for this purpose were data on the functions performed by the 32XXX avionics career field on the fire control system of nine Air Force fighter systems. The report discusses the methods used and the problems encountered during the development of the prototype handbook. The prototype handbook, presented in Appendix A, was designed for ease of use and was organized into three major data sections. Section 1 was reserved for data comparisons on system design, training, manpower, occupational tasks, maintenance procedures, etc. Included in Section 2 were data on past, current, and projected numbers of personnel, various skill levels, etc. Section 3 was reserved for technical information that could be generalized to a wide variety of problems. Included in the last section were data on the effects of task difficulty, error rates in performing maintenance activities, performance time, and experience level. An alphabetical index of contents concludes the handbook. (Author)

**A Multi-Objective Model for Planning Equal Employment Opportunities. Research Report No. 23. Revised Edition.**

Office of Civilian Manpower Management (Navy), Washington, D.C.

Spons Agency—Office of Naval Research, Washington, D.C. Personnel and Training Research Programs Office.

Report No—OCMM-RR-23

Pub Date Oct 75

Note—33p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Administrative Organization, Employment Opportunities, \*Equal Opportunities (Jobs), Linear Programming, \*Manpower Development, \*Models, Objectives, \*Organizational Development, \*Planning, Probability, Program Planning

Identifiers—Markoff Processes

The document suggests some new modeling approaches for equal employment opportunity (EEO) planning. Previous manpower planning models of the Office of Civilian Manpower Management have utilized multi-period Markoff processes embedded in goal programming (multiple objective) models. These are here extended to EEO plans directed to changing the mix of employees over time. At each point in the planning interval, the organization is taken as given (for example, in terms of the probabilities for promotion, transfer, etc.) when formulating manpower programs. Over time, however, these organization processes are submitted to planned changes which alter the probabilities of occurrence for these events. The Merit Promotion System is preserved and other controls are also imposed explicitly for the exercise of managerial discretion. The focus here is on an ordinary (absolute value) formulation of objectives and a numerical illustration is supplied with differing weights for each of the indicated classes of objectives. Other types of objectives are briefly discussed, along with different approaches to problems of validation and, subsequently, implementation in a U. S. Navy context. (Author/EC)

**The Importance of Vocational Education in the Total Education Picture.**

Pub Date 13 Nov 75

Note—11p.; Speech Prepared for the National Convention of the Future Farmers of America (48th, Kansas City, Missouri, November 13, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Academic Education, Career Education, Community Coordination, \*Educational Planning, \*Futures (of Society), Individual Needs, \*Program Coordination, Technological Advancement, \*Vocational Education

Liberal arts education and occupational education can and must complement each other. Different and separately administered general and vocational offerings will only delay the development of the total education enterprise necessary in a rapidly changing society. It is important to contemplate the skills and knowledge that schools/colleges/universities should be striving to impart. More viable relationships are needed between education and all of the work that people do; students should not have to choose between liberal arts education and occupational education. Post-industrial America now engages more people in sales, services, and government than in the production of goods. A knowledge-based society warrants more educational program-fusing. Career education activities are needed to help all students understand the free enterprise system and the arts and to develop consumer/economic literacy. More open-ended and flexible programs geared to individual needs must be designed for the next century. The broad range of an individual's talents should be developed; over-concentration on one specific area of education should be avoided. Likewise, high quality educational programs utilizing all of the educating mechanisms (Federal/State/ local governments, private employers, trade associations, labor unions, and the home) are needed. (EA)

Descriptors—\*Career Choice, Job Tenure, \*Longitudinal Studies, Mathematical Models, \*Military Personnel, Multiple Regression Analysis, Occupational Surveys, \*Prediction, Predictor Variables, Vocational Interests, \*Work Attitudes

Identifiers—Air Force, \*Recruitment

The report investigates the validity of career intent and job attitude statements for predicting reenlistments among 54,803 airmen in 101 enlisted specialties. Statements were made while completing Air Force occupational surveys during the period 1966-71. Frequency and percentage distributions characterizing item responses and career decisions of the sample are given. Relationships between career intent/job attitude responses and actual reenlistment decisions were studies using multiple linear regression techniques. Job attitudes were found to be substantially related to career decisions but did not provide unique contributions to predictions of career decisions when used in conjunction with career intent statements. A model-seeking exercise identified a second-degree polynomial model with career intent and time-in-service interaction vectors as the most appropriate prediction model. Separate prediction equations were obtained for a number of selected subsamples. Practical examples of forecasting reenlistment rates are illustrated. The regression model selected for the demonstration used weights derived from the total sample to predict the percentage of actual reenlistments for 30 specialties. Ten principal findings of the study are identified. Appended is a chart of Air Force specialties used in the sample. (Author/MS)

ment of Education pertaining to the concept of career education. Career education is conceptualized as the bridge to relevancy between education and work; it moves the school out of the ivory tower into interaction with the total community. The position paper is further designed to provide the reader with an overview of career education in the State. The need for career education is identified and a philosophy established to accommodate that need. A great diversity exists in California schools; therefore, the proposed model for career education contained in the publication, with associated goals, components, and infusion processes, provides general guidelines for district- and school-level activities. Some other aspects of career education considered in the paper are: career education for adults, career education resources, process and product evaluation, staff development and management, and concern for racial and ethnic minorities.  Education, \*State Surveys  
 Identifiers—\*Colorado, Elementary Secondary  
 Education Act Title III, ESEA Title III

The resource guide to Colorado career education programs offers information on more than 50 school programs, obtained from a number of sources including a statewide assessment instrument administered by the 1974 Colorado State facilitator project and the Colorado Department of Education. It is not intended to be comprehensive. Information concerning the efforts of higher education was obtained through written inquiries to all Colorado postsecondary institutions and was compiled by the Office of the State Coordinator for Career Education. The elementary and secondary school career education programs are described in one-page formats which include: (1) school district, program title, grade level, population, and cost per pupil; (2) objectives, narrative description, and evaluation methods; and (3) availability of materials, special requirements, and information source. Postsecondary institutions were requested to indicate what resources they could provide for school districts or school personnel in career education. Their responses are listed, giving the on- and off-campus courses related to career education, the names of resource people, and any materials or other resources available through that institution. State career education resources are listed separately. A page of information on the 306 ESEA Title III Colorado State Facilitator Project is appended. (Author/AJ)

 Aides

Identifiers—\*Career Opportunities Program, COP  
 The Career Opportunities Program (COP) is directed to the educational needs of low income families. The study of COP-trained aides describes the impact of the most effective teams of teachers and aides and social workers and aides on: the learning-teaching process; the delivery of school social work services; the pupils; communication between the school and parents; and the roles of teachers, school social workers,

and principals. Opinions regarding training of COP aides and their working relationships to other school staff were also gathered. The study was confined to the elementary level and to participants who made the best use of aides (12 teachers, 4 social workers, 4 principals). The findings, based on interviews, are summarized for each of the above areas of investigation. Participants' responses are reported in 45 tables corresponding to each question asked in the interviews. Two predominant responses were observations of: (1) the positive impact of COP aides on the individualization on instruction and (2) the importance of COP aides as a resource to the professional staff. Implications related to the success of paraprofessionals, their effectiveness, and their training are discussed. A copy of the pre-interview letter and the teacher interview instrument are appended.  Descriptors—Agricultural Education, \*Data Analysis, Educational Needs, Educational Problems, Educational Programs, Effective Teaching, Program Effectiveness, Questionnaires, \*School Surveys, Secondary Education, Tables (Data), \*Teaching Load, \*Vocational Agriculture, \*Vocational Agriculture Teachers  
 Identifiers—Washington

The document studies the problem of student overload in vocational agriculture programs in the State of Washington, examining its impact on teaching effectiveness and shop safety. The present teaching load is compared with an evaluation of an acceptable teaching and student load. Two questionnaires collected data: (1) regarding the present teaching load (136 of 197 sent to vocational agriculture instructors were returned), and (2) evaluating an acceptable teaching load (335 of 469 sent to school superintendents, principals, and vocational agriculture instructors were returned). An analysis of the data concluded that: (1) not enough is known about the cooperative education program in vocational agriculture, (2) inadequate time for supervision is allowed for the majority of instructors, (3) majority of the programs need more instructors, (4) supervised farming projects and the Future Farmers of America are adversely affected by student overload, (5) 13 to 30 students should be able to be supervised in a cooperative education program, (6) an agriculture classroom should consist of 16-20 students, with shop classes between 14 and 16 students, and (7) 75-80 students is an acceptable teaching load. A series of 37 tables support the analysis. Questionnaires and form letters used in the study are appended. (Author/EC)

**Identifiers—\*Outreach Centers**

It is the undeniable responsibility of the community college to provide educational opportunities for all citizens in a community, including culturally different adults. In designing relevant outreach center programs for culturally different adults, it is of utmost importance to determine the needs of the groups, to directly involve participants in the process, to explore their perceptions of reality, and to examine biases held by the dominant society. The logical starting point for program planning involves determining the group characteristics, which will vary from one group to another. The social-psychological characteristics of culturally different groups usually include low self-esteem, a high degree of dependency on others, and difficulties in communicating with the dominant society. The Martin Luther King Adult Education Center of Kankakee Community College, Kankakee, Illinois is a model outreach center that provides physical/socioeconomic/social-psychological support through its "success-oriented" program. Effectiveness of an outreach center will depend ultimately on the quality and dedication of the teaching/counseling/administrative staff, and on preservice and inservice training, which are vital teacher training components. Moreover, outreach centers need to coordinate their efforts with community libraries and learning centers in order to serve the needs of culturally different adults. (EA)

**Descriptors—\*Career Education, Curriculum Development, \*Curriculum Guides, Educational Objectives, Integrated Curriculum, \*Mathematics, \*Occupational Clusters, Resource Materials, \*Secondary Education, Teaching Procedures, Unit Plan**

The guide offers a compilation of teacher-developed career education materials which may be integrated with secondary level curriculum in mathematics. Suggested activities and ideas present the following units based on career clusters as they relate to mathematics: construction, communications and media, hospitality and recreation, public service, marine science, health, manufacturing, transportation, and agri-business and natural resources. Activity suggestions for other math-related units are also given including several "silent lectures" emphasizing logical problem solving and units on consumer economics, metrics, computer science, statistics, and other mathematical applications. Objectives, teaching procedure, and related resources and materials are presented for each unit. A 12-page list of suggested local field trip sites and guest speakers is included. (EC)

Descriptors—\*Aerospace Education, Career Opportunities, Course Descriptions, \*Educational Needs, Educational Problems, \*Educational Programs, Elementary Secondary Education, Industry, Post Secondary Education, Program Descriptions, \*Program Effectiveness

Identifiers—\*California

The purpose of the Aerospace-Aviation Education Task Force was to study the problems and present recommendations for space and aviation education in California. Educational trends and the increasing rate of dropout occurrence reveal a need to introduce changes in the education and training of students. Many career opportunities exist in the field of aerospace and aviation. Committees were formed to concentrate on the various existing educational levels. The following levels were studied and several aspects of their programs are discussed with recommendations for their development: (1) elementary and junior high schools (description of exemplary programs); (2) high schools and community colleges (requirements for a standard designated subjects teaching credential in aviation flight instruction and/or aviation ground instruction, courses in aviation education, and commentary on the education code); (3) colleges, universities, and private schools (description of aerospace or aeronautical programs in various institutions); and (4) industry and the professions (findings from a survey of aerospace industry employers on their opinions regarding the needs of aerospace education, a discussion on recent technological developments, and an overview of aviation education in the Soviet Union). Materials related to the activities conducted by the task force are appended. (EC)

Descriptors—Administrative Personnel, \*Aerospace Industry, Aviation Technology, Clerical Occupations, \*Employment Opportunities, \*Occupational Information, Production Technicians, Professional Occupations, Technical Occupations

The document briefly presents career information in the field of aerospace industry. Employment exists in three areas: (1) professional and technical occupations in research and development (engineers, scientists, and technicians); (2) administrative, clerical, and related occupations (engineers, scientists, technicians, clerks, secretaries, stenographers, typists, tabulating machine and computer operators, and other office personnel); and (3) production occupations (sheet metal work, machining and tool fabrication, other metal-processing, assembly and installation, inspecting and testing, flight checkout, materials handling and maintenance, and custodial). Aerospace employment is expected to rise by the mid-1980's. Job opportunities are most favorable for highly-trained scientists, engineers, and technicians. Less skilled and unskilled workers are needed to fill entry level production positions. (Employment statistics for the industry up to December 1975 are provided.) (Author/EC)

Descriptors—Career Education, \*Educational Research, Reports, \*Research Coordinating Units, \*Research Projects, Research Proposals, \*State Programs, \*Vocational Education

Identifiers—Vocational Education Amendments 1968

The report summarizes information received from State Research Coordinating Units (RCU's) regarding research activities conducted under Section 131 (b) of Part C of the Vocational Education Amendments of 1968. Eleventh in a series, the report covers the second six months of Fiscal Year 1975 and is designed to inform States of research and development conducted by other States, thus facilitating exchange of information and reducing duplication of effort. A list of previous reports is included with an indication of their availability from the Educational Resources Information Center (ERIC). Sources of project abstracts are Abstracts of Instructional and Research Materials in Vocational and Technical Education (AIM/ARM) and Research in Education. The report is arranged alphabetically by State with information from American territories in a concluding section. Items listed for each reporting State or territory include: name of the Director of Vocational Education, name of the Research Coordinating Unit director, projects completed, new projects funded, research related activities, and projects and activities planned. A title or brief description of the project or activity and the name of the individuals or institution involved are given. (Author/MS)

Identifiers—\*Communications and Media Occupations

The guideline, an in-depth focus on one of the 15 U.S. Office of Education (USOE) career education clusters, provides instructors with information to support effective career decision making and occupational preparation. The first section provides a perspective of career education as applied to occupations in the guidelines (includes explanations of the USOE Model System, a career education/cluster system, and the World of Work function approach). The second section contains: procedures used to define the Dictionary of Occupational Titles (DOT) cluster job titles; listings of job titles representing occupational areas, primary occupations, and occupational families within the cluster; and job analyses describing major job function and duties of the Communications Media Occupations (CMO) from the DOT. A third section provides: purposes, learner characteristics, objectives, and activities for the career orientation (grades 7-9), career exploration (grades 9-10), and occupational preparation phases (grades 11-14, graphic communications); an articulation model for the preparation phase; an annotated bibliography of selected curriculum materials; four instructional strategies; learning activities evaluation model; and a list of primary occupations by school subjects. A final section selectively reviews the elements needed in constructing a successful career education system in the CMO cluster. (Author/MS)

Descriptors—\*Analysis of Variance, \*Aspiration, Career Planning, Data Analysis, \*High School Students, Measurement Instruments, Occupational Aspiration, Secondary Education, \*Social Influences, Student Characteristics, Tables (Data), \*Vocational Agriculture

The primary purpose of the study is to determine the educational plans of junior and senior vocational agriculture students and assess factors which may be related to their educational plans on graduation from high school. Information was collected from a sample of 623 students from 30 public high schools which provided vocational agriculture programs in 1974-75. Instruments for collecting data consisted of: (1) personal, family, and community data related to educational and occupational plans of Iowa vocational agriculture students (40 variables); and (2) agribusiness achievement test (four variables). The following educational plans on graduation were identified and studied: (1) those who planned to attend a postsecondary area vocational school (27%), (2) those who planned to attend a four-year college or university (17%), and (3) those who planned to enter the world of work (55.9%). The findings of the study reveal that there are differences in selected factors related to educational decision making among vocational agriculture students grouped according to their stated educational plans upon graduation from high school. A series of 87 tables support the analysis and discussion based on the collected data. Materials related to the conduction of the study are appended. (Author/EC)

Descriptors—\*Job Analysis, \*Manpower Utilization, Measurement Techniques, \*Military Personnel, Occupational Clusters, Tables (Data), \*Work Experience

Identifiers—Air Force, \*Functional Account Code

A major problem in the utilization of personnel appears in the identification of skills and knowledges acquired in job assignments held in the past. Lack of regular job inventorying of Air Force personnel by individuals rather than samples makes it infeasible to use job inventories to recapture a given airman's record. The possibility of using the Functional Account Code (FAC) in occupational analysis was formulated and a preliminary assessment to verify its potential is presented in the study. The study was made possible with the use of a file of records on all studies clustering job inventories from 1965-1971 with the FAC for each airman included. It was first shown that, when individuals are sequenced by FAC, the job clustering corresponds well with the FAC. Seventy-five Air Force Systems Commands are shown in graphic form. A more intensive analysis was then made of the Administration Specialist ladder, which contains the largest number of FAC's of any specialty. It was found that FAC titles agreed well with the titles assigned to job clusters by the analyst who interpreted the homogeneous grouping of the job inventories. Longitudinal analyses are planned as a continuation of the study. (Author/EC)

Descriptors—\*Affective Objectives, Business Education, Distributive Education, Home

Economics Education, Industrial Education, \*Performance Based Education, \*Surveys, Validity, Vocational Agriculture, \*Vocational Education

#### Identifiers—Affective Competencies

The study attempts to verify the affective competencies which vocational-technical areas in common require of students, and to validate those required in agriculture, business and office, distributive, home economics, and industrial education. The affective competencies were identified so that they might be a major part of the learning sequence, not merely incidental, and provide a basis on which to establish common experiences among vocational education programs. The competencies, elicited by review of vocational education publications, were verified by randomly selected employers, employees, and teachers. Their degree of commonality was validated by 48 State vocational directors, through the Delphi technique. The study concludes that: (1) State directors appear to agree that the five vocational areas do require common affective competencies; (2) teachers, employers, and employees appear to agree with directors on what constitutes affective competencies; (3) they appear also to agree on which are important for career success; (4) affective competencies appear to provide a commonality for the five areas; and (5) the common affective competencies appear to be as important as cognitive and psychomotor competencies. Tables comprise the largest part of the report. A research instrument, a condensed version of Bloom's taxonomy of educational objectives, and sample study correspondence are appended. (Author/AJ)

#### Identifiers—\*Prison Industries

The Institute of Criminal Law and Procedure analyzes the merits, limitations, and problems of various approaches to prison industry and recommends measures and programs to improve industries. Federal and State legislation affecting prison industries were examined, several prison industries were visited, and the literature of prison industries was reviewed. The study's findings are these: Prison industries exist in the context of correctional systems whose future dimensions are unknown and whose purposes are unclear. Therefore, before effective prison industry planning can take place, agreement must be reached as to underlying correctional philosophy and as to the expected numbers and distribution of offenders in the correctional system. Prison industries today do not achieve their traditional goals and should be modified (possibly eliminated). Intelligent modification will be possible only with better information on the true costs of prison industries as determined through standardized accounting procedures. Prison industries should provide a real work experience, including full work days, job compensation, minimum wage, and merit increases in pay. New and closer relationships with private industry can benefit prison industry. Finally, laws restricting prison production and marketing should be repealed. (Author)

#### ED 117 442 CE 006 092 100 Successful Vocational Special Needs Programs.

National Association of Vocational Education Special Needs Personnel.

Report No.—PL-90-576

Pub Date 1 Aug 75

Descriptors—\*Educationally Disadvantaged, Educational Programs, \*Handicapped Students, \*Program Descriptions, Secondary Education, \*Special Education, Teenagers, \*Vocational Education, Young Adults

The survey was conducted for the following purposes: (1) to provide a sampling of successful vocational special needs programs throughout the country that were developed as the direct result of the motivation and support provided by PL-90-576 and (2) to make available to educators and other interested parties examples of vocational programs that meet the needs of disadvantaged students in school and the educationally disadvantaged not in school, and examples of successful vocational programs serving the handicapped. The handicaps identified include the crippled, deaf, emotionally disturbed, educable mentally retarded, hard of hearing, learning disabled, multiple handicapped, mentally retarded, other health impaired, speech impaired, trainable mentally retarded, and visually handicapped. Information for each program is presented in the following areas: administrative personnel, location of the school, program title, school characteristics (urban or rural, number of students, for disadvantaged or handicapped, grade level, type of handicap), cost, nature of disadvantage, and brief descriptions of program activities and outcomes. Descriptors—Audiovisual Aids, \*Criterion Referenced Tests, \*Equivalency Tests, \*Occupational Therapists, Occupational Therapy, \*Occupational Therapy Assistants, Pretesting, Task Analysis, \*Test Construction, Testing Problems

Criterion-referenced proficiency examinations have been prepared for entry level occupational therapists and entry level occupational therapy assistants. Item development was based on a task inventory solicited from occupational therapists throughout the country, with six occupational therapists reviewing test development. A small scale pilot test was administered to a total of 233 individuals and a pretest was later administered to 782 individuals including those employed in related fields and a comparison group of college freshman at 23 test sites around the country. Testing methodology and data results are presented, and three parallel forms of each examination resulted. Audiovisuals, simulators, and related materials were explored for the tests, with line drawings being chosen for use, and recommendations made for further research in this area. Problems encountered during the test development are discussed. Recommendations state that further external validation and associated test development should proceed before satisfactory performance standards can be established. Appended material takes up two-thirds of the document and includes: test blueprints, therapists tasks, assistant tasks, item writers packet, reviewers instructions, item writers, item reviewers, pretest site coordinators, final forms-difficulty levels, and American Occupational Therapy Association policies and procedures. #### Identifiers—Europe, European Countries

A listing of English-language sources available on adult education in Europe presents 556 items covering a period of five years and supplements the bibliography Adult Education in Continental Europe: An Annotated Bibliography of English-language Materials 1945-1969. The bibliography is organized by country, with a section on Europe and a section on Scandinavia. Countries include: Albania, Austria, Belgium, Bulgaria, Czechoslovakia, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Luxembourg, Netherlands, Norway, Poland, Portugal, Romania, Spain, Sweden, Switzerland, USSR, and Yugoslavia. Materials were selected using the broadest possible concept of adult education as a basis. They are divided into 20 main categories, then further subdivided, so that both broad categories (e.g., history of adult education) and specific areas (e.g., night schools) are included. The listing for each country is sub-divided into categories of the various institutions, methods and technicians, and subject matter, with each source listed in full as the main entry in the major applicable sub-category and cross-referenced by number under any other applicable sub-category. Subject and author indexes, a list of periodicals searched, and a list of the 20 categories used throughout the bibliography are included. (Author/LH)

Descriptors—Course Content, \*Curriculum Guides, Educational Facilities, \*Law Enforcement, Lesson Plans, \*Police, Post Secondary Education, Professional Education, Resource Guides, \*Training

The suggested curriculum guide for law enforcement (police science) programs was designed to assist those responsible for implementing a course of study that is becoming a job requirement prior to employment in police service. Law enforcement education programs are discussed in terms of background, police roles, employment opportunities, and educational requirements. Program implementation is examined in terms of present commitments, advisory committees, program planning, staff, students, instructional material, and student evaluation. A four semester outline is presented, including an indication of class, laboratory, and outside study hours and brief descriptions of each course. Course outlines for units of instruction to cover the suggested curriculum are then presented under the following broad categories: technical specialty (10 courses); auxiliary and supporting technical (7 courses); general (10 courses). Suggested texts and references are listed after each course, and class hours necessary for each unit of instruction are indicated. Physical facility needs are examined closely and include diagrams, descriptions, necessary equipment, and their estimated costs. A bibliography of suggested materials is provided. Information regarding student and program assistance, and listings of film sources and postsecondary institutions with this type of program are appended. (LH)

The Women's Leadership Project represents an initial effort to combat discrimination against women in adult education, with special emphasis on adult basic education. Overall goals involved leadership development, impact, and support to: (1) recruit and prepare 10 qualified women adult educators for leadership positions in adult education, (2) develop a resource center of materials relevant to the leadership status of women in education and disseminate information broadly, and (3) develop an internal/external support system for project participants. The highly individualized program was conceived as strongly field based with emphasis on the relation between theory and practice. Project staff included one full-time and three part-time faculty representing educational management, curriculum, and adult education. Program features included: a special preseminar and seminar, supervised management internship in adult education at the local or State level, university course work, and special community impact activities. Specific listings of internships, courses, conferences/meetings/workshops attended, special impact projects, and resource center offerings are included as well as self-rating forms and progress charts. Appendixes contain: a schematic representation of the project, recommended readings, proseminar schedule, educa-

tional leadership appraisal, a workshop description, job referral and placement resources, and resource center readings. (EA)

Training women for homemaker service is an important function of every agency that provides such services. The Homemaker Service of the National Capital Area, Inc. designed a training manual to be used with either a single new employee or with a group as large as 15. Informal discussions, lectures, practice, and demonstration are methods of teaching used. Supplementary aids that have proved helpful include films, case histories, and problem setting questions. The manual provides knowledge that will be needed by the homemaker in 10 sections: an introduction to homemaker services; goals; role of the homemaker and types of services; working with troubled people; the homemaker and families with children; the homemaker and the sick and disabled; the homemaker and mental health; the homemaker—nutrition and home management; agency policy and procedures; and agency forms and related materials. The volume is described as a first attempt to provide a brief bibliography of some of the most important work of European scholars in three major languages—English, French, and German. The 482 citations are divided into two general categories: general background and the teaching situation. The first group cites separately items of general interest and items from 20 European countries in the following areas: bibliographies and abstracts, periodicals, and historical and descriptive surveys. Items in the second section are not arranged separately by country. They focus on: general theories of adult education, including also leisure and education permanente; the adult student: attitudes, motives, and characteristics; psychology of adult learning, including also group psychology and group dynamics; teaching methods, both general and multimedia techniques, programmed learning, and broadcasting and audiovisual techniques; evaluation; and training of adult educators. Typical bibliographic data is provided together with an English annotation which briefly describes each entry. An author index is appended. (BP)

Descriptors—\*Adult Education, Adult Literacy, \*African Culture, Community Development, \*Developing Nations, Educational Attitudes, \*Educational Development, \*Educational Needs, Womens Education Identifiers—\*Africa

In order for adult education to be successfully applied in other countries, it is important that an understanding of the people's traditional background and educational attitudes is acquired. A continuing educator must also be a continuing learner. In Africa, education is considered a continuing or recurrent process throughout life serving to fulfill social needs, to foster community awareness, and transmit basic values. Adult education offers a chance for a country to develop and strengthen its population, not only in terms of economic advancement, but in terms of acquiring literacy and skills in the areas of politics, health, agriculture, and economics. Educational problems exist for African women since men are usually provided more educational opportunities in the school system which is patterned after the western model. In planning adult education programs, the important role women already have in the areas of agriculture and trade should be taken into consideration. Adult education, for men and for women, promotes national and cultural cohesion by raising the consciousness of the people to a sense of development and change. (EC)

Descriptors—\*Bilingual Education, \*Bilingualism, \*Educational Objectives, \*Elementary Education, Equal Education, \*Foreign Countries Identifiers—\*Sweden

Due to increasing numbers of immigrants since 1960, especially Finnish children, Sweden began to establish instructional objectives and policies for immigrant children. Stated aims clearly stress that the primary aim in the teaching of immigrant children in Swedish schools is to promote bilingualism. While the short-term aim is to produce functional bilingualism (equal ability to speak and read both languages), the long-term aim is to equalize the learning opportunities for these children in the regular school system. V. P. John and V. M. Herner (1971) propose four models of bilingual education: informal, supplementary, transition, and two-way. The Swedish model is a transition model which uses the native language as a bridge to the national language. The mother tongue (Finnish) is developed to a relatively high degree during pre-school years and the first two years in the compulsory school; Swedish is given

subordinate importance until grade 3 when training in the national language is necessary. The objective is to reach functional bilingualism by the end of grade 3. Development in the native language after age 10 is highly dependent upon the individual child and parental support. (EA)

*Passmore, David Lynn***Policy Implications of "Inequality" for Career Education. Monograph No. 2.**

Bowling Green State Univ., Ohio. Career and Technology Education Graduate Faculty.

Pub Date 76

Note—23p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Book Reviews, \*Career Education, Educational Assessment, \*Educational Equality, Educational Needs, Educational Philosophy, Educational Policy, \*Equal Education, Social Class, Social Differences, \*State of the Art Reviews

The conclusions presented in a book entitled *Inequality*, written by Jencks, et al., call for a critical analysis of the popular beliefs regarding schools and schooling as a means to achieve the social, economic, and cultural goals of the American Dream. This meritocratic system offers equal opportunities but may yield unequal results. In the Jencks study, educational opportunities, educational attainment, occupational status, income, and job satisfaction were all found to be unequally distributed among individuals. These inequalities are real, even though their causes may be questioned, and they have implications for career education, which is, like faith in schooling, presented as a facilitator of the meritocratic ideal. Because it can exert no influence over the working world, it is likely that career education will act as a conservative force to maintain the very societal inequalities it was designed to overcome. The achievement of equality will require more radical social and economic changes than mere school reforms offered by career education. (Author/EC)

Descriptors—\*Career Education, \*Employment Potential, National Surveys, Needs Assessment, Occupational Clusters, \*Physically Handicapped, Questionnaires, \*Residential Schools, Resource Guides, State Federal Aid, State Surveys, \*Vocational Development

Focusing on the career education potential of physically handicapped individuals at Massachusetts Hospital School (MHS), the project included a current population assessment, a survey of employment prospects, and career education resources for physically handicapped students. Based on a series of data collection procedures, 18 career education recommendations are offered for MHS. A questionnaire (23 percent return) to 434 State firms to determine the kinds of businesses and types of jobs employing the physically handicapped indicated many employers appeared unaware of the potential of physically handicapped employees. Findings of a national survey to 51 Directors of State Easter Seal Societies (24 percent return) and 50 State Commissioners of Education (42 percent return) to determine successful occupations of physically handicapped persons (coded by handicapping condition and listed under occupational clusters) showed that a wide variety of careers are open to physically handicapped persons in Massachusetts and the United States. The program/population study covered: physical facility, equipment, records, handicapping conditions, academic aptitude/curriculum, personality traits (High School Personality Questionnaire), and school programs.

Findings of a questionnaire to graduates of 1968-1973 classes (53 percent return) also are included. Resources include potential funding sources, annotated bibliography of classroom materials, list of publishers, and professional references. (EA)

Descriptors—Career Education, \*Educational Needs, Guidelines, Inservice Education, Inservice Programs, \*Inservice Teacher Education, Needs Assessment, \*Participant Involvement, \*Program Planning, \*Questionnaires, Teacher Attitudes, Teacher Improvement

A four-step method that can be utilized to make inservice education programs more responsive to the interests and needs of teachers and other educational personnel is presented. The first step involves assessing teachers' attitudes and changes in attitudes toward inservice as measured by responses to 34 statements in an inventory. A copy of the instrument is included and its purpose, design, and use are described. It is suggested that the second step, surveying for general inservice needs, be accomplished by collecting data from the appropriate individuals and notifying them of the needs determined by consensus. Copies of surveys directed to teachers, vocational teachers, and administrators are included as examples. The third step is a survey that identifies participant strengths and weaknesses, objectives to emphasize, and instructional procedures to utilize. Two examples of such an instrument are given along with a list of definitions for learning procedures. The fourth step involves designing and conducting the planned inservice program to meet participant needs identified through the data gathered in the previous steps. Attached is a list of 15 guidelines for effective inservice in career education based on the results of a nation wide study. (Author/MS)

**Getting It Together [8]. A Teacher's Guide: An Integrated Approach to Junior High Career Education.**

Eugene Public Schools, Oreg.

Spons Agency—Oregon State Dept. of Education, Salem.

Pub Date 74

Note—141p.

**EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage**

Descriptors—\*Career Education, Career Exploration, Career Planning, Consumer Economics, \*Curriculum Guides, Grade 8, \*Instructional Materials, Junior High Schools, \*Learning Activities, \*Program Descriptions, Self Evaluation, Simulation, Small Group Instruction, Vocational Education

Most of the document is a teacher's guide for an eighth grade course in career education, in use at Cal Young Junior High School, Eugene, Oregon, emphasizing small group work. The five main parts of the course are: (1) career corner, a multimedia career information center for student job studies, (2) life career, a life planning simulation game, (3) self-awareness learning package for self-evaluation of interests, attitudes, abilities, and personality, (4) study of a local business, and (5) consumer economics, emphasizing buying an automobile and grocery shopping. The guide contains general objectives for the course. Specific objectives, background information, student activities, worksheets, and other learning materials are included for each unit. Activities can be adapted for use with the entire class. The guide is one product of a project to provide a comprehensive, formal career education program to seventh and eighth grade students through a learning center program utilizing an integrated approach. The final report of the project which involved 483 students and 20 staff members is included. The educational setting, procedures, outcomes, and recommendations of the two-year effort are summarized. An evaluation of the project's objectives indicates that the majority were met fully or partially. (MS)

Descriptors—Auto Mechanics (Occupation),

\*Communication Skills, \*Course Content, Course Evaluation, Curriculum Development, Curriculum Planning, Draftsmen, Electronics, English Instruction, \*Instructional Materials, \*Integrated Curriculum, Job Application, Metal Working Occupations, Secondary Education, \*Trade and Industrial Education, Vocational Education

The project was designed to help high school students with industrial occupational goals achieve practical communication skills necessary for efficient employment entry. Industrial arts and language arts teachers together developed major essential categories for vocational English (reading skills, correspondence skills, reference skills, technical terminology, and job hunting skills) and subdivided these into specific communication skills. Multiple job sheets were developed for each skill utilizing content from the occupational fields (auto mechanics, drafting, electronics, and metals). A total of 277 job sheets, each about a 50 minute assignment, were developed and reviewed by an advisory committee for each industrial area. After completing 45 sheets a student received a grade and credit for the class. Student response was positive and evaluations by the instructors indicate their satisfaction with the program and the need for its continuation. The course materials (most of the document) are: student progress record sheets, performance evaluation sheet, separate job sheets for the four industrial areas covering skills in the essential categories (presenting objectives, materials, and procedures for students to use independently), and a bibliography for each area. Also included are notes from the advisory committee meetings, and favorable program evaluations from parents and outside educators. (Author/MS)

Identifiers—Senate Hearings, \*Vietnam War Veterans

The subcommittee on education and training held hearings regarding educational benefits for post-Vietnam era veterans. Four main bills were presented as amendments to title 38 of the United States Code and formed the focus of discussion: (1) HR 2000, to entitle veterans to 45 months of educational assistance for all educational programs, undergraduate and graduate; (2) HR 6806, to terminate the Vietnam era period of war and have it extend from August 5, 1964 to June 30, 1975; (3) HR 7726, to set a termination date for veterans' educational benefits, defining an eligible veteran as one who served on active duty for more than 180 days from February 1, 1955 to June 30, 1975; (4) HR 8406, to set a termination date of August 31, 1975 for computing veterans' educational entitlement and to extend the maximum educational benefits to 45 months. The testimonies of the following individuals are included and are supportive of the various bills they address: Rufus H. Wilson, Veterans Administration; Donald H. Schwab, Veterans of Foreign Wars; Mylio S. Kraja, American Legion; Charles C. Garafino, National Association of Concerned Veterans. Supportive statements from congressman and various national groups are also included. (LH)

Identifiers—Criminal Justice, Law Enforcement Assistance Administration, LEAA, \*Monitoring Systems, SPA, State Planning Agencies

The handbook is designed to help State Planning Agencies (SPA, grantees of Federal funds) to develop or improve performance monitoring systems in order to monitor the implementation, operation, and results of the criminal justice projects they support. Such monitoring is required by the Law Enforcement Assistance Administration (LEAA) guidelines. The suggested procedures were obtained by telephone survey, review of materials, and visits to 55 SPAs and represent those practices which appeared most useful in meeting the LEAA guidelines. A chapter discussing monitoring requirements defines the nature and scope of the required monitoring, and describes its relationship to management and other types of evaluation. In another chapter the major problems confronting monitoring system managers are identified. The remaining four chapters detail how the manager can use the monitoring system to accomplish these four identified tasks: establishing agreement on information required by the user, establishing agreement with the subgrantee (unit of local or State government receiving Federal funds from the SPA for a criminal justice project) on what will be monitored, establishing the information flow, and assuring the utilization of monitoring information. Appended material (79 pages) includes detailed examples (identified by State) of procedures and materials used in monitoring criminal justice programs. (Author/MS)

The three-year Special Experimental Adult Basic Education (ABE) Project was established in Tucson, Arizona, in order to identify and recruit residents known to have minimal academic skills or a minimal ability to communicate in the English language. ABE services, developed to meet individual needs, were offered in the home by project teachers when participants were unable to attend classes. The services came in the form of innovative and individualized survival type lessons designed to enable participants to understand and deal with the existing socioeconomic system in their locality. The first year of the project focused on recruiting low income participants with no high school education through general outreach techniques and on the development of relevant and practical learning materials. In the second and third years the emphasis shifted to

enrolling parents of school aged children into ABE classes and encouraging them to become involved with the programs or institutions affecting their children through specific goals such as: visit the classroom, become volunteer teaching aides, serve as tutors, or attend parent meetings. The importance of the role of the project teacher is discussed and participant data are given. Summaries of accomplishments for 1973-1975, correspondence, and samples of materials and curriculum are appended. (Author/EC)

Descriptors—Abstracts, \*Annotated Bibliographies, \*Human Resources, \*Publications, \*Research Projects, Research Reviews (Publications)

Identifiers—\*Human Resources Research Organization, HumRRO

The bibliography lists research reports, publications by staff members in professional journals, and presentations at professional and military meetings by the Human Resources Research Organization (HumRRO) during fiscal year 1975. It provides a complete record of HumRRO publications in conjunction with the cumulative Bibliography of Publications as of June 30, 1971, which lists research reports issued since HumRRO's establishment in 1951, and the Bibliography of Publications and Presentations During FY 1972-74 (available as ED 105 155). Abstracts are provided for most items. Items are identified by the following where applicable to indicate availability sources: government contract numbers, AD numbers (Defense Department Documentation Center, DDC), PB numbers (DDC Publication Board code), and ED numbers (Educational Resources Information Center, ERIC). Most of the items are available through National Technical Information Service (NTIS). Three sections list: (1) Work Units and Research Projects (65 items) alphabetically by research program code names, (2) Basic Research (one item), and (3) General Research (eight items) which include those not directly related to a specific research project or related to several efforts. Appended are a list of fiscal year 1975 Technical Reports and Professional Papers by number, an author index, a sponsor index, and a subject index. (Author/MS)

Identifiers—\*Einstein School, Illinois (Chicago)

The Urban Leadership Program, a Federally funded program consisting of three 10-week sessions for sixth graders in the Einstein Public School, Chicago, Illinois, provided a career awareness program of action learning to bridge the gap between students' economically impoverished neighborhoods and the mainstream urban community. The community centered career program consisted of a two-week internship in a government agency or business, study of the internship career prior to internship, group visits to agencies, and emphasis on individualized reading skills. The staff included a teacher coordinator, a teacher aide, and four community aides with input from parents and resource personnel from various city agencies and businesses. The Iowa Test of Basic Skills Reading Tests, administered as a pre- and post-test in each 10-week session, indicated statistically significant improvement in reading scores. Results of the Coopersmith Self-Esteem Inventory were nonsignificant, although a slight improvement in self-

esteem levels was reported. A school attitude inventory, constructed for the program, indicated improved school attitudes; strong parental approval of the program was noted in interviews and questionnaires. (EA)

Identifiers—\*UNESCO

A summary of the third International Conference on Adult Education (Tokyo) by UNESCO, the book examines adult education trends of the last decade, functions of adult education as related to lifelong education, and formulation of adult education policies in the context of national education plans. During the 12-year period between conferences, organized adult education has made notable advances throughout the world. However, weaknesses remain in governmental reluctance to treat adult education as an integral part of educational systems, the low level of financial support, and the lack of participation in adult education programs by those most needing education. Chapter 1 reflects "Changing Ideas and Functions" while Chapters 2 and 3, "Attitudes, Needs, Motivation, and Learning Ability" and "Unmet Needs and Target Groups", examine the nature of the demand for adult education. Chapter 4 presents "Changing Structures" on the international scene, and Chapter 5 examines "Programs and Content". The following five chapters deal with "Methods and Materials"; "The Administrative, Organizing, and Teaching Force"; "Administrative Policies"; "The Problem of Financing"; and "Research and Development". Two concluding chapters, "The International Dimension" and "Towards a Learning Society", discuss the developed nations/developing nations relationship and future implications. (EA)

Identifiers—\*Pennsylvania

The Insurance Department and the Department of Education of the Commonwealth of Pennsylvania collaborated on the insurance guide intending to present basic information about the insurance industry and its regulations in Pennsylvania. Presented in a format appropriate to existing curriculum needs and students' skills at the secondary level, the insurance curriculum is composed of six sections: an introduction to insurance, automobile insurance, medical care insurance, disability income insurance, life insurance, and property insurance. It can be taught in a 9 to 12 week course. The six sections can be integrated into social studies, consumer education, mathematics, vocational education, home economics, industrial arts classes, and occupational planning sessions. Each of the units consists of vocabulary list, the generalizations and concepts to be taught, and an outline of performance objectives and learning activities. The document concludes with a six-page bibliography of printed materials and films about the insurance industry. (Author/BP)

Identifiers—\*Australia

The study on Australian health manpower focuses on lessons of value to the United States, on the eve of an expanded national health system. Researchers asked: What can be learned about the soundest approach from a similar country that has had an extensive health insurance program for many years, and is about to enact a more comprehensive one? The study is presented in six chapters. First is a relatively brief overview of the Australian health care system; second, a summary of the health manpower resources, with some data on facilities, and their distribution by type and geography; and third, an examination of recent innovations in functions of health manpower, new types of personnel, and new ways in which established types of health workers are functioning. Chapter 4 reviews the educational system for health manpower, emphasizing recent changes, and Chapter 5 analyzes the several methods of regulating health personnel, through governmental and voluntary channels. Chapter 6 recapitulates the highlights and trends in all aspects of health manpower policy and practice deemed especially salient for the United States. The information was gathered through a literature review supplemented by three visits to Australia. A list of 165 persons and agencies interviewed is appended. (Author/AJ)

**Perceptions Regarding the Role of the Vocational Counselor in Texas. A Report of Research.**

Texas A and M Univ., College Station. Dept. of Agricultural Education.

Pub Date Aug 75

Note—43p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Counselor Characteristics, \*Counselor Role, Counselors, Individual Characteristics, \*Opinions, Principals, \*Questionnaires, \*Role Perception, Secondary Education, Vocational Directors

The central purpose of the study was to identify the role of the vocational counselor in the public schools of Texas as perceived by vocational directors, vocational counselors, secondary school principals, and secondary school counselors. Of the 121 school districts in the sample, 99 complete school district data sets, consisting of returned opinionnaires from the person in each of the four respondent categories, were obtained. Among the four groups significantly different responses were recorded regarding: 44 of the 70 role statements pertaining to the role of vocational counselors, perceptual profiles across 70 role statement variables, and all 10 issue statements concerning the role of vocational counselors. Within categories, the following significant differences were found with respect to the role of the vocational counselor: respecting 13 of the 70 role statements between vocational counselors without vocational education teaching experience but with world-of-work experience and those with both kinds of experience; and respecting 6 of the 70 role statements among secondary school counselors without vocational education teaching experience but with world-of-work experience, those with neither kind of experience, and those with both kinds of experience. Appended are 107 references. The role statements, issue statements, and their statistical means are listed. (Author/JR)

Descriptors—\*Conference Reports, Employment Programs, \*Employment Services, Federal State Relationship, Financial Needs, Foreign Countries, Futures (of Society), \*Government Role, Local Government

The conference report focuses on three problem areas: the role and objectives of the employment service in meeting society's needs; Federal, State, and local responsibilities and relationships in public employment service; and financing the public employment service. The report contains workshop reports on each of the three problem areas presented by Charles E. Odell, Mary A. Hallaren, and Curtis Aller. The body of the report (121 pages) consists of addresses and papers presented by: Jacob Clayman, J. S. Craig, Edward L. Cushman, and Eli Ginzberg discussing the first problem area; William L. Heartwell, Thomas C. Maloney, Philip J. Rutledge, and Nathaniel L. Semple discussing the second problem area; and Geraldine M. Beideman, Leonard Lesser, and Henry Rothell discussing the third problem area. In addition, William H. Kolberg keynoted with a speech on Mandates and Issues Confronting the Public Employment Service, and Beatrice G. Reubens discussed the employment service in foreign countries. Edited concluding statements of William B. Lewis, Murray Comarow, F. J. Walsh, and William H. Kolberg are also included in the report. Appendixes covering 30 pages include the conference agenda, points considered in preparation of formal papers, a summary of organizations participating, a list of participants, and "Jobs"—a description of a film presentation. Descriptors—Class Management, Classroom Environment, \*Classroom Techniques, Contingency Management, Educational Innovation, Educational Objectives, Educational Research, \*Effective Teaching, Military Personnel, \*Military Training, Models, Student Behavior, Systems Analysis, Task Performance, \*Teacher Education, Teacher Evaluation, \*Teacher Improvement, Teaching Methods, Training Techniques

Identifiers—\*Army Instructors

Using "A Model of the Functions of Master Instructor" (HumRRO-TR-73-23) as a guide, procedures and materials for training Army instructors to improve their classroom effectiveness were developed. In constructing the model, various materials on instructor characteristics and responsibilities in four main areas (training programs, classroom behaviors, professional growth, and innovative practices) were gathered from civilian and military sources. Special attention was given to materials devoted to classroom management techniques. Each of the 40 tasks described in the model was carefully reviewed considering three aspects: performance situation, kinds of information needed, and sources of information. The report elaborates on the activities and experiences an instructor would undertake to acquire or update the skills described in the model. The main emphasis is on description of recommended activities to be undertaken in connection with the performance of each instructor task cited in the model. The document concludes with a 12-item bibliography and five appendixes: a model of the functions of a master instructor, a sample system analysis, a sample of matrix terminal and enabling objectives, a sample observation form, and videotaping objectives. Descriptors—\*Educational Programs, \*Educational Psychology, \*Educational Research, \*Military Training, Program Development, \*Research Utilization, Systems Approach, Transfer of Training

Identifiers—\*Military Psychology

Military psychology has made three major contributions to civilian education. The first is the systems approach which contains two complementary components: the conceptual and the empirical. The purpose of the conceptual approach is to understand nature to determine on what principle the system works; the purpose of the empirical approach is to control nature. The conceptual approach is problem-oriented; the empirical approach is product-oriented. Although the distinctions between these two systems approaches must be carefully delineated, they work best when tied together. This second major contribution of military psychology is integrated research, development, engineering, and utilization activities. Used in close relationship with clients, these activities ensure that continued empirical results develop in clients' faith in the continued need for conceptual research. Finally, the third major contribution of military psychology concerns content and tested programs. Since about 85% of military jobs have commonality with civilian occupations, military programs can be adapted or adopted to meet civilian education and training needs. (Author/JR)

**A Classification System for Rehabilitation Program Evaluation Technology and Literature. Wisconsin Studies in Vocational Rehabilitation, Series 3, Monograph 21.**

Wisconsin Univ., Madison. Regional Rehabilitation Research Inst.

Spons Agency—Rehabilitation Services Administration (DHEW), Washington, D.C.

Pub Date 75

Note—43p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Classification, Information Dissemination, Information Processing, Information Retrieval, \*Program Evaluation, Rehabilitation Programs, \*Taxonomy, \*Thesauri, \*Vocational Rehabilitation

The monograph presents a classification system of vocational rehabilitation program evaluation technology and literature intended to be useful for the efficient retrieval of program evaluation information and to provide greater communication among rehabilitation personnel. The classification system's purpose is to control the nuances of expression relevant to indexing and retrieving information, technology, and literature of interest to rehabilitation personnel and others concerned with program evaluation. The classification system includes: (1) a hierarchic outline consisting of 323 terms, which provides a systematic set of constructs for describing all the elements (environment, goals, resources, methodology, results, and utilization) that relate to the input, process, and output of program evaluation in the rehabilitation service system; and (2) an alphabetic thesaurus which includes all of the terms contained in the hierarchic outline as well as terms that refer a user to an accepted system term. Both the hierarchic outline and alphabetic thesaurus were developed in a manner that complements the existing Rehabilitation Service Administration's Research Information System Thesaurus. Identifiers—Project Expedite

The project was designed to demonstrate the feasibility and effectiveness of providing faster, more relevant, and more comprehensive diagnostic services to vocational rehabilitation clients with a wide range of disabilities. The improved services were provided by an Experimental Unit (E) and compared with those of a Control Unit (C). The random assignment of physically disabled, alcoholic, mentally ill, and mentally retarded clients to E and C groups and procedures used for each group are presented. The following components used with E referrals are described: audiovisual orientation, vocational rehabilitation-oriented social evaluation interview, psychological testing, short-term work evaluation, faster general medical examination, medical transcription, and transportation. Thirteen variables on which it was hypothesized that the E Group would be found superior to the C Group are listed. Results, based on 749 E and 722 C cases, are reported in 20 tables (Appendix A) and analyzed in narrative form. Findings revealed successes in some areas but indicate that, in general, all E-C differences were small. A discussion section presents comparisons between the groups and seven recommendations for further endeavors. Also appended are forms used in the Experimental unit and counselor questionnaire responses. (Author/MS)

Identifiers—\*San Francisco Job Training Interchange

The report describes a 1974-75 project to coordinate planning efforts for public training programs in vocational education, rehabilitation, and manpower training and development in San Francisco. Project participants included representatives from the local public school district, the community college district, the office of the State Department of Rehabilitation, the Mayor's Office of Manpower, and several citizens. These participants worked to build a new and wholly local model for coordinated planning without significant links to other governmental relationships. The report discusses the implications for national policy and local program development in the way intra-field communication needs are presently perceived and handled. It outlines the processes through which the local group progressed toward a new procedure and discusses the nature of the group process in working with diverse local training agencies. Finally it outlines the features of the "Job Training Interchange," the instrument for continuing communication among local training programs, which was the product of the work group's effort. Appendixes include information on public training and related assistance programs in San Francisco (one page) and the Job Training Interchange's statement of purposes and methods (seven pages). A three-page bibliography and a two-page summary of related Federal, State, and local legislation is also included. (JR)

Descriptors—Career Change, Career Choice, Career Opportunities, Career Planning, \*Careers, Environmental Criteria, \*Environmental Influences, Females, Minority Groups, Personal Adjustment, \*Personality Theories, Self Congruence, \*Typology, Vocational Adjustment, Vocational Aptitude, Vocational Counseling, Vocational Development, Vocational Interests

Identifiers—\*Holland (John L)

The paper uses John L. Holland's theory of careers to explain certain common career phenomena and concepts. An understanding of careers requires useful answers for four fundamental questions relating to vocational choice, vocational stability and instability, and vocational congruence. The theory of careers attempts to answer these fundamental questions by using a few carefully defined concepts (such as theoretical personality types and environmental models) to explain vocational behavior. A modern differentialist view can better reinterpret some common vocational developmental concepts, such as those associated with vocational maturity, personal integration, identity, crystallization of interests, and vocational adjustment than a developmental view. The typology of persons and environments is more useful than any of the life stage strategies in formulating a theory of careers applicable to the entire life span. It also is suitable for assessing career changes and crises, as well as for explaining the career experiences of women and minority groups. In summary, the typology can be used to organize occupational materials and experiences, to explain and interpret vocational data and behavior, and to plan remedial activities. It can serve as the basis for an entire vocational assistance orientation including self-use materials and, where needed, personal and group counseling. (Author/JR)

Greenleigh Associates, Inc., New York, N.Y.

Pub Date Jul 75

Note—45p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Differentiated Staffs, Educational Finance, Educational Innovation, Foreign Countries, \*Institutional Role, Program Effectiveness, Program Evaluation, \*Rehabilitation Programs, \*Severely Handicapped, \*Sheltered Workshops, State of the Art Reviews, \*Vocational Rehabilitation, Wages

The executive summary of a three-volume study of the role of sheltered workshops in the rehabilitation of the severely handicapped includes a brief description of the research that was undertaken in the project and a summary of the study's findings. Site visits to 400 sheltered workshops throughout the country formed the basis for the study. The study's eight sections discuss the following subjects: (1) the project's origins and research approach; (2) the state of the art and the workshop universe; (3) the clientele of the workshops and the manner in which they became clients; (4) programs and services offered by sheltered workshops; (5) workshop staffs; (6) workshop finances and wage payments; (7) workshops' impact on their clients; and (8) interesting concepts utilized in foreign and innovative domestic projects related to workshops. The summary concludes with specific recommendations based on the strengths and weaknesses determined from the overall assessment. (Author/JR)

Identifiers—\*Job Search

A nationwide sample survey was conducted in January 1973 to investigate the job search methods workers used and their effectiveness. Prepared by the Bureau of Labor Statistics and the Manpower Administration in cooperation with the Bureau of the Census, the survey covered nearly 16 million employed wage and salary workers 16 years of age and above, who were not in school, and had started their current job in 1972. Two broad categories of search methods are recognized: informal methods, including direct application to employers and asking friends; and formal methods, including State and private employment agencies, school placement offices, union hiring halls, and newspaper advertisements. Seven tables supplement the test, which discusses job seeker characteristics; methods used and their effectiveness; work history and job search; job search timing, duration, and intensity; job refusal; earnings; and suggestions for further study. Half the document is taken up by extensive reference tables. The appendix discusses survey reliability and concepts and presents the questionnaire used. Major findings include: two out of three jobseekers applied directly to employers, with half of them obtaining jobs; greater proportions of blacks than whites asked friends for jobs; and four methods were generally used before a job was found. Consumer Education: How to Conduct Community Consumer Education Nights.

Illinois State Office of Education, Springfield.

Note—50p.; Not available in hard copy due to marginal reproducibility

EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Committees, Community Involvement, \*Community Service Programs, \*Consumer Education, Guidelines, Higher Education, Parent School Relationship, \*Program Planning, Public Relations, School Community Cooperation, \*School Community Programs, Secondary Education, Student Participation

The guide outlines activities through which students, teachers, and administrators can initiate and implement a program providing an opportunity for parents and others in the community to visit the school and receive instruction from area experts on consumer education topics. The suggestions are based on experience at Western Illinois University but modifications have been made so that the plan can also be used in high schools. Twelve steps for planning and conducting community consumer education nights are detailed for the consumer education teacher. Information for the principal or other school administrator stresses the public service value of the programs. Other instructions are for class committees (courtesy, promotion, and audio visual), the coordinator (student-chosen assistant to the teacher and treasurer), and the speakers' assistants (who function as a program committee). Samples of forms, letters, and promotional materials used in planning and conducting the program are included. (Author/MS)

Descriptors—\*Career Education, Definitions, \*Educational Assessment, Educational Theories, Federal Aid, \*Flexible Progression, \*Individualized Instruction, Individualized Programs, Program Descriptions, Program Effectiveness, \*Program Evaluation

Identifiers—\*National Institute of Education, Tracking (Career Paths)

The project sought to determine whether certain National Institute of Education (NIE)-funded career education programs provided for personalization of instruction and whether they avoided tracking students into narrowly constrained areas. The first chapter discusses individualized instruction in historical and current perspective and presents sample definitions. The components of individualized instruction are described in the second chapter. Chapter three deals with special issues in individualized instruction including the role of counseling, problems in program evaluations, and common criticisms. A definition of individualized instruction as a basis for program review and assessment is presented in chapter four along with a discussion of tracking. Chapter five relates key elements of the definition to activities and programs observed in NIE-funded programs in Philadelphia, Charleston, West Virginia, and Glasgow, Montana. Presented for each program are: a brief description, detailed assessment results, and a discussion relating six questions about tracking to these programs. Where tracking appeared, it was attributed to external influences. A final chapter summarizes the project and discusses numerous conclusions for each program. A three-page reference list and appended program options, student interview responses, and participant selection criteria for some of the programs are included. (Author/MS)

Aides to Career Education: Counselor Aide Handbook.

Los Angeles City Schools, Calif. Div. of Career and Continuing Education; Los Angeles Unified School District, Calif.

Pub Date [75]

Note—96p.

EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage

Descriptors—\*Career Education, Community Colleges, \*Counseling, \*Disadvantaged Youth, Educational Legislation, Guidelines, Guides, Individual Tests, Job Applicants, Occupational Information, \*Paraprofessional School Personnel, Personnel Policy, Referral, Self Evaluation, \*Vocational Education

Identifiers—Counselor Aides

The handbook, designed for use by career advisors and counselor aides working with disadvantaged students in regular Los Angeles Unified School District vocational programs, provides information for the classification of counselor aide (job definition, typical duties, and qualifications), guidelines for effective utilization of aides, and information on program accountability and evaluation. Copies of a task analysis chart, program data sheets, and counselor aide log are included as well as definitions of academically/socially/economically/culturally disadvantaged persons. The document predominantly consists of 10 appendixes: counselor aide employment information, an annotated list of referral agencies, district personnel rules and regulations, legislation and regulations related to pupils' rights to privacy, concurrent enrollment opportunities in two-year colleges, guidelines for the administration of individual tests, selecting a career and getting a job, Los Angeles City College two-year counselor aide program, annotated bibliography, and self-evaluation for paraprofessionals. The job placement guide, designed to help individuals (high school or college students or graduates) find suitable employment, is presented in five sections. Each section contains items such as checklists, suggestions, and inventories which a student can use independently to improve his chances of finding a satisfactory job. The first section deals with self-evaluation and includes a personality inventory and a personal vocational questionnaire. The second section presents a job conditions checklist, suggestions for finding job information and job openings, and a brief description of placement services for guidance in job evaluation. Section three helps the individual prepare for a successful job interview. The details of writing a resume are presented in section four. The final section offers some suggestions for job success. Appended are personal data and resume forms, a sample resume, and an employer prospect list form. (MS)

Occupational Choice: A Conditional Logit Model with Special Reference to Wage Subsidies and Occupational Choice. Final Report.

Stanford Univ., Calif. Dept. of Economics.

Spons Agency—Manpower Administration (DOL), Washington, D.C. Office of Research and Development.

Report No—DLMA-91-06-12-28

Pub Date Nov 73

Note—46p.; Revised, November 1973

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Economic Research, Federal Aid, Females, \*Human Capital, Labor Supply, Males, Mathematical Models, \*Occupational Choice, Race, Statistical Analysis, Training, \*Unemployment, \*Wages

A model of occupational choice based on the theory of human capital is developed and estimated by conditional logit analysis. The empirical results estimated the probability of individuals with certain characteristics (such as race, sex, age, and education) entering each of 11 occupational groups. The results indicate that individuals tend to choose those occupations with the highest discounted percent value of potential future earnings, the lowest present value of expected earnings foregone due to unemployment, and the lowest raining cost relative to net worth. The relative weights given to these three variables in choosing occupations varied markedly by race and sex. White males tended to weight expected earnings much more heavily relative to earnings foregone due to unemployment than black males or females of either race. Results were then employed in an analysis of the effects of a national wage subsidy scheme on the selection probabilities for each occupation. The results suggested a higher probability of entering low wage occupations due to the greater relative importance of the subsidy in these occupations. (Author/EA)

Descriptors—Blue Collar Occupations, Ethnic Studies, Human Dignity, Interviews, Occupational Surveys, \*Self Concept, \*Semiskilled Workers, \*Social Class, \*Social Discrimination, Social Structure, Unskilled Workers, Urban Areas, \*Work Attitudes

The book examines the effect of class barriers on blue collar workers by mirroring occupational/ethnic backgrounds of the white manual-laboring population in the Boston area through urban anthropological observations as well as 150 in-depth interviews conducted in 1969-70. It mainly reflects the experience of middle-aged, third generation American males. The authors explore the moral hierarchy of national and cultural differences, the effects of the intrusion of urban renewal, and the dilemma of working people trying to find out what position they occupy in America. The interviews generally reflected a crisis in self-respect of the working man, a hidden anxiety of feeling inadequately in control with feelings of self-defeat. A central position of the book is that everyone in society is subject to a scheme of values whereby they must unremittingly validate self by wearing "badges of ability" in order to win others' respect and their own. The authors examine worker sacrifices, hopes, and defenses in light of the tangled, complex relationship of denied freedom and dignity, and perceive the psychological motivation of a class society as being the healing of self-doubt, which, in turn, keeps the class order going. Identifiers—Employer Surveys, Ohio (Lake County), \*Student Surveys

The study on Lake County career opportunities was conducted (1) to forecast major population and demographic changes and their effects on schools and programs, (2) to determine the present and future occupational needs of employers, (3) to determine current program and enrollments in career training, (4) to determine student aspirations, (5) to determine career planning services provided for the students, and (6) to make recommendations for improvement of occupational education. To meet these objectives, four subcommittees from the Citizens Advisory Committee were established to collect pertinent data. The findings for each objective are discussed with supporting tables and include: (1) 1974 population estimates range from 202,600-220,900 with a declining birth rate; (2) most companies do not forecast rapidly expanding labor needs, and higher job categories were in more demand; (3) college preparatory was the program with the highest enrollment; (4) nearly half of all seniors had college plans; career cluster selection varied with the sex of the respondent; (5) research on both local and national levels suggests student concern for career planning and information; (6) six recommendations resulted. Questionnaires used for the study and a bibliography are appended. (Author/EC)

Descriptors—\*Career Education, Data Collection, Performance, \*Program Attitudes, \*Program Effectiveness, \*Program Evaluation, Questionnaires, Student Attitudes, Tables (Data), Teacher Attitudes, Unit Plan

Identifiers—Arizona, \*Field Testing

A field test was designed and conducted to examine the effectiveness of Arizona-designed career education units, particularly to examine the units' success in terms of their ability to affect positively students' cognitive, affective, and psychomotor behavior according to expressed performance and behavioral objectives. Eleven career education units in nine projects were field tested. Data were gathered through UNIVAL and a teacher monitoring system, with approximately 4,900 students and 152 teachers included in the study. Of the students, 50 percent were female, 69 percent were Anglo, and 31 percent from minority groups. Of the teachers, 31 were male and 121 were female. Teacher attitude toward career education was very positive and moderately positive toward the particular units. Student response to the units was positive, and learner performance (overall percent of correct scores) was a high 83 percent. Measures of unit effectiveness were calculated, based on teacher attitude, learner attitude, and learner performance. Student demographic data were subjected to an ethnic profile. It was concluded that all 11 units in the field test were sufficiently satisfactory to be included in the 1975-1976 statewide implementation program. Additional data and the UNIVAL questionnaire are appended. (BP)

Identifiers—Arizona, \*Field Testing

The field test report on the "Grocery Store Occupations" instructional unit for grade 1 is one of a series of reports on the Arizona developed Career Education Curriculum Units. Presented is specific information as to the success of the units in terms of the learner's cognitive, affective, and psychomotor behavior according to expressed performance and behavioral objectives. Cognitive and student and teacher attitudinal data were collected from six sites and projects in Arizona. Following the introduction, a brief description of the unit is given. The body of the document presents and discusses various tables showing field test results in the following areas: (1) information describing the field test, including demographic characteristics of both participating teachers and learners, (2) attitudinal data from both teachers and learners concerning the unit, (3) learner performance data on the lessons' specific items, and (4) teacher recruitment, refinement data, analysis, and comments. Four brief conclusions and recommendations are included. The document concludes with two appendixes: statistics and tabular data on student and teacher attitudes and a sample of the field test instrument package--UNIVAL (forms and questionnaires on student and teacher attitudes and student performance). The document presents a course outline for the study of natural resources management by junior and senior year high school students. Basic information and practical experiences are offered to the student in the classroom and through several field trips in order to acquire more knowledge in various areas of natural resources and their management. Unit plans for the following areas are presented: (1) white tailed deer and its management in Minnesota; (2) soils--conservation and utilization; (3) Minnesota lakes and rivers and its fishes; (4) Minnesota waterfowl; (5) mammals of Minnesota; (6) our total ecosystem; (7) parks and recreation; (8) maps, mapping, compass use, and land management; (9) aerial stereophotography and its use in natural resources management; (10) upland game bird management; (11) forestry management; (12) forest tree and wood identification; (13) taxidermy of a bird or mammal; (14) air and water pollution; and (15) introduction to Vocational Horticulture Club. Each unit includes the following information: unit objectives; unit outline; student activities (initiatory, developmental, and culminating); and source materials for the instructor and the student. **Identifiers**—AIM, \*Apperception Interception Method

Having used the apperception-interception method (AIM) of adult basic education (ABE) successfully abroad, World Education, with Office of Education funding and working at several American sites, developed a model of innovative ABE methods and materials for the United States, based on addressing learners' motivational problems. By using provocative photographs, problems critical to learners are identified in interviews and subsequently reflected in short, idiomatic, open-ended discussion units used to organize or supplement curriculum; social interaction is crucial. Learners, motivated to solve critical problems, desire basic skills education. Skill development modules provide systematic assistance to teachers, focusing on specific skills and providing skills development outlines, learning activities, and sample applications to particular AIM problem-stories. From the model, ABE teachers can tailor-make culturally relevant and situation-specific materials and develop their effectiveness with disadvantaged, undereducated adults. Background information, the methods-and-materials model evolution, results (a complete list of 101 photo-discussion units, with synopses) and implications comprise the report; appendixes include skills modules and evaluation information. The model is being transferred to selected State ABE staff development projects; a teacher's manual and instructional materials will be published; and a foundation has funded two New York City AIM projects. Teaching Consumer Education: A Common-Sense Approach.

New Jersey State Dept. of Education, Trenton.  
Center for Consumer Education Services.

Pub Date May 74

Note—58p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

**Descriptors**—Consumer Economics, \*Consumer Education, \*Course Organization, Educational Objectives, \*Educational Philosophy, Elementary Education, Family Life Education, Guidelines, Humanistic Education, Interdisciplinary Approach, Money Management, Personal Values, \*Program Design, \*Program Development, Relevance (Education), Secondary Education, Social Values, Values

Effective buymanship and effective financial management are the cornerstone of an elementary and secondary school consumer education program. The curriculum must meet some basic and essential criteria in order to prepare the student for learning about budgeting, a concept which encompasses buymanship and financial management. Through knowledge, insights, and attitudes, students can be helped toward a rich image of the personal and family life they want to work toward, the values they mean to live by, and the commitments they will not forsake; toward a working familiarity with their economic system; and toward a working acquaintanceship with the processes of government and a social philosophy. The tone of a course is important in determining how the students see their own lives; each teacher must decide what type of attitude towards consumerism he wishes to encourage. Preliminary steps to program organization are described: (1) lay out the total job; (2) take an inventory of consumer education already being done in each department; (3) find simple adaptations to enrich the total program. In a well-rounded school-wide program, the special consumer education course starts where other programs have left off, and drives deeper. (Author/AJ)

**A to Z Teaching Activities for Consumer Education.**

Pub Date 75

Note—38p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Consumer Economics, \*Consumer Education, Consumer Science, \*Enrichment Activities, \*Instructional Improvement, \*Learning Activities, Money Management, \*Secondary Education, Teaching Methods

One word was selected for each letter of the alphabet and used to develop a learning activity for teaching consumer education at the high school level. In addition to the word on which the activity is based, other words for each letter are listed which may suggest activities. Ten of the sheets are designed to be duplicated for student use. The others contain specific suggestions directed to teachers for classroom activities or improvement and enrichment of instruction. The activities and suggestions include a wide range of subject areas and skills such as language arts, mathematics, and social studies. Most of the activities are described in one-page presentations; the section on the letter "R", however, is an 11-page presentation on resource units illustrating different kinds of units through three sample topics: energy, auto repair, and inflation. **Consumer-Business Days; Community-Wide Program. Project Guide No. 101.**

New York State Dept. of Commerce, Albany.  
Woman's Program.

Note—37p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—\*Business, Community Cooperation, \*Community Organizations, \*Community Service Programs, \*Consumer Education, Program Descriptions, Program Development, \*Program Guides, Program Planning, School Community Cooperation, School Industry Relationship, Youth Clubs

The project guide describes the organization and implementation of consumer-business days, a community-wide business effort in a concentrated period of time (one week to one month) in which: (1) manufacturers; retailers; and financial, trade, and service organizations provide information, literature, tours, clinics, and programs for local consumers; and (2) men's, women's, and

youths' organizations, schools, colleges, libraries, civic and government agencies devote their meetings and exhibits for the period to one of these business-supplied programs. The responsibilities of the following groups and individuals involved in organizing the program are briefly discussed: general chairman, central committee, publicity, program coordinator, clubs/community groups, schools and youth, libraries, business and industry, and business and industry sub-committees. An outline of five steps involved in implementing the program and an organizational chart are also presented. The bulk of the document contains sample forms and suggestions for the program including: letters and questionnaires enlisting participation of business leaders, clubs, and youth groups; letter enclosure explaining the project; program suggestions for clubs, schools, and organizations; program suggestions for business and industry; program confirmation form; sample calendar of events (includes approximately 200 activities); and sample radio and television spot announcements. **Descriptors**—\*Business Education, Career Planning, Community Resources, Concept Teaching, \*Consumer Economics, \*Consumer Education, \*Curriculum Guides, Learning Activities, Money Management, \*Office Occupations Education, Resource Materials, Secondary Education, Teacher Developed Materials

The guide suggests learning activities for consumer economics that can be used in office occupation education programs. The guide is organized in six sections, each dealing with one of the following basic concepts: (1) the economic system, (2) income procurement, (3) consumer behavior determinants, (4) consumer alternatives, (5) roles, rights, and responsibilities, and (6) community resources. The subject areas of accounting, basic business, clerical, and clerk stenographer are included. Occupations within the subject areas are identified by Dictionary of Occupational Titles numbers. Each section begins with a graphic representation of the basic concept covered. Several objectives are included for each section. For each objective within a section, a table is presented which lists concepts, subject areas, suggested learning activities, and suggested resources. A five-page bibliography includes teacher references, books, pamphlets, instructional materials, practice sets, filmstrips, films, and bulletin board materials. Names of the members of Ohio's State Advisory Committee on Consumer Education and of the committee of business educators who developed the guide are listed. (S)

The purpose of the workshop was to create a greater awareness among teacher educators of the career education concept and to examine methods for integrating career education into preservice teacher education curricula. The 567 participants represented 69 teacher education institutions from 50 States. The agenda consisted of a general overview of recent thinking and development in career education, followed by small informal groups concentrating on methods

application. Presentations related to "Prevalent Career Education Concepts" included "Career Education and Teacher Education"; "What Business Asks of the Schools"; "Career Education"; "Communication, Teacher Behavior, and Humanism"; "Career Education--Articulation in the University"; "Career Education: The Challenge of Our Times"; "What We Believe: Career Education and the Role of the College in Its Development and Implementation"; and "Federal, State, and Local Responsibilities in Career Education". Other presentations provided descriptions of local school career education programs in Weatherford, Texas; Des Moines, Iowa; Montgomery County, Maryland; Eastern Arizona; and Broward County, Florida. Small group sessions, with nationally recognized career education leaders serving as facilitators, focused on College of Education deans, vocational education, educational administration, elementary education, guidance and counseling, industrial arts, home economics, and secondary education. A list of participants is grouped according to institution. (EA)

The individualized learning package for eleventh and twelfth grade consumer education deals with the use of the management process in the achievement of personal and family financial goals. The teacher's section of the package contains a statement of purpose and instructional objectives. Equipment and materials (specific books, magazines, and audiovisual aids) needed for the unit are listed. The method of evaluation suggested requires the use of a pretest, self-tests, and a post-test. Answer keys and copies of these tests are included. The student section contains an introduction, the pretest, a progress record, and four lessons to be completed independently. The lessons cover: clarification of goals, analysis of financial resources, a review of alternatives--decision making, and integration for formulation of a financial plan. An introduction, a behavioral objective, instructions (which list materials needed, specify the number of activities to be done, and indicate the level of competency required on the self-test before proceeding), learning activities, and a self-test are presented for each lesson. Most of the activities involve reading, examining case studies, and tape recording or writing responses to a situation. A list of activities for further study completes the student section. (MS)

The individualized learning package for secondary consumer education deals with consumer buying as influenced by advertising. The teacher's section of the package contains a statement of purpose and instructional objectives. Equipment and materials (specific textbooks, audiovisual aids, and sources for sample post-test advertisements) needed for the unit are listed. The suggested method of evaluation requires the use of a pretest, self-tests, and a post-test. Answer keys and copies of these tests are included. The stu-

dent section contains learning objectives, the pre-test, and three lessons to be completed independently. The lessons cover the functions of advertising for sellers and consumers, kinds of advertising, and wise use of advertising. Behavioral objectives, instructions (which list materials needed, specify the number of activities to be done, and indicate the level of competency required on the self-test before proceeding), learning activities, and a self-test are presented for each lesson. The activities involve reading (textbook or material in the package), viewing films, and finding and analyzing various advertisements. A list of activities for further study completes the student section. (MS)

Descriptors—Concept Teaching, \*Consumer Economics, \*Consumer Education, \*Curriculum Guides, Home Economics Education, \*Home Management, Learning Activities, Money Management, Resource Guides, \*Secondary Education, Unit Plan

The guide presents units of instruction for secondary consumer education and home management education which were developed at a workshop. The subject areas covered by the units, their teaching time, and suggested grade level areas are as follows: (1) organizing resources (one to two weeks, grade 7), (2) making personal and consumer decisions (two parts, each three to four weeks, grade 8), (3) managing human resources within the family (three to four weeks, grade 9), (4) managing family finances for development of purchasing power, financial security, and knowledge of family economic activity (four to five weeks, grade 10), and (5) educating the consumer for managing the family's resources (one semester, high school, non-majors or non-minors in home economics). Each unit divides the subject area into concepts which are further divided into sub-concepts. For each sub-concept, objectives are presented followed by a list of generalizations with corresponding learning experiences. The learning experiences include a wide variety of individual and group activities. Some activities are based on the materials listed in the comprehensive multimedia bibliographies which follow all but the last unit. (MS)

The document is a guide to a consumer education resource unit which aims to create a teacher-student and student-community learning partnership which will actively involve all participants. Concepts, behavioral objectives, learning experiences, and generalizations are provided in a format that can be quickly viewed and easily interpreted, but the teacher is encouraged to be uninhibited and as innovative as possible. The thirteen organizing concepts are: private enterprise, values, self-actualization, priorities, market place, informed consumers, resources, resource management, resource organization, legal aspects, money management, a home in the future, and the changing family. Two-thirds of the document (75 pages) is an appendix to the unit guide, comprised of instructional materials which range from crosswords and other games to scripts for teacher-made recordings. Among the many methods and media called for in the resource unit are: lecture, class and panel discussions, observa-

tion, guest speakers, sociodrama, field trips, interviews, oral reports, brainstorming, programmed material, open-ended sentences, debates, skits, supervised study, and a variety of audio-visual media. (Author/AJ)

**Innovative Planning Techniques for Vocational-Technical Facilities.**

Note—14p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Architectural Programming, \*Construction Costs, Construction Needs, \*Cost Effectiveness, \*Decision Making, Educational Facilities, Estimated Costs, \*Facility Planning, Facility Requirements, Vocational Education Identifiers—\*Value Analysis

A suggested approach, termed value analysis, to studying the cost effectiveness of alternative plans for vocational-technical facilities presents a series of cost diagrams and decision matrices, with explication. The diagrammed steps are: (1) Value-Analysis Cost Schedule, representing a hypothetical facility being planned and showing estimated costs for the desired accommodation; (2) Cost/Achievement Relationship of Various Alternatives, presenting a method of ranking cost data for facility and program operation costs and relating reliable job placements to costs of various alternative programs; (3) Decision Matrix for Three Alternatives, illustrating decision making between several options within a program area; (4) Established Relationship Between Cost and Appraisal Score (Normalization Procedure), converting costs into normalized appraisal scores to determine relative values of the various options; (5) Decision Matrix for Four Vocational/Technical Programs Competing for Space in New Construction, illustrating the use of the decision-matrix approach for making decisions between program areas; and (6) High to Low Relative Value Options with Costs, identifying where deletions must be made. It is suggested that value analysis planning techniques are tools for better decision making. In particular value analysis provides documentation to substantiate major planning decisions. (LH)

**The Iowa Plan for Curriculum Improvement in Industrial Arts, K-12.**

Pub Date Dec 75

Note—18p.; Paper presented at the National Convention of the American Vocational Association, 1975

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Career Education, Curriculum Design, \*Curriculum Development, \*Curriculum Planning, \*Elementary Secondary Education, \*Industrial Arts, State Curriculum Guides Identifiers—\*Iowa

An overview of Iowa's plan for curriculum improvement in industrial arts, K-12, describes the development, content, and implementation strategies of a new State curriculum guide. Guide development involved two committees made up of teachers, supervisors, educators, and consultants from around the State who reviewed literature, recently developed guides, and professional associational publications. A draft copy of the guide was evaluated by over 50 industrial arts teachers and personnel in Iowa and surrounding States. The final draft is described as providing a framework, rather than specific content and methodology, enabling teachers to innovate their own approaches. Based upon the pyramid concept, the guide emphasizes the goals of career and industrial-technological awareness. A staff development (inservice) systems has been developed but not yet implemented beyond the awareness phase. It contains the following phases: awareness, orientation and dissemination, development and preparation, and trial and adoption. A list of selected references is included. (LH)

The major goal of the 3 1/2 year Federal project was to assist each State, the District of Columbia, and Puerto Rico to develop preliminary State-tailored, home-school-community models/guides for developing and implementing improved and extended career guidance, counseling, and placement programs in local school districts. A national training conference for key State leaders was held in St. Louis, Missouri in January, 1972 to provide State teams with the knowledge and skills to develop a State guide. Each team received a "Program Content and Operations Manual" and a kit of exemplary materials and resources. The States received further consultative and technical assistance from the project staff, the national steering committee members, and national/State leaders in the field, as well as limited financial assistance. "Elements of an Illustrative Guide for Career Guidance, Counseling, and Placement" was prepared by the project staff in 1974. The project was successful in meeting its goals as 44 States developed new guides and/or models or modified and extended previous efforts. Two-thirds of the document consists of appendixes of selected project newsletters, a list of exemplary materials distributed to the States, and selected letters concerning the project impact. (EA)

The curriculum guide is intended as a source to help teachers plan consumer education classes in Nevada, from junior high school through the adult level. Developed for a semester's (18 weeks) separate course of study, using individual or group instruction, the guide may be expanded to meet the needs of a full year. Each unit can be taught as an individual course or integrated within other courses. Some sample lesson plans developed by teachers involved in the pilot testing are included. Unit outlines present overall objectives, concepts, learning activities, and resources, and include: consumer in our society; consumer decision making, with sample lesson plan; money and democracy in home management; consumer credit and borrowing money, with sample lesson plan; food shopping at home and in the market; family clothing management, with sample lesson plan; family transportation, with sample lesson plan; health care and services; buying protection, with sample lesson plan; savings and investments; consumer protection, with sample lesson plan; a home for your family; furnishing and equipment for the home; and leisure time and recreation. The extensive resource list includes: books; government and organizational publications, including visuals; periodicals; mailing lists; organizations providing current consumer information; and local, State, and Federal agencies. Longitudinal Studies, Program Evaluation, Student Adjustment, Student Attitudes, Student Evaluation, Tables (Data), \*Test Validity, Vocational Adjustment, Vocational Maturity, \*Work Attitudes, \*Youth, Youth Employment, Youth Programs

Identifiers—Neighborhood Youth Corps, New Education Program, NYC, \*Work Relevant Attitudes Inventory, WRAI

The final report on the development of a Work-Relevant Attitudes Inventory (WRAI) describes the use of the WRAI in diagnosing the needs of individuals and evaluating the effectiveness of manpower programs. The WRAI was used in two longitudinal studies: four Neighborhood Youth Corps (NYC) programs with 502 subjects, and a demonstration education project, the New Educational Program, with 526 subjects. The WRAI was able to differentiate between subjects making a "good" and a "poor" adjustment to work. Furthermore, positive changes in WRAI scores were associated with a "good" adjustment. The WRAI also correlated with counselor ratings and with achievement test scores in reading and mathematics. It was concluded that the WRAI had demonstrated its usefulness as a measure of program effectiveness and as a help in diagnosing the needs of new program participants. Five appendices include the WRAI and various statistical measures relating to the results of its administration. (Author/JR)

Descriptors—College Freshmen, \*College Graduates, \*College Students, Demography, \*Dropouts, \*High School Graduates, Labor Force, Manpower Utilization, Negro Students, Part Time Students, Student Characteristics, Student Employment, Tables (Data), \*Unemployment

Unemployment increased substantially among all youth in the labor force except college graduates in the year ending in October, 1974. Data were collected as part of the Current Population Survey and relate to persons 16 to 24 years of age in the civilian noninstitutional population. Estimates on the number of graduates are based on a sample, and two tables are included in the discussion. High school dropouts were the most severely affected by increased job market competition, with their unemployment rate rising over four percentage points. Negro high school graduate and dropout unemployment rates were twice that of whites. Changes in the college student body reflected a higher percentage of 20 to 24 year old part time students who were combining work and school, with an increased enrollment among women. College freshman and college graduate unemployment rates remained approximately the same as in the previous year. Appended material takes up the bulk of the document and presents definitions and explanations of the basic labor force concepts, sample design, estimating methods and data reliability of the survey, and 17 supplementary tables. A two-year project to systematize the occupational teacher approval record-keeping and planning procedures for the Massachusetts Office of Professional Development (OPD) for the Division of Occupational Education is described. A project overview discusses the problems of the system and objectives arrived at to solve them, including the improvement of record keeping, monitoring systems, and Local Education Agency (LEA) information; determination of State manpower supply and demand; and improvement of teacher-training programs. Eleven project tasks were formulated to achieve these objectives and are described in terms of methods, results, figures and charts, and related materials: (1) survey all LEA personnel; (2) improve the record keeping system; (3) improve data needed for OPD planning; (4) provide uniform credentials; (5) monitor the teacher approval factor; (6) develop listing of available instructors; (7) rewrite OPD policies for approval fields; (8) interface approval system with data bank; (9) increase number of minority instructors; (10) establish legal policies; (11) survey demand for vocational instructors. Appended material provides supplementary information regarding project tasks, schedules, teacher qualifications, and expenditures. (LH)

The first section of the manual for developing career education in existing Louisiana elementary school programs is an introduction to the concept and rationale of career education and to the roles of educators and parents in infusing career education into the curriculum. Section 2 discusses the availability and use of career education materials, and section 3 provides guidelines and suggested topics for guest speakers and field trips. Section 4, composing the bulk of the document, consists of unit plans covering: school helpers (K-1), whose hat is this? (grades 2-3), self-awareness (grades 4-6), communication (grade 5), work tasks and habits (grades 1-6), foods and nutrition (grade 6), the process of photosynthesis (grade 6), let's build a house (grades 3-6), people and their work (grades 1-2), and dental health workers and the law (grades 3-4). Each unit plan lists subject areas, goals, concepts, objectives, activities, resources, and evaluation criteria. The unit on dental health workers also includes the script for a one-act-play, "The Toothache Mystery: The Trial of the Dental Health Six." Two appendixes include an outline of the 15 job clusters and 21 job cluster hidden word puzzles. (JR)

The first section of the manual for developing career education in existing Louisiana senior high school programs is an introduction to the concept and rationale of career education and to the roles of career education personnel. Section 2 is a unit on human values and relations which provides an introduction and rationale for the following activities: human snake, interview (introduction of partner), card interview (introduction of self), falling (exercise in trust), machines, relaxing, blindfold, aggression-assertion, introduction of partner (exercise in perception), listening triads, bomb shelter exercise, peer perception, posters, obituary, group poetry, and show-and-tell. For each topic the unit provides a discussion of concepts, performance objectives, materials, instructions for the activity, and observations. Section 3 lists career education materials available and provides sample units, organized the same as those in section 2, covering the topics of why people work and economic, social, and psychological aspects of work. Section 4 contains subject area units providing concepts and objectives for a variety of subjects. Appendixes provide concepts, objectives, and activities for one-year units on child care and job exploration; a similarly organized unit on teaching poetry; and lists of career information resources. cial Attitudes, \*Womens Education, Working Women

**Identifiers—United Nations**

In the realm of continuing education, synergy, when used to mean a working together on all phases of human rights, implies the promotion of an adult education vehicle to eliminate the cultural lag in the status of women. Recent United Nations actions (such as the establishment of International Women's Year and the World Plan of Action's pressing for the full reconsideration of women's role in politics, education and training, employment and related economic matters, health and nutrition, family organization and family roles, population, and housing) are encouraging. Some general recommendations designed to implement the World Plan of Action's goals for the 1975-80 period include: special efforts to involve women in public affairs and to make the public at large aware of women's role in politics; target dates for the elimination of illiteracy; special training programs in economic and social development for rural women; free compulsory elementary education for girls and boys; inexpensive child care coinciding with school or training hours; special part-time programs for continuing education; elimination of bias from programs, curricula, and textbooks; and co-educational vocational programs open on the basis of aptitude and abilities rather than sex stereotypes. **Guide for Consumer and Homemaking Education Programs in Virginia Secondary Schools.**

Virginia State Dept. of Education, Richmond.

Home Economics Education Service.

Note—211p.

**EDRS Price MF-\$0.83 HC-\$11.37 Plus Postage**

**Descriptors—**Concept Teaching, Consumer Economics, \*Consumer Education, Cultural Factors, \*Curriculum Guides, Family (Sociological Unit), \*Family Life Education, Family Management, Grade 6, Home Economics Education, \*Homemaking Education, Home Management, Individual Development, Learning Activities, Money Management, Purchasing, \*Secondary Education, Student Evaluation, Unit Plan

The guide contains sequential units of consumer and homemaking education instruction for grades 6-12. The units for each grade level build upon and expand concepts developed during the preceding level. Introductory material describes program goals, home economics offerings in Virginia secondary schools, and the development and use of the guide. A chart shows the organization (by units) of the program for grades 6-12. Each of the following family living areas of the guide contains an overview and six instructional units: Consumption of Goods and Services in the Family, Cultural Development in the Family, Individual Development in the Family, and Management in the Family. For each unit a grade level, teaching time (ranging from 3 to 12 weeks), means of evaluation, an objective, several specific concepts and their relation to home economics subject areas are given. Each specific concept is then presented with specific objectives, generalizations, statements of content, and a wide variety of suggested experiences for learning and evaluation. (Author/MS)

**Descriptors—**Community Resources, Concept Teaching, \*Consumer Economics, \*Consumer Education, \*Curriculum Guides, \*Distributive Education, Learning Activities, Resource Guides, \*Secondary Education, Teacher Developed Materials

**Identifiers—Ohio**  
The activities contained in the guide are designed to supplement the distributive education curriculum with information that will prepare the student to become a more informed, skillful employee and help the marketing career oriented student better visualize his customer's buying problems. Four overall objectives are stated. The

guide is organized in five sections, each dealing with one of the following basic concepts: (1) multiple roles of the individual, (2) income procurement, (3) consumer behavior determinants, (4) consumer alternatives, and (5) community resources. Each section begins with a graphic representation of the basic concept covered. Several objectives are included for each section. For each objective within a section, a table is presented which lists concepts, suggested learning and evaluation experiences, suggested resources, and a generalization about the objective. The guide also includes an eight-page list of sources of free and inexpensive materials (books, pamphlets, kits, periodicals, filmstrips, and films) for consumer education. Names of the members of Ohio's State Advisory Committee on Consumer Economic Education and of the committee of educators, developers of the guide, are listed. (Author/MS)

**Descriptors—**Career Planning, Community Resources, Concept Teaching, \*Consumer Economics, \*Consumer Education, \*Curriculum Guides, Family Life, \*Home Economics Education, Learning Activities, Money Management, \*Secondary Education, Teacher Developed Materials

Written by 90 vocational home economics teachers during the consumer education workshops held at three Ohio institutions: Ashland College, Bowling Green University, and Miami University, the material included in the supplement is to be used in combination with the Consumer Education Guide for Ohio, Grades K-12. The learning experiences are pertinent to the area of high school home economics. The guide is organized in six sections, each dealing with one of the following basic concepts: (1) economic system, (2) income procurement, (3) consumer behavior determinants, (4) consumer alternatives, (5) roles, rights, and responsibilities, and (6) community resources. Several objectives are included for each section. For each objective within a section, a table is presented which lists concepts, grade level, suggested learning and evaluation experiences, and suggested resources. Names of participants at consumer education workshops (90 vocational home economics teachers) who developed the guide are also included. (Author/MS)

**Descriptors—**Career Planning, Community Resources, Concept Teaching, \*Consumer Economics, \*Consumer Education, \*Curriculum Guides, \*Job Training, Learning Activities, \*Occupational Home Economics, Resource Guides, Secondary Education, Teacher Developed Materials

The learning experiences in consumer education were developed to be used by job-training teachers as an integral part of the vocational home economics job-training curriculum. The activities were designed to provide basic understanding of the nature and function of the American economic system; the roles of producers, consumers, and citizens; and the use and availability of community resources at the local, State, and national level. The guide is organized in six sections, each dealing with one of the following basic concepts: (1) the economic system, (2) income procurement, (3) consumer behavior determinants, (4) consumer alternatives, (5) roles, rights, and responsibilities, and (6) commu-

nity resources. Each section begins with a graphic representation of the basic concept covered. Several objectives are included for each section. For each objective within a section, a table is presented which lists concepts, suggested learning and evaluation experiences, suggested resources, and generalizations about the objective. A four-page selected bibliography of books, pamphlets, periodicals, filmstrips, and films is also included. Names of the members of Ohio's State Advisory Committee on Consumer Economic Education and of the job training teachers who developed the guide are listed. (Author/MS)

The consumer education guide for industrial arts teachers was developed by a group of experienced teachers using the Consumer Education Curriculum Guide for Ohio, Grades K-12 as a reference. The guide is organized in six sections, each dealing with one of the following basic concepts: (1) the economic system, (2) income procurement, (3) consumer behavior determinants, (4) consumer alternatives, (5) roles, rights, and responsibilities, and (6) community resources. Each section begins with a graphic representation of the basic concept covered, an overall objective for the section, and a statement of the rationale for teaching that section. Several objectives are included for each section. For each objective within a section, a table is presented which lists concepts and a clarification of the individual concepts as they can be applied to industrial arts. Following the table, generalizations related to the objective and suggested learning activities are listed. The guide contains a six-page teaching resource list of books, periodicals, pamphlets and booklets, audio-visual aids, film

companies and sources, and agencies and organizations. Names of the members of Ohio's State Advisory Committee on Consumer Economic Education and of the Industrial Arts Consumer Education Committee, developers of the guide, are also included. (Author/MS)

**Descriptors**—\*Consumer Education, Curriculum Development, \*Curriculum Guides, Educational Programs, \*Home Economics Education, \*Homemaking Education, \*Learning Activities, Learning Experience, Program Design, Program Planning, Reference Materials, Secondary Education, Student Needs

The guide presents suggested learning concepts, experiences, and references for home economics educators in the planning and organization of secondary level consumer and homemaking programs. The suggestions are based on questionnaires and interviews with teachers and administrators involved in this program. The guide's main focus is on the process of designing a program that would meet the student's needs and consists of 17 subject areas which are presented alphabetically: advertising; appliances; clothing purchasing; consumer purchasing; credit; estate planning; food buying; furniture and accessories; housing; insurance; management of the dual role; money management; recreation; responsibilities, obligations, and protection of the consumer; savings and investment; taxes; and transportation. Each subject area begins with information on its general purpose, objective, student references, teacher references, and additional sources of information. This is followed by the guide itself which consists of six columns

presenting the following information: concept, classroom experiences, resource person, related experiences, and teacher-student references. Form letters sent to participants, a time table for evaluating the units, forms used for the evaluation, a list of references, and sources of inexpensive information are appended. (EC)

**Descriptors**—Concept Teaching, \*Consumer Economics, \*Consumer Education, \*Curriculum Guides, Decision Making Skills, Home Management, \*Instructional Materials, \*Learning Activities, Money Management, Secondary Education

The guide offers suggested curriculum materials in consumer education for secondary schools or as background information for teaching adults. It focuses on an understanding of decision making, the economic system, and management. The units of instruction are based on 13 concepts: (1) the process of decision making in relation to consumer behavior; (2) relationship of values and goals to economic competence; (3) influences of the economic system on individual and family consumption; (4) analysis of the business system as related to consumerism; (5) relationship of national income, money, and banks to consumer practices; (6) effect of prices and stabilization procedures on the economy; (7) relationship of taxation to the monetary system; (8) banks and consumer credit services; (9) effects of advertising and protective aids on consumer practices; (10) managing and investing finances; (11) individual and family protection through insurance; (12) financing individual and family housing; and (13) financing individual and family transportation. Each concept provides information about its general purposes, objectives and learning experiences, and references. Sample instructional materials are presented in a separate (112 pages) and consist of information sheets, charts, illustrative materials, learning activities, games, forms, additional references, and other concept-related teaching aids. **Career Guidance Handbook.**

Alabama State Dept. of Education, Montgomery. Div. of Vocational Education and Community Colleges.

Pub Date [73]

Note—26p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Annotated Bibliographies, Career Awareness, \*Career Education, Career Exploration, Elementary Secondary Education, Guidance Functions, Guidance Objectives, \*Guidance Programs, Guidance Services, \*Occupational Guidance, Post Secondary Education, \*Program Development, Program Evaluation, Program Planning, State Programs

**Identifiers**—Alabama

The first section of the career guidance handbook provides a brief introduction to the need for career guidance, explains the eight elements and outcomes of career education in the Alabama Career Education Curriculum Model (self-awareness—self-identity, educational awareness—educational identity, career awareness—career identity, economic awareness—economic understanding, decision making—career decisions, beginning competency—employment skills, employability skills—career placement, and attitudes and appreciations—self/social fulfillment), and discusses the four major constituents of the career guidance process: developing self-awareness, acquiring decision-making skills, developing environmental understanding and awareness, and relating to the world of work. Section two discusses the components of the career guidance program (curriculum base, pupil data system, information system, work observation and experience, group and individual counseling, educational and occupational placement, and research and evaluation), identifies the responsibilities of guidance specialists, teachers, principals, parents,

students, employers, and other community members in career guidance, and outlines procedures for evaluating career guidance programs. A three-page annotated bibliography is included. (JR)

Identifiers—Alabama, \*Alabama Appalachian Career Education Project

After a brief introduction, the guide to career education in Alabama identifies several career education concepts which concern the relevance of education to the world of work and diagrams the components of the three elements of career education (awareness, exploration, and preparation). The next section diagrams the career education curriculum model and explains the three elements of career awareness, career exploration, and career preparation in paragraph-length summaries. The following section briefly describes career education efforts in Appalachian Alabama, and the next section covers various aspects of leadership development for curriculum change (development of inservice education programs and participation in conferences, consortia, councils, and projects to develop career education programs). The last section briefly discusses the promise of career education for Alabama's future. (JR)

The catalog annotates all materials which are available for loan from the Career Services and Industrial Arts Instructional Materials Laboratory in the Vocational Education and Community Colleges Division of the Alabama State Department of Education. Section 1 annotates listings for over 200 books, on career education and career guidance. Section 2 lists 69 titles of books contained in two series of works designed to describe all the major career options open to young people. Section 3 lists for grades 1-12 several hundred units of study in careers for the various subject fields developed by teachers in Alabama and Cobb County, Georgia. Section 4 cites nearly 100 books which cover the various industrial arts subjects. Section 5 lists three special need books and one series of 45 academic skills titles. Section 6 cites approximately 70 position papers and monographs which deal with various aspects of career education. Section 7 lists 11 career education journals. Section 8 describes 15 career films and one series of 44 films on specific occupations. Section 9 lists approximately 40 career filmstrips. Section 10 describes 32 multi-media kits, and section 11 describes five slide kits. (JR)

Identifiers—\*Colorado Task Force for Career Education

The Colorado State Plan, a general framework within which local educational agencies may develop and implement a career education program, is presented. The first section of the document, outlining the State plan, contains an introduction, a policy statement, an overview of the plan, followed by discussion of the roles and organization of State agencies for career education, and of the career education concept, kindergarten through post-secondary levels. Described are the responsibilities of the Coordinating Councils (State and local), State Coordinator, and Intra-agency Coordinators (Colorado Department of Education, State Board for Community Colleges and Occupational Education, and Colorado Commission on Higher Education). An organizational chart shows the relationships between these agencies. Student needs and the experiences to be offered during the career awareness, exploration, preparation, and specialization phases of the career education continuum are discussed. The second section contains the specific goals and State agency staffing data for career education in Colorado. The names of the statewide Task Force members and the document are appended. Descriptors—Behavioral Objectives, \*Career Awareness, Career Exploration, \*Curriculum Guides, \*Elementary Education, Learning Activities, Resource Guides, \*Unit Plan, Work Attitudes

The guide contains career awareness units for grades one through seven. A chart for each grade level lists the unit titles with textbook references, resource speakers, and study trips. Some of the speakers and study trips suggested throughout the guide are specific to the local area. For each unit, concepts to be developed are coordinated in chart form with activities (field trips, games, displays, discussions, and others) and resources (speakers, filmstrips, and books). A unit on developing attitudes about work is presented at each grade level. Other units cover the following occupational areas: grade one, school workers, the home, the grocer, diary and egg farmers, and community workers; grade two, policemen, carpenter-painter, the baker, and medical careers; grade three, radio announcer, fireman, service station worker, and veterinarian; grade four, pilot, forester, United States Postal Service, and law enforcement; grade five, crafts, farming and animal care, managerial work, business relations, and industry work; grade six, communications, machine work, engineering, and investigating and legal work; and grade seven, merchandising and clerical work, medicine and health, scientific research, library related fields, and social science. The volume contains instructional materials for high school consumer education classes. The materials were produced at a workshop and were designed to introduce excitement and enjoyment in the learning process and to serve the slow reader. The first section contains an introduction to simulations and games in consumer education and descriptions of teaching techniques developed in the workshop. The second section begins with a statement of consumer education and the literacy Problem and continues with a 191-item annotated bibliography (with subject index) of low reading level materials. The annotations include grade level, cost, length, source, and comments about contents. The remainder of the volume provides examples of low reading level materials with suggestions for classroom use, produced by teachers in the workshop. The selections include stories, skits, essays, letters, poetry, and textbook style prose. The authors tried to make the writing concrete and personal, adult in interest but simple in sentence structure and vocabulary at a third to fifth grade reading level. Participants at the workshop are listed and their names also accompany their contributions throughout the volume. (Author/MS)

Muhich, Dolores

**Measuring Empirical Properties of Psychomotor Skills in Different Psychological Environments.**

Pub Date 30 Sep 74

Note—17p.

Journal Cit—Perceptual and Motor Skills; v39 p1315-30 1974

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—College Students, \*Decision Making, Educational Research, \*Environmental Influences, Evaluation Methods, Office Occupations Education, Post Secondary Education, \*Psychomotor Skills, \*Skill Analysis, Skill Development, Task Performance, \*Typewriting

The role of decision making and keystroking in the psychomotor activity of office typing tasks was assessed for second-semester, fourth-semester, and terminal college students under three different work conditions: (1) pre-arranged, (2) unarranged without erasing errors, and (3) unarranged with erasing errors. All differences for main effects for speed and errors were significant (probability less than .01). When office tasks were done under wholly realistic conditions, planning and decision making were one-half, keystroking was three-eighths, and erasing comprised one-eighth of the task. Mean completion time for one letter, one table, and one rough draft for 60 students was: prearranged without erasing, 8.94 minutes; unarranged without erasing, 20.89 minutes; and unarranged with erasing, 23.93 minutes. At low levels of skill, time consumed for keystroking was nearly as salient in contributing toward completion of product as time consumed for decision making. As psychomotor skill increased, the perceptual skill of decision making played an increasingly dominant role. The amount of time needed for decision making took on increasing salience in producing office communications as difficulty of the task and amount of training were increased. (Author)

Descriptors—Career Education, \*Career Exploration, \*Curriculum Guides, \*Hotels, Learning Activities, \*Management Education, Secondary Education, Teacher Developed Materials, \*Work Experience Programs

Suggestions arising from a curriculum development workshop led to a curriculum in hotel-motel management and services for high school students which aims to provide them with an opportunity to explore careers in the lodging and hospitality industries. Students will spend half the time in

school study of three required subjects and the other half in supervised on-the-job training. Program goals in the areas of basic skills, career exploration, and understanding the world of work are briefly described. The curriculum outline offers student outcomes, suggested activities and procedures, and evaluations for the following topics: (1) history of the accommodations industry; (2) nature and types of accommodations; and (3) organization of operations—front office, food service, housekeeping, accounting, personnel, sales, maintenance and engineering, and law. Resources for each topic are given. An organization chart of a 200-room motor hotel, a description of jobs available in the hotel-motel industry, and examples of lodging industry jobs and duties are appended. (EC)

The job readiness workshop was designed to offer participants improved methods of finding employment. The manual is intended to be used with small groups of unemployed or underemployed individuals in a workshop setting. The workshop's materials are designed as a resource unit, not as a teaching plan. The attempt has been to present desirable objectives, possible leading statements and approaches for the leader, key questions, suggested participant activities, and concerns and problems that participants often have during the job seeking process. The program is made up of eight units best suited for a single all-day meeting. Each unit contains suggested activities developed to increase individual involvement in the learning process. The format is designed to help determine problems, questions, and concerns of participants and then allow for group discussion that will lead to solution of these problems. Units deal with participants' self-evaluation of occupational abilities and liabilities, developing job expectations, completing resumes, discovering jobs in the local area, completing applications, and developing interviewing techniques. Materials for use with each unit are appended. (Author/LJ)

Descriptors—\*Adult Farmer Education, \*Agricultural Education, Bibliographies, \*Developing Nations, Economically Disadvantaged, International Programs, Manuals, Program Planning, \*Residential Programs, Rural Development, \*Rural Extension

Identifiers—\*Africa

The manual on residential farmer training provides guidance to the extension staff of all agencies concerned with rural development, with special reference to the principals and teaching staffs of training centers, and the informational and training needs of the smaller farmer. The manual was prepared as a result of recommendations made by participants at national seminars and workshops held in the following nine countries in east-central and southern Africa: Ethiopia, Uganda, Kenya, Tanzania, Zambia, Malawi, Swaziland, Lesotho, and Botswana. It deals mostly with residential farmer training, although some reference is made to day centers and nonresidential training. Some of the topics dealt with include physical facilities, staffing, recruitment, program planning, courses of instruction, and evaluation. Information about residential farmer training operating in the nine above-mentioned African countries is appended. A comprehensive bibliography is also included. (Author/NJ)

The document has been compiled to assist in locating materials pertinent to the development of career education materials, levels K-12. Resource listings are presented for professional books as well as curriculum materials, films, tapes, microfiche, and other audiovisual materials. Entries fall into two categories: (1) professional materials (20 pages), listed under the headings of educational theory, curriculum, research studies, testing, vocational education, and vocational guidance; and (2) curriculum materials (55 pages), subdivided into the areas of general materials classified by career clusters, special needs, charts, general audiovisual materials, film catalogs, microfiche, evaluation instruments used, and a publishers index. The documents were reviewed by the project staff and used by teachers involved in career education programs as part of Delaware's Occupational Vocational Educational Model. (Author/LJ)

Identifiers—Florida, Quinmester Program

The guide was prepared to assist student exploration in the fields of construction and building maintenance and as preparation for further specialized training. The course was prepared for quinmester use and includes a series of manipulative job assignments within a laboratory equipped to simulate the actual job atmosphere found in the construction and building maintenance industries. The table of contents provides a suggested hourly breakdown for the orientation unit and the introductory units for carpentry, plumbing maintenance, electrical maintenance, the trowel trades, painting and decorating, and occupational safety. Instructional materials such as handouts, building plans and diagrams, pre- and post-testing materials, resource lists, and bibliographies are provided for some of the units. (LJ)

 Identifiers—Hematology, Urinalysis

The purpose of the manual is to provide the medical assisting student a text which presents the common laboratory procedures in use today in physician's offices. The procedures for performing a complete urinalysis are outlined, along with those for carrying out various hematological tests. Information is also presented to help the student learn to identify forms of bacteria, to become acquainted with the various test media for growing cultures, and to learn to prepare smears and stains. A review test follows each of the three units of study. These procedures are based on the requirements for the certifying examination given by the American Association of Medical Assistants. The procedures are not intended to encompass the advanced skills needed in medical technology. (Author/NJ)

 Identifiers—\*Menu Cycles, Recipes

The curriculum guide for commercial foods instruction is designed to aid the teacher in communicating the importance of menu cycles in commercial food production. It also provides information about the necessary steps in getting food from the raw form to the finished product, and then to the consumer. In addition to providing information on how to design and use menu cycles, the text also discusses the selection, handling, storage, and preparation of fruits and vegetables, meats, poultry, eggs, seafood, and rice and pasta. Units are included on cost control and the role of a balanced diet in the menu cycle. A 60-page section provides recipes for large quantities and a 15-page section of unit tests concludes the document. (NJ)

The curriculum guide presents a two-year, in-school program for juniors and seniors designed to prepare students for positions in the accounting field. Instruction in this program includes all subjects related to the accounting field: accounting, office machines, office processing data, typewriting, economics, business law, and busi-

ness organization. Basic skills in English and math are reviewed and reinforced. The program is planned for the block-of-time approach incorporating both integration and simulation. The junior year guide is divided into seven integration plans that incorporate the five subject areas of accounting, office procedures, English, typewriting, and data processing. Each plan provides supplementary materials and activities. The senior year curriculum guide is a plan for simulation activities designed to emulate office practices as nearly as possible. It includes a teacher's manual and the following materials to be reproduced for the students: a company policy and procedures manual, job descriptions, a mailing list, and typical business forms.  Identifiers—Wisconsin (Appleton)

The curriculum guide is the result of a project to develop, field test, analyze, and revise the junior high level home economics course offerings for Appleton public schools. The theme for grades seven and eight is exploring your world and includes five topics: (1) family, stressing personality development and communicating with and understanding others; (2) foods, presenting nutrition instruction in the four basic food groups, meal planning, use of recipes, manners, and table setting; (3) world of children, discussing the responsibilities of the care of children; (4) clothing, emphasizing personal grooming and clothing care with special attention given to basic sewing skills; and (5) housing, encouraging the student's sense of responsibility for their own rooms. These five topics are repeated for grade nine under the heading of "Focus on Teen-Life." Each topic follows the format of course introduction, conceptual structure, including performance objectives; unit, consisting of content, learning experiences, and evaluative exercises; appendix; and bibliography. Testing instruments are contained in each appendix and are presented as quizzes, games, and crossword puzzles. (LJ)

The lesson plans represent activities carried out in the industrial arts laboratory of Southside Junior High School as part of the Buffalo public school's career education project. Designed for the level of grade 10, these activities provide industrial arts instruction as a means to allow the student to gain awareness of his abilities, aptitudes, and interests through exploratory experiences related to industry and man's technological development. The content include all elements of industry, occupations, materials energy and power, processes, personnel, communications, services, and research and development. The central theme is the individual and his learning about himself through concepts and exploratory experiences. Each of the 37 lessons list

objectives, suggested time, needed materials and equipment, references, evaluation methods, and a summarizing statement. (Author/NJ)

A review of basic mathematics operations is presented with problems and examples applied to activities in the food service industry. The text is divided into eight units: measurement, fractions, arithmetic operations, money and decimals, percentage, ratio and proportion, wages and taxes, and business records. Each unit contains a series of lessons which follow the format of stated objectives, background information, demonstration or procedure, and assignments. Recipes, guest checks, tax forms, and inventory sheets accompany many of the lessons and serve as worksheets for doing the assignments. A conversion chart showing the number of ounces necessary to make tablespoons, cups, pints, and quarts for many foods is included. (KJ)

The model curriculum guide in food service occupations consists of 26 units of study presented in outline form and intended for use at the secondary level. The outline presents a concept statement, behavioral objective, learning activities, teacher resource needs, suggested evaluation techniques, lesson objectives, a lesson/unit plan, and reference materials. The guide covers basic information necessary to anyone working in food service. Among the topics covered are: equipment facility terminology, operation of equipment and facility, personal hygiene, sanitation, basic cooking, salad making, food serving, menu planning, recordkeeping, purchasing and receiving, and mixology. Glossaries of teaching and evaluation methods are appended to the guide, along with brief definitions of norm and criterion tests. Sample lesson plans for use by the instructor are also appended. Lists of books and

magazine and film resources complete the document. (NJ)

The activities comprising the career education resource guide explore careers in chemistry or chemistry-related fields with limited treatment given to other science-related occupations. Units providing a general framework of chemical principles and related activities alternate with the career units. The career concepts most applicable to each unit are given with the unit. The Acquisition of Career-Entry Skills, Stage 5 of the Louisiana State Plan for Career Education, is emphasized. Information and experience built into the curriculum and into the career education activities are intended to help the student acquire these career-entry skills. A list of these skills is given for each unit. Making up one-third of the document, the appendix lists chemistry textbooks adopted for use in Louisiana schools; a reference code; instructional materials; lists of careers in, or related to, science and technology; an occupational study outline; and a list of information sources. Identifiers—Louisiana

The career education resource guide integrates learning activities in basic physics with an exploration of careers in physics or related fields. The guide is keyed to the physics textbooks and laboratory manuals adopted by the Louisiana State Department of Education in 1973. The field of physics is divided into six subject areas: (1) the description of motion, (2) mechanics, (3) thermodynamics, (4) waves, (5) electricity and magnetism, and (6) modern physics. For each subject area, a subject guide, suggested objectives, and career exploration activities are given. The subject guide attempts to keep the curriculum material in perspective. The suggested objectives are referenced, where possible, to experiments in the laboratory manuals on the State adopted list. The career exploration activities center on careers and hobbies that are related to that particular area of physics. An introductory career activity unit precedes that six subject areas and a culminating career activity unit follows. The appendixes include a classified list of physics-related hobbies and careers. Identifiers—Louisiana

The resource guide integrates learning activities in biological science with an exploration of careers in biology or related fields. The materials are divided into seven units: tools of the scientist, basis for life, diversity (protists, plants, animals), structure and function, continuity (reproduction, development, and genetics), evolution, and ecological concepts. Each unit is discussed by subdividing the information or ideas into categories of: (1) content outline, (2) suggested curriculum activities, and (3) career information (occupational clusters, career activities and careers related to biology). Career activities may or may not relate to the specific subject matter with which it appears. The content outline suggests a possible sequence for covering materials while the activity column suggest exercises that could effectively be used with each unit or sub unit. A list of State adopted biology textbooks (categorized by learning level) and a career

bibliography for grades 10-12 conclude the document. (Author/NJ)

Descriptors—\*Career Education, Career Opportunities, \*Earth Science, \*Junior High Schools, \*Learning Activities, Occupational Clusters, Occupational Information, \*Resource Guides, Science Curriculum

Identifiers—Louisiana

The resource guide consists of learning activities in earth science for students at the level of junior high school. The subject matter is divided into three major topics—astronomy, the earth, and earth's weather—which are subdivided into major divisions. The major divisions are provided with suggested learning activities. Career-related activities, referenced to the occupational categories to which they apply, are also included. Also included is a listing of careers related to earth science areas. A check list is provided in the career evaluation guide from which any job can be appraised in terms of the more important considerations in evaluating a potential area. Appended is a listing of books, periodicals, films and other aids which have been categorized as curriculum or career-related references. Also within the appendix is a listing of all the materials on the Louisiana State adopted list of textual materials. (Author/NJ)

Descriptors—\*Agribusiness, Agricultural Machinery, Behavioral Objectives, \*Curriculum Guides, Forestry, Learning Activities, Livestock, Ornamental Horticulture, \*Secondary Education, Soil Conservation, \*Vocational Agriculture, Vocational Development

Identifiers—Louisiana

The curriculum guide consists of three courses of study in vocational agriculture at three different levels: (1) farmer training, (2) off-farm agriculture, and (3) pre-college preparation for professional careers in agriculture. The basic programs of study in agriculture 1 and 2 emphasize agricultural sciences, leadership, and exploratory work in farming and off-farm agricultural careers. The units of study are composed of goals, performance objectives, suggested activities and instructional materials, and references. The course of study for agriculture 3 and agribusiness 4 offers more specialized and advanced training. The major topics are: farm machinery sales and service, farm supplies and equipment, livestock and poultry, crops, forestry, and soil conservation, ornamental horticulture, wildlife and recreation, farm services, and agricultural service. These major topics are further subdivided into units consisting of goals, performance objectives, suggested activities and instructional materials, and references. (NJ)

Developed for home economics teachers in Louisiana, the curriculum guide presents materials for developing a program in consumer education for grades 8-12. Material is arranged under three levels: (1) Beginning Level, with units covering grades 8 and 9; (2) Intermediate Level, with units covering grades 10 and 11; (3) Advanced Level, with units covering grade 12 and Home and Family Living courses. Each unit includes a conceptual diagram of the major ideas to be emphasized, an overview, general objectives, subject matter content or generalizations, learning opportunities and resources, evaluation procedures, a bibliography, and an appendix, which contains a variety of material, including examples of evaluation devices, suggested learning activities and related materials, and a glossary of terms. It is stated that the guide has been planned for students from a variety of socioeconomic backgrounds and cultures, with differing interests, needs, and abilities. (LH)

Descriptors—Delivery Systems, Demonstration Programs, Educational Needs, Educational Programs, \*Health Occupations Education, \*Health Personnel, \*Health Services, Physicians, Program Content, \*Program Descriptions, Program Development, Program Evaluation, Program Planning, \*Staff Improvement Identifiers—\*Health Maintenance Organization, HMO, PCU, Primary Care Unit

The Demonstration Training Program (DTP) undertaken by the Detroit Medical Foundation (DMF) was designed for Primary Care Unit staffs (PCUs) or Physician Corporations (PCs), area health center providers under contract to the Michigan Health Maintenance Organization Plans, Inc. (MHMOP). The major goals of the program were to design an appropriate curriculum for the staff of PCU centers (physicians and other health professionals), develop training methodology for implementing it, produce a training manual outlining the procedures for program implementation in other HMOs, and increase PCU staff cohesiveness and levels of knowledge about HMO systems. The report is divided into four major parts. Part 1 describes: MHMOP (with 28,000 enrollees and 19 health centers) the DMF, and the planning, implementation, and evaluation phases of the DTP. Part 2 is the Individual Practice Association model HMO Training Program Manual which was developed during the training process. Part 3 is a process and impact evaluation of the entire project prepared by a sub-contractor to DMF which indicates that the basic project objectives were accomplished. Part 4 contains appended material including major supportive materials used to design and implement the DTP and a list of trainee participants. (Author/MS)

The Passionate Educators: Voluntary Associations and the Struggle for Control of Adult Educational Broadcasting in Canada 1919-52.

Pub Date Jun 75

Note—202p.

Available from—Books Canada Inc., 35 East Tupper Street, Buffalo, New York 14203 (\$13.50)

Document Not Available from EDRS

Descriptors—Adult Education, \*Adult Education Programs, Change Agents, \*Educational History, Educational Objectives, \*Educational Radio, Foreign Countries, \*National Organizations, Political Attitudes, Program Descriptions, Social Attitudes, \*Social History, Socioeconomic Influences, Voluntary Agencies Identifiers—CAAE, Canada, \*Canadian Association for Adult Education

The Canadian Association for Adult Education (CAAE) is examined during the three historic phases of prewar depression, wartime, and postwar recovery. Social movement groups of a rural and populist nature and traditional voluntary associations encompassing an urban and elitist point of view joined to form the CAAE in 1935, and their conflicting attitudes regarding the role of the Association are traced. External conflicts are discussed, including the changing socioeconomic environment of the 1940's; the working relationship between the CAAE, the Canadian Broadcasting Company, and the Canadian Federation of Agriculture regarding broadcasting; and political criticism from the news media. The "National Farm Radio Forum" and "Citizens' Forum" reached sparsely populated rural Canada, and both programs are described and discussed. Noted figures in the development of the CAAE, CBC, and the Canadian educational and political scene of the day and their roles are examined, including E. A. (Ned) Corbett, James Muir, W. H. Brittain, and J. R. Kidd. Nine chapters present the material, with the 1943 CAAE Manifesto appended and chapter notes and an index provided. (LH)

Descriptors—Abstracts, \*Educational Research, \*Indexes (Locators), \*Instructional Materials, \*Technical Education, \*Vocational Education

The publication is presented with the purpose of providing educators easy access to current materials relevant to vocational-technical instruction and research. The document cumulates the indexes that appeared in the six bi-monthly issues of Abstracts of Instructional and Research Materials in Vocational and Technical Education (AIM/ARM), Volume 8, numbers 1 through 6. This cumulation is intended to be a companion volume to the individual issues of AIM/ARM, which contain the complete resumes of documents. Two indexes are provided in this volume: subject and author. Both indexes show the title of the document, the VT number, and page of AIM/ARM on which the abstract appears. The alphabetical subject index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The terms conform to those presented in the Thesaurus of ERIC Descriptors. The author index is arranged in alphabetical order by the person's last name and/or the institution's full name. Descriptors—Coordinators, Elementary Schools, \*Guides, Organization, Organizational Development, Organizations (Groups), Paraprofessional School Personnel, Program Coordination, Program Costs, \*Program Development, Program Guides, Program Planning, \*School Aides, Secondary Schools, Student Volunteers, \*Voluntary Agencies, \*Volunteers, Volunteer Training

The coordinator's handbook provides a basic outline for establishing or improving volunteer programs; it is primarily directed toward assisting fledgling programs. The handbook defines a school volunteer program as an organization of persons who work in schools under the professional personnel's direction, strengthening the school program or offering special skills to enrich students' educational experience, or, outside the school, providing homework assistance or other special educational aid as needed. Responsibility for program organization rests with the person willing to establish working arrangements with the central school administration and participating school staffs to get the initial project underway. Chapter topics include: (1) funding sources and proposal preparation, (2) organizing and developing a volunteer program, (3) administering a volunteer program, (4) recruiting volunteers, (5) interviewing, selecting, and assigning volunteers, (6) volunteer orientation and training, (7) orientation and training of professional personnel, (8) using students as volunteers, (9) career education implications for volunteers, (10) maintaining volunteer morale, and (11) evaluating volunteer programs. Selected references are offered for the reader's further information. The handbook incorporates materials from eight organizations or volunteer programs, and is a revised and updated version of Washington Technical Institute's popular "ABC's: A Handbook for Educational Volunteers." **A School Counselor Education Program for Persons Without Teaching Experience. A Project Report.**

Wisconsin Univ., Madison. Dept. of Counseling and Guidance.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date Dec 72

Grant—OEG-0-9-590570-2036(721); OEG-0-70-2033(721)

Note—87p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—Counselor Characteristics, Counselor Evaluation, \*Counselor Performance, \*Counselor Qualifications, \*Counselor Training, Helping Relationship, \*Internship Programs, Program Descriptions, \*Teaching Experience

The purposes of this school counselor preparation program were twofold: (1) to recruit, train, and certify as school counselors in Wisconsin individuals with strong behavioral science undergraduate training and experience in related helping professions; and (2) to ascertain if school counselors without teaching experience could be as effective as school counselors with teaching experience. This report includes a description of the two-year counselor education program, as well as program evaluation methods and procedures. Data generated indicate that there are no performance differences between interns from this program and control counselors, as perceived by student clients, teachers, administrators, and other pupil personnel specialists. While the data are tentative because the largest group of persons trained through the internship (15) has yet to perform independently as school counselors, the results of the project and study tend to shed more light on the ability of persons without teaching experience to perform as school counselors. **The Use of Three Variations of Anxiety Management Training in the Treatment of Generalized Anxiety.**

Pub Date [71]

Note—21p.

Available from—Cecil A. Edie, Ph.D., 5857 Union Street, Arvada, Colorado 80004

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Anxiety, \*Behavior Change, \*Behavior Problems, Behavior Theories, \*Desensitization, Neurosis, Rating Scales, Research Projects, Therapy, \*Training Identifiers—AMT, \*Anxiety Management Training, Anxiety Symptom Check List, Manifest Anxiety Scale

Anxiety management training (AMT), developed by Suinn and Richardson, is a short-term treatment procedure for alleviating a variety of manifestations of anxiety. It is based on the theory that anxiety or fear responses themselves can become discriminative stimuli and that clients can be conditioned to respond to those stimuli with antagonistic responses of relaxation and feelings of competence which remove the anxiety through reciprocal inhibition. This study investigated the efficacy of three variations of AMT—physiological cues only, physiological cues plus scenes, and scenes only. Subjects were college students who were seeking help for "free-floating" anxiety problems. Questionnaire data were obtained on the Manifest Anxiety Scale (MAS) and the Anxiety Symptom Check List (ASCL). Post-treatment interview data were also obtained. Data were analyzed by separate analysis of variance designs. In addition to comparing AMT groups to each other, data from a waiting list control group and a no-problem, no-treatment control group were obtained and compared to the treatment group data. The results indicated that all three variations of AMT were effective in alleviating "free-floating" anxiety. (Author)

**Racial and Ethnic Barriers in Counseling.**

Pub Date 27 Aug 73

CG 007 837

Note—37p.; Paper presented at the Annual Meeting of the American Psychological Association (81st, Montreal, Quebec, August 1973)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Counseling, \*Cultural Differences, \*Disadvantaged Groups, Ethnic Groups, \*Minority Groups, Psychological Characteristics, \*Racial Factors, Social Environment, State of the Art Reviews, Testing

There are numerous problems involved in counseling minority group members. Rapport is difficult to establish because of the racial and/or cultural attitudes client and counselor have toward one another; consequently the client often finds his own goals in opposition to those of counseling. The existing cultural gap also leads to different patterns of transference and counter transference; the client expects punishment and rejection from the counselor, while the latter might either be excessively sympathetic and indulgent with minority clients or convey "the great white father syndrome" to his clients. Language is another important factor which hinders effective communications between counselors and clients coming from different cultural backgrounds. Finally, the psychological characteristics of self-hatred, machismo, unwillingness to self-disclose, and modesty are other barriers to successful counseling. Many specific tests are not recommended for use with minority groups that have been culturally isolated and do not speak English fluently. Counselors should thoroughly understand all aspects of minority group cultures and should be careful in recommendations that aim to help their clients. (SE)

**Demographic Factors Influencing Parental Discipline Techniques.**

Spons Agency—Harvard Univ., Cambridge, Mass.

Pub Date [Aug 75]

Note—12p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Children, \*Demography, \*Discipline, Family (Sociological Unit), Interviews, Parent Child Relationship, \*Power Structure, Research Projects, \*Sex Differences, Socioeconomic Status

Forty-four 5th graders and their mothers were interviewed about parental discipline practices toward the child. Responses were coded as indicating parental use of power assertion, love-withdrawal, or teaching (induction). Mother-child agreement and the interrelationships among the discipline types are discussed. Sex of child, measures of SES, and family size were significant predictors of parental discipline. Boys received more power assertion and love-withdrawal, and less teaching than did girls. Indicators of social status (parent education, parent occupation) related negatively to use of power assertion. Larger family size was associated with increased use of power assertion and decreased use of teaching among boys, but among girls the relationships were reversed. Processes by which these demographic variables influence parents are proposed. (Author)

Labor unions and their affiliated locals pledge vast amounts of money annually to aid union members and children of members to acquire education beyond high school. Awards range from \$100 stipends to scholarships worth \$8,000 for the four college years. The listing of union-sponsored scholarships is in two major divisions: the programs of (1) national and international unions awarded on a national basis; and (2) state listings of council, district, and local union awards. The programs of national and international unions are generally for sons and daughters of union members, but on a national basis. The state listings are generally open to sons and daughters of members of union locals; some are open to any high school student in the county or state; and others are unrestricted, but specify, for example, that one will enter study to become a nurse, teacher, or journalist. Unless otherwise noted, all copy in this edition has been approved by the sponsoring organizations since January 1, 1975. (Author)

Descriptors—\*Behavior Patterns, Children, \*Interaction, \*Performance Factors, \*Rewards, \*Self Evaluation, Social Exchange Theory, Speeches

Performance variables were manipulated to elicit differential outcomes of success and failure for dyad members in an attempt to investigate resultant bargaining and distribution of rewards. Seventy, 10-12-year old children (36 female, 34 males) were placed into dyads controlling for age, sex, I.Q., and friendship choices. Self-allocation were made (1) prior to an interaction, (2) after interactions involving an information

exchange, and (3) as a result of a mutual decision process. The results indicated that successful performers gave themselves greater rewards than unsuccessful performers gave themselves; however, these responses reflected equality decisions. Prior to an interaction, unsuccessful performers gave themselves greater rewards than after an information exchange interaction condition. After this interaction, unsuccessful performers followed equity behavior, giving themselves smaller rewards. The mutual decision led to equal rewards for all regardless of performance. Content category analyses of the bargaining sessions revealed differences for performance factors, specifically that successful performers primarily discussed equality statements while unsuccessful performers emphasized equity and agreement with other statements. Descriptors—Bias, College Students, Peer Acceptance, \*Performance, \*Photographs, \*Physical Characteristics, Rating Scales, Research Projects, \*Sex Differences, \*Stereotypes, Task Performance

Identifiers—\*Attribution Theory

Based on research indicating the existence of a generalized positive stereotype of physically attractive individuals, the present study was designed to investigate the effects of an individual's attractiveness on attributions about his achievement-related behavior. In the context of an accuracy-of-person perception task, 162 male and female subjects were shown a photograph of either a male or female physically attractive or unattractive stimulus person. Subjects were told that the stimulus person had either succeeded or failed on an examination, and were asked to attribute the stimulus person's success or failure to four attributional categories (i.e., task difficulty, luck, ability, and effort). The results indicated that physical attractiveness affected causal attributions, especially for those who were unattractive. Unattractive individuals were seen as having very high ability and expending much effort when successful, but very low ability and effort expended when they failed. This finding was especially pronounced for female, as compared to male subjects. A number of such sex-related findings are discussed as well as the implication of these findings for other attribution-type studies. (Author)

**Social Facilitation: Effects of Audience and Manipulated Feedback on Performance.**

Pub Date [75]  
 Note—12p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Anxiety, College Students, \*Feedback, Males, \*Motivation, \*Performance Factors, \*Psychological Patterns, Research Projects, Social Influences, \*Social Relations, Task Performance

Quality of performance feedback provided an individual may have pronounced impact on his motivation level and be at least partly responsible for social facilitation results. Male students (N=118) performed a dart-throwing task in the presence or absence of a three-person evaluative audience. After each of seven trials they received consistently positive, average, or negative performance feedback. Results showed a social facilitation effect of audience presence and initially facilitated performance under average feedback, but no interactions. Post-performance mood questionnaires suggest that separate mechanisms could mediate performance under each of the three feedback conditions. (Author)

Descriptors—Conference Reports, Counselor Training, \*Educational Needs, Health Education, \*Health Personnel, \*Professional Training, \*Sex Education, \*Sexuality

This report emphasizes that the purpose of sexual health care should be the enhancement of life and personal relationships, and that awareness of and education about the sexual aspects of health need to be promoted among all community workers. There is a great need for (1) basic information about the biological and psychological aspects of sexuality dysfunction and disease; (2) positive attitudes towards sexuality; (3) personnel with understanding of and an objective outlook on sexuality and sexual problems; and (4) training programs and referral services relevant to sexual health needs. The report urges the establishment of regional or national resource centers in sexology to coordinate and improve efforts in training and research, and to provide reference services. Teaching aids should be based on and relevant to the culture of the particular country or region concerned. Research and epidemiological surveys on local knowledge, attitudes, and practices regarding sexuality should be encouraged. This report stresses that programs should become more interdisciplinary and should give more attention to normal sexual development and behavior rather than, as formerly, gross pathological conditions and the forensic aspects. This report describes the nature and function of humanistic interviewing in the exchange of information. This interviewing process recognized the human side of the transfer of information involving insight, growth, and further understanding. The report examines the purposes and types of interviews, questionnaire construction, the interviewing session, and the interview plan. Guidesheets for content and style development within questionnaires and sample questionnaires are provided. (SJL)

**Educated American Mothers Abroad: Resolving Parent/Work Role Conflicts.**

Pub Date 75

Note—12p.; Paper presented at the Annual Meeting of the Psychological Association (82nd, New Orleans, Louisiana, August 1974); Not available in hard copy due to reproducibility of original document

**EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Academic Achievement, \*Emotional Adjustment, Family Attitudes, Individual Power, Interviews, \*Mothers, Psychological Characteristics, \*Role Conflict, \*Working Women

Identifiers—\*Living Abroad

Twenty-five well-educated American mothers living abroad were interviewed to assess the relationship of their various home/career patterns to their overall emotional adjustment. The primary areas investigated as to their impact on adjustment levels included whether or not the women were working, whether or not they were satisfied with their working or nonworking status, and the nature and extent of support they received from husbands, domestic help, and governmental agencies. Findings from open-ended, semistructured interviews suggested that satisfaction with one's

home/career patterns was a necessary prerequisite to healthy emotional adjustment. All the women rated poorly adjusted ( $N=10$ ) were not working, and were highly dissatisfied with this state of affairs (International Casualties). Those rated well-adjusted were either working and happy to be doing so (Happily Working Mothers,  $N=9$ ) or not working, but by conscious choice (Satisfied Mothers,  $N=6$ ). The extent to which the husband actively participated in family life, the amount of household help, and the presence of supplementary income were not as critical to women's satisfaction as was the freedom to actively structure their lives in a fashion consistent with their sense of self. Descriptors—\*Aspiration, \*Career Choice, \*College Bound Students, \*College Preparation, Educational Planning, Educational Research, Secondary Education, Secondary School Students, \*Seniors, Surveys

Identifiers—Indiana

This report is part of the Indiana College-Level Manpower Study and provides statistical information concerning future college enrollments and manpower supply. The survey data of this report deal with the educational and occupational plans of Indiana high school seniors who had pursued college preparatory programs at the secondary education level. The report deals primarily with the 17,464 seniors who classified themselves as college preparatory. For purposes of comparison, the responses of non-college preparatory seniors are included. The data of this report are meant to be informational; of potential value to administrators, educational planners, parents, teachers, counselors and students. The survey questionnaire used in this study is included in the report. (SJL)

Descriptors—Annual Reports, Attitudes, \*Committees, \*Educational Equality, \*Educational Improvement, Elementary Secondary Education, Foreign Countries, \*School Community Relationship, \*Social Differences

Identifiers—\*Australia (Queensland)

This commission report consists of the recommendations made for Australian schools regarding equality, open attitudes, and the school community. The School's Commission places an emphasis on more equal outcomes from schooling. Particular stress is laid on social group disparities and attempts to mitigate them, and on social changes and their effects on desired educational outcomes. It is asserted that the adaptation of educational arrangements to the needs of children in relation to desired outcomes from schooling is more effectively achieved with active community involvement. The commission recommends that the school or learning community be allowed maximum freedom to address itself to its own problems and act on its own best judgement in allaying them. The commission also encourages more open attitudes to educational questions, organization, and structures. The report challenges the traditional balance of allocation of resources between primary, junior secondary and senior secondary levels. The report includes descriptions of the commission's multiprogram approach to its supplementary funding of state school systems. (SJL)

Identifiers—Kansas (Lawrence)

This short report provides a brief description of a research project presenting an alternative approach to delinquency treatment. Achievement Place is a family-sized residential treatment home for preadolescent and delinquent youngsters. Six to eight boys, aged 12-16, live in a renovated house located in their own community. A specially trained couple, serving as teaching-parents, help to provide a family milieu in which they teach the boys new social, self-help, and academic behaviors through the use of a token reinforcement system. The report outlines the project goals, reinforcement system, training of teaching-parents, community controls, and community savings operating within the Achievement Place program. (SJL)

**Demand Characteristics in Classical Verbal Conditioning and Attitude Conditioning Studies.**

Pub Date 75

Note—48p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Attitudes, \*Classical Conditioning, \*Contingency Management, Experimental Psychology, \*Learning Processes, Paired Associate Learning, Patterned Responses, Research Projects, \*Verbal Learning

This paper is a draft for the American Psychological Association Symposium on the conditioning of verbal behavior and attitudes. The author presents the results of several studies he conducted in the classical conditioning of meaning and attitude. These studies attempt to control the measurement effects created by extraneous variables operating on the generalized Staats procedure. Especially at issue is the elimination of the effects of contingency awareness and of demand characteristics in "conditioning of meaning" studies. A problem remaining is determining if contingency awareness is a necessary condition not only for the special case of classical conditioning of meaning but for classical conditioning in general. The author presents a tentative conclusion that the results from Staats' "conditioning of meaning" procedure are not due entirely to demand characteristic effects. (SJL)

Descriptors—\*Behavior Patterns, Family Relationship, \*Incidence, Psychological Patterns, Questionnaires, Research Projects, \*Socially Deviant Behavior, \*Sociocultural Patterns, \*Youth Problems

Identifiers—\*Runaways

This extensive report presents the recommendations and findings of a study designed to indicate procedures and instruments for a national study of the incidence of runaway. Reported data are from an urban-suburban area and a rural area in Colorado. The report makes specific recommendations concerning the feasibility of using a national probability sample for the purpose of estimating the incidence of running away. Several smaller studies conducted in several carefully

selected localities are recommended for collecting detailed information about runaway episodes, runaways and their families. The report also presents incidence estimates, an analysis of user satisfaction with sources of assistance, descriptions of types of runaways and runaway behavior, and global comparisons between runaways and nonrunaways. The social-psychological theories relating to runaway behavior are examined, and the methodology and results of the pilot study are described in detail. (SJL)

Descriptors—\*Attitudes, Behavior, \*Drug Abuse, Marihuana, Narcotics, \*National Surveys, Research Projects, \*Sociocultural Patterns, \*Statistical Data, Stimulants

This is a study of beliefs, attitudes, and behavior with regard to a wide range of legal and illegal drugs. Included are data about coffee, tea, tobacco, and illicit drugs such as marihuana and heroin. The report covers the current situation and highlights trends from two prior studies on drug abuse conducted for the National Commission on Marihuana and Drug Abuse. The present survey adds considerable new information reflecting current interests and issues. The report includes summary information of recipient experience with the drugs; user patterns and characteristics; medical usage of psychotherapeutic drugs; findings on other substances such as tea, coffee, cigarettes, and alcohol; and beliefs and attitudes related to drugs. There are also extensive appendices. Findings of the survey include the fact that the public has more experience with marihuana than with any other psychoactive drugs studied, with the next highest being over-the-counter psychotherapeutic drugs. There are strong age relationships connected with the use of marihuana, social use of illicit drugs is the most common pattern, nearly half the adult population report some experience with prescribed psychotherapeutic drugs, and, finally, virtually no change has been reported in adult cigarette consumption over the past several years whereas a marked increase for young people has been noted. **The Others-Concept and Adult Behavior in Small Groups.**

Pub Date [72]

Note—9p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Adults, \*Developmental Psychology, Group Dynamics, Individual Characteristics, \*Interpersonal Competence, Maturation, \*Personality Assessment, Research Projects, \*Social Development, Task Performance

Identifiers—\*Others Concept

In other studies to be reported in this symposium, the others-concept is seen to be a psychological construct of emerging importance for understanding children's behavior. It would appear, however, to have relevance for all age groups. Thus this researcher sought to investigate whether or not the relationships which had been previously found between children's others-concepts and their group behavior could be demonstrated in an adult population. An adult form of the PHT (the PHT-A) was developed and given to university students. High and low scoring subjects were asked to work in small groups on a task appropriate for college students. The group sessions were tape recorded, and these recordings were coded blindly and analyzed statistically, along the lines of the Barnett and Zuker studies with children. Significant behavioral differences were found between subjects who had high others-concept and subjects who had low others-concepts. The study therefore demonstrated that the others-concept is a theoretical construct which is applicable to adults as well as to children. In so doing, the value of the others-concept

as a construct for working with children was enhanced. (Author)

**A Model for Implementing Career Education Within an Existing Curriculum.**

Pub Date [75]

Note—15p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Career Education, Childhood Attitudes, Curriculum Design, \*Curriculum Development, Elementary Secondary Education, \*Models, Pilot Projects, Program Evaluation, \*Skill Development, \*Work Attitudes

A model was developed for implementing career education into an existing curriculum and is composed of four essential elements based on a perceived need: needs assessment, participation facilitation, curriculum design and implementation process. Each element of the model is totally dependent on the completion of the components comprising each preceding element. The model was applied in the Cooperative Educational Service Agency No. 1 which is composed of 14 school systems in six counties in northwestern Wisconsin. The model, as applied to two pilot school systems, was intended to serve as a guide for other school systems. Through application the model was found to be viable in implementing career education into an existing curriculum. Development of attitudes and communications skills is essential to the participation of parents, teachers, and students in creating the curricular design. Needs must be identified and satisfied in the implementation process. Evaluation and followup should provide necessary feedback to insure an acceptable level of implementation. It is recommended that others test the model for usefulness and possible improvement. Further application should support its practicality for urban as well as for rural settings. (Author)

**Use of Self-Control Procedures in the Counselor Education Program at Michigan State University.**

Pub Date 24 Mar 75

Note—10p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Audiovisual Aids, \*Autoinstructional Aids, Behavioral Objectives, Behavior Change, Counselor Functions, \*Counselor Training, \*Curriculum, \*Higher Education, Program Descriptions, \*Self Control, Student Centered Curriculum

Identifiers—\*Self Management

This paper describes a curriculum that attempts to provide counselor trainees with the necessary abilities to improve their counseling after they leave the learning environment and enter the world of work. These efforts come through training in self-control techniques during a counselor education masters program. A first course exposes trainees to behavior modification techniques and sets a self-modification task. This course is followed by one in which the self-management techniques are applied to the Modification of problem behaviors related to the trainees' ability to interview. Videotape and role-playing techniques are employed. Trainees are then encouraged to use the self-management techniques in practicum. There is also a brief description of the inclusion of self-modification training in the Ph.D. program. The techniques appear to be of significant help. (NG)

**Promising Guidance Practices in Texas, 1974-75.**

Texas Education Agency, Austin. Div. of Guidance Services.

Pub Date [75]

Note—25p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Career Education, \*Counseling Services, \*Elementary Secondary Education, Evaluation, \*Guidance Programs, Junior High Schools, \*Methods, \*Program Descriptions, Program Evaluation

In 1974, the Texas Education Agency Division of Guidance Services established as one of its objectives the identification of a cross section of promising guidance practices. The idea for such a project came from the fact that agency guidance consultants often discovered exemplary practices by accident. Sometimes these were small, innovative projects carried out by a zealous individual or a few staff members in one school, and sometimes they were systemwide programs. The Division of Guidance Services decided there should be a systematic attempt to find such practices and give them additional recognition. This publication is the result of that attempt. Its purpose is to highlight 30 selected examples of innovative approaches to guidance and to serve as an example to other educators who look for ways to increase their guidance services to students. Projects selected are categorized into six groups: Elementary Schools, Middle Schools, High Schools, All Levels, Schools Without Counselors, and Schools with Guidance Associates. The last section lists 69 additional schools with effective guidance practices. (NG)

McConkie, Mark L., Ed. Morton, Joann B., Ed. **Selected Readings from SCMTC (Southeast Correctional Management Training Council) Seminars.**

Georgia Univ., Athens. Southeastern Correctional Management Training Council.

Pub Date Apr 75

Note—94p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—\*Administrator Guides, \*Correctional Rehabilitation, \*Corrective Institutions, Disadvantaged Groups, Guides, Institutionalized (Persons), Law Enforcement, \*Prisoners, \*Social Factors, Volunteers

This selection of readings is designed to assist correctional managers with their particular concerns such as planning, organizing, understanding the client, and utilizing volunteers. The first article deals generally with the functions and problems of the innovator and planner, without dealing specifically with the correctional setting. The second addresses such issues as the philosophies underlying correctional systems, types of reform needed, relations of the facility to the community and state-local institutions. The third attempts to analyze organizations in general and correctional facilities in particular. It also addresses the problems of quality of personnel, goals, and means. The next attempts, by describing the situation of the poor and disadvantaged, to give correctional personnel sensitivity to the viewpoint of those usually placed in corrective custody. The last article warns that inmates should be protected from inequities in the system, and examines some of the societal elements which often lead the poor and underprivileged toward criminal behavior. **Sex Differences in Self-Evaluation of Academic Achievement and Ability.**

Pub Date May 75

Note—8p.; Paper presented at the Annual Meeting of the Midwestern Psychological Association (46th, Chicago, Illinois, May 2-4, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Ability Identification, Academic Achievement, \*Achievement, \*Expectation, \*Performance, Personality Assessment, Research Projects, \*Self Evaluation, \*Sex Differences

Extending the work of Crandall (1969), this study tested the hypotheses of sex differences in interpretation of past academic performance and expectations of future achievement. Subjects were 225 freshman women and 194 freshman men (93 percent of the freshmen class) at a highly selective midwestern liberal arts college: they did not differ in past academic performance (high school rank), later college performance (grade point average), or ability (SAT-Verbal). The students indicated whether their high school grades accurately represented, underrepresented, or overrepresented their abilities. Results confirmed predictions and supported Crandall's (1969) findings that women students underestimate future performance on intellectual and academic tasks while men tend to overestimate it. Women tended to report grades as overrepresenting their ability, men as underrepresenting their ability. Men were also more likely than women to expect at least a "B" average in college and honors at graduation. For both sexes, students who saw their high school grades as underrepresenting their abilities had significantly lower college grades than those who saw grades as overrepresenting abilities. **Perceiving the Good Samaritan: Effects of the Behavior of Others on Attributions of Altruism.**

Pub Date 3 May 75

Note—32p.; Paper presented at the Annual Meeting of the Midwestern Psychological Association (46th, Chicago, Illinois, May 2-4, 1975)

Available from—Michael D. Dowdle, Department of Psychology, Michigan State University, East Lansing, Michigan 48824

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Altruism, \*Behavior Patterns, Laboratory Experiments, \*Psychological Patterns, Psychological Studies, \*Reactive Behavior, Research Projects, Social Attitudes, \*Social Influences

Subjects judged the behavior of a target person who had helped or not helped a person in distress while the target person was either alone or with confederates who also had helped or not helped. In addition, subjects were told that either (1) 80 percent of all persons tested had helped, (2) 20 percent had helped, or (3) nothing about the percentage that helped. The data revealed that subjects' judgments were a function of the social desirability of the observed behavior when the target person had participated in the altruism situation alone. However, when the target person had participated with confederates present, subjects' judgments were a function of the similarity/dissimilarity between the target person's behavior and the confederates' behavior rather than the social desirability of the behavior per se. Providing subjects with information about base rates of altruistic behavior had only minimal effects on their judgments. (Author)

**A Longitudinal Field Investigation of the Impact of Group Composition on Group Performance and Cohesion.**

Spons Agency—Office of Naval Research, Washington, D.C. Organizational Effectiveness Research Program.

Pub Date [75]

Note—23p.; Paper presented at the Annual Meeting of the Midwestern Psychological Association (46th, Chicago, Illinois, May 2-4, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Ability Grouping, \*Attitudes, Field Studies, \*Group Behavior, \*Group Unity, Higher Education, Longitudinal Studies, \*Performance Factors, Psychological Studies, Task Performance

Identifiers—\*Cohesion

In a longitudinal field experiment, 42 groups were assembled on the factors of individual ability and attitude similarity resulting in a 2 x 2 crossed ANOVA design. These groups then worked on six projects which spanned a three-month time period. For each project, measures of group performance and group cohesion were taken. Analyses showed that high ability groups exhibited the best performance whereas attitudinally similar groups expressed the greatest cohesiveness. In addition, correlational data suggest that the effect of attitude similarity on cohesion is not immediate, but develops over time, and that across the six projects, performance can be both positively and negatively related to cohesion. **Influence of the Others-Concept on Children's Group Behavior.**

Pub Date [75]

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Behavior Patterns, \*Children, Educational Research, \*Group Behavior, Individual Characteristics, \*Interpersonal Relationship, \*Psychological Patterns, Social Relations, Speeches, Teamwork

Identifiers—\*Others Concept

This paper summarizes and integrates the findings from three separate studies, all of which had as their major objective the investigation of differences in small group behavior between children who have relatively high others-concepts and children who have relatively low others-concepts, as measured by the Paired Hands Test. Group sessions of four children each were taped while the children worked on tasks such as assembling a jigsaw puzzle or building something with Tinkertoys. The recordings were then coded blindly and analyzed statistically. All three studies showed a tendency for children who have high others-concepts to be more cooperative and friendly in small groups than children with low others-concepts. Some of the factors which were explored in these studies were sex of children, teachers' judgements of their socioeconomic status and intelligence, and variations in the group task. The data from all three studies demonstrate that the others-concept is predictive of group trends and therefore a significant theoretical construct for helping school psychologists to understand children's behavior. **Social Interaction Involving Depressed Persons.**

Pub Date [74]

Note—9p.; Occasional light print

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Behavior Patterns, \*Emotional Problems, \*Interpersonal Problems, \*Psychological Patterns, Psychological Studies, Research Projects, \*Response Mode, Social Relations

Identifiers—\*Depression

This paper discusses a study undertaken to examine the reaction of others to the behavior of depressed persons. The general hypotheses of the study are that (1) normal subjects respond differentially to the behavior of depressed patients; (2) this differential response is due to the fact that the target individuals are depressed, and not that they are patients; and (3) this pattern can be related to the symptomology of depression. More specifically, it was hypothesized that depressed persons induce depression and hostility in others, and consequently are rejected socially. The experiment involved a single telephone conversation between paired women. One woman of each pair was a college student, the other was either a depressed outpatient of a mental health center, a nondepressed outpatient, or a control group member. These conversations were then rated on various dimensions and a measure of postconversation mood was completed by each participant. The results are supportive of the hypotheses, and are discussed in terms of their implications. (SJL)

In the aftermath of the Watergate scandal, each profession is reviewing its ethical practices. This paper assists in this renewal by citing the code of ethical standards of APGA; reviewing the laws of the State of Nevada regarding privileged communications; and covering the legal aspects which relate to counseling situations. This paper addresses the need for having a specialist in vocational guidance who knows what needs to be done to implement and improve vocational guidance services. The person who fills the role of vocational guidance specialist must be aware of the potential roles that each group within the educational system can play in fostering needed guidance services, and must serve as a catalyst for bringing these resources together into a viable program. To do this, the author posits that the specialist must have an in-depth and practical understanding of the educational system, the world of work, the individual and the process of vocational development, and procedures for bringing people together in a common effort. For purposes of providing insight into the breadth and level of this person's understanding, the author provides a comprehensive description of relevant competencies. (SJL)

**A Guide to Training Parents as Behavior Modifiers.**

Note—16p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Behavior Change, \*Change Agents, \*Change Strategies, Conditioning, \*Guidelines, Parent Child Relationship, \*Parent Education, Reinforcement

A guide to training parents as behavior modifiers is presented. Providing the parents with a summary of behavior modification principles is suggested. Having the parents select behaviors and gather base rates prior to the interview is discussed. Specific interview topics and questions are presented. The statement of a precise behavioral objective is stressed, as is the rehearsal of the change strategy. Assessment is reviewed with reference to the behavioral change, the parents, and the change agent. Common mistakes leading to the failure of the change strategy are listed. Finally, termination and generalization of parent behaviors are discussed. (Author)

**Positive Attentional Cues as Cognitive Factors in Desensitization.**

Pub Date 1 May 75

Note—15p.; Paper presented at the Annual Meeting of the Midwest Association of Behavioral Analysis (1st, Chicago, Illinois, May 1, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Attention Control, \*Behavior Change, Cognitive Processes, \*Conditioning, \*Desensitization, \*Fear, Psychological Studies

The purpose of this study was to investigate the function of positive attentional cues as cognitive factors in the modification of fear responses in a desensitization-like treatment procedure. Positive attentional cues are defined as positively-valenced descriptors of the feared stimulus. Two groups of two subjects each were assessed as to the intensity of their fear responses (snake phobia) along behavioral and cognitive dimensions. After two relaxation sessions, the standard treatment and experimental groups received the same desensitization treatment with one exception: the hierarchy of the experimental group was supplemented with a positive attentional cue. The results indicated that while both groups improved on the behavioral measures, the experimental

group's improvement was somewhat greater. Follow-up data indicated that the experimental group lost some of their initial gains while the control group continued to improve. The implications of these findings are discussed. (Author)

The 1972 Summer Conference for Counselors of the Institute for Services to Education, Thirteen College Curriculum Program was held at Newton College of the Sacred Heart, Newton, Massachusetts during the period of June 25 through July 14, 1972. The general theme throughout the entire conference was three-fold in nature: (1) to introduce and develop the concept of the interdisciplinary approach across academic and administrative lines at the college and university level; (2) to present a vast array of counseling techniques which would enhance counselor skills in working with students; and (3) to instill within each counselor the vital role that he or she must play if the total curriculum program is to be successful. These three elements were placed under the umbrella of over-all morale building for the status of the counselors in the college consortia program. (Author)

Descriptors—College Programs, Consortia, \*Counseling Programs, \*Counselor Role, \*Demonstration Programs, \*Guidelines, Higher Education, Objectives, \*Program Descriptions, Student Needs

This handbook orients counselors to the counseling needs engendered by the curriculum program of the Thirteen College Consortium. In addition to providing an overview of the philosophy and objectives of the counseling program, the book describes the general and special services to be provided by counselors. Also described are the techniques and processes of counseling for the Consortia Program, evaluation instruments and evaluation procedures, and a detailed model for a counseling program. Within the program framework, the counselor acts as a central unifying force by helping to meet both immediate and long-term student needs, by acting as an advocate of student views, by serving as a source of support and understanding for individual students, and by monitoring programs and student progress for the purposes of continued improvement. Correlates of Self-Concept of Elderly Women Residing in Institutions.

Pub Date [73]

Note—20p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Behavioral Science Research, Correlation, \*Females, \*Institutionalized (Persons), Interviews, Measurement Instruments, Morale, \*Older Adults, Questionnaires, Religion, \*Self Concept, Self Esteem

Identifiers—Philadelphia Geriatric Morale Scale, Rosenberg Self Esteem Scale  
Ninety-five females (aged 61-100, mean=80.88) were interviewed in a study to

determine correlates of self-regard, as measured by the Philadelphia Geriatric Morale Scale (PGMS) and the Rosenberg Self-Esteem Scale (RSE). The PGMS correlated with the RSE, implying that the two reflect a single construct. Both scales correlated with self-reported activity. Religious variables correlated better with the RSE, while self-estimates of health correlated better with the PGMS. The PGMS is preferable as a measure of self-concept for this population because of its ease of administration. (Author)

Child Behavior toward Parent: An Inventory and Factor Analysis.

Pub Date 31 Aug 75

Note—22p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30 to September 2, 1975); Some pages of the Inventory are marginally legible

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Affection, \*Behavior Patterns, \*Children, Factor Analysis, Interaction, \*Parent Child Relationship, \*Perception, \*Rating Scales, Reliability

Research on child influence upon parent behavior motivated the development of a Parent Report of Child Behavior Toward the Parent Inventory. Internal consistency reliabilities of 31 five-item scales ranged from .69 to .95 with a median of .88. Varimax rotation of three principal component factors yielded dimensions of Control, Acceptance versus Rejection, and Independence versus Dependence. Rotation of five factors differentiated the Acceptance scales into three factors labeled Affection, Considerateness and Helpfulness. Similar factors in children's perceptions of parent behavior are identified that will facilitate research on reciprocity in parent and child perceptions of parent-child interaction. (Author)

Descriptors—College Students, \*Educational Programs, Evaluation, \*Graduate Study, \*Human Services, Literature Reviews, \*Program Evaluation, Program Improvement, Research Criteria, \*Research Problems, Speeches

Identifiers—\*Nontraditional Research

There is a growing need for program evaluation in the human services field. Along with this is a need to assess environments in order to plan effective programs. Graduate programs are doing little to prepare students for this task. Instead of training students how to do evaluation, graduate programs stubbornly adhere to the experimental research-scientist model. Research generates further research with little effect upon clinical practice. An alternate training paradigm based on the scientist-practitioner model is necessary. If evaluators are to be successful, they need a knowledge in program evaluation, environmental assessment, political processes, organizational theory, and research design. Evaluators also need interpersonal skills. Will graduate training meet the challenge of the 70's and train students in program evaluation and environmental assessment? (Author)

Identifiers—Learning Environment Inventory, \*Sociopsychological Climate

The relationship of Locus of Control and Sensation Seeking to 267 high school students' perceptions of their Actual and Ideal socio-psychological climates as measured by the Learning Environment Inventory (LEI) was investigated. A principal components analysis of the LEI responses yielded three substantive dimensions: pleasantness index, relationship index, personal development index. Separate analysis of variance of the scores on the three components yielded significant Instruction and Locus of Control effects on the pleasantness index. No other significant effects were found. Results were discussed in terms of the structure of the perceived environment and the relevance of individual difference measures for socio-psychological climates. (Author)

Descriptors—\*Affective Behavior, Behavior Rating Scales, Body Language, \*Communication (Thought Transfer), \*Interaction Process Analysis, \*Nonverbal Communication, Personality Assessment, Research Projects, \*Verbal Communication

Identifiers—\*Deception

The present study explored the effect of verbal dissembling on nonverbal behavior. Subjects were 146 females who were led to be either truthful or deceptive verbally to a confederate. The underlying affective state of the subjects and the publicness of the interaction between subject and confederate were also varied experimentally. The nonverbal behavior of the subjects was analyzed using objective scoring by trained coders and by showing samples of subjects' behavior to naive judges who rated how pleased the subjects appeared. Results showed that nonverbal behavior tended to reflect whether a subject was dissembling or being truthful. In addition, when they were truthful, subjects revealed their underlying affective states. However, when lying, there was no difference in nonverbal behavior according to the affect felt for the confederate. The nonverbal behavior of the subjects also tended to differ according to whether they were interacting publicly or privately; in public, subjects appeared more pleased with the confederate than in private. Document Not Available from EDRS

Descriptors—\*Behavior Change, Manuals, \*Parent Child Relationship, \*Parent Education, Parent Workshops, \*Program Guides, Reinforcement, Workbooks

This guide for parents, which seeks to apply behavior modification techniques for changing their own as well as their children's behaviors, has two separate parts—a workshop and a workbook. The manual attempts to teach methods of effective parenting and behavior change through programmed instruction in "antecedents-behaviors-consequences." There are 9 sessions and 29 steps necessary to effect change, and the progression should be step-by-step. Sessions include: (1) analyzing behavior; (2) observing and

tracking behavior; (3) developing an intervention; (4) strengthening and maintaining behaviors; (5) weakening and eliminating behaviors; (6) teaching and shaping new behaviors; (7) returning to baseline conditions; (8) returning to the intervention; (9) developing future programs. The sessions, which open with some theoretical and historical background, specify the behavioral objectives and activities to obtain them. The workbook contains the necessary forms, graph paper and evaluation sheets needed to complete the steps outlined in the session materials. The authors include evaluation sheets that users are to fill out and return which will provide feedback to the program creators on its effectiveness and value. (NG)

**Communication Workshop for Parents of Adolescents (Leader's Guide and Parent's Review).**

Pub Date 73

Note—90p.; Leader's Guide 73 pages, Parent's Review 17 pages

Available from—Research Press, 2612 North Mattis, Champaign, Illinois 61820

**Document Not Available from EDRS**

**Descriptors—**\*Adolescents, \*Communication Skills, \*Counseling Instructional Programs, Guides, \*Interpersonal Competence, Manuals, Parent Child Relationship, \*Parent Counseling, Parent Workshops

This handbook describes the tasks, materials, rationale, and procedures for conducting a five-session Communication Workshop for Parents of Adolescents. It is designed for a variety of professionals, including psychologists, social workers, ministers, school counselors and others whose work with families has alerted them to the acute need for more effective communication between parents and their children. It includes a separate Parent's Review. This program was initially developed for parents whose adolescents were psychiatric patients. These parents were primarily from middle class social status, with adolescent children ranging in age from 13 to 16. Behavior problems (e.g. drugs, running away) were the predominant complaint, but some of the adolescents were also showing signs of serious depression, anxiety, and, in a few cases, psychosis. However, the content and format of the Communication Workshop have proven to be relevant not only in clinical settings, but for non-patient populations in the community-at-large as well. In establishing the Communication Workshop, applicable goals for the workshop were: (1) to give parents specific information on how to communicate more effectively, (2) to help parents begin analyzing their families' communication patterns, (3) to help parents identify their own style of communicating with their children, and (4) to start parents in practicing alternative methods where it seems warranted. **Descriptors—**Behavioral Objectives, \*Behavior Change, Guides, Manuals, Parent Child Relationship, Parent Participation, \*Parent Responsibility, \*Program Guides, \*Reinforcement

This behavior modification program, for use by parents with their children, shows parents how to use tokens to provide contingent reinforcement for increasing desirable behaviors. Withdrawal of tokens is used as punishment to extinguish behaviors deemed undesirable. The program includes an introduction for the professional, but is intended primarily for use by parents themselves rather than by professionals. It provides detailed instructions for all aspects of parent management. A separate contract sheet is included on which parents are to specify desirable and undesirable behaviors, and day-by-day records of the child's progress. (NG)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors—**\*Behavior Change, Geriatrics, \*Institutionalized (Persons), \*Milieu Therapy, Nursing Homes, \*Older Adults, Personal Care Homes, Research Projects, Speeches, \*Sub-professionals, Therapy

**Identifiers—**\*Reality Orientation

This study reports an experimentally designed evaluation of Reality Orientation. Twelve elderly residents were chosen for the experimental group and 13 residents were chosen for the no-treatment control group. Both classroom Reality Orientation and 24-hour Reality Orientation were introduced on the experimental floor. A pretest-posttest control group design was used with two instruments serving as the dependent measures: a 25 item structured interview measuring the amount of basic information the resident had concerning orientation to environment and a 30-item rating form completed by staff familiar with the resident's daily functioning. T-test comparisons of means for dependent samples indicated a significant increase in orientation to environment on the structured interview and a non-significant increase in orientation on the rating form for the experimental group from pre-to posttest. The control group showed a non-significant decrease in orientation on both instruments. Comparison of means indicated a significant posttest difference on the structured interview and a non-significant difference on the rating form between the experimental and control group. Reality Orientation led to greater orientation and noticeable behavior change in residents and gave the largely subprofessional staff of this nursing home a productive method for interacting with residents. **Explaining Death to Children.**

Pub Date [75]

Note—5p.; Paper presented at the Annual Meeting of the National Council of Family Relations (Salt Lake City, August 19-23, 1975); Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.**

**Descriptors—**\*Children, \*Death, \*Guidelines, Needs, Parent Attitudes, Parent Child Relationship, \*Parent Responsibility

**Identifiers—**\*Grief

This essay deals with the necessity of explaining death to children, and offers guidelines as to how parents can do this. It points out that ignoring the child's need to confront the issue of death can only be harmful, depriving him of the opportunity to share his grief. The author suggests that parents be honest with their children about death, be receptive to the child's feelings and bewilderment, and encourage the child to verbalize his fantasies and fears. (NG)

**Identifiers—**\*Separation (War Induced)

The present study, based on data gathered after the first year of a longitudinal investigation, was designed to compare the second generational ef-

fects of long-term father absence on children whose fathers are classified as "missing in action" and children whose fathers were held prisoners during the Vietnam War but returned to their families. The study included 99 children of returned prisoners of war and 105 children of men who remain "missing in action." The investigators were concerned with examining whether the children whose fathers have not returned would have greater difficulty adjusting than the children whose fathers returned. All subjects were administered the California Test of Personality approximately 12 to 24 months after the return of American prisoners of war from Vietnam to determine their levels of personal and social adjustment. Scores are compared using a t-test for significant differences. Findings indicated that the groups differed in two areas of adjustment: one area of personal adjustment, manifestation of nervous symptoms, and one area of social adjustment, community relations; in both cases the children whose fathers did not return were indicating poorer adjustment. Throughout continuing higher education there has been a surge of concern for the returning student (housewife), but the returning student (divorcee) is usually left without needed supportive services to nurture her return to the mainstream. The newly-single female is a crisis-strengthened and weakened mutation, unable to return to her former self and needing help in shaping her new identity. Many see college education as the process through which to gain renewal. To counsel creatively it is necessary to recognize that the divorcee is in a unique position to barter past limitations for new goals. (Author)

**Facilitating Personal Growth in Marriage Via Psychodramatic Methods.**

Pub Date Sep 75

Note—14p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors—**\*Conflict Resolution, Guidelines, Interpersonal Competence, \*Interpersonal Relationship, \*Marriage Counseling, \*Methods, \*Personal Growth, Psychotherapy, Speeches

This paper describes a psychotherapeutic approach using psychodramatic procedures for training in handling of marital conflict. In this approach, persons are taught how to confront directly and deal actively with marital conflict situations. The author makes some theoretical assertions and then describes the psychodramatic procedures employed and the methods of conflict resolution taught through these procedures. The approach attempts to relate individual dynamics to the interpersonal context of the marital relationship. The therapist's function is to facilitate the marital partners' recognition of their needs, feelings, and expectations, and to help them express these fully to their partners. The general aims of the approach are to help each partner find ways to have his needs met without interfering with the satisfactions of the other, and find ways to help satisfy each other's needs. The author also presents guidelines for assessing the effectiveness of the protagonists in relating to each other. (Author/SJL)

**Conflict, Outcome, and Perception of Women's Roles.**

Pub Date [75]

Note—19p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Females, \*Graduate Students, Projective Tests, \*Psychological Patterns, Psychological Studies, \*Role Conflict, \*Role Perception

**Identifiers**—\*Thematic Apperception Test

The study was designed to investigate perception of conflict and outcome across women's roles. A variation of the Thematic Apperception Test was used. Female graduate students (N=93) wrote stories to three pictorial cues. Each cue depicted women in a role: girl-friend/wife role, worker role, mother role. The 279 protocols (93 ss X 3 cues = 279) were coded blindly for existence of conflict and evaluation of outcome. Interrater reliability was 96 percent. Cochran's Q analyses indicate that more stories with conflict were told to the girl-friend/wife role and more stories with negative outcomes were told to the mother role cue. The results suggest that educated adult women perceive the worker role as the least problematic. Further, chi-square analyses indicate that the perceptions are independent of respondent's age, marital, or maternal status. (Author)

Note—14p.; Paper presented at a Meeting of the National Association of State Universities and Land Grant Colleges (Kansas City, Missouri, July 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Accountability, \*Certification, \*Ethics, Higher Education, \*Professional Continuing Education, \*Professional Education, Speeches, State of the Art Reviews

This paper addresses the issues concerning the moral and ethical picture of responsibility and control of relicensure in the professions. The author examines the historical framework of professionalism, outlines the philosophical, legal, and ethical issues, and stresses the need for accountability and continuing education. While the professional associations should set the standards for continuing education, it is recommended that the universities be responsible for planning and developing continuing education programs. The author advocates a structural arrangement within the institution whereby responsibility is shared by the professional school and the continuing education/extension division. Finally, the paper discusses the advantages of this dual-responsibility approach in continuing education of the professions. (SJL)

Note—66p.; with phonodisc; third printing; foreword by Leonard P. Ullmann

Available from—Research Press, 2612 North Mattis Avenue, Champaign, Illinois 61820 (ISBN 0-87822-104-2)

**Document Not Available from EDRS**

**Descriptors**—Anxiety, \*Conditioned Response, Emotional Response, Guidelines, \*Methods, \*Progressive Relaxation, Psychological Patterns, \*Psychotherapy, \*Training Techniques

This manual sets forth in detail the therapist behaviors necessary for effective application of this relaxation training technique. The materials presented are designed to provide therapists in many disciplines with the skills they need to train their clients in relaxation. A background to relaxation training is presented, and the basic procedures of progressive relaxation are discussed. Also provided is an outline of those situations in which relaxation training has been beneficial and those situations in which it has proved less useful. The authors emphasize that progressive relaxation training should be part of a joint effort by therapist and client which takes place within the context of a positive therapeutic relationship. **RET [Rational Emotive Therapy] Abolishes Most of the Human Ego.**

Pub Date 30 Aug 75

Note—18p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Individual Characteristics, \*Individual Psychology, \*Performance, \*Rational Therapy, \*Self Concept, \*Self Evaluation, Speeches

Rational-emotive therapy (RET) holds that much of what we call the human "ego" has little or no legitimacy and, when conceived of and given a global rating (e.g., the individual gets rated as "worthwhile" or "worthless"), interferes with survival and happiness. Certain aspects of "ego" do have a verifiable existence and lead to beneficial results: people do seem to exist, or have aliveness, for a number of years, and they also have self-consciousness, or awareness of their existence. In this sense, they have uniqueness, ongoingness, and "ego." But what they

usually call their "self" or "totality" or "personality" has a vague, almost indefinable quality, and they cannot legitimately give it a single meaningful rating—cannot label it as "good" or "bad." They may well have good or bad traits—characteristics that help or hinder them in their goals of survival and happiness—but they really have no "self" that "is" good or bad. To increase their health and happiness, RET theory and practice recommends that they'd better resist the tendency to rate their "self" or "essence" and had better rate only their deeds, traits, acts, characteristics, and performances. **Descriptors**—Cognitive Ability, \*Cognitive Processes, \*Discrimination Learning, Reading Research, Sensory Integration

**Identifiers**—Differentiation, Integration (Cognitive)

This study attempts to assess differences in the three aspects of cognitive complexity—differentiation, discrimination, and integration—as functions of information about and interest in the relevant domain. The two groups of subjects consisted of 20 members of a local sports car club and an equal number from a local garden club. Each group had high interest and information in one domain and, at most, average interest and information in the other domain. Each subject filled out a form on 20 flowers and a form on 20 cars. Multidimensional scalings revealed pronounced differences in integration, possible differences in discrimination, and virtually no differences in differentiation when the between-domain and within-domain judgments were compared. **Game Power for Phonics.**

Pub Date 72

Note—40p.

Available from—Spin-A-Test Company, Dept. ER, Post Office Box 823, Pleasanton, California 94566 (\$7.95 paper)

**Document Not Available from EDRS**

**Descriptors**—\*Classroom Games, Educational Games, Elementary Education, Games, Instructional Materials, \*Phonics, \*Reading Instruction, Reading Skills, \*Remedial Reading

The games presented in this manual are based on the Spin-A-Test game making technique, are applicable to the complex area of phonics, and are intended to provide teachers of reading with an almost unlimited source of circular games which meet prescriptive objectives. Contents of the manual consist of (1) a description of the scope of the game making technique when applied to reading (including an index of phonetic and structural games and an index of comprehensive games), (2) details of the features of the Spin-A-Test models, (3) directions for creating the game format, (4) a learner verification form, (5) a typical remedial sequence, (6) instructions to players for six basic games, (7) an index of structural and phonetic games (with an extensive, alphabetical list of words and word fragments), and (8) a comprehensive game index. Articles in this issue are concerned with reading instruction aimed at preventing reading disability. Topics discussed in the six articles are: classroom practices which aggravate reading problems, a model for individualized reading instruction which allows for several levels of individualization, a data based instructional system for improving learning and preventing reading failure, integration of the language arts as the only basis for successful programing, the importance of capitalizing on children's interests and experience, child authorship, using the camera to aid language arts skill development, and resource materials. Also included are lists of primary dictionaries, books for children to read by themselves from kindergarten to third grade, graded word lists (annotated), and sources of games and game books. (JM)

Reynolds, Allan G. Flagg, Paul W.  
Recognition Memory for Elements of Sentences.

Pub Date 75

Note—54p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—\*Abstraction Levels, Language Research, Language Skills, \*Memory, Models, Orthographic Symbols, \*Phonology, Psychological Studies, Recall (Psychological), \*Semantics, \*Sentence Structure, Syntax

Identifiers—Dartmouth College

Nouns are generally recalled and recognized better in memory tasks, although several theoretical positions and a variety of empirical tasks indicate the importance of verbs to sentences. To try to resolve this paradox, several experiments were designed to explore the efficiency of various sentence elements as cues in recognition memory. Subjects for the experiments were students enrolled in an introductory psychology course at Dartmouth College. In one experiment concreteness of the stimuli did not interact with the type of distractor; however, verb phrase changes were harder to recognize than noun phrase changes when synonym distractors were used. This result was replicated in two other experiments, a forced-choice recognition paradigm and an experiment involving whole sentences where the derivational similarity of verbs and nouns was controlled. Two additional experiments indicated that the effect could not be attributed to characteristics of the English language or to superior memory for form information in nouns. The total results are interpreted as suggesting that subjects process different parts of a sentence to different semantic levels, with verbs receiving more semantic representation and nouns more orthographic or phonological representation. The Blended Sound-Sight Method of Learning.  
Second Edition Revised.

Pub Date 69

Note—265p.; Published by Modern Press, Saskatoon, Saskatchewan

EDRS Price MF-\$0.83 HC-\$14.05 Plus Postage

Descriptors—Basic Reading, \*Beginning Reading, \*Decoding (Reading), Elementary Education, Grade 1, Individualized Reading, \*Phonics, \*Sight Method, Spelling, Study Skills, Teaching Guides, \*Teaching Methods

The beginning reading method explained in this book combines a phonics approach with a sight word/basal reader approach, a method which the author used during her many years in the classroom. The author has found that children can become independent readers in two to four months and may read from 10 to 200 books independently in the first year. Spelling and writing are also stressed in this method. Chapter topics are: the purpose and advantage of the blended sound-sight method, the advanced phonics course taught in grade 1, basic steps and procedures in the blended sound-sight method, the activity set-up, the pre-primer stage, teaching advanced phonics, the individualized library, the teaching of spelling, tying phonics into other subjects, written communication, grouping, what parents should know about reading, individualization, interaction learning climates, and basic procedures when using an individualized approach. Also in-

cluded are practical helps for teachers such as examples of seatwork, references, and charts. (MKM)

Pastore, Nancy A.

The Effects of a Superordinate Context on the Learning and Retention of Facts for Second and Fourth Grade Children.

Pub Date 75

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., April 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Abstraction Levels, Elementary Education, \*Learning Processes, Memory, Psychological Studies, Reading Research, \*Recall (Psychological), \*Relevance (Information Retrieval), \*Semantics

The purpose of this study was to provide a more complete understanding of the storage and retrieval processes of developmentally different youngsters. Forty-four second and fourth grade subjects were given a lesson consisting of 25 facts to learn and remember. Half of the group learned the facts in a context containing superordinate statements (topic sentences), the other half with coordinate (related) statements. Half of the subjects went through free recall sessions before the retention test while half did not. Significantly greater recall and recognition was found for second grade subjects going through coordinate learning and free recall retention treatments, and fourth grade subjects going through superordinate learning and straight retention treatments. Free recall sessions were taped and analyzed. Implications for cognitive-developmental research and instructional modes are discussed. (Author/MKM)

Criteria for Excellence in Reading: An Evaluation Scale.

Pennsylvania State Dept. of Education, Harrisburg. Bureau of Curriculum Services.

Pub Date 75

Note—34p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Adult Basic Education, Community Involvement, Elementary Secondary Education, \*Evaluation Criteria, Paraprofessional School Personnel, Parent Participation, \*Program

Evaluation, \*Rating Scales, \*Reading Instruction, Reading Materials, \*Reading Programs, Teachers

Identifiers—Pennsylvania, \*Right to Read

These criteria for determining excellence in reading programs were designed to focus attention on the substance rather than the form of reading instruction in Pennsylvania. School district evaluators are directed to apply an evaluation scale of zero, indicating an item is not applicable, to five, indicating a high score, to the criteria. Criteria topics and subtopics concern the learner, the staff, the community, instruction, materials, the environment, time, evaluation, and the budget. Examples of criteria for the learner are: "Instruction should be learner-centered and each learner guided through a planned arrangement of skills to read at his/her diagnosed expectancy level;" and "The learner should be encouraged to use his/her interests and experiences as an integral part of reading." (MKM)

Attitudes Toward Reading Scale.

Pennsylvania State Dept. of Education, Harrisburg. Bureau of Curriculum Services.

Pub Date 75

Note—10p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Attitudes, \*Attitude Tests, Elementary Education, \*Interest Scales, \*Reading Habits, \*Reading Interests

Identifiers—\*Attitudes Toward Reading Scale, Right to Read

This reading attitude scale was designed to negate the tendency for students to indicate overly positive attitudes, a tendency which the authors feel is reflected in responses to other attitude scales. There are two forms of the scale: one for grades 1-3 and one for grades 4-6. The primary scale is read to the children and has a three choice format on a hand-scored answer sheet. The intermediate scale is read by the children themselves and has a five choice format on a machine-scorable answer sheet. The first six items ask for descriptive information. The remaining items are worded either positively or negatively, where positive attitudes are indicated by agreement with positively worded items and disagreement with negatively worded items. Scoring instructions are given. Reliability estimates for both forms are given as .85 to .90. (MKM)

Descriptors—\*Composition Skills (Literary), Elementary Secondary Education, \*Language Skills, \*Parental Background, Rating Scales, Reading Achievement, \*Reading Habits, Reading Interests, Reading Research, \*Reading Tests

Identifiers—Canada, Ontario (Toronto)

During the school year 1971-72, a study of language skills was conducted in the city of Toronto, Ontario. Scores on the Gates-MacGinitie Reading Test were analyzed for many students in grades four, six, eight, and nine. Students scored at grade level with reference to the United States norms of this test. The vocabulary and reading subsections of the Canadian Tests of Basic Skills were also administered to groups of students in grades four, six, and eight in order to compare the two tests. The relative performance of students on this test was similar to performance on the Gates-MacGinitie; however, the scores were several months lower. A questionnaire was administered to a sample of sixth graders concerning their reading activities and their parents' reading activities. In general, the sixth graders reported that they and their parents engaged in many reading activities. The favorite themes of the children were mystery, adventure, and horror. Analysis of compositions collected from a sample of eighth graders showed that most of the students can write a coherent narrative of acceptable prose. Parents' occupation was found to be related to all three measures of language ability, with higher occupational status being associated with higher scores. (MKM)

Teaching to Read: Historically Considered.

Pub Date 76

Note—214p.

Available from—The University of Chicago Press, 5801 Ellis Avenue, Chicago, Illinois 60637 (\$3.95 paper)

Document Not Available from EDRS

Descriptors—Alphabets, \*Beginning Reading, Decoding (Reading), Elementary Education, \*History, Phonics, \*Reading Instruction, \*Reading Research, Sight Method, Word Recognition

The history of teaching people to read is explored from the introduction of the Greek alphabet about 3,000 years ago to the present renewed interest in sound symbol relationships. Greek schoolboys were required to learn first the alphabet in order, next commonly used syllables, and then words. English was first written in the Latin alphabet using phonetic spelling until the art of printing reached England about 1475 causing more fixed spellings and thus more reading difficulty. Other topics explored are reading problems and solutions in Germany, early reading experiments in the United States, the word method endorsed by Horace Mann, reading from Horace Mann to Francis Parker, the words-to-reading method popular in Chicago, the word method and the new education of Dewey, public excitement over reading in the United States since the 1880's, the linguistic approach to reading, beginning reading with temporary alphabets, and reading experiments and their results. From Shape to Letters.

Pub Date Dec 71

Note—11p.; Reprinted from Main Currents in Modern Thought, v28 n2, Nov.-Dec., 1971

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Kinesthetic Development, Elementary Education, \*Instructional Aids, \*Kinesthetic Methods, \*Letters (Alphabet), \*Perceptual Development, Primary Education, \*Reading Readiness, Visual Discrimination

In order to make letter shape recognition an integral part of perception training, the use of the line in its two basic shapes is proposed. Letter shapes may seem exceedingly complex linear shapes to young minds. Thus instead of instruction in configuration, instruction involving transformational activities to manipulate and create the differentiating features of each letter should be given. This perceptual teaching approach may provide sub-skill foundations for learning to read that are important to developing cognitive processes. Learning sequences involving the use of blocks to shape letters provide multisensory, intrinsic, and constructive activities in addition to visual recognition. (MKM)

The Reading Process: A Framework for Analysis and Description.

Pub Date Feb 76

Note—117p.

Available from—The Shoe String Press, Inc., 995 Sherman Avenue, Hamden, Connecticut 06514 (\$8.00 cloth)

Document Not Available from EDRS

Descriptors—\*Affective Behavior, Cognitive Processes, \*Librarians, Library Education, Literacy, \*Readability, \*Reading Comprehension, \*Reading Processes

This study of the reading process was written by a librarian for other librarians in order to explore what happens as the end result of the librarian's job, the meeting of a person and a book. A model of the reading act is constructed which makes the reader the subject rather than the receiver, as in the communications model of "transmitter through message to receiver." The six stages of this reading model are indicated in the chapter headings. Who is the reader? What does the reader want? What is the text? How do the reader and the text come together? What is the nature of the reading? and What ensues from the reading? Librarians are encouraged to use increased knowledge of the reading process as it relates to the reader to improve their services. Descriptors—\*Auditory Discrimination, \*Beginning Reading, \*Diagnostic Teaching, Learning Disabilities, Paraprofessional School Personnel, \*Perceptual Development, Perceptual Motor Learning, Primary Education, Reading Research, Sensory Integration, \*Visual Perception

The purpose of this research study was to compare two kinds of perceptual training for kindergarteners. A control group was grouped for instruction in visual or auditory perception. The children whose weaker modality was auditory received an "Open Court" program which stressed the acquisition of phonetic skills. The Frostig-Horne program was given to those with visual perception difficulties. No attempt was made to determine the specific nature or level of their perceptual inadequacies, all children beginning their particular programs simultaneously. The children were taught by both teachers and aids. A carefully equated experimental group in terms of IQ, auditory perception, and reading was instructed by means of individual programs which emphasized instruction in both the weak and strong modality at students' specific level of ability. Those with no deficiencies participated in experience writing. The experimental group was taught by teachers and volunteers. Instructional time for both groups averaged thirty minutes a day, three times each week, over an eight month period. An analysis revealed that the experimental group made significantly greater improvement than the control group in the evaluation of visual perception, auditory perception, and in letter-word recognition. Comprehension of Written Syntactic Structures by Good Readers and Slow Readers.

Pub Date Jun 75

Note—84p.; M.Ed. Thesis, Rutgers University, The State University of New Jersey; Two reading tests were removed due to copyright restrictions

EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage

Descriptors—Intermediate Grades, Junior High Schools, Reading, \*Reading Comprehension, Reading Difficulty, \*Reading Processes, \*Reading Research, \*Reading Tests, Sentences, \*Syntax

The purpose of this study was to compare the performance of ninth-grade slow readers with ninth-grade good readers and with sixth grade readers on a test of syntactic comprehension. The significant difference between the ninth-grade good readers' and the ninth-grade slow readers' performance on A Test of Sentence Meaning (ATSM), developed by Albert D. Marcus, clearly shows that comprehension of syntactic structure is an element in total reading comprehension. The low correlation between the total reading scores and the ATSM score would seem to indicate that it is not an important factor in reading at this level. The correlation of .70 between reading and the ATSM indicates that comprehension of syntactic structures is an important reading factor for sixth grade readers even on a survey reading test. It is suggested that the great difference in the correlations between the sixth-grade readers and the ninth-grade readers indicates that although these two groups measure on The Nelson Reading Test to be very similar with the same range and almost the same means, they must differ in at least one important respect. Descriptors—\*Effective Teaching, Elementary Education, \*Individual Instruction, Individualized Reading, Inservice Programs, \*Reading Consultants, Reading Diagnosis, Reading Instruction, Reading Research, Regular Class Placement, \*Remedial Reading, Teacher Evaluation

This three year study compared three organizational plans for teaching remedial reading by spending one year each at different grade levels: primary, intermediate, and seven-eighth, in that order. In the first plan a reading consultant tutored children individually in a reading clinic. In the second plan a master reading teacher provided aid in diagnosis, prescription, and individualization of instruction to classroom teachers who taught the remedial readers in their own classrooms. Intensive inservice education was conducted during the three years for the participating teachers; a reading materials center was established; and the reading clinic resources were made available to all teachers. A control group was selected the second year and did not receive program treatment. The results indicated that teacher competency increased in terms of five of six behavioral objectives. In the first year no statistical difference could be demonstrated in favor of children receiving special reading treatment at the clinic when compared to like children receiving regular classroom instruction. During the last two years of the experiment, students in the regular classrooms, whose teachers were involved in inservice sessions and who had the help of master teachers, demonstrated greater gains than the other two groups. \*MKM)

Reawakening the Imagination.

Pub Date 75

Note—8p.; Paper presented at the Los Angeles Community College District English Conference, Oct. 28, 1975

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

**Descriptors**—Community Colleges, Composition (Literary), \*English Instruction, Higher Education, \*Imagination, Language Arts, \*Language Skills, \*Reading, Relevance (Education), Student Motivation, \*Writing

The inability of college students to read accurately or to write coherently is a problem. The solution lies in the classroom and with the instructors who must approach the challenge of reading and writing instruction with encouragement and excitement, remembering that the true objective is the development of students' imagination. Students must be motivated to learn and must understand the practical necessity of mastering the subjects of reading and writing. The educational process must be made effective in relation to each individual student. (JM)

The premise of this book is that parents should help their child learn to read at home in order to individualize reading skill instruction better than may be possible at school alone. A reading readiness checklist is offered as a guide to determining if one's child is linguistically, behaviorally, and perceptually ready to begin to learn to read. A guide to how to teach the sound-symbol relationships of phonics composes the major portion of the book. Reading comprehension is discussed and a reading skill checklist is suggested as a check on reading progress. (MKM)

**Document Not Available from EDRS**

**Descriptors**—\*Children's Books, \*Critical Reading, Elementary Education, Fiction, \*Literary Analysis, \*Literature, \*Literature Appreciation, Nonfiction, Poetry, Teacher Education

This book is designed to introduce students and teachers to the vocabulary of literary analysis so that they may discuss and write about children's literature and make their own evaluations and judgments about books for children. Children's literature should be considered different from adult literature in degree, not kind. Points of similarity and difference are discussed throughout the text. Chapter topics concern a definition of children's literature; revelation of character, unity of character and action, types of characters, and change in character; types of plots, narrative order, conflict, and patterns of action; types and functions of setting; types of themes; point of view; style; and tone. Examples from well known children's literature illustrate points made in the discussion of these topics. Study questions accompanying each chapter ask the student to read specific children's books and to evaluate them using the terms and ideas of the chapter. Also discussed are rhymes and poetry and bias, style, and types of organization in a variety of nonfiction. (MKM)

**Descriptors**—\*Developmental Reading, \*Effective Teaching, Elementary Education, \*Individualized Reading, Rating Scales, \*Reading Achievement, Reading Materials, \*Teacher Behavior, Teacher Characteristics, Teacher Qualifications

**Identifiers**—\*Teacher Effort Scale in Reading

Since both good and poor reading achievement have been produced with any one of several developmental reading approaches, teacher characteristics are thought to be an important, however seldom tested, variable in reading achievement. A study conducted by the author which employed the author constructed Teacher Effort Scale in Reading indicated that high teacher effort correlated positively with the reading achievement of classes. The teachers judged to be high effort versus low effort teachers in reading expended a high degree of effort while attempting to individualize instruction in their classes. Four subscales of the rating scale noted efforts to: (1) secure and utilize a variety of materials; (2) provide differentiated instruction; (3) keep records of student progress; and (4) arrange conferences dealing with an individual student's progress. The success of the high effort teacher in the study cited lends increased support for the training of teachers to William Powell's "automatic" level where the teacher blends knowledge and action together and to Arthur Gates' observance in 1937 that success in reading depends on the effectiveness of the teacher, the availability and effective use of materials, and the adherence to individual differences. **An Annotated Bibliography on Volunteer Tutoring Programs.**

Pub Date Feb 76

Note—13p.; Paper presented at the Annual Meeting of the Southeast Regional Reading Conference, International Reading Association (4th, Jacksonville, Florida, February 20, 1976)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Annotated Bibliographies, Community Involvement, Elementary Education, Literature Reviews, \*Paraprofessional Personnel, Parent Participation, \*Reading Instruction, Reading Research, Student Participation, \*Tutorial Programs, Tutoring, Tutors, \*Volunteers, \*Volunteer Training

The first section of this annotated bibliography is a selected review of research on the effects of volunteer tutoring programs. Reviews of 34 studies note the number, level, and type of students; type of tutors; area of U.S.; length, frequency, and duration of tutoring sessions; and achievement and other results of the tutoring programs. Reference is made to a review of the research

and literature concerning student involvement in tutoring programs. The second section reviews eight articles and books on training programs for tutors. This bibliography was developed for schools that are interested in developing tutoring programs. It also contains pertinent information for community organizations involved in organizing and administering volunteer tutoring programs. (MKM)

**All About Reading.**

North Dakota Univ., Grand Forks. Center for Teaching and Learning.

Pub Date Oct 74

Note—12p.

Journal Cit—Insights Into Open Education; v7 n2 Entire Issue Oct 1974

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Beginning Reading, Elementary Education, Reading Diagnosis, \*Reading Instruction, Reading Programs, Reading Skills, \*Reading Tests, \*Silent Reading

Focusing on reading, this issue of "Insights" contains three sections. The first, by Clara A. Pedersen, lists 20 questions which teachers and administrators should ask themselves before administering reading tests. The second, "What's Wrong with Reading Tests" by Deborah Meier, defines reading, describes learning to read, and analyzes the problems with reading tests. In the third, "Sustained Silent Reading," Robert A. McCracken outlines a sustained silent reading program which should be an integral part of the total reading program, providing both the drill of reading silently and the model of an adult (the teacher) who reads and shares what is read. **An Effectiveness Evaluation Between Manual and Automated Readability Counting Techniques. CNETS Report 5-75.**

Naval Education and Training Command, Pensacola, Fla.

Report No—CNETS-R-5-75

Pub Date Aug 75

Note—33p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—\*Career Ladders, Educational Programs, \*Instructional Aids, \*Instructional Materials, Manuals, \*Measurement Instruments, \*Readability, Reading Research

**Identifiers**—Navy

A statistical comparison was made between two automated devices which were used to count data points (words, sentences, and syllables) needed in the Flesch Reading Ease Score to determine the reading grade level of written material. Determination of grade level of all Rate Training Manuals and Non-Resident Career Courses had been requested by the Chief of Naval Education and Training Support. The devices compared were the Automated Flesch Count (AFC) developed by Kincaid and McDaniel and The Navy Automated Counter (NAC), a pencil-like stylus with a pressure-sensitive switch, developed by the Navy. Comparisons were made between the speed and reliability of the automated devices, and between the speed and reliability of each device and the manual method of counting data points. Similar reliabilities were found for both of the devices and for the manual method. Counts made using the devices were done almost twice as fast as manual counts. The NAC was 20% faster than the AFC, but this difference may be attributable to a practice advantage. The use of an automated device such as the NAC or AFC is recommended as being the most cost-effective technique available for any readability study which involves detailed counting. (MKM)

**Criteria for the Instructional Level of Reading.**

Pub Date 75

Note—30p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Critical Reading, Elementary Education, \*Informal Reading Inventory, Oral Reading, \*Readability, \*Reading Comprehension, \*Reading Diagnosis, Reading Instruction, Reading Research, Reading Tests, \*Word Recognition

This study was designed to discover the answers to two general questions concerning the instructional level of reading: (1) What is the per-

centage of word recognition that is necessary for second and fifth graders to maintain in order to achieve a certain percentage of comprehension? (2) Are those word recognition percentages the same for both groups? Twenty-five second and 25 fifth graders were randomly selected from three middle-class schools. An Informal Reading Inventory was developed and administered to each subject. The data was analyzed and median word recognition scores were computed across levels of readability for various bands of comprehension. Subjects were asked to read two comparable passages at each level, one orally at sight and the other silently by sight. The results indicated that most second and fifth graders needed to achieve a word recognition score of at least 98 or 99 percent on the oral passage in order to have an accompanying comprehension score of at least 75 percent on the silent passage. Most second graders who achieved less than 92 percent recognition had accompanying comprehension scores of less than 50 percent. Most fifth graders who achieved less than 96 percent had accompanying comprehension scores of less than 50 percent. (Author/MKM)

**The Relationship between Self-Concept and Reading Achievement During the Elementary School Years.**

Pub Date 75

Note—179p.; Ed.D. Dissertation, Duke University Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-29,498, MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Elementary Education, Item Analysis, \*Predictive Validity, \*Reading Achievement, Reading Research, Reading Skills, \*Reading Tests, \*Self Concept, \*Test Validity

Identifiers—Self Observation Scales

This study, using the Self-Observation Scales (SOS) primary and intermediate levels, was conducted to determine whether the self-concept items that were most predictive of reading achievement varied among sex-race-grade subsamples and to examine specific item content in order to focus upon the nature of the relationship between reading achievement and self-concept. It was hypothesized that the set of items most predictive of reading achievement for a particular sex-race-grade subsample is constant across all sex-race-grade subsamples on the Primary Level of the SOS, and the set of items most predictive of reading achievement for a particular sex-race-grade subsample is constant across all sex-race-grade subsamples on the Intermediate Level of the SOS. Subjects for this study were 5,990 children whose reading achievement data were recorded by their teachers during the process of validating and establishing norms for the SOS. Both hypotheses were rejected. (Author/RB)

**Teacher Competence and Effective Reading Instruction (In the Middle Elementary Grades).**

Pub Date 75

Note—189p.; Ph.D. Dissertation, Northwestern University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-29,632, MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Elementary Education, \*Elementary School Teachers, Intermediate Grades, Interpersonal Competence, \*Reading Instruction, \*Teacher Attitudes, \*Teacher Evaluation, Teacher Responsibility

In order to determine the competencies possessed by teachers who have conducted successful reading programs, a qualitative study was conducted in Area C, Chicago Public Schools. It presents the views of twelve principals who assisted in identifying fifteen teachers designated superior in the teaching of reading in the middle grades (grades four through eight). The data provided by the principals and teachers included in the sample were obtained through the use of "Principal's Guide For Determining the Competencies of the Superior Teacher of Reading: Teacher's Questionnaire," "A Professional Profile," and "An Observer's Grid." A series of fifteen questions provided a basis for the interpretation of the data. It was concluded that the

competencies possessed by the urban teachers who have been designated superior in the teaching of reading in the middle grades, had a great deal to do with the personal attributes and positive attitudes toward learning of the individual teachers. The competent teacher of reading must also make studied explorations into the areas of beginning reading instruction, word recognition techniques, comprehension and interpretation skills, oral reading practices, reading in the content areas, and the availability and use of reading materials. (Author/TS)

**An Evaluation of Teacher Rating, Reading Readiness, and Kindergarten Achievement as Predictors of First-Grade Vocabulary and Comprehension Achievement.**

Pub Date 75

Note—138p.; Ed. D. Dissertation, University of Kansas

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-30,034, MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Beginning Reading, Educational Diagnosis, Learning Disabilities, \*Predictive Ability (Testing), Predictor Variables, Primary Education, \*Rating Scales, \*Reading Achievement, Reading Comprehension, \*Reading Readiness, Reading Research, Vocabulary

Identifiers—Teacher Judgment

To aid in the early identification of potential learning disabled children a multiple regression equation using analysis of covariance was used to determine which composite predictor variables obtained in kindergarten correlate maximally with first-grade achievement. Eighty-seven kindergarten students in Lawrence, Kansas, who had been instructed in a formal reading program were tested in May 1973. The predictor variables were: a reading readiness test, a reading achievement test, and a teacher rating scale. The criterion was a vocabulary and comprehension score at the completion of first grade, 1974. The results indicated that the teacher rating scale would be a more efficient predictive measure than either the reading readiness test or reading achievement test for both first-grade vocabulary and comprehension achievement. All three of the independent predictor variables were statistically significant ( $p$  less than .01) for the criteria. Analysis of covariance was used to isolate the predictive efficiency of each set of predictors. The teacher rating was significant ( $p$  less than .02) in predicting first-grade comprehension achievement. Both the teacher scale and reading readiness test were significant ( $p$  less than .01) in predicting first-grade vocabulary achievement. (Author/MKM)

**The Development of Scales to Measure Attitudes toward Reading.**

Pub Date 75

Note—123p.; Ed.D. Dissertation, The University of Tennessee

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-1947, MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Attitude Tests, Doctoral Theses, Elementary Education, \*Interest Scales, \*Rating Scales, \*Reading Habits, \*Reading Interests, Reading Research

The purpose of this study was to develop an instrument or instruments to measure the attitudes toward reading of children in grades one through six. The Likert-type scale was chosen as the most appropriate type of instrument to meet established criteria. Two rural schools and two urban schools with normally distributed populations according to ability and socioeconomic levels were used in the study. Pilot work, consisting of individual interviews with children in grades one through six, was conducted to explore the area of reading attitudes and to obtain statements suitable for the attitude scale. Such interviews revealed that two scales were needed, one for grades one through three and one for grades four through six. The two attitude scales were administered to sample populations in the four schools. The final scales contain 20 items for the beginning level and 24 items for the second level. Answer formats were also designed for each scale. The scales were checked for reliability by

the test-retest method and for validity by item analysis and by teacher rating of students with positive and negative attitudes. Diagnostic clusters of questions were developed for diagnosis. The scales were judged to meet the established criteria. (Author/MKM)

**A Comparison of Reading and Vocabulary Achievement of Elementary Students Taught with Two Reading Teaching Methods.**

Pub Date 75

Note—140p.; Ed.D. Dissertation, University of Kansas

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-30,040; MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Basic Reading, \*Computer Assisted Instruction, Doctoral Theses, Elementary Education, \*Individualized Reading, \*Reading Achievement, \*Reading Instruction, Reading Research, Vocabulary

The purpose of this study was to compare student reading and vocabulary achievement of classes using a standard basal-reading series with the achievement of a class using the same standard basal-reading series and a computer-managed, teacher-support system in reading. The reading and vocabulary achievement growth of a sample of 40 classes of elementary students taught by a basal reading series method during the 1972-73 school year provided the control group data for this study. The next year the same teachers' classes were taught by using the same standard basal-reading series in conjunction with a computer-managed, teacher-support system. The achievement growth of these classes provided the experimental data for the study. There was a difference at the .05 level of significance between classes' reading scores indicating that greater growth was obtained by students in classes using only the basal-reading series. **Programmed Instruction in Reading Correlated with Student Characteristics and Program Variables.**

Pub Date 75

Note—286p.; Ph.D. Dissertation, Northwestern University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-29,669; MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, \*Predictor Variables, Primary Education, \*Programmed Instruction, \*Program Effectiveness, \*Reading Instruction, \*Reading Programs, Reading Research, Teaching Methods, Technological Advancement

The purpose of this study was to determine the effectiveness of an automated programmed instructional unit under varying conditions. Students' sex and socioeconomic status as an influence on achievement when interacting with the intervention was investigated along with other facts. The selected literature included a review of representative samples of the current general literature in the areas of programmed instruction and educational technology as it relates to reading instruction. The sample for the study consisted of 800 first and second grade students who were divided into three treatment groups determined by the degree of treatment received. Among the conclusions reached were that the instructional mode investigated could be a useful adjunct to schools' reading programs and to teachers' efforts to raise the reading achievement levels of students; it appeared that for the intervention program to be used most effectively it should be used in the classroom rather than being centrally located; this type of programmed instruction with immediate feedback and reinforcement seemed to be equally effective on students who came from high, middle, and low socioeconomic levels; and there was an indication that students attending traditionally organized classrooms achieve at a higher level than those in ungraded situations. **An Analysis of Two Approaches Used in Teaching Reading and Study Skills Improvement in a Two-Year Community College.**

Pub Date 75

Note—132p.; D.Ed. Dissertation, The Pennsylvania State University

Available from—University Microfilms, P.O. Box 176, Ann Arbor, Michigan 48106 (Order No. 76-1360, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Academic Achievement, \*Content Reading, Developmental Reading, Doctoral Theses, Junior Colleges, \*Reading Achievement, \*Reading Instruction, Reading Programs, Reading Research, \*Study Skills

This study investigated students' learning performances in reading and academic achievement after an experimental group took a reading improvement course in which vocabulary and comprehension improvement exercises were derived from their content area textbooks and a comparison group took a general reading improvement course with materials traditionally used in similar reading courses at many colleges. The subjects were eighty students enrolled in a college preparatory program which provided preparation for college studies for students who had poor high school achievement or who had been away from school for a long time and needed a refresher program. The comparative effectiveness of the two approaches was determined by analyzing the semester's mean cumulative grade-point averages and the mean achievement scores in the three content area courses using a two-tailed t test. Both groups made significant gains in reading scores from pretest to posttest on the Nelson-Denny Reading Test. There were no significant differences between groups in grade-point averages, reading improvement scores, or achievement in the writing or mathematics courses. There were significant differences in favor of the experimental group in achievement in the science course. (Author/MKM)

Books as Reinforcers of Reading Performance: An Investigation of Their Relative Effectiveness.

Pub Date 75

Note—86p.; Ed.D. Dissertation, University of Maryland

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-29,116, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Elementary Education, \*Positive Reinforcement, \*Reading Achievement, Reading Instruction, Reinforcement, \*Reinforcers, \*Remedial Reading Programs, \*Tutorial Programs

This study investigated the relative effectiveness of books on reading achievement scores when earned by under-achieving readers in a student tutoring program. Fifty-three fifth grade students who were in below grade level classroom reading groups and who scored from six months to three years below grade level on at least one of two reading achievement tests, were assigned to three treatment groups and one control group. The Wide Range Achievement Test and the Slosson Oral Reading Test were administered before and after the treatment phase. Data, in the form of the number of lines read correctly and number of errors made during each of the tutoring sessions, were collected. One group received knowledge of results only. A second group received knowledge of results and gift certificates redeemable at a local toy store. The results showed that the subjects reinforced with certificates for books showed significantly greater gains in reading achievement scores than did subjects who obtained other reinforcers. A Content Analysis of Initial Elementary Reading Methods Courses.

Pub Date 75

Note—227p.; Ed.D. Dissertation, Rutgers University The State University of New Jersey

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-1121, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Beginning Reading, \*Curriculum, Developmental Reading, Doctoral Theses, Elementary School Curriculum, Higher Education, Questionnaires, Reading Research, Teacher Attitudes, \*Teacher Education, \*Teacher Educators, \*Teaching Methods, Textbooks

Identifiers—\*Teacher Judgment

The purpose of this study was to obtain background information regarding the curriculum content of elementary reading methods courses for the development of a classification system of that content. This information was compiled from three separate sources: textbooks designated for use in an elementary reading methods course, opinions and suggestions of instructors of elementary reading methods courses, and opinions and suggestions of elementary teachers. Using operationally defined categories derived from a study of course outlines, 21 texts were examined to determine if given categories were included. A questionnaire using the same operationally defined categories was then developed and sent to 500 instructors of elementary reading methods courses and to 500 reading teachers throughout the United States. The questionnaire included a section to provide information regarding the background and experience of each subject. The response from the instructors showed that one-third required only one course in reading methods. The results of the survey indicated that there is significant agreement between elementary reading textbooks, instructors of elementary reading methods courses, and elementary teachers as to the curriculum content which should be included in an initial elementary reading methods course. Effects of the "Auditory Discrimination in Depth Program" on Auditory Conceptualization and Reading Achievement.

Pub Date 75

Note—80p.; Ed.D. Dissertation, University of Northern Colorado

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-221, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Auditory Discrimination, Doctoral Theses, Elementary Education, Exceptional Child Education, \*Reading Achievement, \*Reading Instruction, Reading Research

Identifiers—\*Auditory Discrimination in Depth Program

Statistically significant differences were not found between the treatment and non-treatment groups in a study designed to investigate the effectiveness of the Auditory Discrimination in Depth (A.D.D.) Program. The treatment group involved thirty-nine normally achieving and educationally handicapped students who were given the A.D.D. Program concurrently with their reading instruction. The non-treatment group consisted of twenty-nine normally achieving and educationally handicapped students who were not taught with the A.D.D. Program. Auditory discrimination as measured by the Lindamood Auditory Conceptualization Test was tested prior to the program, immediately after the program, and eight weeks after the program. The Metropolitan Achievement Test was administered on the same schedule to measure gains in reading achievement. Based on the analysis of the data, the investigator was unable to detect the effects of the A.D.D. Program on auditory conceptualization abilities and reading achievement. (Author/MKM)

Analysis and Validation of the Inventory of Teacher Knowledge of Reading.

Pub Date 75

Note—121p.; Ph.D. Dissertation, University of Missouri-Columbia

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-1041, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Achievement Tests, Doctoral Theses, Higher Education, \*Inservice Teacher Education, Reading Research, \*Test Reliability, \*Test Validity

Identifiers—\*Inventory of Teacher Knowledge of Reading

The purpose of this study was to administer the revised "Inventory of Teacher Knowledge of Reading" by Artley and Hardin to a representative population of teachers, and to secure information concerning the factorial validity and reliability of the instrument. The subjects included 552 inservice elementary education teachers, elementary education teachers taking graduate education courses, and graduating college seniors

who were close to completion of requirements for certification as elementary school teachers. Utilizing the Kuder-Richardson formula 20, the internal-consistency reliability of the "Inventory" was found to be .920. Thirty-five factors with eigenvalues greater than one were extracted, utilizing the principal-axes method of principal-components analysis. These factors accounted for 61.051 percent of the total variance of the "Inventory." It was concluded that the "Inventory of Teacher Knowledge of Reading" has sufficient reliability to justify its use as a measure of teachers' knowledge of reading. (Author/TS)

ED 117 677 CS 002 390

The Effect of Instruction in Test-Taking Skills on the Standardized Reading Test Scores of White and Black Third-Grade Children of High and Low Socioeconomic Status.

Pub Date 75

Note—280p.; Ph.D. Dissertation, Indiana University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-23,438, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Caucasian Students, Doctoral Theses, Grade 3, Negro Students, \*Predictor Variables, Primary Education, \*Reading Achievement, Reading Research, \*Reading Tests, \*Socioeconomic Status, \*Standardized Tests

Identifiers—\*Test Taking Instruction, Test Taking Skills

The problem under investigation was to determine the differential effects of three types of treatment on students' test-taking skills. The study also investigated whether test-taking instruction would result in significant mean test score gains on a standardized reading test for white and black, high and low socioeconomic status (SES) third-grade children. The sample consisted of 275 white and black, high and low SES third-graders from six elementary public schools in a midwestern urban school system. Generally, the results indicated that the test-taking skills of some students can be significantly increased through systematic instruction. The extent of increase appeared to depend on such variables as SES, race, and sex. The data indicated that the apparent gains in test-taking skills did not transfer in terms of expected equivalent levels of performance on the Gates reading test. (Author/RB)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Booklists, \*Critical Reading, \*Instructional Materials, \*Literature Appreciation, \*Reading Instruction, Secondary Education, Teaching Guides, \*Teaching Techniques

Suggestions are given for over 50 activities which secondary students at many levels can use with fiction or non-fiction to provide opportunities to read, relate, reflect, and record their thoughts about a book. The primary goal is to help students gain insight into the literary elements that prompt their responses. Stated objectives for each activity are based on the literary elements of action, plot, or content; characterization; setting; theme; and tone, audience, or style. These materials are designed to enable students to engage more easily in the process of talking about books with other students and reshape and make visible their responses to books. Suggestions for grouping are given. Examples of objectives and activities include the following: "analyze the personality of the protagonist by preparing a case study that includes all the known evidence (appearance, age, occupation, principal actions, and their implications) for presentation to a panel of psychiatrists and social workers, or by using all the known evidence to compose a horoscope analysis of the

protagonist"; and "demonstrate a process described in a work of nonfiction by creating a photo essay in which the steps of the process are illustrated by the student's own photographs and written captions." (MKM)

**Ascertaining Knowledge of Reading with the Alley-Hardin Inventory.**

Pub Date 75

Note—18p.; Paper presented at the Annual Meeting of the National Reading Conference (St. Petersburg, Florida, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Higher Education, \*Reading Instruction, Reading Research, \*Reading Tests, \*Teacher Education, \*Teacher Qualifications, Teachers

Identifiers—\*Inventory of Teacher Knowledge of Reading

The Inventory of Teacher Knowledge of Reading was administered to a sample of 60 freshmen, 60 juniors, and 60 seniors in elementary education at the University of Illinois. In addition, it was administered to 60 experienced teachers who had not attended the University of Illinois as undergraduates. An analysis of variance of the test scores was significant ( $F=74.7$ ) and a Newman Keuls showed that the scores of the freshmen, juniors, and seniors were significantly different. Seniors' and experienced teachers' scores did not differ. Items were assigned to the knowledge categories identified by the test authors. Fifty percent of the items were assigned to three knowledge categories by three reading specialists. These categories were reading readiness, word perception, and comprehension-critical reading. KR20 coefficients were too low to suggest use of knowledge categories as subscales. Items with the best characteristics were identified for use as a possible short-form. (Author/MKM)

**Diagnostic and Prescriptive Strategies Designed to Bring Back the Joy.**

Pub Date 75

Note—20p.; Paper presented at the Annual Meeting of the California Reading Association Conference (Fresno, California, November 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Elementary Secondary Education, Miscue Analysis, \*Psycholinguistics, Reading Achievement, Reading Comprehension, \*Reading Diagnosis, \*Reading Instruction, \*Reading Interests, Reading Processes, Reading Skills

The diagnostic and prescriptive strategies presented in this paper are based on the assumption that reading is language, reading is understanding, reading is not an exact process, reading is responding, and reading is enjoyable. The principles of diagnosis based on these assumptions are that diagnosis will be based on the goals of the reading program, will be a on-going process, will be combined with instruction into diagnostic teaching, will be concentrated on those aspects of reading that can be measured, will include a student's self-appraisal, will evidence a concern for the student's "felt" needs, will include students' interests and attitudes, and will have a developmental emphasis. The diagnostic information needed includes basic skills as well as attitudes toward reading and reading interests. Sources for obtaining this information include a variety of group methods, such as administering standardized intelligence and achievement tests, and individual procedures, such as administering a miscue analysis inventory and holding individual conferences. Prescriptive strategies for bringing the joy of reading to students include making a wide variety of books available for student selection and scheduling a reading time in addition to skill instruction time. Schain, Robert L., Ed. And Others

**Developing Reading Skills through Subject Areas; A Handbook for Secondary School Educators.**

Pub Date 76

Note—72p.

Available from—George W. Wingate High School Press, 600 Kingston Ave., Brooklyn, New York 11203 (\$5.00 paper)

**Document Not Available from EDRS**

Descriptors—\*Content Reading, \*Reading Comprehension, Reading Instruction, \*Reading Skills, Secondary Education, \*Study Skills, Teaching Guides, \*Vocabulary

This handbook includes materials developed by faculty members of George W. Wingate High School in a program to improve reading skills in subject area classes. These materials include lesson plans and various kinds of worksheets. Although the lessons involve many content areas, they are divided into these reading skill subject areas: vocabulary building, finding details, finding the main idea, making inferences, following directions, and other study skills. The premise of this handbook is that as a subject teacher plans and develops a lesson, certain reading skills are involved quite naturally, thereby providing excellent opportunities to build and strengthen those reading skills. The teaching guide was developed as a total school effort to raise student reading levels to the eighth grade level required by New York City for graduations from high school (MKM)

**The Effects of Choice on Children's Reading Comprehension and Attitudes.**

Pub Date 76

Note—56p.; M.S. Ed. Thesis, University of Illinois at Urbana-Champaign

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—Cloze Procedure, \*Elective Reading, Elementary Education, Individualized Reading, Individual Needs, \*Individual Power, Masters Theses, \*Reading Comprehension, \*Reading Interests, Sex Differences, \*Student Attitudes

This study was designed to test the effects of choice on the reading comprehension of 92 fifth and sixth grade students. Conducted in an elementary classroom, the test involved having each student read five cloze passages and answer an interest questionnaire about the passages. The experimental variable in this study was choice of topics on a reading task. Children were assigned to either a cued choice, blind choice, or no-choice condition. In the cued choice condition, children chose their reading topics from among alternatives which were clearly labeled. The blind choice condition offered them a choice, but from among alternatives that were in blank folders so that they had no information about the alternatives. The no-choice condition assigned the selections to be read on a random basis. The analysis of central interest in this study was a sex by condition analysis of variance. The performance means were fairly low overall and were similar in magnitude for both sexes. However, the boys in the cued choice condition performed substantially better than the boys in the blind choice and no-choice conditions. The girls had no apparent pattern which could be related to the manipulation of the choice variable. (MKM)

**Readability Analysis of SRA Power Builders; An Examination of the Readability Levels of the Power Builder Component of the SRA Reading Laboratory IIIB as Measured by the Dale-Chall Readability Formula.**

Pub Date May 75

Note—67p.; M.A. Thesis, California State University, Northridge

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—\*Developmental Reading, Masters Theses, \*Readability, \*Reading Materials, Secondary Education

Identifiers—\*SRA Power Builders

This study evaluates the readability levels of frequently used literacy materials, the power builder component of the SRA Reading Laboratory IIIB. A review of the readability literature reveals numerous studies performed on content area textbooks but relatively few studies performed on literacy materials. Three questions are asked: (1) What is the Dale-Chall readability level of each power builder? (2) What is the average Dale-Chall readability level of each color level? and (3) Do the Dale-Chall readability levels for each color level correspond to the readability levels asserted by the publisher? A computer analysis of the power builders indicates that: (1) readability scores for individual power builders range from grade 4.0 to grade 14.0; (2) the average readability score for each level ranges from grade 5.8 to grade 12.2; and (3) the average Dale-Chall readability score for all levels is .2 to 1.4 years higher than the publisher-determined grade level. It was discovered that the readability scores in any one level cover a wide range. The smallest range occurs in purple—3.4 years, while the largest range occurs in aqua—6.5 years. Recommendations are made for application of the research findings and the revision of the Dale-Chall formula. (Author/MKM)

**[The Areas of Legislation and Certification as They Affect the Demand for Graduate Studies in Reading Education.]**

Pub Date 76

Note—53p.

Journal Cit.—Epistle; v3 n1 Entire Issue Jan 1976

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—Doctoral Programs, \*Educational Legislation, Employment Opportunities, Higher Education, \*Reading Instruction, Reading Pro-

grams, \*State Standards, \*Teacher Educator Education, \*Teacher Educators, Teacher Qualifications, Teachers

The "Epistle" is the Publication Forum of Professors of Reading Teacher Educators, which is a special-interest group of the International Reading Association. The topics considered in this issue are the areas of legislation and certification as they affect the demand for graduate studies in reading education. Charles and Nathaniel Peters relate their experiences with legislative action in Michigan to the need for similar assertiveness by reading professionals at the national level. Anne Adams describes the successful effort of the North Carolina Association of College Professors of Reading to upgrade the status of reading instruction at pre-service, graduate, and public school levels. Kemble Oliver summarizes information on new certification action affecting reading programs supplied by correspondents in eighteen states. Regular features are "Movers," which endeavors to record the job choices of new graduates and the relocation of others; "Job Report," which lists positions available to doctoral-degree holders; and "For The Time Capsule," which contains notes of interest to reading professors. The guidelines in this booklet have been prepared to help authors, artists, and editors cope with problems inherent in presenting educational materials that give children an unbiased view of the full range of human potential. Contents are divided into three main sections. The guidelines for treatment of the sexes focus on general content, language usage, and avoiding sex stereotypes in art. The guidelines for treatment of races and minorities deal with general content, content for specific groups (Black Americans, American Indians, Hispanic Americans, Asian Americans, and Jewish Americans), and avoiding racial and minority stereotypes in art for the same groups. The subject area guidelines concentrate on avoiding sexism and racism in 11 key classroom areas of study: reading; general social studies; elementary social studies; high school social studies; literature; grammar, composition, and spelling; foreign language; family life (home economics); mathematics; science; and music. Each of the sections in the booklet's guidelines gives detailed examples of negative and positive treatment. (JM)

Two bills concerning national reading programs were the subjects of a hearing held in Washington, D. C. on November 13, 1975, by the Subcommittee on Elementary, Secondary, and Vocational

Education of the Committee on Education and Labor of the House of Representatives. H. R. 9048 is a bill to provide federal assistance for the distribution of inexpensive books to school children; H. R. 8304 is a bill to amend the national reading improvement program to provide more flexibility in the types of projects which can be funded. Representatives present for the hearing were Carl Perkins, Shirley Chisholm, Leo Zeferetti, George Miller, Albert Quie, and John Buchanan. Topics for presentation and discussion were the level of national reading achievement and literacy, factors involved in reading achievement, the National Assessment of Educational Progress, the Right to Read Program, and reading academies for adults sponsored by Right to Read. Statements about the above topics were presented by Terrel Bell, U.S. Commissioner of Education, Department of Health, Education, and Welfare; Andrew Porter, Acting Associate Director for Basic Skills, National Institute of Education; and several of the officials of the above named national programs. **Social Reinforcement to Increase the Utilization of Library Books by Sixth Grade Pupils.**

Pub Date 75  
Note—10p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (Jackson, Mississippi, November 12-14, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Books, Elementary Education, Grade 6, \*Individual Reading, \*Libraries, Motivation Techniques, Positive Reinforcement, \*Reading Habits, \*Social Reinforcement

All sixth grade pupils in the largest elementary school in New Orleans were involved in a study to assess the effects of social reinforcement on the use of library books. The number of library books used by both experimental and control groups was ascertained and compared. Standard arithmetic procedures were used to establish baseline, experimental, and postexperimental phases for the study. The treatment for the experimental classes consisted of social reinforcement in the form of praise by the librarian when the pupils returned their borrowed library books to the librarian personally instead of placing the books in the usual place. The members of the classes not having used library books were ignored. It was concluded that social reinforcement can (a) increase the utilization of library books by sixth grade pupils and (b) it can increase proper care and prompt returning of library books by sixth grade pupils. **Suprasegmental Aspects of Reading Interference.**

Pub Date 75

Note—14p.; Paper presented at the Southwest Area Linguistic and Language Workshop (SWALLOW IV) (San Diego, April 10-12, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—Dialect Studies, Language Research, \*Linguistics, \*Negro Dialects, Psycholinguistics, \*Reading Difficulty, \*Research Needs, Sociolinguistics, \*Suprasegmentals  
Identifiers—\*Black English

Information is presented in this paper regarding suprasegmental features of Black English that may cause reading interference for some Black children. Much of the research concerning reading problems of many Afro-American students stresses the segmental differences of the phonology, the morphology, the syntax, and lexical selection between two dialects of American English referred to as Black English and Standard English. Not enough attention has been given to suprasegmental features of Black English such as intonation (pitch, stress, and juncture), prosody, and loud-speaking. Black English is a speech that has common African core elements fused with English. The process of the fusion begins with American languages through a pidginization stage, through a creolization stage (the language called Gullah), to a decreolization stage, to the output-Black English. One can assume that some African language features have been retained and research studies are cited showing that suprasegmental features, especially pitch, are important to the understanding of Black English. Pitch has semantical as well as phonemic significance; certain intonational patterns in Black English may be misunderstood by white teachers who are checking comprehension through oral reading. Identifiers—\*Reading Strategy Project

This is a report on the evaluation of the Reading Strategy Project operated in 46 public and eight non-public schools during the 1974-75 regular school year. This project served 7,698 pupils. The design of the instructional format of the Reading Strategy Project was one which utilized a criterion-referenced diagnostic reading test, locally constructed, to identify degrees of accuracy within sub-skill areas of comprehension, vocabulary, auditory discrimination, syllabication, beginning and ending sounds, blending, and sound discrimination. Special teachers provided help to the classroom teachers. Evaluation was directed toward determination from test data and the subjective opinions of parents, teachers, principals, and project staff the extent to which the project had met its product objectives. Some of the findings drawn from the evaluation procedures were: (1) Based on a sample of 85 students, it was determined that 82 percent of fourth grade and 80 percent of fifth grade participants attained the objective criteria based upon 80 percent mastery of the Diagnostic Reading Probe posttest; (2) Fifty-three percent of the sample maintained and/or increased their stanine status from third to fourth grade; and (3) Increased positive attitudes toward reading were observed by teachers. **Descriptors**—\*Affective Behavior, Biology, Dyslexia, \*Emotional Response, Feedback, Junior Colleges, \*Neurological Organization, Psychological Studies, \*Psychophysiology, Reading Difficulty, Reading Processes, \*Remedial Reading

This study was undertaken to measure emotional expression as mediated by the automatic nervous system during reading and during other tasks related to school work. Subjects for this research were eight normal readers, reading above the 46th percentile on the Davis Reading Test Form 1-A, used as a control group and sixteen abnormal readers drawn from a junior college remedial reading center, who tested at the 1st to 25th percentile. The abnormal group was split into two sub-groups termed hypotensive or hypertensive according to their behavior during reading. Physiological data were collected during the reading process using a polygraph machine and a psychogalvanoscope. The data introduced evidence to the effect that two opposing, coping behaviors are evidently associated with long term reading dysfunction. The first is a hypotensive reaction indicating a drop below the normal activation or arousal necessary for optimal processing of information, registration and storage to occur. The other reaction is one of hypertensiveness where all arousal mediating sympathetic nervous system factors are activated into an alarm reaction, making it equally difficult to attend to external stimuli and information processing as during reading. The control group exhibited a moderate range of emotions. (MKM)

**Bibliotherapy: Its Effect on Self-Concept and Self-Actualization.**

Pub Date 75

Note—117p.; Ed.D. Dissertation, East Texas State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-4623, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—\*Behavior Development, \*Bibliotherapy, Doctoral Theses, Emotional Adjustment, \*Interpersonal Relationship, \*Reading Research, Secondary Education, \*Self Concept

This research was designed to investigate the therapeutic value of bibliotherapy in effecting changes in the growth process (self-concept and self-actualization) of the individual in group counseling. Forty-two secondary school students enrolled in a high school in Texas participated in the study on a volunteer basis. The subjects were assigned to one of three groups; group one met with the investigator each week and, in addition, subjects were assigned various materials to be read; group two was assigned reading materials and met on an individual basis periodically with the investigator to determine progress on assigned reading materials; and group three was a control group. All participants completed the Personal Orientation Inventory Scales and the Berger Acceptance of Self and Others Scale before and after the bibliotherapeutic treatment. It was found that bibliotherapy as defined in this study did not increase subjects self-concept and self-actualization scores; however, it was concluded that the value of bibliotherapy may lie in its ability to bridge the gap in developing deeper involvement in interpersonal relationships and more accepting activities toward others. Peer tutoring and other innovative uses of students in teaching roles have received considerable attention because of the academic and social gains which can be observed among participating children. Teachers who want to try peer tutoring often encounter difficulty in devising workable programs for their own classrooms, however, because most currently available information fails to integrate what has been learned from individual projects throughout the country. This interpretive study combines an examination of relevant literature and field observations of several ongoing peer tutoring programs in a guide for school personnel. The guide contains descriptions of both structured and flexible approaches to tutoring in reading (8 programs), all subjects (3 programs), spelling/English (1 program), and math (1 program). It also provides suggestions for teachers on how to design and implement a program of peer tutoring which is responsive to the particular needs of their individual classrooms. The bibliography lists 206 published articles, ERIC documents, and doctoral dissertations on peer tutoring. (Author/MKM)

This booklet was developed from the premise that the activity of drama is central to a child's language experience. Its purpose is to help the classroom teacher initiate drama activities, understand the relationship of the activities to one another, use drama activities as an integral part of the classroom curriculum, and determine whether the drama program is accomplishing its intentions. The booklet begins with a foreword, notes for teachers and administrators, and an introduction. The first section, "Acting," contains an overview as well as the concepts, goals, and activities for the exploration of movement, speech, and improvisation. The second section, "Playmaking," contains an overview and concepts, goals, and activities for the exploration of plot, character, theme, and dialogue. The final section offers instructional guidelines and goals for the audience, another essential component of the art of drama. (TS)

**Descriptors**—\*Cloze Procedure, \*Composition (Literary), \*Diagnostic Tests, Language Arts, \*Language Handicaps, Language Instruction, \*Language Research, Language Skills, Teaching Methods, Test Construction

This paper describes the value of the cloze procedure for teaching language and composition, classroom diagnosis of language difficulties, and research into the process of composition. Any aspect of language structure, including word order, form class words, connectives, inflectional endings, and function words, could be taught through use of the cloze. Cloze tests could be constructed as diagnostic instruments by first observing the student and then examining his or her writing. Finally, the cloze procedure is a technique which may lend itself to an investigation of the composition process. (LL)

**Identifiers**—\*Dictionary of American Regional English

Answers to three of the questions used in gathering material for the Dictionary of American Regional English (DARE) are analyzed in this paper. The data was collected state by state, and the number studied in each state was based on the 1960 population figures and known patterns of settlements and migrations. In the first question, the informants were asked to supply a word for the blank in "When people bring baked dishes, salads and so forth to a meeting place and share them together, that's a ..... meal." Of the

131 different answers, the five most frequent were: potluck 459, covered dish 425, picnic 60, tureen 25, and carry-in 23. The second question was the open question, "What names do you have around here for men's haircuts?" 362 different answers to this question were collected, among the most common being: crew 667; flat-top 360; butch 266; Beatle 166; and pompadour 81. In the third question, the informant was asked to fill in the blank in "He doesn't amount to ...." The most frequent answers were: hill of beans 547; row of pins 168; much 81; anything 64; damn 42; and tinker's damn 38. (LL)

**Descriptors—**\*Content Analysis, Media Research, \*Newspapers, News Reporting, \*Reading Habits, \*Reading Interests, \*Social Attitudes, Surveys

**Identifiers—**Newspaper Circulation, \*Newspaper Subscriptions

This study examines the reasons for cancellations of the newspaper, who makes the decision to stop the newspaper in each household, why the subscriber initiated service and who makes this decision, and why people read a newspaper. The sites selected for this study were Evansville, Indiana ("Evansville Press"), Raleigh, North Carolina ("The News and Observer"), and Los Angeles, California ("Los Angeles Times"). The study of new subscribers and those cancelling their subscriptions demonstrates that readers take a newspaper for both news coverage (content) and for psychological satisfaction (relaxation and enjoyment), but that they stop taking the newspaper mainly because of unsatisfactory delivery service, the cost of the newspaper, and lack of time to read the newspaper. While the decision to subscribe to a newspaper is usually a joint one, the decision to stop seems to be rather evenly divided among husbands, wives, and joint agreements. Husbands and wives seem to take the newspaper for about the same reasons, but to stop it for slightly different reasons. While reasons for taking the newspaper fall into two groups (content and psychological satisfaction), the reasons for stopping the newspaper are more diverse. (Tables are included). (RB)

**Two Studies of Mass Media Use by Contemporary Young Adults. News Research Bulletin No. 5.**

American Newspaper Publishers Association, Washington, D.C.

Pub Date Aug 74

Note—21p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors—**Behavior Patterns, Higher Education, Journalism, Mass Media, Media Research, \*Newspapers, Periodicals, \*Political Issues, Radio, \*Reading Habits, \*Television Viewing, Voting, \*Young Adults

This issue of the "News Research Bulletin" contains reports on two studies of media use by contemporary young adults. The first study analyzes the media behavior of 447 randomly selected respondents in Virginia Beach, Virginia in the summer of 1973. Some of the highlights of the study were that about 90 percent of the young people report doing at least some reading in a daily newspaper several days a week or more often; most television viewing time is given to entertainment and non-news information; a majority believe television is the most accurate of the four major mass media; and a majority say that newspapers provide the most complete coverage of events. The second study concerns 292 randomly selected young voters (ages 18-20) and their use of the mass media during the 1972 presidential election campaign. Some of the findings in this study were that 42 percent of the students said newspapers are the best way for "keeping up with what is going on in the world today" while 27 percent selected television; and the data support, although they do not prove, the hypothesis that the mass media tend to set the agenda for people concerning the most important issues. This book contains a documented critical analysis of the state of broadcast journalism in the United States. It also examines the conditions that prevent news broadcasting as a practice from being a profession, and suggests steps needed to achieve professionalism in providing the kind of news service the nation needs but is not getting. Some of the journalistic practices which are viewed critically include news reporting from the teletype, plagiarism from other media, selection of the visual over the significant, overemphasis on firstness and fastness, preference for the obvious, conflict or violence, and sponsor and industry censorship or taboos. The book suggests that there is considerable evidence—much of it emanating from within the industry itself—that news broadcasting is neither adequate to national needs, nor free from various pressures—governmental, sponsor, management, sales—that seriously restrict the flow of information. Suggestions for improving broadcast journalism are included. (RB)

**Identifiers—**Finland

The three primary aims of this report were to investigate whether or not the single gratifications associated with the use of different mass media form some gratification dimensions more basic in their nature; to explore in what way these dimensions are related to the actual mass media content choices of the audience; and to investigate the way education is related to the kinds of gratifications obtained from media and to the kinds of content consumed from them. The data for these inquiries were collected from various groups of people in Finland. The first chapter discusses the background of the report. The second chapter discusses the structure of gratifications, examining such topics as dimensions of gratifications associated with mass media use and summarizing the conclusions. The third chapter discusses dimensions of gratifications and content choices, examining such topics as relationships between gratification dimensions and content choices with respect to newspapers and summarizes the conclusions. The fourth chapter discusses education and the dimensions of gratifications and content choices. The fifth chapter contains a summary and final conclusions. (TS)

This report deals with several questions concerning the Finnish people's conceptions of the mass media, especially in a situation when the in-

CS 202 453

roduction of a new medium, television, is changing the field of mass communication. The subjects for the survey were television owners and non-owners in Lapland. The questions dealt with in this descriptive survey are the following: what is the significance attached by people to television and what are the functions which they consider television to fulfil for them; how does the introduction of television affect conceptions as to the significance and functions of the other mass media; what advance ideas do people have as to the importance and functions of television, and how do these advance ideas correspond to their actual experience; and what are the factors underlying the conception of television as significant in general and as a means of fulfilling certain functions, such as the transmission of news, general information, art and entertainment.
